## CHAPTER XII.—GENERAL REVIEW.

This twelfth chapter of Syntax is devoted to a series of lessons, methodically digested, wherein are reviewed and reapplied, mostly in the order of the parts of speech, all those syntactical principles heretofore given which are useful for the correction of errors.

### IMPROPRIETIES FOR CORRECTION.

#### FALSE SYNTAX FOR A GENERAL REVIEW.

☞ [The following examples of false syntax are arranged for a General Review of the doctrines contained in the preceding Rules and Notes. Being nearly all of them exact quotations, they are also a sort of syllabus of verbal criticism on the various works from which they are taken. What corrections they are supposed to need, may be seen by inspection of the twelfth chapter of the Key. It is here expected, that by recurring to the instructions before given, the learner who takes them as an oral exercise, will ascertain for himself the proper form of correcting each example, according to the particular Rule or Note under which it belongs. When two or more errors occur in the same example, they ought to be corrected successively, in their order. The erroneous sentence being read aloud as it stands, the pupil should say, “*first*, Not proper, because, &c.” And when the first error has thus been duly corrected by a brief and regular syllogism, either the same pupil or an other should immediately proceed, and say, “*Secondly*, Not proper *again*, because,” &c. And so of the third error, and the fourth, if there be so many. In this manner, a class may be taught to speak in succession without any waste of time, and, after some practice, with a near approach to the PERFECT ACCURACY which is the great end of grammatical instruction. When time cannot be allowed for this regular exercise, these examples may still be profitably rehearsed by a more rapid process, one pupil reading aloud the quoted false grammar, and an other responding to each example, by reading the intended correction from the Key.]

“His being an expert dancer does not entitle him to our regard.”—*Ib.*, p. 82.\* “Cæsar went back to Rome to take possession of the public treasure, which his opponent, by a most unaccountable oversight, had neglected taking with him.”—*Goldsmith’s Rome*, p. 116. “And Cæsar took out of the treasury, to the amount of three thousand pound weight of gold, besides an immense quantity of silver.”—*Ibid.* “Rules and definitions, which should always be clear and intelligible as possible, are thus rendered obscure.”—*Greenleaf’s Gram.*, p. 5. “So much both of ability and merit is seldom found.”—*Murray’s Key*, ii, 179. “If such maxims, and such practices prevail, what is become of decency and virtue?”—*Bullions, E. Gram.*, p. 78. “Especially if the subject require not so much pomp.”—*Blair’s Rhet.*, p. 117. “However, the proper mixture of light and shade, in such compositions; the exact adjustment of all the figurative circumstances with the literal sense; have ever been considered as points of great nicety.”—*Murray’s Gram.*, i, 343. “And adding to that hissing in our language, which is taken so much notice of by foreigners.”—ADDISON: DR. COOTE: *ib.*, i, 90. “Speaking impatiently to servants, or any thing that betrays unkindness or ill-humour, is certainly criminal.”—*Murray’s Key*, ii, 183; *Merchant’s*, 190. “There is here a fulness and grandeur of expression well suited to the subject.”—*Blair’s Rhet.*, p. 218. “I single Strada out among the moderns, because he had the foolish presumption to censure Tacitus.”—*Murray’s Key*, ii, 262. “I single him out among the moderns, because,” &c.—*Bolingbroke, on Hist.*, p. 116. “This is a rule not always observed, even by good writers, as strictly as it ought to be.”—*Blair’s Rhet.*, p. 103. “But this gravity and assurance, which is beyond boyhood, being neither wisdom nor knowledge, do never reach to manhood.”—*Notes to the Dunciad*. “The regularity and polish even of a turnpike-road has some influence upon the low people in the neighbourhood.”—*Kames, El. of Crit.*, ii, 358. “They become fond of regularity and neatness; which is displayed, first upon their yards and little enclosures, and next within doors.”—*Ibid.* “The phrase, *it is impossible to exist*, gives us the idea of it’s being impossible for men, or any body to exist.”—*Priestley’s Gram.*, p. 85. “I’ll give a thousand pound to look upon him.”—*Beauties of Shak.*, p. 151. “The reader’s knowledge, as Dr. Campbell observes, may prevent his mistaking it.”—*Murray’s Gram.*, i, 172; *Crombie’s*, 253. “When two words are set in contrast or in opposition to one another, they are both emphatic.”—*Murray’s Gram.*, i, 243. “The number of persons, men, women, and children, who were lost in the sea, was very great.”—*Ib.*, ii, 20. “Nor is the resemblance between the primary and resembling object pointed out”—*Jamieson’s Rhet.*, p. 179. “I think it the best book of the kind which I have met with.”—DR. MATHEWS: *Greenleaf’s Gram.*, p. 2.

“Why should not we their ancient rites restore,  
And be what Rome or Athens were before.”—*Roscommon*, p. 22.

---

\* Of this example, Professor Bullions says, “This will be allowed to be *a correct English sentence*, complete in itself, and requiring nothing to be supplied. The phrase, ‘*being an expert dancer*,’ is the subject of the verb ‘*does entitle*,’ but the word ‘*dancer*’ in that phrase is neither the subject of any verb, nor is governed by any word in the sentence.”—*Eng. Gram.*, p. 52. It is because this word cannot have any regular construction after the participle when the possessive case precedes, that I deny his first proposition, and declare the sentence *not* “to be correct English.” But the Professor at length reasons himself into the notion, that this indeterminate “*predicate*,” as he erroneously calls it, “is properly in the *objective case*, and in parsing, may correctly be called the *objective indefinite*,” of which case, he says, “The following are also examples: ‘*He* had the honour of being a *director* for life.’ ‘By being a *diligent student*, *he* soon acquired eminence in his profession.’”—*Ib.*, p. 83. But “*director*” and “*student*” are here manifestly in the *nominative* case: each agreeing with the pronoun *he*, which denotes the same person. In the latter sentence, there is a very obvious transposition of the first five words.

## LESSON XII.—TWO ERRORS.

“It is labour only which gives the relish to pleasure.”—*Murray’s Key*, ii, 234. “Groves are never as agreeable as in the opening of the spring.”—*Ib.*, p. 216. “His ‘Philosophical Inquiry into the origin of our Ideas on the Sublime and Beautiful’ soon made him known to the literati.”—*Biog. Rhet.*, n. Burke. “An awful precipice or tower whence we look down on the objects which lie below.”—*Blair’s Rhet.*, p. 30. “This passage, though very poetical, is, however, harsh and obscure; owing to no other cause but this, that three distinct metaphors are crowded together.”—*Ib.*, p. 149. “I propose making some observations.”—*Ib.*, p. 280. “I shall follow the same method here which I have all along pursued.”—*Ib.*, p. 346. “Mankind never resemble each other so much as they do in the beginnings of society.”—*Ib.*, p. 380. “But no ear is sensible of the termination of each foot, in reading an hexameter line.”—*Ib.*, p. 383. “The first thing, says he, which either a writer of fables, or of heroic poems, does, is, to choose some maxim or point of morality.”—*Ib.*, p. 421. “The fourth book has been always most justly admired, and abounds with beauties of the highest kind.”—*Ib.*, p. 439. “There is no attempt towards painting characters in the poem.”—*Ib.*, p. 446. “But the artificial contrasting of characters, and the introducing them always in pairs, and by opposites, gives too theatrical and affected an air to the piece.”—*Ib.*, p. 479. “Neither of them are arbitrary nor local.”—*Kames, El. of Crit.*, p. xxi. “If crowding figures be bad, it is still worse to graft one figure upon another.”—*Ib.*, ii, 236. “The crowding withal so many objects together, lessens the pleasure.”—*Ib.*, ii, 324. “This therefore lies not in the putting off the Hat, nor making of Compliments.”—*Locke, on Ed.*, p. 149. “But the Samaritan Vau may have been used, as the Jews did the Chaldaic, both for a vowel and consonant.”—*Wilson’s Essay*, p. 19. “But if a solemn and familiar pronunciation really exists in our language, is it not the business of a grammarian to mark both?”—*Walker’s Dict., Pref.*, p. 4. “By making sounds follow each other agreeable to certain laws.”—*Music of Nature*, p. 406. “If there was no drinking intoxicating draughts, there could be no drunkards.”—*O. B. Peirce’s Gram.*, p. 178. “Socrates knew his own defects, and if he was proud of any thing, it was in the being thought to have none.”—*Goldsmith’s Greece*, i, 188. “Lysander having brought his army to Ephesus, erected an arsenal for building of gallies.”—*Ib.*, i, 161. “The use of these signs are worthy remark.”—*Brightland’s Gram.*, p. 94. “He received me in the same manner that I would you.”—*Smith’s New Gram.*, p. 113. “Consisting both of the direct and collateral evidence.”—*Butler’s Analogy*, p. 224. “If any man or woman that believeth have widows, let them relieve them, and let not the church be charged.”—1 *Tim.*, v, 16. “For mens sakes are beasts bred.”—*Walker’s Particles*, p. 131. “From three a clock there was drinking and gaming.”—*Ib.*, p. 141. “Is this he that I am seeking of, or no?”—*Ib.*, p. 248. “And for the upholding every one his own opinion, there is so much ado.”—*Sewel’s Hist.*, p. 809. “Some of them however will be necessarily taken notice of.”—*Sale’s Koran*, p. 71. “The boys conducted themselves exceedingly indiscreet.”—*Merchant’s Key*, p. 195. “Their example, their influence, their fortune, every talent they possess, dispense blessings on all around them.”—*Ib.*, p. 197; *Murray’s Key*, ii, 219. “The two *Reynolds* reciprocally converted one another.”—*Johnson’s Lives*, p. 185. “The destroying the two last Tacitus calls an attack upon virtue itself.”—*Goldsmith’s Rome*, p. 194. “Monies is your suit.”—*Beauties of Shak.*, p. 38. “*Ch*, is commonly sounded like *tch*; as in church; but in words derived from the Greek, has the sound of *k*.”—*Murray’s Gram.*, i, 11. “When one is obliged to make some utensil supply purposes to which they were not originally destined.”—*Campbell’s Rhet.*, p. 222. “But that a being baptized with water, is a washing away of sin, thou canst not from hence prove.”—*Barclay’s Works*, i, 190. “Being but spoke to one, it infers no universal command.”—*Ibid.* “For if the laying aside Copulatives gives Force and Liveliness, a

Redundancy of them must render the Period languid.”—*Buchanan’s Syntax*, p. 134. “James used to compare him to a cat, who always fell upon her legs.”—ADAM’S HIST. OF ENG.: *Crombie*, p. 384.

“From the low earth aspiring genius springs,  
And sails triumphant born on eagles wings.”—*Lloyd*, p. 162.

### LESSON XIII.—TWO ERRORS.

“An ostentatious, a feeble, a harsh, or an obscure style, for instance, are always faults.”—*Blair’s Rhet.* p. 190. “Yet in this we find the English pronounce perfectly agreeable to rule.”—*Walker’s Dict.*, p. 2. “But neither the perception of ideas, nor knowledge of any sort, are habits, though absolutely necessary to the forming of them.”—*Butler’s Analogy*, p. 111. “They were cast: and an heavy fine imposed upon them.”—*Goldsmiths Greece*, ii, 30. “Without making this reflection, he cannot enter into the spirit, nor relish the composition of the author.”—*Blair’s Rhet.*, p. 450. “The scholar should be instructed relative to finding his words.”—*Osborn’s Key*, p. 4. “And therefore they could neither have forged, or reversified them.”—*Knight, on the Greek Alph.*, p. 30. “A dispensary is the place where medicines are dispensed.”—*Murray’s Key*, ii, 172. “Both the connexion and number of words is determined by general laws.”—*Neef’s Sketch*, p. 73. “An Anapest has the two first syllables unaccented, and the last accented: as, ‘Contravene, acquiesce.’”—*Murray’s Gram.*, i, 254. “An explicative sentence is, when a thing is said to be or not to be, to do or not to do, to suffer or not to suffer, in a direct manner.”—*Ib.*, i, 141; *Lowth’s*, 84. “BUT is a *conjunction*, in all cases when it is neither an adverb nor preposition.”—*Smith’s New Gram.*, p. 109. “He wrote in the king Ahasuerus’ name, and sealed it with the king’s ring.”—*Esther*, viii, 10. “Camm and Audland were departed the town before this time.”—*Sewel’s Hist.*, p. 100. “Previous to their relinquishing the practice, they must be convinced.”—*Dr. Webster, on Slavery*, p. 5. “Which he had thrown up previous to his setting out.”—*Grimshaw’s Hist.* U. "There is no other God but him, no other light but his."—*William Penn*. "How little reason to wonder, that a perfect and accomplished orator, should be one of the characters that is most rarely found?"—*Blair's Rhet.*, p. 337. "Because they neither express doing nor receiving an

action.”—*Infant School Gram.*, p. 53. “To find the answers, will require an effort of mind, and when given, will be the result of reflection, showing that the subject is understood.”—*Ib.*, p. vii. “To say, that ‘the sun rises,’ is trite and common; but it becomes a magnificent image when expressed as Mr. Thomson has done.”—*Blair’s Rhet.*, p. 137. “The declining a word is the giving it different endings.”—*Ware’s Gram.*, p. 7. “And so much are they for every one’s following their own mind.”—*Barclay’s Works*, i, 462. “More than one overture for a peace was made, but Cleon prevented their taking effect.”—*Goldsmith’s Greece*, i, 121. “Neither in English or in any other language is this word, and that which corresponds to it in other languages, any more an article, than *two, three, four*.”—DR. WEBSTER: *Knickerbocker* of 1836. “But the most irksome conversation of all others I have met within the neighbourhood, has been among two or three of your travellers.”—*Spect.*, No. 474. “Set down the two first terms of supposition under each other in the first place.”—*Smiley’s Arithmetic*, p. 79. “It is an useful rule too, to fix our eye on some of the most distant persons in the assembly.”—*Blair’s Rhet.*, p. 328. “He will generally please most, when pleasing is not his sole nor chief aim.”—*Ib.*, p. 336. “At length, the consuls return to the camp, and inform them they could receive no other terms but that of surrendering their arms, and passing under the yoke.”—*Ib.*, p. 360. “Nor is mankind so much to blame, in his choice thus determining him.”—SWIFT: *Crombie’s Treatise*, p. 360. “These forms are what is called Number.”—*Fosdick’s De Sacy*, p. 62. “In languages which admit but two Genders, all Nouns are either Masculine or Feminine, even though they designate beings which are neither male or female.”—*Ib.*, p. 66. “It is called a *Verb* or *Word* by way of eminence, because it is the most essential word in a sentence, without which the other parts of speech can form no complete sense.”—*Gould’s Adam’s Gram.*, p. 76. “The sentence will consist of two members, which are commonly separated from one another by a comma.”—*Jamieson’s Rhet.*, p. 7. “Loud and soft in speaking, is like the *fortè* and *piano* in music, it only refers to the different degrees of force used in the same key; whereas high and low imply a change of key.”—*Sheridan’s Elocution*, p. 116. “They are chiefly three: the acquisition of knowledge; the assisting the memory to treasure up this knowledge; or the communicating it to others.”—*Ib.*, p. 11.

“These kind of knaves I know, which in this plainness,  
Harbour more craft, and more corrupter ends,  
Than twenty silly ducking observants.”—*Beauties of Shak.*, p. 261.

#### LESSON XVII.—MANY ERRORS.

“A man will be forgiven, even great errors, in a foreign language; but in his own, even the least slips are justly laid hold of, and ridiculed.”—*American Chesterfield*, p. 83. “*Let* does not only express permission; but praying, exhorting, commanding.”—*Lowth’s Gram.*, p. 41. “*Let*, not only expresses permission, but entreating, exhorting, commanding.”—*Murray’s Gram.*, p. 88; *Ingersoll’s*, 135. “That death which is our leaving this world, is nothing else but putting off these bodies.”—*Sherlock*. “They differ from the saints recorded both in the Old and New Testaments.”—*Newton*. “The nature therefore of relation consists in the referring or comparing two things one to another; from which comparison, one or both comes to be denominated”—*Locke’s Essay*, i, 220. “It is not credible, that there hath been any one who through the whole course of their lives will say, that they have kept themselves undefiled with the least spot or stain of sin.”—*Witsius*. “If acting conformably to the will of our Creator;—if promoting the welfare of mankind around us;—if securing our own happiness;—are objects of the highest moment:—then we are loudly called upon to cultivate and extend the great interests of religion and virtue”—*Murray’s Gram.*, i, 278;

*Comly's*, 163; *Ingersoll's*, 291. "By the verb being in the plural number, it is supposed that it has a plural nominative, which is not the case. The only nominative to the verb, is, *the officer*: the expression *his guard*, are in the objective case, governed by the preposition *with*; and they cannot consequently form the nominative, or any part of it. The prominent subject, and the true nominative of the verb, and to which the verb peculiarly refers, is *the officer*."—*Murray's Parsing*, Cr. 8vo, ii, 22. "This is another use, that, in my opinion, contributes rather to make a man learned than wise; and is neither capable of pleasing the understanding, or imagination."—ADDISON: *Churchill's Gram.*, p. 353. "The work is a dull performance; and is capable of pleasing neither the understanding, nor the imagination."—*Murray's Key*, ii, 210. "I would recommend the Elements of English Grammar, by Mr. Frost. Its plan is after Murray, but his definitions and language is simplified as far as the nature of the subject will admit, to meet the understanding of children. It also embraces more copious examples and exercises in Parsing than is usual in elementary treatises."—*Hall's Lectures on School-Keeping*, 1st Ed., p. 37. "More rain falls in the first two summer months, than in the first two winter ones: but it makes a much greater show upon the earth, in these than in those; because there is a much slower evaporation."—*Murray's Key*, ii, 189. have been universal, and as they have been afforded to a greater or less part of the world at different times; so likewise, at different times, both revelations have had different degrees of evidence.”—*Butler’s Analogy*, p. 210. “Thus we see, that killing a man with a sword or a hatchet, are looked upon as no distinct species of action: but if the point of the sword first enter the body, it passes for a distinct species, called *stabbing*.”—*Locke’s Essay*, p. 314. “If a soul sin, and commit a trespass against the Lord, and lie unto his neighbour in that which was delivered him to keep, or hath deceived his neighbour, or have found that which was lost, and lieth concerning it, and sweareth falsely; in any of all these that a man doeth, sinning therein, then it shall be,” &c.—*Lev.*, vi, 2. “As the doing and teaching the commandments of God is the great proof of virtue, so the breaking them, and the teaching others to break them, is the great proof of vice.”—*Wayland’s Moral Science*, p. 281. “In Pope’s terrific maltreatment of the latter simile, it is neither true to mind or eye.”—*Coleridge’s Introd.*, p. 14. “And the two brothers were seen, transported with rage and fury, endeavouring like Eteocles and Polynices to plunge their swords into each other’s hearts, and to assure themselves of the throne by the death of their rival.”—*Goldsmith’s Greece*, i, 176. “Is it not plain, therefore, that neither the castle, the planet, nor the cloud, which you see here, are those real ones, which you suppose exist at a distance?”—*Berkley’s Alciphron*, p. 166. “I have often wondered how it comes to pass, that every Body should love themselves best, and yet value their neighbours Opinion about themselves more than their own.”—*Collier’s Antoninus*, p. 226. “VIRTUE (Αρετή, Virtus) as well as most of its Species, are all Feminine, perhaps from their Beauty and amiable appearance.”—*Harris’s Hermes*, p. 55. “Virtue, with most of its Species, are all Feminine, from their Beauty and amiable Appearance; and so Vice becomes Feminine of Course, as being Virtue’s natural opposite.”—*British Gram.*, p. 97. “Virtue, with most of its Species, is Feminine, and so is Vice, for being Virtue’s opposite.”—*Buchanan’s Gram.*, p. 22. “From this deduction, may be easily seen how it comes to pass, that personification makes so great a figure in all compositions, where imagination or passion have any concern.”—*Blair’s Rhet.*, p. 155. “An Article is a word prefixed to a substantive to point them out, and to show how far their signification extends.”—*Folker’s Gram.*, p. 4. “All men have certain natural, essential, and inherent rights—among which are, the enjoying and defending life and liberty; acquiring, possessing, and protecting property; and, in a word, of seeking and obtaining happiness.”—*Constitution of New Hampshire*. “From Grammarians who form their ideas, and make their decisions, respecting this part of English Grammar, on the principles and construction of languages, which, in these points, do not suit the peculiar nature of our own, but differ considerably from it, we may naturally expect grammatical schemes that are not very perspicuous, or perfectly consistent, and which will tend more to perplex than inform the learner.”—*Murray’s Gram.*, p. 68; *Hall’s*, 15. “There are, indeed, very few who know how to be idle and innocent, or have a relish of any pleasures that are not criminal; every diversion they take, is at the expense of some one virtue or another, and their very first step out of business is into vice or folly.”—ADDISON: *Blair’s Rhet.*, p. 201.\*

\* Faulty as this example is, Dr. Blair says of it: “Nothing can be more elegant, or more finely turned, than this sentence. It is neat, *clear*, and musical. We could hardly *alter one word*, or disarrange one member, without *spoiling* it. Few sentences are to be found, more finished, or more happy.”—*Lecture XX*, p. 201. See the *six* corrections suggested in my Key, and judge whether or not they *spoil* the sentence.—G. B.

### **CHAPTER XIII.—GENERAL RULE.**

The following comprehensive canon for the correction of all sorts of nondescript errors in syntax, and the several critical or general notes under it, seem necessary for the completion of my design; which is, to furnish a thorough exposition of the various faults against which the student of English grammar has occasion to be put upon his guard.

#### **GENERAL RULE OF SYNTAX.**

In the formation of sentences, the consistency and adaptation of all the words should be carefully observed; and a regular, clear, and correspondent construction should be preserved throughout.

#### **CRITICAL NOTES TO THE GENERAL RULE.**

##### **CRITICAL NOTE I.—OF THE PARTS OF SPEECH.**

Words that may constitute different parts of speech, must not be left doubtful as to their classification, or to what part of speech they belong.

##### **CRITICAL NOTE II.—OF DOUBTFUL REFERENCE.**

The reference of words to other words, or their syntactical relation according to the sense, should never be left doubtful, by any one who means to be understood.

##### **CRITICAL NOTE III.—OF DEFINITIONS.**

A definition, in order to be perfect, must include the whole thing, or class of things, which it pretends to define, and exclude every thing which comes not under the name.

##### **CRITICAL NOTE IV.—OF COMPARISONS.**

A comparison is a form of speech which requires some similarity or common property in the things compared; without which, it becomes a solecism.

##### **CRITICAL NOTE V.—OF FALSITIES.**

Sentences that convey a meaning manifestly false, should be changed, rejected, or contradicted; because they distort language from its chief end, or only worthy use; which is, to state facts, and to tell the truth.

##### **CRITICAL NOTE VI.—OF ABSURDITIES.**

Absurdities, of every kind, are contrary to grammar, because they are contrary to reason, or good sense, which is the foundation of grammar.

##### **CRITICAL NOTE VII.—OF SELF-CONTRADICTION.**

Every writer or speaker should be careful not to contradict himself; for what is self-contradictory, is both null in argument, and bad in style.

##### **CRITICAL NOTE VIII.—OF SENSELESS JUMBLING.**

To jumble together words without care for the sense, is an unpardonable negligence, and an abuse of the human understanding.

## CRITICAL NOTE IX.—OF WORDS NEEDLESS.

Words that are entirely needless, and especially such as injure or encumber the expression, ought in general to be omitted.

## CRITICAL NOTE X.—OF IMPROPER OMISSIONS.

Words necessary to the sense, or even to the melody or beauty of a sentence, ought seldom, if ever, to be omitted.

## CRITICAL NOTE XI.—OF LITERARY BLUNDERS.

Grave blunders made in the name of learning, are the strongest of all certificates against the books which contain them unproved.

## CRITICAL NOTE XII.—OF PERVERSIONS.

Proof-texts in grammar, if not in all argument, should be quoted literally; and even that which needs to be corrected, must never be perverted.

## CRITICAL NOTE XIII.—OF AWKWARDNESS.

Awkwardness, or inelegance of expression, is a reprehensible defect in style, whether it violate any of the common rules of syntax or not.

## CRITICAL NOTE XIV.—OF IGNORANCE.

Any use of words that implies ignorance of their meaning, or of their proper orthography, is particularly unscholarlike; and, in proportion to the author's pretensions to learning, disgraceful.

## CRITICAL NOTE XV.—OF SILLINESS.

Silly remarks and idle truisms are traits of a feeble style, and, when their weakness is positive, or inherent, they ought to be entirely omitted.

## CRITICAL NOTE XVI.—OF THE INCORRIGIBLE.

Passages too erroneous for correction, may be criticised, orally or otherwise, and then passed over without any attempt to amend them.\*

---

\* This Note, as well as all the others, will by-and-by be amply illustrated by citations from authors of sufficient repute to give it some value as a grammatical principle: but one cannot hope such language as is, in reality, incorrigibly bad, will always appear so to the generality of readers. Tastes, habits, principles, judgements, differ; and, where confidence is gained, many utterances are well received, that are neither well considered nor well understood. When a professed critic utters what is incorrect beyond amendment, the fault is the more noteworthy, as his professions are louder, or his standing is more eminent. In a recent preface, deliberately composed for a very comprehensive work on "English Grammar," and designed to allure both young and old to "a thorough and extensive acquaintance with their mother tongue,"—in the studied preface of a learned writer, who has aimed "to furnish not only a text-book for the higher institutions, but also a reference-book for *teachers*, which may give breadth and exactness to their views,"—I find a paragraph of which the following is a part: "Unless men, at least occasionally, bestow their attention upon the science and the laws of the language, they are in some danger, amid the excitements of professional life, of losing the delicacy of their taste and giving sanction to vulgarisms, or to what is worse. On this point, listen to the recent declarations of two leading men in the Senate of the United States, both of whom understand the use of the English language in its power: 'In truth, I must say that, in my opinion, the vernacular tongue of the country has become greatly vitiated, depraved, and corrupted by the style of our Congressional debates.' And the other, in courteous response remarked, 'There *is* such a *thing* as *an* English

and a parliamentary *vocabulary*, and I have never heard *a worse*, when circumstances called it out, on this side [of] Billingsgate!”—*Fowler’s E. Gram.*, 8vo. 1850, Pref., p. iv.

Now of these “two leading men,” the former was Daniel Webster, who, in a senatorial speech, in the spring of 1850, made such a remark concerning the style of oratory used in Congress. But who replied, or what idea the “courteous response,” as here given, can be said to convey, I do not know. The language seems to me both unintelligible and solecistical; and, therefore, but a fair sample of the *Incorrigible*. Some intelligent persons, whom I have asked to interpret it, think, as Webster had accused our Congress of corrupting the English language, the respondent meant to accuse the British Parliament of doing the same thing in a greater degree,—of descending yet lower into the vileness of slang. But this is hardly a probable conjecture. Webster might be right in acknowledging a very depraving abuse of the tongue in the two Houses of Congress; but could it be “courteous,” or proper, for the answerer to jump the Atlantic, and pounce upon the English Lords and Commons, as a set of worse corrupters?

The gentleman begins with saying, “There *is* such *a thing*”—as if he meant to describe some *one* thing; and proceeds with saying, “as *an* English *and* a parliamentary vocabulary,” in which phrase, by repeating the article, he speaks of *two “things”—two vocabularies*; then goes on, “and I have never heard *a worse*!” A worse *what*? Does he mean “*a worse vocabulary*?” If so, what sense has “*vocabulary*?” And, again, “a worse *than* what? Where and what is this “*thing*” which is so bad that the leading Senator has “never heard a worse?” Is it some “*vocabulary*” both “English and parliamentary?” If so, whose? If not, what else is it? Lest the wisdom of this oraculous “declaration” be lost to the public through the defects of its syntax,—and lest more than one rhetorical critic seem hereby “in some danger” of “giving sanction to” *nonsense*,—it may be well for Professor Fowler, in his next edition, to present some elucidation of this short but remarkable passage, which he values so highly!

An other example, in several respects still more remarkable,—a shorter one, into which an equally successful professor of grammar has condensed a much greater number and variety of faults,—is seen in the following citation: “The verb is so called, because it means *word*; and as there can be no sentence without it, it is called, emphatically, *the word*.”—*Pinneo’s Analytical Gram.*, p. 14. This sentence, in which, perhaps, most readers will discover no error, has in fact faults of so many different kinds, that a critic must pause to determine under which of more than half a dozen different heads of false syntax it might most fitly be presented for correction or criticism. (1.) It might be set down under my Note 5th to Rule 10th; for, in one or two instances out of the three, if not in all, the pronoun “*it*” gives not the same idea as its antecedent. The faults coming under this head might be obviated by three changes, made thus: “The verb is so called, because *verb* means *word*; and, as there can be no sentence without *a verb*, *this part of speech* is called, emphatically, *the word*.” Cobbett wisely says, “Never put an *it* upon paper without thinking well of what you are about.”—*E. Gram.*, ¶ 196. But (2.) the erroneous text, and this partial correction of it too, might be put under my Critical Note 5th, among *Falsities*; for, in either form, each member affirms what is manifestly untrue. The term “*word*” has many meanings; but no usage ever makes it, “*emphatically*” or otherwise, a name for one of the classes called “parts of speech;” nor is there nowadays any current usage in which “*verb* means *word*.” (3.) This text might be put under Critical Note 6th, among *Absurdities*; for whoever will read it, as in fairness he should, taking the pronoun “*it*” in the exact sense of its antecedent “*the verb*,” will see that the import of each part is absurd—the whole, a two-fold absurdity. (4.) It might be put under Critical Note 7th, among *Self-Contradictions*; for, to teach at once that “*the verb* is *so* called,” and “is called, emphatically,” *otherwise*,—namely, “*the word*,”—is, to contradict one’s self. (5.) It might be set down under Critical Note 9th, among examples of *Words Needless*; for the author’s question is, “Why is the verb so called?” and this may be much better answered in fewer words, thus: “THE VERB is so called, because in French it is called *le verbe* and in Latin, *verbum*, which means *word*.” (6.) It might be put under Critical Note 10th, as an example of *Improper Omissions*; for it may be greatly bettered by the addition of some words, thus: “The verb is so called, because [in French] it [is called *le verbe*, and in Latin, *verbum*, which] means *word*: as there can be no sentence without *a verb*, *this* [most important part of speech] is called, emphatically, [the verb,—q.d.,] *the word*.” (7.) It might be put under Critical Note 11th, among *Literary Blunders*; for there is at least one blunder in each of its members. (8.) It might be set down under Critical Note 13th, as an example of *Awkwardness*; for it is but clumsy work, to teach *grammar* after this sort. (9.) It might be given under Critical Note 16th, as a sample of the *Incorrigible*; for it is scarcely possible to eliminate all its defects and retain its essentials.

These instances may suffice to show, that even gross errors of grammar may lurk where they are least to be expected, in the didactic phraseology of professed masters of style or oratory, and may abound where common readers or the generality of hearers will discover nothing amiss.

**GENERAL OBSERVATIONS ON THE SYNTAX.**

OBS. 1.—In the foregoing code of syntax, the author has taken the parts of speech in their order, and comprised all the general principles of relation, agreement, and government, in twenty-four leading Rules. Of these rules, eight—(namely, the 1st, of *Articles*; the 4th, of *Possessives*; the 9th, of *Adjectives*; the 20th, of *Participles*; the 21st, of *Adverbs*; the 22d, of *Conjunctions*; the 23d, of *Prepositions*; and the 24th, of *Interjections*—) are used only in parsing. The remaining sixteen, because they embrace principles that are sometimes violated in practice, answer the double purpose of parsing and correcting. The Exceptions, of which there are thirty-two, (all occasionally applicable in parsing,) belong to nine different rules, and refer to all the parts of speech, except nouns and interjections. The Notes, of which there are one hundred and fifty-two, are subordinate rules of syntax, not designed to be used in parsing, but formed for the exposition and correction of so many different forms of false grammar. The Observations, of which there are, in this part of the work, without the present series, four hundred and ninety-seven, are designed not only to defend and confirm the doctrines adopted by the author, but to explain the arrangement of words, and whatever is difficult or peculiar in construction.

OBS. 2.—The rules in a system of syntax may be more or less comprehensive, as well as more or less simple or complex; consequently they may, without deficiency or redundancy, be more or less numerous. But either complexity or vagueness, as well as redundancy or deficiency, is a fault; and, when all these faults are properly avoided, and the two great ends of methodical syntax, *parsing* and *correcting*, are duly answered, perhaps the requisite number of syntactical rules, or grammatical canons, will no longer appear very indeterminate. In the preceding chapters, the essential principles of English syntax are supposed to be pretty fully developed; but there are yet to be exhibited some forms of error, which must be corrected under other heads or maxims, and for the treatment of which the several dogmas of this chapter are added. Completeness in the system, however, does not imply that it must have shown the pupil how to correct every form of language that is amiss: for there may be in composition many errors of such a nature that no rule of grammar can show, either what should be substituted for the faulty expression, or what fashion of amendment may be the most eligible. The inaccuracy may be gross and obvious, but the correction difficult or impossible. Because the sentence may require a change throughout; and a total change is not properly a correction; it is a substitution of something new, for what was, perhaps, in itself incorrigible.

OBS. 3.—The notes which are above denominated *Critical* or *General*, are not all of them obviously different in kind from the other notes; but they all are such as could not well have been placed in any of the earlier chapters of the book. The *General Rule of Syntax*, since it is not a canon to be used in parsing, but one that is to be applied only in the correcting of false syntax, might seem perhaps to belong rather to this order of notes; but I have chosen to treat it with some peculiar distinction, because it is not only more comprehensive than any other rule or note, but is in one respect more important; it is the rule which will be cited for the correction of the greatest number and variety of errors. Being designed to meet every possible form of inaccuracy in the mere construction of sentences,—or, at least, every corrigible solecism by which any principle of syntax can be violated,—it necessarily includes almost all the other rules and notes. It is too broad to convey very definite instruction, and therefore ought not in general to be applied where a more particular rule or note is clearly applicable. A few examples, not properly fitting under any other head, will serve to show its use and application: such examples are given,

in great abundance, in the false syntax below. If, in some of the instances selected, this rule is applied to faults that might as well have been corrected by some other, the choice, in such cases, is deemed of little or no importance.

OBS. 4.—The imperfection of *ancient* writing, especially in regard to division and punctuation, has left the syntactical relation of words, and also the sense of passages, in no few instances, uncertain; and has consequently made, where the text has been thought worthy of it, an abundance of difficult work for translators, critics, and commentators. Rules of grammar, now made and observed, as they ought to be, may free the compositions of this, or a future age, from similar embarrassments; and it is both just and useful, to test our authors by them, criticising or correcting their known blunders according to the present rules of accurate writing. But the readers and expounders of what has come to us from remote time, can be rightly guided only by such principles and facts as have the stamp of creditable antiquity. Hence there are, undoubtedly, in books, some errors and defects which have outlived the *time in which*, and the *authority by which*, they might have been corrected. As we have no right to make a man say that which he himself never said or intended to say, so we have in fact none to fix a positive meaning upon his language, without knowing for a certainty what he meant by it. Reason, or good sense, which, as I have suggested, is the foundation of grammar and of all good writing, is indeed a perpetual as well as a universal principle; but, since the exercises of our reason must, from the very nature of the faculty, be limited to what we know and understand, we are not competent to the positive correction, or to the sure translation, of what is obscure and disputable in the standard books of antiquity.

OBS. 5.—Let me cite an example: “For all this I considered in my heart, even to declare all this, that the righteous, and the wise, and their works, are in the hand of God: no man knoweth either love or hatred *by* all *that is* before them. All *things come* alike to all.”—*Ecclesiastes*, ix, 1. Here is, doubtless, *one* error which any English scholar may point out or correct. The pronoun “*them*” should be *him*, because its intended antecedent appears to be “*man*,” and not “*the righteous and the wise*,” going before. But are there not *other* faults in the version? The common French Bible, in this place, has the following import: “Surely I have applied my heart to all that, and to unfold all this; *to wit*, that the righteous and the wise, and their actions, *are* in the hand of God and love and hatred; *and that* men know nothing of all *that which is* before them. All *happens* equally to all.” The Latin Vulgate gives this sense: “All these things have I considered in my heart, that I might understand them accurately: the righteous and the wise, and their works, are in the hand of God; and yet man doth not know, whether by love or by hatred lie may be worthy: but all things in the future are kept uncertain, so that all may happen alike to the righteous man and to the wicked.” In the Greek of the Septuagint, the introductory members of this passage are left at the end of the preceding chapter, and are literally thus: “that all this I received into my heart, and my heart understood all this.” The rest, commencing a new chapter, is as follows: “For the righteous and the wise and their works *are* in the hand of God, and indeed both love and hatred man knoweth not: all things before their face *are* vanity to all.” Now, which of these several readings is the nearest to what Solomon meant by the original text, or which is the farthest from it, and therefore the most faulty, I leave it to men more learned than myself to decide; but, certainly, there is no *inspired authority* in any of them, but *in so far as they convey the sense which he really intended*. And if his meaning had not been, by some imperfection in the oldest expression we have of it, *obscured and partly lost*, there could be neither cause nor excuse for these discrepancies. I say this with no willingness to depreciate the general authority of the Holy Scriptures,

which are for the most part clear in their import, and very ably translated into English, as well as into other languages.

## IMPROPRIETIES FOR CORRECTION. FALSE SYNTAX UNDER THE GENERAL RULE.

### LESSON I.—ARTICLES.

(1.) “An article is a part of speech placed before nouns.”—*Comly's Gram.*, p. 11.

[FORMULE.—Not proper, because the article *an* is here inconsistent with the term “*part of speech*,” for the text declares one thing of a kind to be the whole kind. But, according to the General Rule of Syntax, “In the formation of sentences, the consistency and adaptation of all the words should be carefully observed; and a regular, clear, and correspondent construction should be preserved throughout.” The sentence may be corrected in two ways, thus: “*The* article is a part of speech placed before nouns;”—or better, “*An* article is a word placed before nouns.”\*]

(2.) “An article is a part of speech used to limit nouns.”—*Gilbert's Gram.*, p. 19. (3.) “An article is a part of speech set before nouns to fix their vague Signification.”—*Ash's Gram.*, p. 18. (4.) “An adjective is a part of speech used to describe a noun.”—*Gilbert's Gram.*, p. 19. (5.) “A pronoun is a part of speech used instead of a noun.”—*Ibid.*; and *Weld's Gram.*, pp. 30 and 50; *Abridg.*, pp. 29 and 46. (6.) “A Pronoun is a Part of Speech which is often used instead of a Noun Substantive common, and supplies the Want of a Noun proper.”—*British Gram.*, p. 102; *Buchanan's Gram.*, p. 29. (7.) “A verb is a part of speech, which signifies *to be, to do, or to be acted upon*”—*Merchant's School Gram.*, p. 17. (8.) “A verb is a part of speech, which signifies *to be, to act, or to receive an action*.”—*Comly's Gram.*, p. 11. (9.) “A verb is a part of speech by which any thing is asserted.”—*Weld's Gram.*, p. 50; *Abridg.*, 46 and 58. (10.) “A verb is a part of speech which expresses action, or existence, in a direct manner.”—*Gilbert's Gram.*, p. 20. (11.) “A participle is a part of speech derived from a verb, and expresses action or existence in an indirect manner.”—*Ibid.* (12.) “A Participle is a Part of Speech derived from a Verb, and denotes being, doing, or suffering, and implies Time, as a Verb does.”—*British Gram.*, p. 139; *Buchanan's*, p. 46. “An adverb is a part of speech used to add to the meaning of verbs, adjectives, and participles.”—*Gilbert's Gram.*, p. 20. (14.) “An adverb is an indeclinable part of speech, added to a verb, adjective, or other adverb, to express some circumstance, quality, or manner of their signification.”—*Adam's Gram.*, p. 142; *Gould's*, 147. (15.) “An Adverb is a part of speech joined to a verb, an Adjective, a Participle, and sometimes to another Adverb, to express the quality or circumstance of it.”—*Ash's Gram.*, p. 47. (16.) “An Adverb is a part of speech joined to a Verb, Adjective, Participle, and sometimes to another Adverb, to express some circumstances respecting it.”—*Beck's Gram.*, p. 23. (17.) “An Adverb is a Part of Speech which is joined to a Verb, Adjective, Participle, or to another Adverb to express some Modification, or Circumstance, Quality, or Manner of their Signification.”—*Buchanan's Gram.*, p. 61. (18.) “An Adverb is a part of speech added to a Verb (whence the name), and

\* As a mere assertion, this example is here sufficiently corrected; but, as a *definition*, (for which the author probably intended it,) it is deficient; and consequently, in that sense, is still inaccurate. I would also observe that most of the subsequent examples under the present head, contain other errors than that for which they are here introduced; and, of some of them, the faults are, in my opinion, very many: for example, the several definitions of an *adverb*, cited below. Lindley Murray's definition of this part of speech is not inserted among these, because I had elsewhere criticised that. So too of his faulty definition of a *conjunction*. See the *Introduction*, Chap. X. paragraphs 26 and 28. See also *Corrections in the Key*, under Note 10th to Rule 1st.

sometimes even to another word.”—*Bucke’s Gram.*, p. 76. (19.) “A conjunction is a part of speech used to connect words and sentences.”—*Gilbert’s Gram.*, p. 20; *Weld’s*, 51. (20.) “A Conjunction is a part of speech that joins words or sentences together.”—*Ash’s Gram.*, p. 43. (21.) “A Conjunction is that part of speech which connect sentences, or parts of sentences or single words.”—*Blair’s Gram.*, p. 41. (22.) “A Conjunction is a part of speech, that is used principally to connect sentences, so as, out of two, three, or more, sentences, to make one.”—*Bucke’s Gram.*, p. 28. (23.) “A Conjunction is a part of speech that is chiefly used to connect sentences, joining two or more simple sentences into one compound sentence: it sometimes connects only words.”—*Kirkham’s Gram.*, p. 118. (24.) “A Conjunction is a Part of Speech which joins Sentences together, and shews the Manner of their Dependence upon one another.”—*British Gram.*, p. 163; *Buchanan’s*, p. 64; *E. Devis’s*, 103. (25.) “A preposition is a part of Speech used to show the relation between other words.”—*Gilbert’s Gram.*, p. 20. (26.) “A Preposition is a part of speech which serves to connect words and show the relation between them.”—*Frost’s El. of Gram.*, p. 42. (27.) “A *preposition* is a part of speech used to connect words and show their relation.”—*Weld’s Gram.*, p. 51; *Abridg.* 47. (28.) “A preposition is that part of speech which shows the position of persons or things, or the relation that one noun or pronoun bears toward another.”—*Blair’s Gram.*, p. 40. (29.) “A Preposition is a Part of Speech, which being added to any other Parts of Speech serves to shew their State, Relation or Reference to each other.”—*British Gram.*, p. 165; *Buchanan’s*, p. 65. (30.) “An interjection is a part of speech used to express sudden passion or emotion.”—*Gilbert’s Gram.*, p. 20. (31.) “An interjection is a part of speech used in giving utterance to some sudden feeling or emotion.”—*Weld’s Gram.*, pp. 49 and 51; *Abridg.*, 44 and 47. (32.) “An Interjection is that part of speech which denotes any sudden affection or emotion of the mind.”—*Blair’s Gram.*, p. 42. (33.) “An Interjection is a Part of Speech thrown into discourse, and denotes some sudden Passion or Emotion of the Soul.”—*British Gram.*, p. 172; *Buchanan’s*, p. 67.

(34.) “A scene might tempt some peaceful sage  
To rear him a lone hermitage.”—*Union Poems*, p. 89.

(35.) “Not all the storms that shake the pole  
Can e’er disturb thy halcyon soul,  
And smooth th’ unaltered brow.”—*Day’s Gram.*, p. 78; *E. Reader*, 230.

## LESSON II.—NOUNS.

“The thrones of every monarchy felt the shock.”—*Frelinghuysen*.

[FORMULE.—Not proper, because the plural noun *thrones* has not a clear and regular construction, adapted to the author’s meaning. But, according to the General Rule of Syntax, “In the formation of sentences the consistency and adaptation of all the words should be carefully observed; and a regular, clear, and correspondent construction should be preserved throughout.” The sentence may be corrected thus: “The *throne* of every monarchy felt the shock.”]

“These principles ought to be deeply impressed upon the minds of every American.”—*Webster’s Essays*, p. 44. “The word *church* and *shire* are radically the same.”—*Ib.*, p. 256. “They may not, in their present form, be readily accommodated to every circumstance belonging to the possessive cases of nouns.”—*L. Murray’s Gram.*, 8vo, p. 53. “*Will*, in the second and third person, only foretels.”—*Ib.*, p. 88. “Which seem to form the true distinction between the subjunctive and the indicative moods.”—*Ib.*, p. 208. “The very general approbation, which this performance of Walker has received from the public.”—*Ib.*,

p. 241. "Lest she carry her improvements this way too far."—CAMPBELL: *ib.*, p. 371. "Charles was extravagant, and by this means became poor and despicable."—*Murray's Key*, 8vo, p. 189. #### LESSON IV.—PRONOUNS.

"If I can contribute to your and my country's glory."—*Goldsmith*.

[FORMULE.—Not proper, because the pronoun *your* has not a clear and regular construction, adapted to the author's meaning. But, according to the General Rule of Syntax, "In the formation of sentences, the consistency and adaptation of all the words should be carefully observed; and a regular, clear, and correspondent construction should be preserved throughout." The sentence, having a doubtful or double meaning, may be

corrected in two ways, thus: “If I can contribute to our country’s glory,”—or, “If I can contribute to your *glory* and *that of my country*.”]

\* In his explanation of *Ellipsis*, Lindley Murray continually calls it "*the ellipsis*," and speaks of it as something that is "*used*,"—"*made use of*,"—"*applied*,"—"*contained in*" the examples; which expressions, referring, as they there do, to the mere *absence* of something, appear to me solecistical. The notion too, which this author and others have entertained of the figure itself, is in many respects erroneous; and nearly all their examples for its illustration are either questionable as to such an application, or obviously inappropriate. The absence of what is *needless* or *unsuggested*, is *no ellipsis*, though some grave men have not discerned this obvious fact. The nine solecisms here quoted concerning "*the ellipsis*," are all found in many other grammars. See *Fisk's E. Gram.*, p. 144; *Guy's*, 91; *Ingersoll's*, 153; *J. M. Putnam's*, 137; *R. C. Smith's*, 180; *Weld's*, 190.

## LESSON XI.—BAD PHRASES.

“He had as good leave his vessel to the direction of the winds.”—SOUTH: *in Joh. Dict.* “Without good nature and gratitude, men had as good live in a wilderness as in society.”—L’ESTRANGE: *ib.* “And for this reason such lines almost never occur together.”—*Blair’s Rhet.*, p. 385. “His being a great man did not make him a happy man.”—*Crombie’s Treatise*, p. 288. “Let that which tends to the making cold your love be judged in all.”—*S. Crisp.* “It is worthy the observing, that there is no passion in the mind of man so weak but it mates and masters the fear of death.”—*Bacon’s Essays*, p. 4. “Accent dignifies the syllable on which it is laid, and makes it more distinguished by the ear than the rest.”—*Sheridan’s Lect.*, p. 80; *Murray’s Gram.*, 8vo, p. 244. “Before he proceeds to argue either on one side or other.”—*Blair’s Rhet.*, p. 313. “The change in general of manners throughout all Europe.”—*ib.*, p. 375. “The sweetness and beauty of Virgil’s numbers, throughout his whole works.”—*ib.*, p. 440. “The French writers of sermons study neatness and elegance in laying down their heads.”—*ib.*, p. 13. “This almost never fails to prove a refrigerant to passion.”—*ib.*, p. 321. “At least their fathers, brothers, and uncles, cannot, as good relations and good citizens, dispense with their not standing forth to demand vengeance.”—*Goldsmith’s Greece*, Vol. i, p. 191. “Alleging, that their crying down the church of Rome, was a joining hand with the Turks.”—*Barclay’s Works*, i, 239. “To which is added the Assembly of Divines Catechism.”—*New-England Primer*, p. 1. “This treachery was always present in both their thoughts.”—*Dr. Robertson.* “Thus far both their words agree.” (“*Convenient adhuc utriusque verba.* Plaut.”)—*Walker’s Particles*, p. 125. “Aparithmeses, or Enumeration, is the branching out into several parts of what might be expressed in fewer words.”—*Gould’s Gram.*, p. 241. “Aparithmeses, or Enumeration, is when what might be expressed in a few words, is branched out into several parts.”—*Adam’s Gram.*, p. 251. “Which may sit from time to time where you dwell or in the neighbouring vicinity.”—*Taylor’s District School*, 1st Ed., p. 281. “Place together a large and a small sized animal of the same species.”—*Kames, El. of Crit.*, i, 235. “The weight of the swimming body is equal to that of the weight, of the quantity of fluid displaced by it.”—*Percival’s Tales*, ii, 213. “The Subjunctive mood, in all its tenses, is similar to that of the Optative.”—*Gwilt’s Saxon Gram.*, p. 27. “No other feeling of obligation remains, except that of fidelity.”—*Wayland’s Moral Science*, 1st Ed., p. 82. “Who asked him, ‘What could be the reason, that whole audiences should be moved to tears, at the representation of some story on the stage.’”—*Sheridan’s Elocution*, p. 175. “Art not thou and you ashamed to affirm, that the best works of the Spirit of Christ in his saints are as filthy rags?”—*Barclay’s Works*, i, 174. “A neuter verb becomes active, when followed by a noun of the same signification with its own.”—*Sanborn’s Gram.*, p. 127. “But he has judged better, in omitting to repeat the article *the*.”—*Blair’s Rhet.*, p. 194. “Many objects please us as highly beautiful, which have almost no variety at all.”—*ib.*, p. 46. “Yet notwithstanding, they sometimes follow them.”—*Emmons’s Gram.*, p. 21. “For I know of nothing more material in all the whole Subject, than this doctrine of Mood and Tense.”—*Johnson’s Gram. Com.*, p. 292. “It is by no means impossible for an error to be got rid of or suppressed.”—*Philological Museum*, Vol. i, p. 642. “These are things of the highest importance to the growing age.”—*Murray’s Key*, 8vo, p. 250. “He had better have omitted the word *many*.”—*Blair’s Rhet.* p. 205. “Which had better have been separated.”—*ib.*, p. 225. “Figures and metaphors, therefore, should, on no occasion be stuck on too profusely.”—*ib.*, p. 144; *Jamieson’s Rhet.*, 150. “Metaphors, as well as other figures, should on no occasion, be stuck on too profusely.”—*Murray’s Gram.*, p. 338; *Russell’s*, 136. “Something like this has been reproached to Tacitus.”—BOLINGBROKE: *Priestley’s Gram.*, p. 164.

“O thou, whom all mankind in vain withstand,  
Each of whose blood must one day stain thy hand!”—*Sheffield's Temple of Death*.

## LESSON XII.—TWO ERRORS.\*

“Pronouns are sometimes made to precede the things which they represent.”—*Murray's Gram.*, p. 160. “Most prepositions originally denote the relation of place.”—*Lowth's Gram.*, p. 65. “*Which* is applied to inferior animals and things without life.”—*Bullions, E. Gram.*, p. 24; *Pract. Lessons*, 30. “What noun do they describe or tell the kind?”—*Infant School Gram.*, p. 41. “Iron cannon, as well as brass, is now universally cast solid.”—*Jamieson's Dict.* “We have philosophers, eminent and conspicuous, perhaps, beyond any nation.”—*Blair's Rhet.*, p. 251. “This is a question about words alone, and which common sense easily determines.”—*Ib.*, p. 320. “The low [pitch of the voice] is, when he approaches to a whisper.”—*Ib.*, p. 328. “Which, as to the effect, is just the same with using no such distinctions at all.”—*Ib.*, p. 33. “These two systems, therefore, differ in reality very little from one another.”—*Ib.*, p. 23. “It were needless to give many instances, as they occur so often.”—*Ib.*, p. 109. “There are many occasions when this is neither requisite nor would be proper.”—*Ib.*, p. 311. “Dramatic poetry divides itself into the two forms, of comedy or tragedy.”—*Ib.*, p. 452. “No man ever rhymed truer and evenner than he.”—*Pref. to Waller*, p. 5. “The Doctor did not reap a profit from his poetical labours equal to those of his prose.”—*Johnson's Life of Goldsmith*. “We will follow that which we found our fathers practice.”—*Sale's Koran*, i, 28. “And I would deeply regret having published them.”—*Infant School Gram.*, p. vii. “Figures exhibit ideas in a manner more vivid and impressive, than could be done by plain language.”—*Kirkham's Gram.*, p. 222. “The allegory is finely drawn, only the heads various.”—*Spect.*, No. 540. “I should not have thought it worthy a place here.”—*Crombie's Treatise*, p. 219. “In this style, Tacitus excels all writers, ancient and modern.”—*Kames, El. of Crit.*, ii, 261. “No author, ancient or modern, possesses the art of dialogue equal to Shakspeare.”—*Ib.*, ii, 294. “The names of every thing we hear, see, smell, taste, and feel, are nouns.”—*Infant School Gram.*, p. 16. “What number are these boys? these pictures? &c.”—*Ib.*, p. 23. “This sentence is faulty, somewhat in the same manner with the last.”—*Blair's Rhet.*, p. 230. “Besides perspicuity, he pursues propriety, purity, and precision, in his language; which forms one degree, and no inconsiderable one, of beauty.”—*Ib.*, p. 181. “Many critical terms have unfortunately been employed in a sense too loose and vague; none more so, than that of the sublime.”—*Ib.*, p. 35. “Hence, no word in the language is used in a more vague signification than beauty.”—*Ib.*, p. 45. “But, still, he made use only of general terms in speech.”—*Ib.*, p. 73. “These give life, body, and colouring to the recital of facts, and enable us to behold them as present, and passing before our eyes.”—*Ib.*, p. 360. “Which carried an ideal chivalry to a still more extravagant height than it had risen in fact.”—*Ib.*, p. 374. “We write much more supinely, and at our ease, than the ancients.”—*Ib.*, p. 351. “This appears indeed to form the characteristical difference between the ancient poets, orators, and historians, compared with the modern.”—*Ib.*, p. 350. “To violate this rule, as is too often done by the English, shews great incorrectness.”—*Ib.*, p. 463. “It is impossible, by means of any study

\* Some of these examples do, *in fact*, contain *more* than two errors; for mistakes in *punctuation*, or in the use of *capitals*, are not here reckoned. This remark may also be applicable to some of the other lessons. The reader may likewise perceive, that where two, three, or more improprieties occur in one sentence, some one or more of them may happen to be such, as he can, if he choose, correct by some rule or note belonging to a previous chapter. Great labour has been bestowed on the selection and arrangement of these syntactical exercises; but to give to so great a variety of literary faults, a distribution perfectly distinct, and perfectly adapted to all the heads assumed in this digest, is a work not only of great labour, but of great difficulty. I have come as near to these two points of perfection in the arrangement, as I well could.—G. BROWN.

to avoid their appearing stiff and forced.”—*Ib.*, p. 335. “Besides its giving the speaker the disagreeable appearance of one who endeavours to compel assent.”—*Ib.*, p. 328. “And, on occasions where a light or ludicrous anecdote is proper to be recorded, it is generally better to throw it into a note, than to hazard becoming too familiar.”—*Ib.*, p. 359. “The great business of this life is to prepare, and qualify us, for the enjoyment of a better.”—*Murray’s Gram.*, 8vo, p. 373. “In some dictionaries, accordingly, it was omitted; and in others stigmatized as a barbarism.”—*Crombie’s Treatise*, p. 322. “You cannot see, or think of, a thing, unless it be a noun.”—*Mack’s Gram.*, p. 65. “The fleet are all arrived and moored in safety.”—*Murray’s Key*, ii, 185.

### LESSON XIII.—TWO ERRORS.

“They have each their distinct and exactly-limited relation to gravity.”—*Hasler’s Astronomy*, p 219. “But in cases which would give too much of the hissing sound, the omission takes place even in prose.”—*Murray’s Gram.*, 8vo, p. 175. “After *o* it [the *u*] is sometimes not sounded at all; sometimes like a single *u*.”—*Lowth’s Gram.*, p. 3. “It is situation chiefly which decides *of* the fortunes and characters of men.”—HUME: *Priestley’s Gram.*, p. 159. “It is situation chiefly which decides the fortune (or, *concerning* the fortune) and characters of men.”—*Murray’s Gram.*, 8vo, p. 201. “The vice of covetousness is what enters deeper into the soul than any other.”—*Ib.*, p. 167; *Ingersoll’s*, 193; *Fisk’s*, 103; *Campbell’s Rhet.*, 205. “Covetousness, of all vices, enters the deepest into the soul.”—*Murray*, 167; *and others*. “Covetousness is what of all vices enters the deepest into the soul.”—*Campbell’s Rhet.*, p. 205. “The vice of covetousness is what enters deepest into the soul of any other.”—*Guardian*, No. 19. “*Would* primarily denotes inclination of will; and *should*, obligation; but they both vary their import, and are often used to express simple event.”—*Lowth’s Gram.*, p. 43; *Murray’s*, 89; *Fisk’s*, 78; *Greenleaf’s*, 27. “But they both vary their import, and are often used to express simple events.”—*Comly’s Gram.*, p. 39; *Ingersoll’s*, 137. “But they vary their import, and are often used to express simple event.”—*Abel Flint’s Gram.*, p 42. “A double conjunctive, in two correspondent clauses of a sentence, is sometimes made use of: as, ‘*Had* he done this, he *had* escaped.’”—*Murray’s Gram.*, 8vo, p. 213; *Ingersoll’s*, 269. “The pleasures of the understanding are preferable to those of the imagination, or of sense.”—*Murray’s Key*, 8vo, p. 191. “Claudian, in a fragment upon the wars of the giants, has contrived to render this idea of their throwing the mountains, which is in itself so grand, burlesque, and ridiculous.”—*Blair’s Rhet.*, p. 42. “To which not only no other writings are to be preferred, but even in divers respects not comparable.”—*Barclay’s Works*, i, 53. “To distinguish them in the understanding, and treat of their several natures, in the same cool manner as we do with regard to other ideas.”—*Sheridan’s Elocution*, p. 137. “For it has nothing to do with parsing, or analyzing, language.”—*Kirkham’s Gram.*, p. 19. Or: “For it has nothing to do with parsing, or analyzing, language.”—*Ib.*, *Second Edition*, p. 16. “Neither was that language [the Latin] ever so vulgar in Britain.”—SWIFT: see *Blair’s Rhet.*, p. 228. “All that I propose is to give some openings into the pleasures of taste.”—*Ib.*, p. 28. “But it would have been better omitted in the following sentences.”—*Murray’s Gram.*, 8vo, p. 210. “But I think it had better be omitted in the following sentence.”—*Priestley’s Gram.*, p. 162. “They appear, in this case, like excrescences jutting out from the body, which had better have been wanted.”—*Blair’s Rhet.*, p. 326. “And therefore, the fable of the Harpies, in the third book of the *Æneid*, and the allegory of Sin and Death, in the second book of *Paradise Lost*, had been better omitted in these celebrated poems.”—*Ib.*, p. 430. “Ellipsis is an elegant Suppression (or the leaving out) of a Word, or Words in a Sentence.”—*British Gram.*, p. 234; *Buchanan’s*, p. 131. “The article *a* or *an* had better be omitted in this

construction.”—*Blair’s Gram.*, p. 67. “Now suppose the articles had not been left out in these passages.”—*Burke’s Gram.*, p. 27. “To give separate names to every one of those trees, would have been an endless and impracticable undertaking.”—*Blair’s Rhet.*, p. 72. “*Ei*, in general, sounds the same as long and slender *a*.”—*Murray’s Gram.*, p. 12. “When a conjunction is used apparently redundant it is called Polysyndeton.”—*Adam’s Gram.*, p. 236; *Gould’s*, 229. “*Each*, *every*, *either*, *neither*, denote the persons or things which make up a number, as taken separately or distributively.”—*McCulloch’s Gram.*, p. 31. “The Principal Sentence must be expressed by verbs in the Indicative, Imperative, or Potential Modes.”—*Clark’s Pract. Gram.*, p. 133. “Hence he is diffuse, where he ought to have been pressing.”—*Blair’s Rhet.*, p. 246. “All manner of subjects admit of explaining comparisons.”—*Ib.*, p. 164; *Jamieson’s Rhet.*, 161. “The present or imperfect participle denotes action or being continued, but not perfected.”—*Kirkham’s Gram.*, p. 78. “What are verbs? Those words which express what the nouns do”—*Fowle’s True Eng. Gram.*, p. 29.

“Of all those arts in which the wise excel,  
Nature’s chief masterpiece is writing well.”—J. *Sheffield, Duke of Buck.*

“Such was that muse whose rules and practice tell  
Nature’s chief masterpiece is writing well.”—*Pope, on Criticism.*

#### LESSON XIV.—THREE ERRORS.

“In some words the metaphorical sense has justled out the original sense altogether, so that in respect of it they are become obsolete.”—*Campbell’s Rhet.*, p. 323. “Sure never any mortal was so overwhelmed with grief as I am at this present.”—*Sheridan’s Elocution*, p. 138. “All languages differ from each other in their mode of inflexion.”—*Bullions, E. Gram.*, Pref., p. v. “Nouns and verbs are the only indispensable parts of speech—the one to express the subject spoken of, and the other the predicate or what is affirmed of it.”—*McCulloch’s Gram.*, p. 36. “The words in italics of the three latter examples, perform the office of substantives.”—*L. Murray’s Gram.*, 8vo, p. 66. “Such a structure of a sentence is always the mark of careless writing.”—*Blair’s Rhet.*, p. 231. “Nothing is frequently more hurtful to the grace or vivacity of a period, than superfluous dragging words at the conclusion.”—*Ib.*, p. 205. “When its substantive is not joined to it, but referred to, or understood.”—*Lowth’s Gram.*, p. 24. “Yet they have always some substantive belonging to them, either referred to, or understood.”—*Ib.*, 24. “Because they define and limit the extent of the common name, or general term, to which they either refer, or are joined.”—*Ib.*, 24. “Every new object surprises, terrifies, and makes a strong impression on their mind.”—*Blair’s Rhet.*, p. 136. “His argument required to have been more fully unfolded, in order to make it be distinctly apprehended, and to give it its due force.”—*Ib.*, p. 230. “Participles which are derived from active verbs, will govern the objective case, the same as the verbs from which they are derived”—*Emmons’s Gram.*, p. 61. “Where, contrary to the rule, the nominative *I* precedes, and the objective case *whom* follows the verb.”—*Murray’s Gram.*, 8vo, p. 181. “The same conjunction governing both the indicative and the subjunctive moods, in the same sentence, and in the same circumstances, seems to be a great impropriety.”—*Ib.*, p. 207; *Smith’s New Gram.*, 173: see *Lowth’s Gram.*, p. 105; *Fisk’s*, 128; and *Ingersoll’s*, 266. “A nice discernment, and accurate attention to the best usage, are necessary to direct us, on these occasions.”—*Murray’s Gram.*, 8vo, p. 170. “The Greeks and Romans, the former especially, were, in truth, much more musical nations than we; their genius was more turned to delight in the melody of speech.”—*Blair’s Rhet.*, p. 123. “When the sense admits it, the sooner a circumstance is introduced, the better, that the more important and significant words may possess the last place, quite

disencumbered.”—*Murray’s Gram.*, 8vo, i, p. 309; *Parker and Fox’s*, Part III, p. 88. “When the sense admits it, the sooner they are despatched, generally speaking, the better; that the more important and significant words may possess the last place, quite disencumbered.”—*Blair’s Rhet.*, p. 118. See also *Jamieson’s Rhet.*, p. 101. “Thus we find it, both in the Greek and Latin tongues.”—*Blair’s Rhet.*, p. 74. “A train of sentences, constructed in the same manner, and with the same number of members, should never be allowed to succeed one another.”—*Ib.*, p. 102; *Murray’s Gram.*, 8vo, Vol. i, p. 306; *Parker and Fox’s Gram.*, Part III, p. 86. “I proceed to lay down the rules to be observed in the conduct of metaphors, and which are much the same for tropes of every kind.”—*Blair’s Rhet.*, p. 143. “By a proper choice of words, we may produce a resemblance of other sounds which we mean to describe.”—*Ib.*, p. 129; *Murray’s Gram.*, 8vo, Vol. i, p. 331. “The disguise can almost never be so perfect, but it is discovered.”—*Blair’s Rhet.*, p. 259. “The sense admits of no other pause than after the second syllable ‘sit,’ which therefore must be the only pause made in the reading.”—*Ib.*, p. 333. “Not that I believe North America to be peopled so late as the twelfth century, the period of Madoc’s migration.”—*Webster’s Essays*, p. 212. “Money and commodities will always flow to that country, where they are most wanted and will command the most profit.”—*Ib.*, p. 308. “That it contains no visible marks, of articles, which are the most important of all others, to a just delivery.”—*Sheridan’s Elocution*, p. 13. “And of virtue, from its beauty, we call it a fair and favourite maid.”—*Mack’s Gram.*, p. 66. “The definite article may agree with nouns in the singular and plural number.”—*Infant School Gram.*, p. 130.

#### LESSON XV.—MANY ERRORS.

(1.) “A compound word is included under the head of derivative words.”—*Murray’s Gram.*, 8vo, p. 23. (2.) “An Apostrophe, marked thus ‘ is used to abbreviate or shorten a word. Its chief use is to show the genitive case of nouns.”—*Ib.*, p. 281.\* (3.) “A Hyphen, marked thus - is employed in connecting compounded words. It is also used when a word is divided.”—*Ib.*, p. 282. (4.) “The Acute Accent, marked thus ´: as, ‘*Fáncy*.’ The Grave thus ` as, ‘*Fàvour*’”—*Ib.*, p. 282. (5.) “The stress is laid on long and short syllables indiscriminately. In order to distinguish the one from the other, some writers of dictionaries have placed the grave on the former, and the acute on the latter.”—*Ib.*, 282. (6.) “A Diæresis, thus marked ¨, consists of two points placed over one of the two vowels that would otherwise make a diphthong, and parts them into syllables.”—*Ib.*, 282. (7.) “A Section marked thus §, is the division of a discourse, or chapter, into less parts or portions.”—*Ib.*, 282. (8.) “A Paragraph ¶ denotes the beginning of a new subject, or a sentence not connected with the foregoing. This character is chiefly used in the Old and in the New Testaments.”—*Ib.*, 282. (9.) “A Quotation “ “. \* This example, or L. Murray’s miserable modification of it, traced through the grammars of Alden, Alger, Bullions, Comly, Cooper, Flint, Hiley, Ingersoll, Jaudon, Merchant, Russell, Smith, and others, will be found to have a dozen different forms—all of them no less faulty than the original—all of them obscure, untrue, inconsistent, and almost incorrigible. It is plain, that “*a comma*,” or *one comma*, cannot divide more than *two* “simple members;” and these, surely, cannot be connected by more than *one relative*, or by more than *one* “comparative;” if it be allowable to call *than*, *as*, or *so*, by this questionable name. Of the multitude of errors into which these pretended critics have so blindly fallen, I shall have space and time to point out only a *very small part*: this text, too justly, may be taken as a pretty fair sample of their scholarship!

## LESSON XVI.—MANY ERRORS.

“The Japanese, the Tonquinese, and the Corceans, speak different languages from one another, and from the inhabitants of China, but use, with these last people, the same written characters; a proof that the Chinese characters are like hieroglyphics, independent of language.”—*Jamieson’s Rhet.*, p. 18. “The Japanese, the Tonquinese, and the Corceans, who speak different languages from one another, and from the inhabitants of China, use, however, the same written characters with them; and by this means correspond intelligibly with each other in writing, though ignorant of the language spoken in their several countries; a plain proof,” &c.—*Blair’s Rhet.*, p. 67. “The curved line is made square instead of round, for the reason beforementioned.”—*Knight, on the Greek Alphabet*, p. 6. “Every one should content himself with the use of those tones only that he is habituated to in speech, and to give none other to emphasis, but what he would do to the same words in discourse. Thus whatever he utters will be done with ease, and appear natural.”—*Sheridan’s Elocution*, p. 103. “Stops, or pauses, are a total cessation of sound during a perceptible, and in numerous compositions, a measurable space of time.”—*Ib.*, p. 104. “Pauses or rests, in speaking and reading, are a total cessation of the voice during a perceptible, and, in many cases, a measurable space of time.”—*Murray’s Gram.*, p. 248; *English Reader*, p. 13; *Goldsbury’s Gr.*, 76; *Kirkham’s*, 208; *Felton’s*, 133; *et al.* “Nouns which express a small one of the kind are called *Diminutive Nouns*; as, lambkin, hillock, satchel, gosling, from lamb, hill, sack, goose.”—*Bullions, E. Gram.*, 1837, p. 9. “What is the cause that nonsense so often escapes being detected, both by the writer and by the reader?”—*Campbell’s Rhet.*, p. xi, and 280. “An Interjection is a word used to express sudden emotion. They are so called, because they are generally thrown in between the parts of a sentence without reference to the structure of the other parts of it.”—*McCulloch’s Gram.*, p. 36. “*Ought* (in duty bound) *oughtest*, *oughtedst*, are it’s only inflections.”—*Mackintosh’s Gram.*, p. 165. “But the arrangment, government, agreement, and dependence of one word upon another, are referred to our reason.”—*Osborn’s Key, Pref.*, p. 3. “*Me* is a personal pronoun, first person singular, and the accusative case.”—*Guy’s Gram.*, p. 20. “The substantive *self* is added to a pronoun; as, herself, himself, &c.; and when thus united, is called a reciprocal pronoun.”—*Ib.*, p. 18. “One cannot avoid thinking that our author had done better to have begun the first of these three sentences, with saying, *it is novelty which bestows charms on a monster*, &c.”—*Blair’s Rhet.*, p. 207. “The idea which they present to us of nature’s resembling art, of art’s being considered as an original, and nature as a copy,\* seems not very distinct nor well brought out, nor indeed very material to our author’s purpose.”—*Ib.*, p. 220. “The present construction of the sentence, has plainly been owing to hasty and careless writing.”—*Ib.*, p. 220. “Adverbs serve to modify, or to denote some circumstance of an action, or of a quality, relative to its time, place, order, degree, and the other properties of it, which we have occasion to specify.”—*Ib.*, p. 84. “The more that any nation is improved by science, and the more perfect their language becomes, we may naturally expect that it will abound more with connective particles.”—*Ib.*, p. 85. “Mr. Greenleaf’s book is by far the best adapted for learners of any that has yet appeared on the subject.”—DR. FELTUS and BP. ONDERDONK: *Greenleaf’s Gram.*, p. 2. “Punctuation is the art of marking in writing the several pauses,

\* The “*idea*” which is here spoken of, Dr. Blair discovers in a passage of Addison’s Spectator. It is, in fact, as here “*brought out*” by the critic, a bald and downright absurdity. Dr. Campbell has criticised, under the name of *marvellous nonsense*, a different display of the same “*idea*,” cited from De Piles’s Principles of Painting. The passage ends thus: “In this sense it may be asserted, that in Rubens’ pieces, Art is above Nature, and Nature only a copy of that great master’s works.” Of this the critic says: “When the expression is *stript* of the *absurd meaning*, there remains nothing but balderdash.”—*Philosophy of Rhet.*, p. 278.

It has one uniform sound.”—*Murray’s Gram.*, p. 17; *Fisk’s*, 42. “*V* is flat *f*, and bears the same relation to it as *b* does to *p*, *d* to *t*, hard *g* to *k*, and *z* to *s*. It is never irregular.”—*Walker’s Dict.*, p. 52. “*V* has the sound of flat *f*, and bears the same relation to it as *z* does to *s*. It has one uniform sound.”—*Greenleaf’s Gram.*, p. 20. “The author is explaining the distinction, between the powers of sense and imagination in the human mind.”—*Murray’s Gram.*, 8vo, Vol. i, p. 343. [The author is endeavouring] “to explain a very abstract point, the distinction between the powers of sense and imagination in the human mind.”—*Blair’s Rhet.*, p. 164. “HE (Anglo-Saxon *he*) is a Personal pronoun, of the Third Person, Masculine Gender (Decline *he*), of the singular number, in the nominative case.”—*Fowler’s E. ## FALSE SYNTAX UNDER THE CRITICAL NOTES.

### UNDER CRITICAL NOTE I.—OF THE PARTS OF SPEECH.

“The passive voice denotes a being acted upon.”—*Maunders Gram.*, p. 6.

[FORMULE.—Not proper, because the term “*being acted upon*” as here used, suggests a doubt concerning its classification in parsing. But, according to Critical Note 1st, “Words that may constitute different parts of speech, must not be left doubtful as to their classification, or to what part of speech they belong.” Therefore, the phraseology should be altered; thus, “The passive voice denotes *an action received*.” Or; “The passive voice denotes *the receiving of an action*.”]

“Milton, in some of his prose works, has very finely turned periods.”—*Blair’s Rhet.*, p. 127; *Jamieson’s*, 129. “These will be found to be all, or chiefly, of that class.”—*Blair’s Rhet.*, p. 32. “All appearances of an author’s affecting harmony, are disagreeable.”—*Ib.*, p. 127; *Jamieson*, 128. “Some nouns have a double increase, that is, increase by more syllables than one; as, *iter*, *itinēris*.”—*Adam’s Gram.*, p. 255; *Gould’s*, 241. “The powers of man are enlarged by advancing cultivation.”—*Gurney’s Essays*, p. 62. “It is always important to begin well; to make a favourable impression at first setting out.”—*Blair’s Rhet.*, p. 307. “For if one take a wrong method at first setting out, it will lead him astray in all that follows.”—*Ib.*, 313. “His mind is full of his subject, and his words are all expressive.”—*Ib.*, 179. “How exquisitely is this all performed in Greek!”—*Harris’s Hermes*, p. 422. “How little is all this to satisfy the ambition of an immortal soul!”—*Murray’s Key*, 8vo, p. 253. “So as to exhibit the object in its full and most striking point of view.”—*Blair’s Rhet.*, p. 41. “And that the author know how to descend with propriety to the plain, as well as how to rise to the bold and figured style.”—*Ib.*, p. 401. “The heart can only answer to the heart.”—*Ib.*, p. 259. “Upon its first being perceived.”—*Harris’s Hermes*, p. 229. “Call for Samson, that he may make us sport.”—*Judges*, xvi, 25. “And he made them sport.”—*Ibid.* “The term *suffer* in this definition is used in a technical sense, and means simply the receiving of an action, or the being acted upon.”—*Bullions*, p. 29. “The Text is what is only

#### UNDER CRITICAL NOTE II.—OF DOUBTFUL REFERENCE.

“However disagreeable, we must resolutely perform our duty.”—*Murray’s Key*, 8vo, p. 171.

[FORMULE.—Not proper, because the adjective *disagreeable* appears to relate to the pronoun *we*, though such a relation was probably not intended by the author. But, according to Critical Note 2d, “The reference of words to other words, or their syntactical relation according to the sense, should never be left doubtful, by any one who means to be understood.” The sentence may be amended thus: “However disagreeable *the task*, we must resolutely perform our duty.”]

#### UNDER CRITICAL NOTE III.—OF DEFINITIONS.

(1.) "*Definition* is such a description of things as exactly describes the thing and that thing only."—*Blair's Gram.*, p. 135.

[FORMULE.—Not proper, because this definition of a *definition* is not accurately adapted to the thing. But, according to Critical Note 3d, "A definition, in order to be perfect, must include the whole thing, or class of things, which it pretends to define, and exclude every

thing which comes not under the name.”\* The example may be amended thus: “A definition is a *short and lucid* description of a *thing, or species, according to its nature and properties.*”]

(2.) “Language, in general, signifies the expression of our ideas by certain articulate sounds, which are used as the signs of those ideas.”—*Blair’s Rhet.*, p. 53. (3.) “A WORD is an articulate *sound* used by common consent as the sign of an idea,”—*Bullions, Analyt. and Pract. Gr.*, p. 17. (4.) “A word is a sound, or combination of sounds, which is used in the expression of thought”—*Hazen’s Gram.*, p. 12. (5.) “*Words* are articulate sounds, used as *signs* to convey our ideas.”—*Hiley’s Gram.*, p. 5. (6.) “A *word* is a number of letters used together to represent some idea.”—*Hart’s E. Gram.*, p. 28. (7.) “A *Word* is a combination of letters, used as the sign of an idea.”—*S. W. Clark’s Practical Gram.*, p. 9. (12.) “Orthography means *word-making* or *spelling*.”—*Kirkham’s Gram.*, p. 19; *Smith’s New Gram.*, p. 41. (13.) “A vowel is a letter, the name of which constitutes a full, open sound.”—*Hazen’s Gram.*, p. 10; *Lennie’s*, 5; *Brace’s*, 7. (14.) “Spelling is the art of reading by naming the letters singly, and rightly dividing words into their syllables. Or, in writing, it is the expressing of a word by its proper letters.”—*Lowth’s Gram.*, p. 5; *Churchill’s*, 20. (16.) “Spelling is the art of expressing words by their proper letters; or of rightly dividing words into syllables.”—*Comly’s Gram.*, p. 8. (17.) “Spelling is the art of expressing a word by its proper letters, and rightly dividing it into syllables.”—*Bullions’s Princ. of E. Gram.*, p. 2. (18.) “Spelling is the art of expressing a word by its proper letters.”—*Kirkham’s Gram.*, p. 23; *Sanborn’s*, p. 259. (19.) “A syllable is a sound either simple or compounded, pronounced by a single impulse of the voice, and constituting a word or part of a word.”—*Lowth*, p. 5; *Murray*, 21; *Ingersoll*, 6; *Fisk*, 11; *Greenleaf*, 20; *Merchant*, 9; *Alger*, 12; *Bucke*, 15; *Smith*, 118; *et al.* (20.) “A Syllable is a complete Sound uttered in one Breath.”—*British Gram.*, p. 32; *Buchanan’s*, 5. (21.) “A syllable is a distinct sound, uttered by a single impulse of the voice.”—*Kirkham’s Gram.*, p. 20. (22.) “A Syllable is a distinct sound forming the whole of a word, or so much of it as can be sounded at once.”—*Bullions, E. Gr.*, p. 2. (23.) “A *syllable* is a word, or part of a word, or as much as can be sounded at once.”—*Picket’s Gram.*, p. 10. (24.) “A diphthong is the union of two Vowels, both of which are pronounced as one: as in bear and beat.”—

\* Bad definitions may have other faults than to include or exclude what they should not, but this is their great and peculiar vice. For example: “*Person* is *that property* of *nouns* and *pronouns* which distinguishes the speaker, the person or thing addressed, and the person or thing spoken of.”—*Wells’s School Gram.*, 1st Ed., p. 51; 113th Ed., p. 57. See nearly the same words, in *Weld’s English Gram.*, p. 67; and in his *Abridgement*, p. 49. The three persons of *verbs* are all improperly excluded from this definition; which absurdly takes “*person*” to be *one property that has all the effect of all the persons*; so that each person, in its turn, since each cannot have all this effect, is seen to be excluded also: that is, it is not such a property as is described! Again: “An *intransitive verb* is a verb which *does not have* a noun or pronoun for its object.”—*Wells*, 1st Ed., p. 76. According to Dr. Johnson, “*does not have*,” is not a scholarly phrase; but the adoption of a puerile expression is a trifling fault, compared with that of including here all passive verbs, and some transitives, which the author meant to exclude; to say nothing of the inconsistency of excluding here the two classes of verbs which he absurdly calls “intransitive,” though he finds them “followed by objectives depending upon them!”—*Id.*, p. 145. Weld imitates these errors too, on pp. 70 and 153.

*Bucke's Gram.*, p. 15. (25.) "A diphthong consists of two vowels, forming one syllable; as, *ea*, in *beat*."—*Guy's Gram.*, p. 2. (26.) \* S. R. Hall thinks it necessary to recognize "*four distinctions*" of "*the distinction* occasioned by sex." In general, the other authors here quoted, suppose that we have only "*three distinctions*" of "*the distinction* of sex." And, as no philosopher has yet discovered more than two sexes, some have thence stoutly argued, that it is absurd to speak of more than two genders. Lily makes it out, that in Latin there are *seven*: yet, with no great consistency, he will have *a gender* to be *a* or *the* distinction of *sex*. "GENUS est sexus discretio. Et sunt genera numero septem."—*Lilii Gram.*, p. 10. That is, "GENDER is the distinction of *sex*. And *the genders* are *seven* in number." Ruddiman says, "GENUS est, discrimen *nominis* secundum sexum, vel *ejus* in structurâ grammaticâ imitatio. Genera nominum sunt *tria*."—*Ruddimanni Gram.*, p. 4. That is, "GENDER is the diversity of the *noun* according to sex, or [it is] the imitation *of it* in grammatical structure. The genders of nouns are *three*." These old definitions are no better than the newer ones cited above. All of them are miserable failures, full of faults and absurdities. Both the nature and the cause of their defects are in some degree explained near the close of the tenth chapter of my Introduction. Their most prominent errors are these: 1. They all assume, that *gender*, taken as one thing, is in fact two, three, or more, *genders*, 2. Nearly all of them seem to say or imply, that *words* differ from one another *in sex*, like animals. 3. Many of them expressly confine *gender*, or *the genders*, to *nouns* only. 4. Many of them confessedly *exclude the neuter gender*, though their authors afterwards admit this gender. 5. That of Dr. Webster supposes, that words

#### UNDER CRITICAL NOTE IV.—OF COMPARISONS.

“We abound more in vowel and diphthong sounds, than most languages.”—*Blair’s Rhet.*, p. 89.

[FORMULE.—Not proper, because the terms *we* and *languages*, which are here used to form a comparison, express things which are totally unlike. But, according to Critical Note 4th, “A comparison is a form of speech which requires some similarity or common property in the things compared; without which, it becomes a solecism.” Therefore, the expression ought to be changed; thus, “*Our language abounds* more in vowel and diphthong sounds, than most *other tongues*.” Or: “We abound more in vowel and *diphthongal* sounds, than most *nations*.”]

differing in gender never have the same “*termination*.” The absurdity of this may be shown by a multitude of examples: as, *man* and *woman*, *male* and *female*, *father* and *mother*, *brother* and *sister*. This is better, but still not free from some other faults which I have mentioned. For the correction of all this great batch of errors, I shall simply substitute in the Key one short definition, which appears to me to be exempt from each of these inaccuracies.

#### UNDER CRITICAL NOTE V.—OF FALSITIES.

“The long sound of *i* is compounded of the sound of *a*, as heard in *ball*, and that of *e*, as heard in *be*.”—*Churchill’s Gram.*, p. 3.

[FORMULE.—Not proper, because the sentence falsely teaches, that the long sound of *i* is that of the diphthong heard in *oil* or *boy*. But, according to Critical Note 5th, “Sentences that convey a meaning manifestly false, should be changed, rejected, or contradicted; because they distort language from its chief end, or only worthy use; which is, to state facts, and to tell the truth.” The error may be corrected thus: “The long sound of *i* is *like a very quick union* of the sound of *a*, as heard in *bar*, and that of *e*, as heard in *be*.”]

## UNDER CRITICAL NOTE VI.—OF ABSURDITIES.

(1.) “And sometimes two unaccented syllables follow each other.”—*Blair’s Rhet.*, p. 384.

[FORMULE.—Not proper, because the phrase, “*follow each other*,” is here an absurdity; it being impossible for two things to “follow each other,” except they alternate, or whirl round. But, according to Critical Note 6th, “Absurdities, of every kind, are contrary to grammar; because they are contrary to reason, or good sense, which is the foundation of grammar.” Therefore, a different expression should here be chosen; thus: “And sometimes two unaccented syllables *come together*.” Or: “And sometimes *one* unaccented *syllable* follows an other.”]

(2.) “What nouns frequently succeed each other?”—*Sanborn’s Gram.*, p. 65. (3.) “Words are derived from one another in various ways.”—*Ib.*, p. 288; *Merchant’s Gram.*, 78; *Weld’s*, 2d Edition, 222. (4.) “Prepositions are derived from the two Latin words *præ* and *pono*, which signify before and place.”—*Mack’s Gram.*, p. 86. (5.) “He was sadly laughed at for such conduct.”—*Bullion’s E. Gram.*, p. 79. (6.) “Every adjective pronoun belongs to some noun or pronoun expressed or understood.”—*Ingersoll’s Gram.*, p. 212. (7.) “If he [Addison] fails in anything, it is in want of strength and precision, which renders his manner not altogether a proper model.”—*Blair’s Rhet.*, p. 187. (8.) “Indeed, if Horace be deficient in any thing, it is in this, of not being sufficiently attentive to juncture and connexion of parts.”—*Ib.*, p. 401. (9.) “The pupil is now supposed to be acquainted with the nine sorts of speech, and their most usual modifications.”—*Taylor’s District School*, p. 204. (10.) “I could see, hear, taste, and smell the rose.”—*Sanborn’s Gram.*, p. 156. (11.) “The triphthong *iou* is sometimes pronounced distinctly in two syllables; as in bilious, various, abstemious.”—*L. Murray’s Gram.*, p. 13; *Walker’s Dict.*, Prin. 292, p. 37. (12.) “The diphthong *aa* generally sounds like a short in proper names; as in Balaam, Canaan, Isaac; but not in Baal, Gaal.”—*Murray’s Gram.*, p. 10. (13.) “Participles are sometimes governed by the article; for the present participle, with the definite article *the* before it, becomes a substantive.”—*Ib.*, p. 192. (14.) “Words ending with *y*, preceded by a consonant, form the plurals of nouns, the persons of verbs, verbal nouns, past participles, comparatives and superlatives, by changing *y* into *i*.”—*Walker’s Rhyming Dict.*, p. viii; *Murray’s Gram.*, 23; *Merchant’s Murray*, 13; *Fisk’s*, 44; *Kirkham’s*, 23; *Greenleaf’s*, 20; *Wright’s Gram.*, 28; *et al.* (15.) “But *y* preceded by a vowel, *in such instances as the above*, is not changed; as boy, boys.”—*Murray’s Gram.*, p. 24; *Merchant’s*, *Fisk’s*, *Kirkham’s*, *Greenleaf’s*, *et al.* (16.) “But when *y* is preceded by a vowel, it is very rarely\* changed in the additional syllable: as coy, coily.”—*Murray’s Gram. again*, p. 24; *Merchant’s*, 14; *Fisk’s*, 45; *Greenleaf’s*, 20; *Wright’s*,

\* Walker states this differently, and even repeats his remark, thus: “But *y* preceded by a vowel is *never* changed: as coy, coily, gay, gayly.”—*Walker’s Rhyming Dict.*, p.x. “Y preceded by a vowel is *never* changed, as boy, boys, I cloy, he cloys, etc.”—*Ib.*, p viii. Walker’s twelve “Orthographical Aphorisms,” which Murray and others republish as their “Rules for Spelling,” and which in stead of amending they merely corrupt, happened through some carelessness to contain *two* which should have been condensed into *one*. For “words ending with y preceded by a consonant,” he has not only the absurd rule or assertion above recited, but an other which is better, with an exception or remark under each, respecting “*y* preceded by a vowel.” The grammarians follow him in his errors, and add to their number: hence the repetition, or similarity, in the absurdities here quoted. By the term “*verbal nouns*,” Walker meant nouns denoting agents, as *carrier* from carry; but Kirkham understood him to mean “*participial nouns*,” as *the carrying*. Or rather, he so mistook “that able philologist” Murray; for he probably knew nothing of Walker in the matter; and accordingly changed the word “*verbal*” to “*participial*,” thus teaching, through all his hundred editions, except a few of the first, that participial nouns from verbs ending in *y* preceded by a consonant, are formed by merely “changing the *y* into *i*.” But he seems to have known, that this is not the way to form the participle; though he did not know, that “*coyleless*” is not a proper English word.

29; *et al.* (17.) “But when *y* is preceded by a vowel, *in such instances*, it is very rarely changed into *i*; as coy, COYLESS.”—*Kirkham’s Gram.*, p. 24. \* The *idea of plurality* is not “*plurality of idea*,” any more than the *idea of wickedness*, or the *idea of absurdity*, is absurdity or wickedness of idea; yet, behold, how our grammarians copy the blunder, which Lowth (perhaps) first fell into, of putting the one phrase for the other! #### UNDER CRITICAL NOTE VII.—OF SELF-CONTRADICTION.

(1.) "Though the construction will not admit of a *plural verb*, the sentence would certainly stand better thus: 'The king, the lords, and the commons, *form* an excellent constitution.'"—*Murray's Gram.*, p. 151; *Ingersoll's*, 239.

[FORMULE.—Not proper, because the first clause here quoted is contradicted by the last. But, according to Critical Note 7th, "Every writer or speaker should be careful not to contradict himself; for what is self-contradictory, is both null in argument, and bad in style." The following change may remove the discrepancy: "Though 'The king *with* the lords and commons,' *must have a singular rather than* a plural verb, the sentence would certainly stand better thus: 'The king, the lords, *and* the commons, *form* an excellent constitution.'"]

(2.) "*L* has always a soft liquid sound; as in love, billow, quarrel. It is sometimes mute: as in half, talk, psalm."—*Murray's Gram.*, p. 14; *Fisk's*, 40. (3.) "*L* has always a soft liquid sound; as in *love*, *billow*. It is often silent; as in *half*, *talk*, *almond*."—*Kirkham's Gram.*, p. 22. (4.) "The words *means* and *amends*, though formerly used in the singular, as well as in the plural number, are now, by polite writers, restricted to the latter. #### UNDER CRITICAL NOTE VIII.—OF SENSELESS JUMBLING.

“Number distinguishes them [viz., *nouns*], as one, or many, of the same kind, called the singular and plural.”—*Dr. Blair’s Lectures on Rhetoric*, p. 74.

[FORMULE.—Not proper, because the words of this text appear to be so carelessly put together, as to make nothing but jargon, or a sort of scholastic balderdash. But, according to Critical Note 8th, “To jumble together words without care for the sense, is an unpardonable negligence, and an abuse of the human understanding.” I think the learned author should rather have said: “*There are two numbers* called the singular and *the* plural, *which* distinguish nouns as *signifying either* one *thing*, or many of the same kind.”]

“Here the noun *James Munroe* is addressed, he is spoken to, it is here a noun of the second person.”—*Mack’s Gram.*, p. 66. “The number and case of a verb can never be ascertained until its nominative is known.”—*Emmons’s Gram.*, p. 36. “A noun of multitude, or signifying many, may have the verb and pronoun agreeing with it either in the singular or plural number; yet not without regard to the import of the word, as conveying unity or plurality of idea.”—*Lowth’s Gram.*, p. 75; *Murray’s*, 152; *Alger’s*, 54; *Russell’s*, 55; *Ingersoll’s*, 248; *et al.* “To express the present and past imperfect of the active and neuter verb, the auxiliary *do* is sometimes used: I *do* (now) love; I *did* (then) love.”—*Lowth’s Gram.*, p. 40. “If these are perfectly committed, they will be able to take twenty lines for a lesson on the second day; and may be increased each day.”—*Osborn’s Key*, p. 4. “When *c* is joined with *h* (*ch*), they are generally sounded in the same manner: as in Charles, church, cheerfulness, and cheese. But foreign words (except in those derived from the French, as *chagrin*, *chicanery*, and *chaise*, in which *ch* are sounded like

sh) are pronounced like *k*; as in Chaos, character, chorus, and chimera.”—*Bucke’s Classical Gram.*, p. 10. “Some substantives, naturally neuter, are, by a figure of speech, converted into the masculine or feminine gender.”—*Murray’s Gram.*, p. 37; *Comly’s*, 20; *Bacon’s*, 13; *A Teacher’s*, 8; *Alger’s*, 16; *Lennie’s*, 11; *Fisk’s*, 56; *Merchant’s*, 27; *Kirkham’s*, 35; *et al.* “Words in the English language may be classified under ten general heads, the names of which classes are usually termed the ten parts of speech.”—*Nutting’s Gram.*, p. 14. “Mercy is the true badge of nobility.’ *Nobility* is a noun of multitude, mas. and fem. gender, third person, sing. and in the obj. case, and governed by ‘of.’ RULE 31.”—*Kirkham’s Gram.*, p. 161. “gh, are either silent, or have the sound of f, as in laugh.”—*Town’s Spelling-Book*, p. 10. “As many people as were destroyed, were as many languages or dialects lost and blotted out from the general catalogue.”—*Chazotte’s Essay*, p. 25. “The *grammars* of some languages contain a greater number of *the* moods, than *others*, and exhibit *them* in different forms.”—*Murray’s Gram.*, 8vo. #### UNDER CRITICAL NOTE IX.—OF WORDS NEEDLESS.

“A knowledge of grammar enables us to express ourselves better in conversation and in writing composition.”—*Sanborn’s Gram.*, p. 7.

[FORMULE.—Not proper, because the word *composition* is here needless. But, according to Critical Note 9th, “Words that are entirely needless, and especially such as injure or encumber the expression, ought in general to be omitted.” The sentence would be better without this word, thus: “A knowledge of grammar enables us to express ourselves better in conversation and in writing.”]

## UNDER CRITICAL NOTE X.—OF IMPROPER OMISSIONS.

“All qualities of things are called adnouns, or adjectives.”—*Blair’s Gram.*, p. 10.

[FORMULE.—Not proper, because this expression lacks two or three words which are necessary to the sense intended. But according to Critical Note 10th, “Words necessary to the sense, or even to the melody or beauty of a sentence, ought seldom, if ever, to be omitted.” The sentence may be amended thus: “All *words signifying concrete* qualities of things, are called adnouns, or adjectives.”]

#### UNDER CRITICAL NOTE XI.—OF LITERARY BLUNDERS.

"Repeat some [adverbs] that are composed of the article *a* and nouns."—*Kirkham's Gram.*, p. 89.

“In the beginning, God created the heavens and the earth.”—*Murray’s Gram.*, 8vo, Vol. i, p. 330; *Hallock’s Gram.*, p. 179; *Melmoth, on Scripture*, p. 16.

[FORMULE.—Not proper, because this reading is false in relation to the word “*heavens*,” nor is it usual to put a comma after the word “*beginning*.” But, according to Critical Note

12th, “Proof-tests in grammar, if not in all argument, should be quoted literally; and even that which needs to be corrected, must never be perverted.” The authorized text is this: “In the beginning God created the *heaven* and the earth.”—*Gen.*, i, 1.]

"They slew Varus, who was he that I mentioned before."—*Murray's Key*, 8vo, p. 194.

[FORMULE.—Not proper, because the phrase, "*who was he that*," is here prolix and awkward. But, according to Critical Note 13th, "Awkwardness, or inelegance of expression, is a reprehensible defect in style, whether it violate any of the common rules of syntax or not." This example may be improved thus: "They slew Varus, *whom* I mentioned before."]

#### UNDER CRITICAL NOTE XIV.—OF IGNORANCE.

“What is an Asserter? It is *the part of speech* which asserts.”—*O. B. Peirce’s Gram.*, p. 20.

[FORMULE.—Not proper, because the term “*Asserter*” which is here put for *Verb*, is both ignorantly misspelled, and whimsically misapplied. But, according to Critical Note 14th, “Any use of words that implies ignorance of their meaning, or of their proper orthography, is particularly unscholarlike; and, in proportion to the author’s pretensions to learning, disgraceful.” The errors here committed might have been avoided thus: “What is *a verb*? It is *a word* which signifies *to be*, *to act*, or *to be acted upon*.” Or thus: “What is an *assertor*? Ans. ‘One who affirms positively; an affirmer, supporter, or vindicator.’—*Webster’s Dict.*”]

\* In the Doctor’s “New Edition, Revised and Corrected,” the text stands thus: “The *Present participle* of THE ACTIVE VOICE has an active signification; as, James is *building* the house. *In many of these*, however, *it* has,” &c. Here the first sentence is but an idle truism; and the phrase, “*In many of these*,” for lack of an antecedent to *these*, is utter nonsense. What is in “the active voice,” ought of course to be *active* in “signification;” but, in this author’s present scheme of the verb, we find “the active voice,” in direct violation of his own definition of it, ascribed not only to verbs and participles either neuter or intransitive, but also, as it would seem by this passage, to “many” that are *passive*!—G. #### UNDER CRITICAL NOTE XV.—OF SILLINESS AND TRUISMS.

“Such is the state of man, that he is never at rest.”—*L. Murray’s Gram.*, p. 57.

[FORMULE.—This is a remark of no wisdom or force, because it would be nearer the truth, to say, “Such is the state of man, that he *must often* rest,” But, according to Critical Note 15th, “Silly remarks and idle truisms are traits of a feeble style, and when their weakness is positive, or inherent, they ought to be entirely omitted.” It is useless to

attempt a correction of this example, for it is not susceptible of any form worth preserving.]

#### UNDER CRITICAL NOTE XVI.—OF THE INCORRIGIBLE.

“And this state of things belonging to the painter governs it in the possessive case.”—*Murray’s Gram.*, p. 195; *Ingersoll’s*, 201; *et al.*

[FORMULE.—This composition is incorrigibly bad. The participle “*belonging*” which seems to relate to “*things*,” is improperly meant to qualify “*state*.” And the “*state of things*,” (which *state* really belongs *only to the things*,) is absurdly supposed to belong to a *person*—i. e., “*to the painter*.” Then this *man*, to whom the “state of things” is said to belong, is forthwith called “*it*,” and nonsensically declared to be “in the possessive case.” But, according to Critical Note 16th, “Passages too erroneous for correction, may be criticised, orally or otherwise, and then passed over without any attempt to amend them.” Therefore, no correction is attempted here.]

“Nouns or pronouns, following the verb *to be*; or the words *than*, *but*, *as*; or that answer the question *who?* have the same case *after as preceded* them.”—*Beck’s Gram.*, p. 29. “The common gender is *when* the noun may be either masculine or feminine.”—*Frost’s Gram.*, p. 8. “The possessive is generally pronounced the same as if the *s* were added.”—*Alden’s Gram.*, p. 11. “For, assuredly, as soon as men *had got* beyond simple interjections, and began to communicate *themselves* by discourse, they would be under a necessity of assigning names to the objects they *saw around* them, *which* in grammatical language, *is called the invention* of substantive nouns.”—*Blair’s Rhet.*, p. 72. “Young children will learn to form letters as *soon*, if not *readier*, *than they* will when older.”—*Taylor’s District School*, p. 159. “This comparing words with one another, constitutes what is called the *degrees* of comparison.”—*Sanborn’s Gram.*, p. 29. “Whenever a noun is *immediately annexed* to a *preceding neuter* verb, it *expresses either* the same notion *with* the verb, or denotes only *the* circumstance of the *action*.”—*Lowth’s Gram.*, p. 73. “Two or more nouns or pronouns joined *singular* together by the conjunction *and*, *must have verbs* agreeing with them in the plural number.”—*Infant School Gram.*, p. 129. “Possessive and demonstrative pronouns agree with their nouns in number and case; as, ‘my brother,’ ‘this slate,’ ‘these slates.’”—*Ib.*, p. 130. “Participles which have no relation to time are used either as adjectives or as substantives.”—*Maunder’s Gram.*, p. 1. “They are in use only in some of their times and modes; and in some of them are a composition of times of several defective verbs, having the same signification.”—*Lowth’s Gram.*, p. 59. “When *words* of the possessive case *that are* in apposition, *follow one another* in quick succession, the possessive sign should be annexed to the *last only*, and *understood* to the rest; as, ‘For David, my servant’s sake.’”—*Comly’s Gram.*, p. 92. “*By this order*, the first nine *rules* accord with *those* which respect the *rules* of concord; and the *remainder include*, though *they* extend beyond the *rules* of government.”—*Murray’s Gram.*, p. 143. “*Own* and *self*, in the plural *selves*, are *joined* to the possessives, *my*, *our*, *thy*, *your*, *his*, *her*, *their*; as, *my own* hand, *myself*, *yourselves*; both of them expressing emphasis or opposition, as, ‘I did it *my own self*,’ that is, *and* no one else; the latter also forming the reciprocal pronoun, as, ‘he hurt *himself*.’”—*Lowth’s Gram.*, p. 25. “A *flowing* copious style, therefore, is required *in* all public speakers; *guarding*, at the *same time*, against such a degree of *diffusion*, as renders *them* languid and tiresome; *which* will always *prove the case*, when they *inculcate* too much, and present the *same thought* under *too many* different views.”—*Blair’s Rhet.*, p.

"I believe your Lordship will agree with me, in the reason why our language is less refined than those of Italy, Spain, or France.' DEAN SWIFT. Even in this short sentence, we may discern an inaccuracy—'why our language is less refined than *those* of Italy, Spain, or France;' putting the pronoun *those* in the plural, when the antecedent substantive to which it refers is in the singular, *our language*."—*Blair's Rhet.*, p. 228. "The sentence might have been made to run much better in this way; 'why our language is less refined than the Italian, Spanish, or French.'"—*Ibid.* "But when arranged in an entire sentence, which they must be to make a complete sense, they show it still more evidently."—*L. Murray's Gram.*, p. 65. "This is a more artificial and refined construction than that, in which the common connective is simply made use of."—

\* One objection to these passage is, that they are *examples* of the very construction which they describe as a *fault*. The first and second sentences ought to have been separated only by a semicolon. This would have made them "*members*" of one and the same sentence. Can it be supported that one "*thought*" is sufficient for two periods, or for what one chooses to point as such, but not for two members of the same period?—G. BROWN.

Some gross allay, some tincture of the man.”—*Dr. Lowth*.

#### LESSON V.—VARIOUS RULES.

“The possessive case is always followed by the noun which is the name of the thing possessed, expressed or understood.”—*Felton’s Gram.*, p. 61; *Revised Edition*, pp. 64 and 86. “Hadmer of Aggstein was as pious, devout, and praying a Christian, as were Nelson, Washington, or Jefferson; or as are Wellington, Tyler, Clay, or Polk.”—H. C. WRIGHT: *Liberator*, Vol. xv, p. 21. “A word in the possessive case is not an independent noun, and cannot stand by its self.”—*Wright’s Gram.*, p. 130. “Mary is not handsome, but she is good-natured, which is better than beauty.”—*St. Quentin’s Gram.*, p. 9. “After the practice of joining words together had ceased, notes of distinction were placed at the end of every word.”—*Murray’s Gram.*, p. 267; *Hallock’s*, 224. “Neither Henry nor Charles dissipate his time.”—*Hallock’s Gram.*, p. 166. “He had taken from the Christians’ abode thirty small castles.”—*Knowles*.”—*Ib.*, p. 61. “In *whatever* character Butler was admitted, is unknown.”—*Ib.*, p. 62. “How is the agent of a passive, and the object of an active verb often left?”—*Ib.*, p. 88. “By *subject* is meant the word of which something is declared of its object.”—*Chandler’s Gram.*, 1821, p. 103. “Care should also be taken that an intransitive verb is not used instead of a transitive: as, I lay, (the bricks) for, I lie down; I raise the house, for I rise; I sit down, for, I set the chair down, &c.”—*Ib.*, p. 114. “On them depend the duration of our Constitution and our country.”—*J. C. Calhoun at Memphis*. “In the present sentence neither the sense nor the measure require *what*.”—*Chandler’s Gram.*, 1821, p. 164. “The Irish thought themselves oppress’d by the Law that forbid them to draw with their Horses Tails.”—*Brightland’s Gram.*, Pref., p. iii. “So *willingly* are adverbs,

qualifying deceives.”—*Cutler’s Gram.*, p. 90. “Epicurus for experiment sake confined himself to a narrower diet than that of the severest prisons.”—*Ib.*, p. 116. “Derivative words are such as are compounded of other words, as common-wealth, good-ness, falsehood.”—*Ib.*, p. 12. “The distinction here insisted on is as old as Aristotle, and should not be lost sight of.”—*Hart’s Gram.*, p. 61. “The Tenses of the Subjunctive and the Potential Moods.”—*Ib.*, p. 80. “A triphthong is a union of three vowels uttered in like manner: as, *uoy* in buoy.”—P. *Davis’s Practical Gram.*, p. xvi. “Common nouns are the names of a species or kind.”—*Ib.*, p. 8. “The superlative degree is a comparison between three or more.”—*Ib.*, p. 14. “An adverb is a word or phrase serving to give an additional idea of a verb, and adjective, article, or another adverb.”—*Ib.*, p. 36. “When several nouns in the possessive case succeed each other, each showing possession of the same noun, it is only necessary to add the sign of the possessive to the last: as, He sells men, women, and *children’s* shoes. Dog. cat, and *tiger’s* feet are digitated.”—*Ib.*, p. 72. “A rail-road is making *should be* A rail-road is *being made*. A school-house is building, *should be* A school-house is *being* built.”—*Ib.*, p. 113. “Auxiliaries are not of themselves verbs; they resemble in their character and use those terminational or other inflections in other languages, *which we are obliged to use in ours* to express the action in the mode, tense, &c., desired.”—*Ib.*, p. 158. “Please hold my horse while I speak to my friend.”—*Ib.*, p. 159. “If I say, ‘Give me *the* book,’ I ask for some *particular* book.”—*Butler’s Practical Gram.*, p. 39. “There are five men here.”—*Ib.*, p. 134. “In the active the object may be omitted; in the passive the name of the agent may be omitted.”—*Ib.*, p. 63. “The Progressive and the Emphatic forms give in each case a different shade of meaning to the verb.”—*Hart’s Gram.*, p. 80. “*That* is a Kind of a Redditive Conjunction, when it answers to *so* and *such*.”—*W. Ward’s Gram.*, p. 152. “He attributes to negligence your failing to succeed in that business.”—*Smart’s Accidence*, p. 36. “Does *will* and *go* express but *our* action?”—*S. Barrett’s Revised Gram.*, p. 58. “Language is the *principle* vehicle of thought. G. BROWN.”—*James Brown’s English Syntax*, p. 3. “*Much* is applied to things weighed or measured; *many*, to those that are numbered. *Elder* and *eldest*, to persons only; *older* and *oldest*, either to persons or things.”—*Bullions, E. Gram.*, p. 20; *Pract. Les.*, 25. “If there are any old maids still extant, while mysogonists are so rare, the fault must be attributable to themselves.”—*Kirkham’s Elocution*, p. 286. “The second method used by the Greeks, has never been the practice of any part of Europe.”—*Sheridan’s Elocution*, p. 64. “Neither consonant, nor vowel, are to be dwelt upon beyond their common quantity, when they close a sentence.”—*Sheridan’s Rhetorical Gram.*, p. 54. “IRONY is a mode of speech expressing a *sense contrary* to that which the speaker or writer intends to convey.”—*Wells’s School Gram.*, 1st Ed., p. 196; 113th Ed., p. 212. “IRONY is *the intentional* use of words *in a sense contrary* to that which the writer or speaker *intends* to convey.”—*Weld’s Gram.*, 2d Ed., p. 215; Imp. Ed., 216. “The persons speaking, or spoken to, are supposed to be present.”—*Wells*, p. 68. “The persons speaking and spoken to are supposed to be present.”—*Murray’s Gram.*, p. 51. “A *Noun* is a word used to express the *name* of an object.”—*Wells’s School Gram.*, pp. 46 and 47. “A *syllable* is a word, or such a part of a word as is uttered by one articulation.”—*Weld’s English Gram.*, p. 15; “*Abridged Ed.*,” p. 16.

“Thus wondrous fair; thyself how wondrous then!  
Unspeakable, who sits above these heavens.”—*Cutler’s Gram.*, p. 131.

“And feel thy sovereign vital lamp; but thou  
Revisitest not these eyes, that roll in vain.”—*Felton’s Gram.*, p. 133.

“Before all temples the upright and pure.”—*Butler’s Gram.*, p. 195.

“In forest wild, in thicket, break or den.”—*Cutler’s Gram.*, p. 130.

“The rogue and fool by fits is fair and wise;  
And e’en the best, by fits, what they despise.”—*Pope’s Ess.*, iii, 233.

## CHAPTER XIV.—QUESTIONS.

### ORDER OF REHEARSAL, AND METHOD OF EXAMINATION.

#### PART THIRD, SYNTAX.

☞ [The following questions, which embrace nearly all the important particulars of the foregoing code of Syntax, are designed not only to direct and facilitate class rehearsals, but also to develop the acquirements of those who may answer them at examinations more public.]

#### LESSON I.—DEFINITIONS.

1. Of what does Syntax treat? 2. What is the *relation* of words? 3. What is the *agreement* of words? 4. What is the *government* of words? 5. What is the *arrangement* of words? 6. What is a *sentence*? 7. How many and what are the *principal parts* of a sentence? 8. What are the other parts called? 9. How many kinds of sentences are there? 10. What is a *simple* sentence? 11. What is a *compound sentence*? 12. What is a *clause*, or *member*? 13. What is a *phrase*? 14. What words must be supplied in parsing? 15. How are the leading principles of syntax presented? 16. In what order are the rules of syntax arranged in this work?

#### LESSON II.—THE RULES.

1. To what do articles relate? 2. What case is employed as the subject of a finite verb? 3. What agreement is required between words in apposition? 4. By what is the possessive case governed? 5. What case does an active-transitive verb or participle govern? 6. What case is put after a verb or participle not transitive? 7. What case do prepositions govern? 8. When, and in what case, is a noun or pronoun put absolute in English? 9. To what do adjectives relate? 10. How does a pronoun agree with its antecedent? 11. How does a pronoun agree with a collective noun? 12. How does a pronoun agree with joint antecedents? 13. How does a pronoun agree with disjunct antecedents?

#### LESSON III.—THE RULES.

14. How does a finite verb agree with its subject, or nominative? 15. How does a verb agree with a collective noun? 16. How does a verb agree with joint nominatives? 17. How does a verb agree with disjunctive nominatives? 18. What governs the infinitive mood? 19. What verbs take the infinitive after them without the preposition *to*? 20. What is the regular construction of participles, as such? 21. To what do adverbs relate? 22. What do conjunctions connect? 23. What is the use of prepositions? 24. What is the syntax of interjections?

#### LESSON IV.—THE RULES.

1. What are the several titles, or subjects, of the twenty-four rules of syntax? 2. What says Rule 1st of *Articles*? 3. What says Rule 2d of *Nominatives*? 4. What says Rule 3d of *Apposition*? 5. What says Rule 4th of *Possessives*? 6. What says Rule 5th of *Objectives*? 7. What says Rule 6th of *Same Cases*? 8. What says Rule 7th of *Objectives*? 9. What says Rule 8th of the *Nominative Absolute*? 10. What says Rule 9th of *Adjectives*? 11. What says Rule 10th of *Pronouns*? 12. What says Rule 11th of *Pronouns*? 13. What says Rule 12th of

*Pronouns*? 14. What says Rule 13th of *Pronouns*? 15. What says Rule 14th of *Finite Verbs*? 16. What says Rule 15th of *Finite Verbs*? 17. What says Rule 16th of *Finite Verbs*? 18. What says Rule 17th of *Finite Verbs*? 19. What says Rule 18th of *Infinitives*? 20. What says Rule 19th of *Infinitives*? 21. What says Rule 20th of *Participles*? 22. What says Rule 21st of *Adverbs*? 23. What says Rule 22d of *Conjunctions*? 24. What says Rule 23d of *Prepositions*? 25. What says Rule 24th of *Interjections*?

#### LESSON V.—THE ANALYZING OF SENTENCES.

1. What is it, “to analyze a sentence?” 2. What are the component parts of a sentence? 3. Can all sentences be divided into clauses? 4. Are there different methods of analysis, which may be useful? 5. What is the first method of analysis, according to this code of syntax? 6. How is the following example analyzed by this method? “Even the Atheist, who tells us that the universe is self-existent and indestructible—even he, who, instead of seeing the traces of a manifold wisdom in its manifold varieties, sees nothing in them all but the exquisite structures and the lofty dimensions of materialism—even he, who would despoil creation of its God, cannot look upon its golden suns, and their accompanying systems, without the solemn impression of a magnificence that fixes and overpowers him.” 7. What is the second method of analysis? 8. How is the following example analyzed by this method? “Fear naturally quickens the flight of guilt. Rasselas could not catch the fugitive, with his utmost efforts; but, resolving to weary, by perseverance, him whom he could not surpass in speed, he pressed on till the foot of the mountain stopped his course.” 9. What is the third method of analysis? 10. How is the following example analyzed by this method? “Such is the emptiness of human enjoyment, that we are always impatient of the present. Attainment is followed by neglect, and possession, by disgust. Few moments are more pleasing than those in which the mind is concerting measures for a new undertaking. From the first hint that wakens the fancy, to the hour of actual execution, all is improvement and progress, triumph and felicity.” 11. What is the fourth method of analysis? 12. How are the following sentences analyzed by this method? (1.) “*Swift* would say, ‘The thing has not life enough in it to keep it sweet;’ Johnson, ‘The creature possesses not vitality sufficient to preserve it from putrefaction.’” (2.) “There is one Being to whom we can look with a perfect conviction of finding that security, which nothing about us can give, and which nothing about us can take away.” 13. What is said of the fifth method of analysis?

[Now, if the teacher choose to make use of any other method of analysis than full syntactical parsing, he may direct his pupils to turn to the next selection of examples, or to any other accurate sentences, and analyze them according to the method chosen.]

#### LESSON VI.—OF PARSING.

1. Why is it necessary to observe *the sense*, or *meaning*, of what we parse? 2. What is required of the pupil in syntactical parsing? 3. How is the following long example parsed in Praxis XII? “A young man studious to know his duty, and honestly bent on doing it, will find himself led away from the sin or folly in which the multitude thoughtlessly indulge themselves; but, ah! poor fallen human nature! what conflicts are thy portion, when inclination and habit—a rebel and a traitor—exert their sway against our only saving principle!”

[Now parse, in like manner, and with no needless deviations from the prescribed forms, the ten lessons of the *Twelfth Praxis*; or such parts of those lessons as the teacher may choose.]

#### LESSON VII.—THE RULES.

1. In what chapter are the rules of syntax first presented? 2. In what praxis are these rules first applied in parsing? 3. Which of the ten parts of speech is left without any rule of syntax? 4. How many and which of the ten have but one rule apiece? 5. Then, of the twenty-four rules, how many remain for the other three parts,—nouns, pronouns, and verbs? 6. How many of these seventeen speak of *cases*, and therefore apply equally to nouns and pronouns? 7. Which are these seven? 8. How many rules are there for the agreement of pronouns with their antecedents, and which are they? 9. How many rules are there for finite verbs, and which are they? 10. How many are there for infinitives, and which are they? 11. What ten chapters of the foregoing code of syntax treat of the ten parts of speech in their order? 12. Besides the rules and their examples, what sorts of matters are introduced into these chapters? 13. How many of the twenty-four rules of syntax are used both in parsing and in correcting? 14. Of what use are those which cannot be violated in practice? 15. How many such rules are there among the twenty-four? 16. How many and what parts of speech are usually parsed by such rules only?

#### LESSON VIII.—THE NOTES.

1. What is the essential character of the *Notes* which are placed under the rules of syntax? 2. Are the different forms of false construction as numerous as these notes? 3. Which exercise brings into use the greater number of grammatical principles, parsing or correcting? 4. Are the principles or doctrines which are applied in these different exercises usually the same, or are they different? 5. In etymological parsing, we use about seventy *definitions*; can these be used also in the correcting of errors? 6. For the correcting of false syntax, we have a hundred and fifty-two *notes*; can these be used also in parsing? 7. How many of the rules have no such notes under them? 8. What order is observed in the placing of these notes, if some rules have many, and others few or none? 9. How many of them are under the rule for *articles*? 10. How many of them refer to the construction of *nouns*? 11. How many of them belong to the syntax of *adjectives*? 12. How many of them treat of *pronouns*? 13. How many of them regard the use of *verbs*? 14. How many of them pertain to the syntax of *participles*? 15. How many of them relate to the construction of *adverbs*? 16. How many of them show the application of *conjunctions*? 17. How many of them expose errors in the use of *prepositions*? 18. How many of them speak of *interjections*?

[Now correct orally the examples of *False Syntax* placed under the several Rules and Notes; or so many texts under each head as the teacher may think sufficient.]

#### LESSON IX.—THE EXCEPTIONS.

1. In what exercise can there be occasion to cite and apply the *Exceptions* to the rules of syntax? 2. Are there exceptions to all the rules, or to how many? 3. Are there exceptions in reference to all the parts of speech, or to how many of the ten? 4. Do articles always relate to nouns? 5. Can the subject of a finite verb be in any other case than the nominative? 6. Are words in apposition always supposed to be in the same case? 7. Is the possessive case always governed by the name of the thing possessed? 8. Can an active-transitive verb govern any other case than the objective? 9. Can a verb or participle not

transitive take any other case after it than that which precedes it? 10. Can a preposition, in English, govern any other case than the objective? 11. Can “the case absolute,” in English, be any other than the nominative? 12. Does every adjective “belong to a substantive, expressed or understood,” as Murray avers? 13. Can an adjective ever relate to any thing else than a noun or pronoun? 14. Can an adjective ever be used without relation to any noun, pronoun, or other subject? 15. Can an adjective ever be substituted for its kindred abstract noun? 16. Are the person, number, and gender of a pronoun always determined by an antecedent? 17. What pronoun is sometimes applied to animals so as not to distinguish their sex? 18. What pronoun is sometimes an expletive, and sometimes used with reference to an infinitive following it?

#### LESSON X.—THE EXCEPTIONS.

19. Does a singular antecedent ever admit of a plural pronoun? 20. Can a pronoun agree with its antecedent in one sense and not in an other? 21. If the antecedent is a collective noun conveying the idea of plurality, must the pronoun always be plural? 22. If there are two or more antecedents connected by *and*, must the pronoun always be plural? 23. If there are antecedents connected by *or* or *nor*, is the pronoun always to take them separately? 24. Must a finite verb always agree with its nominative in number and person? 25. If the nominative is a collective noun conveying the idea of plurality, must the verb always be plural? 26. If there are two or more nominatives connected by *and*, must the verb always be plural? 27. If there are nominatives connected by *or* or *nor*, is the verb always to refer to them separately? 28. Does the preposition *to* before the infinitive always govern the verb? 29. Can the preposition *to* govern or precede any other mood than the infinitive? 30. Is the preposition *to* “understood” after *bid*, *dare*, *feel*, and so forth, where it is “superfluous and improper?” 31. How many and what exceptions are there to rule 20th, concerning participles? 32. How many and what exceptions are there to the rule for adverbs? 33. How many and what exceptions are there to the rule for conjunctions? 34. How many and what exceptions are there to the rule for prepositions? 35. Is there any exception to the 24th rule, concerning interjections?

#### LESSON XI.—THE OBSERVATIONS.

1. How many of the ten parts of speech in English are in general incapable of any agreement? 2. Can there be a syntactical relation of words without either agreement or government? 3. Is there ever any needful agreement between unrelated words? 4. Is the mere relation of words according to the sense an element of much importance in English syntax? 5. What parts of speech have no other syntactical property than that of simple relation? 6. What rules of relation are commonly found in grammars? 7. Of what parts is syntax commonly said to consist? 8. Is it common to find in grammars, the rules of syntax well adapted to their purpose? 9. Can you specify some that appear to be faulty? 10. Wherein consists *the truth* of grammatical doctrine, and how can one judge of what others teach? 11. Do those who speak of syntax as being divided into two parts, Concord and Government, commonly adhere to such division? 12. What false concords and false governments are cited in Obs. 7th of the first chapter? 13. Is it often expedient to join in the same rule such principles as must always be applied separately? 14. When one can condense several different principles into one rule, is it not expedient to do so? 15. Is it ever convenient to have one and the same rule applicable to different parts of speech? 16. Is it ever convenient to have rules divided into parts, so as to be double or triple in their form? 17. What instance of extravagant innovation is given in Obs. 12th of the first chapter?

## LESSON XII.—THE OBSERVATIONS.

18. Can a uniform series of good grammars, Latin, Greek, English, &c., be produced by a mere revising of one defective book for each language? 19. Whose are “The Principles of English Grammar” which Dr. Bullions has republished with alterations, “on the plan of Murray’s Grammar?” 20. Can praise and success entitle to critical notice works in themselves unworthy of it? 21. Do the Latin grammarians agree in their enumeration of the concords in Latin? 22. What is said in Obs. 16th, of the plan of mixing syntax with etymology? 23. Do not the principles of etymology affect those of syntax? 24. Can any words agree, or disagree, except in something that belongs to each of them? 25. How many and what parts of speech are concerned in government? 26. Are rules of government to be applied to the governing words, or to the governed? 27. What are gerundives? 28. How many and what are the principles of syntax which belong to the head of simple relation? 29. How many agreements, or concords, are there in English syntax? 30. How many rules of government are there in the best Latin grammars? 31. What fault is there in the usual distribution of these rules? 32. How many and what are the governments in English syntax? 33. Can the parsing of words be varied by any transposition which does not change their import? 34. Can the parsing of words be affected by the parser’s notion of what constitutes a simple sentence? 35. What explanation of simple and compound sentences is cited from Dr. Wilson, in Obs. 25? 36. What notion had Dr. Adam of simple and compound sentences? 37. Is this doctrine consistent either with itself or with Wilson’s? 38. How can one’s notion of *ellipsis* affect his mode of parsing, and his distinction of sentences as simple or compound?

## LESSON XIII.—ARTICLES.

1. Can one noun have more than one article? 2. Can one article relate to more than one noun? 3. Why cannot the omission of an article constitute a proper ellipsis? 4. What is the position of the article with respect to its noun? 5. What is the usual position of the article with respect to an adjective and a noun? 6. Can the relative position of the article and adjective be a matter of indifference? 7. What adjectives exclude, or supersede, the article? 8. What adjectives precede the article? 9. What four adverbs affect the position of the article and adjective? 10. Do other adverbs come between the article and the adjective? 11. Can any of the definitives which preclude *an* or *a*, be used with the adjective *one*? 12. When the adjective follows its noun, where stands the article? 13. Can the article in English, ever be placed after its noun? 14. What is the effect of the word *the* before comparatives and superlatives? 15. What article may sometimes be used in lieu of a possessive pronoun? 16. Is the article *an* or *a* always supposed to imply unity? 17. Respecting *an* or *a*, how does present usage differ from the usage of ancient writers? 18. Can the insertion or omission of an article greatly affect the import of a sentence? 19. By a repetition of the article before two or more adjectives, what other repetition is implied? 20. How do we sometimes avoid such repetition? 21. Can there ever be an implied repetition of the noun when no article is used?

## LESSON XIV.—NOUNS, OR CASES.

1. In how many different ways can the nominative case be used? 2. What is the usual position of the nominative and verb, and when is it varied? 3. With what nominatives of the second person, does the imperative verb agree? 4. Why is it thought improper to put a noun in two cases at once? 5. What case in Latin and Greek is reckoned *the subject* of the infinitive mood? 6. Can this, in general, be literally imitated in English? 7. Do any English

authors adopt the Latin doctrine of the accusative (or objective) before the infinitive? 8. Is the objective, when it occurs before the infinitive in English, usually governed by some verb, participle, or preposition? 9. What is our nearest approach to the Latin construction of the accusative before the infinitive? 10. What is *apposition*, and from whom did it receive this name? 11. Is there a construction of like cases, that is not apposition? 12. To which of the apposite terms is the rule for apposition to be applied? 13. Are words in apposition always to be parsed separately? 14. Wherein are the common rule and definition of apposition faulty? 15. Can the explanatory word ever be placed first? 16. Is it ever indifferent, which word be called the principal, and which the explanatory term? 17. Why cannot two nouns, each having the possessive sign, be put in apposition with each other? 18. Where must the sign of possession be put, when two or more possessives are in apposition? 19. Is it compatible with apposition to supply between the words a relative and a verb; as, "At Mr. Smith's [*who is*] the bookseller?" 20. How can a noun be, or seem to be, in apposition with a possessive pronoun? 21. What construction is produced by the *repetition* of a noun or pronoun? 22. What is the construction of a noun, when it emphatically repeats the idea suggested by a preceding sentence?

#### LESSON XV.—NOUNS, OR CASES.

23. Can words differing in number be in apposition with each other? 24. What is the usual construction of *each other* and *one an other*? 25. Is there any argument from analogy for taking *each other* and *one an other* for compounds? 26. Do we often put proper nouns in apposition with appellatives? 27. What preposition is often put between nouns that signify the same thing? 28. When is an active verb followed by two words in apposition? 29. Does apposition require any other agreement than that of case? 30. What three modes of construction appear like exceptions to Rule 4th? 31. In the phrase, "For *David* my servant's sake," which word is governed by *sake*, and which is to be parsed by the rule of apposition? 32. In the sentence, "It is *man's* to err," what is supposed to govern *man's*? 33. Does the possessive case admit of any abstract sense or construction? 34. Why is it reasonable to limit the government of the possessive to nouns only, or to words taken substantive? 35. Does the possessive case before a real participle denote the possessor of something? 36. What two great authors differ in regard to the correctness of the phrases, "*upon the rule's being observed*," and "*of its being neglected*?" 37. Is either of them right in his argument? 38. Is the distinction between the participial noun and the participle well preserved by Murray and his amenders? 39. Who invented the doctrine, that a participle and its adjuncts may be used as "*one name*" and in that capacity govern the possessive? 40. Have any popular authors adopted this doctrine? 41. Is the doctrine well sustained by its adopters, or is it consistent with the analogy of general grammar? 42. When one doubts whether a participle ought to be the governing word or the adjunct,—that is, whether he ought to use the possessive case before it or the objective,—what shall he do? 43. What is objected to the sentences in which participles govern the possessive case, and particularly to the examples given by Priestley, Murray, and others, to prove such a construction right? 44. Do the teachers of this doctrine agree among themselves? 45. How does the author of this work generally dispose of such government? 46. Does he positively determine, that the participle should *never* be allowed to govern the possessive case?

#### LESSON XVI.—NOUNS, OR CASES.

47. Are the distinctions of voice and of time as much regarded in participial nouns as in participles? 48. Why cannot an omission of the possessive sign be accounted a true *ellipsis*? 49. What is the usual position of the possessive case, and what exceptions are

there? 50. In what other form can the meaning of the possessive case be expressed? 51. Is the possessive often governed by what is not expressed? 52. Does every possessive sign imply a separate governing noun? 53. How do compounds take the sign of possession? 54. Do we put the sign of possession always and only where the two terms of the possessive relation meet? 55. Can the possessive sign be ever rightly added to a separate adjective? 56. What is said of the omission of *s* from the possessive singular on account of its hissing sound? 57. What errors do Kirkham, Smith, and others, teach concerning the possessive singular? 58. Why is Murray's rule for the possessive case objectionable? 59. Do compounds embracing the possessive case appear to be written with sufficient uniformity? 60. What rules for nouns coming together are inserted in Obs. 31st on Rule 4th? 61. Does the compounding of words necessarily preclude their separate use? 62. Is there a difference worth notice, between such terms or things as *heart-ease* and *heart's-ease*; a *harelip* and a *hare's lip*; a *headman* and a *headsman*; a *lady's-slipper* and a *lady's slipper*? 63. Where usage is utterly unsettled, what guidance should be sought? 64. What peculiarities are noticed in regard to the noun *side*? 65. What peculiarities has the possessive case in regard to correlatives? 66. What is remarked of the possessive relation between time and action? 67. What is observed of nouns of weight, measure, or time, coming immediately together?

#### LESSON XVII.—NOUNS, OR CASES.

68. Are there any exceptions or objections to the old rule, "Active verbs govern the objective case?" 69. Of how many different constructions is the objective case susceptible? 70. What is the usual position of the objective case, and what exceptions are there? 71. Can any thing but the governing of an objective noun or pronoun make an active verb transitive? 72. In the sentence, "What *have* I to *do* with thee?" how are *have* and *do* to be parsed? 73. Can infinitives, participles, phrases, sentences, and parts of sentences, be really "in the objective case?" 74. In the sentence, "I *know why* she blushed," how is *know* to be parsed? 75. In the sentence, "I *know that* Messiah cometh," how are *know* and *that* to be parsed? 76. In the sentence, "And *Simon* he surnamed *Peter*", how are *Simon* and *Peter* to be parsed? 77. In such sentences as, "I paid *him* the *money*,"—"He asked *them* the *question*," how are the two objectives to be parsed? 78. Does any verb in English ever govern two objectives that are not coupled? 79. Are there any of our passive verbs that can properly govern the objective case? 80. Is not our language like the Latin, in respect to verbs governing two cases, and passives retaining the latter? 81. How do our grammarians now dispose of what remains to us of the old Saxon dative case? 82. Do any reputable writers allow passive verbs to govern the objective case? 83. What says Lindley Murray about this passive government? 84. Why is the position, "Active verbs govern the objective case," of no use to the composer? 85. On what is the construction of *same cases* founded? 86. Does this construction admit of any variety in the position of the words? 87. Does an ellipsis of the verb or participle change this construction into apposition? 88. Is it ever right to put both terms before the verb? 89. What kinds of words can take different cases after them? 90. Can a participle which is governed by a preposition, have a case after it which is governed by neither? 91. How is the word *man* to be parsed in the following example? "The atrocious *crime of being* a young *man*, I shall neither attempt to palliate, nor deny."

#### LESSON XVIII.—NOUNS, OR CASES.

92. In what kinds of examples do we meet with a doubtful case after a participle? 93. Is the case after the verb reckoned doubtful, when the subject going before is a sentence,

or something not declinable by cases? 94. In the sentence, "It is certainly as easy to be a *scholar*, as a *gamester*," what is the case of *scholar* and *gamester*, and why? 95. Are there any verbs that sometimes connect like cases, and sometimes govern the objective? 96. What faults are there in the rules given by *Lowth*, *Murray*, *Smith*, and others, for the construction of *like cases*? 97. Can a preposition ever govern any thing else than a noun or a pronoun? 98. Is every thing that a preposition governs, necessarily supposed to have cases, and to be in the objective? 99. Why or wherein is the common rule, "Prepositions govern the objective case," defective or insufficient? 100. In such phrases as *in vain*, *at first*, *in particular*, how is the adjective to be parsed? 101. In such expressions as, "I give it up *for lost*,"—"I take it *for granted*," how is the participle to be parsed? 102. In such phrases as, *at once*, *from thence*, *till now*, how is the latter word to be parsed? 103. What peculiarity is there in the construction of nouns of time, measure, distance, or value? 104. What is observed of the words *like*, *near*, and *nigh*? 105. What is observed of the word *worth*? 106. According to Johnson and Tooke, what is *worth*, in such phrases as, "Wo *worth* the day?" 107. After verbs of *giving*, *paying*, and the like, what ellipsis is apt to occur? 108. What is observed of the nouns used in dates? 109. What defect is observable in the common rules for "the case absolute," or "the nominative independent?" 110. In how many ways is the nominative case put absolute? 111. What participle is often understood after nouns put absolute? 112. In how many ways can nouns of the second person be employed? 113. What is said of nouns used in exclamations, or in mottoes and abbreviated sayings? 114. What is observed of such phrases as, "*hand to hand*,"—"face to face?" 115. What authors deny the existence of "the case absolute?"

#### LESSON XIX.—ADJECTIVES.

1. Does the adjective frequently relate to what is not uttered with it? 2. What is observed of those rules which suppose every adjective to relate to some noun? 3. To what does the adjective usually relate, when it stands alone after a finite verb? 4. Where is the noun or pronoun, when an adjective follows an infinitive or a participle? 5. What is observed of adjectives preceded by *the* and used elliptically? 6. What is said of the position of the adjective? 7. In what instances is the adjective placed after its noun? 8. In what instances may the adjective either precede or follow the noun? 9. What are the construction and import of the phrases, *in particular*, *in general*, and the like? 10. What is said of adjectives as agreeing or disagreeing with their nouns in number? 11. What is observed of *this* and *that* as referring to two nouns connected? 12. What is remarked of the use of adjectives for adverbs? 13. How can one determine whether an adjective or an adverb is required? 14. What is remarked of the placing of two or more adjectives before one noun? 15. How can one avoid the ambiguity which Dr. Priestley notices in the use of the adjective *no*?

#### LESSON XX.—PRONOUNS.

1. Can such pronouns as stand for things not named, be said to agree with the nouns for which they are substituted? 2. Is the pronoun *we* singular when it is used in lieu of *I*? 3. Is the pronoun *you* singular when used in lieu of *thou* or *thee*? 4. What is there remarkable in the construction of *ourself* and *yourself*? 5. Of what person, number, and gender, is the relative, when put after such terms of address as, *your Majesty*, *your Highness*, *your Lordship*, *your Honour*? 6. How does the English fashion of putting *you* for *thou*, compare with the usage of the French, and of other nations? 7. Do any imagine these fashionable substitutions to be morally objectionable? 8. What figures of rhetoric are liable to affect the agreement of pronouns with their antecedents? 9. How does the

pronoun agree with its noun in cases of personification? 10. How does the pronoun agree with its noun in cases of metaphor? 11. How does the pronoun agree with its noun in cases of metonymy? 12. How does the pronoun agree with its noun in cases of synecdoche? 13. What is the usual position of pronouns, and what exceptions are there? 14. When a pronoun represents a phrase or sentence, of what person, number, and gender is it? 15. Under what circumstances can a pronoun agree with either of two antecedents? 16. With what does the relative agree when an other word is introduced by the pronoun *it*? 17. In the sentence, "*It* is useless to complain," what does *it* represent? 18. How are relative and interrogative pronouns placed? 19. What are the chief constructional peculiarities of the relative pronouns? 20. Why does the author discard the two special rules commonly given for the construction of relatives?

#### LESSON XXI.—PRONOUNS.

21. To what part of speech is the greatest number of rules applied in parsing? 22. Of the twenty-four rules in this work, how many are applicable to pronouns? 23. Of the seven rules for cases, how many are applicable to relatives and interrogatives? 24. What is remarked of the ellipsis or omission of the relative? 25. What is said of the suppression of the antecedent? 26. What is noted of the word *which*, as applied to persons? 27. What relative is applied to a proper noun taken merely as a name? 28. When do we employ the same relative in successive clauses? 29. What odd use is sometimes made of the pronoun *your*? 30. Under what *figure* of syntax did the old grammarians rank the plural construction of a noun of multitude? 31. Does a collective noun with a singular definitive before it ever admit of a plural verb or pronoun? 32. Do collective nouns generally admit of being made literally plural? 33. When joint antecedents are of different persons, with which person does the pronoun agree? 34. When joint antecedents differ in gender, of what gender is the pronoun? 35. Why is it wrong to say, "The first has a lenis, *and* the other an asper over *them*?" 36. Can nouns without *and* be taken jointly, as if they had it? 37. Can singular antecedents be so suggested as to require a plural pronoun, when only one of them is uttered? 38. Why do singular antecedents connected by *or* or *nor* appear to require a singular pronoun? 39. Can different antecedents connected by *or* be accurately represented by differing pronouns connected in the same way? 40. Why are we apt to use a plural pronoun after antecedents of different genders? 41. Do the Latin grammars teach the same doctrine as the English, concerning nominatives or antecedents connected disjunctively?

#### LESSON XXII.—VERBS.

1. What is necessary to every finite verb? 2. What is remarked of such examples as this: "The *Pleasures* of Memory *was* published in 1702?" 3. What is to be done with "*Thinks I* to myself," and the like? 4. Is it right to say with Smith, "Every hundred *years constitutes* a century?" 5. What needless ellipses both of nominatives and of verbs are commonly supposed by our grammarians? 6. What actual ellipsis usually occurs with the imperative mood? 7. What is observed concerning the place of the verb? 8. What besides a noun or a pronoun may be made the subject of a verb? 9. What is remarked of the faulty omission of the pronoun *it* before the verb? 10. When an infinitive phrase is made the subject of a verb, do the words remain adjuncts, or are they abstract? 11. How can we introduce a noun or pronoun before the infinitive, and still make the whole phrase the subject of a finite verb? 12. Can an objective before the infinitive become "the subject of the affirmation?" 13. In making a phrase the subject of a verb, do we produce an exception to Rule 14th? 14. Why is it wrong to say, with Dr. Ash, "The king and queen

appearing in public *was* the cause of my going?” 15. What inconsistency is found in Murray, with reference to his “*nominative sentences*?” 16. What is Dr. Webster’s ninth rule of syntax? 17. Why did Murray think all Webster’s examples under this rule bad English? 18. Why are both parties wrong in this instance? 19. What strange error is taught by Cobbett, and by Wright, in regard to the relative and its verb? 20. Is it demonstrable that verbs often agree with relatives? 21. What is observed of the agreement of verbs in interrogative sentences? 22. Do we ever find the subjunctive mood put after a relative pronoun? 23. What is remarked of the difference between the indicative and the subjunctive mood, and of the limits of the latter?

#### LESSON XXIII.—VERBS.

24. In respect to collective nouns, how is it generally determined, whether they convey the idea of plurality or not? 25. What is stated of the rules of Adam, Lowth, Murray, and Kirkham, concerning collective nouns? 26. What is Nixon’s notion of the construction of the verb and collective noun? 27. Does this author appear to have gained “a *clear idea* of the nature of a collective noun?” 28. What great difficulty does Murray acknowledge concerning “nouns of multitude?” 29. Does Murray’s notion, that collective nouns are of different sorts, appear to be consistent or warrantable? 30. Can words that agree with the same collective noun, be of different numbers? 31. What is observed of collective nouns used partitively? 32. Which are the most apt to be taken plurally, collections of persons, or collections of things? 33. Can a collective noun, as such, take a plural adjective before it? 34. What is observed of the expressions, *these people*, *these gentry*, *these folk*? 35. What is observed of sentences like the following, in which there seems to be no nominative: “There *are* from eight to twelve professors?” 36. What rule does Dr. Webster give for such examples as the following: “There *was* more than a hundred and fifty thousand pounds?” 37. What grammarians teach, that two or more nouns connected by *and*, “always require the verb or pronoun to which they refer, to be in the plural number?” 38. Does Murray acknowledge or furnish any exceptions to this doctrine? 39. On what principle can one justify such an example as this: “*All work and no play, makes* Jack a dull boy?” 40. What is remarked of instances like the following: “Prior’s *Henry and Emma contains* an other beautiful example?” 41. What is said of the suppression of the conjunction *and*? 42. When the speaker changes his nominative, to take a stronger one, what concord has the verb? 43. When two or more nominatives connected by *and* explain a preceding one, what agreement has the verb? 44. What grammarian approves of such expressions as, “Two and two *is* four?” 45. What is observed of verbs that agree with the nearest nominative, and are understood to the rest? 46. When the nominatives connected are of different persons, of what person is the verb?

#### LESSON XXIV.—VERBS.

47. What is the syntax of the verb, when one of its nominatives is expressed, and an other or others implied? 48. What is the syntax of the verb, when there are nominatives connected by *as*? 49. What is the construction when two nominatives are connected by *as well as*, *but*, or *save*? 50. Can words connected by *with* be properly used as joint nominatives? 51. Does the analogy of other languages with ours prove any thing on this point? 52. What does Cobbett say about *with* put for *and*? 53. What is the construction of such expressions as this: “A torch, *snuff* and *all*, *goes* out in a moment?” 54. Does our rule for the verb and disjunct nominatives derive confirmation from the Latin and Greek syntax? 55. Why do collective nouns singular, when connected by *or* or *nor*, admit of a plural verb? 56. In the expression, “*I, thou, or he, may affirm*,” of what person and number

is the verb? 57. Who says, “the verb agrees with *the last nominative*?” 58. What authors prefer “*the nearest person*,” and “*the plural number*?” 59. What authors prefer “the *nearest nominative*, whether singular or plural?” 60. What author declares it improper ever to connect by *or* or *nor* any nominatives that require different forms of the verb? 61. What is Cobbett’s “*clear principle*” on this head? 62. Can a zeugma of the verb be proved to be right, in spite of these authorities? 63. When a verb has nominatives of different persons or numbers, connected by *or* or *nor*, with which of them does it *commonly* agree? 64. When does it agree with the remoter nominative? 65. When a noun is implied in an adjective of a different number, which word is regarded in the formation of the verb? 66. What is remarked concerning the place of the pronoun of the first person singular? 67. When verbs are connected by *and*, *or*, or *nor*, do they necessarily agree with the same nominative? 68. Why is the thirteenth rule of the author’s Institutes and First Lines not retained as a rule in this work? 69. Are verbs often connected without agreeing in mood, tense, and form?

#### LESSON XXV.—VERBS.

70. What particular convenience do we find in having most of our tenses composed of separable words? 71. Is the connecting of verbs elliptically, or by parts, anything peculiar to our language? 72. What faults appear in the teaching of our grammarians concerning *do* used as a “substitute for other verbs?” 73. What notions have been entertained concerning the word *to* as used before the infinitive verb? 74. How does Dr. Ash parse *to* before the infinitive? 75. What grammarians have taught that the preposition *to* governs the infinitive mood? 76. Does Lowth agree with Murray in the anomaly of supposing *to* a preposition that governs nothing? 77. Why do those teach just as inconsistently, who forbear to call the *to* a preposition? 78. What objections are there to the rule, with its exceptions, “One verb governs another in the infinitive mood?” 79. What large exception to this rule has been recently discovered by Dr. Bullions? 80. Are the countless examples of this exception truly elliptical? 81. Is the infinitive ever governed by a preposition in French, Spanish, or Italian? 82. What whimsical account of the English infinitive is given by Nixon? 83. How was the infinitive expressed in the Anglo-Saxon of the eleventh century? 84. What does Richard Johnson infer from the fact that the Latin infinitive is sometimes governed by a preposition? 85. What reasons can be adduced to show that the infinitive is not a noun? 86. How can it be proved that *to* before the infinitive is a preposition? 87. What does Dr. Wilson say of the character and *import* of the infinitive? 88. To what other terms can the infinitive be connected? 89. What is the infinitive, and for what things may it stand? 90. Do these ten heads embrace all the uses of the infinitive? 91. What is observed of Murray’s “*infinitive made absolute*?” 92. What is said of the position of the infinitive? 93. Is the infinitive ever liable to be misplaced?

#### LESSON XXVI.—VERBS.

94. What is observed of the frequent ellipses of the verb *to be*, supposed by Allen and others? 95. What is said of the suppression of *to* and the insertion of *be*; as, “To make himself *be* heard?” 96. Why is it necessary to use the sign *to* before an abstract infinitive, where it shows no relation? 97. What is observed concerning the distinction of *voice* in the simple infinitive and the first participle? 98. What do our grammarians teach concerning the omission of *to* before the infinitive, after *bid*, *dare*, *feel*, &c.? 99. How do Ingersoll, Kirkham, and Smith, agree with their master Murray, concerning such examples as, “*Let me go*?” 100. What is affirmed of the difficulties of parsing the infinitive according to the code of Murray? 101. How do Nutting, Kirkham, Nixon, Cooper, and Sanborn, agree with

Murray, or with one an other, in pointing out what governs the infinitive? 102. What do Murray and others mean by “*neuter verbs*,” when they tell us that the taking of the infinitive without *to* “extends only to active and neuter verbs?” 103. How is the infinitive used after *bid*? 104. How, after *dare*? 105. How, after *feel*? 106. How, after *hear*? 107. How, after *let*? 108. How, after *make*? 109. How, after *need*? 110. Is *need* ever an auxiliary? 111. What errors are taught by Greenleaf concerning *dare* and *need* or *needs*? 112. What is said of *see*, as governing the infinitive? 113. Do any other verbs, besides these eight, take the infinitive after them without *to*? 114. How is the infinitive used after *have*, *help*, and *find*? 115. When two or more infinitives occur in the same construction, must *to* be used with each? 116. What is said of the sign *to* after *than* or *as*?

#### LESSON XXVII.—PARTICIPLES.

1. What questionable uses of participles are commonly admitted by grammarians? 2. Why does the author incline to condemn these peculiarities? 3. What is observed of the multiplicity of uses to which the participle in *ing* may be turned? 4. What is said of the participles which some suppose to be put absolute? 5. How are participles placed? 6. What is said of the transitive use of such words as *unbecoming*? 7. What distinction, in respect to government, is to be observed between a participle and a participial noun? 8. What shall we do when *of* after the participial noun is objectionable? 9. What is said of the correction of those examples in which a needless article or possessive is put before the participle? 10. What is stated of the retaining of adverbs with participial nouns? 11. Can words having the form of the first participle be nouns, and clearly known to be such, when they have no adjuncts? 12. What strictures are made on Murray, Lennie, and Bullions, with reference to examples in which an infinitive follows the participial noun? 13. In what instances is the first participle equivalent to the infinitive? 14. What is said of certain infinitives supposed to be erroneously put for participles? 15. What verbs take the participle after them, and not the infinitive? 16. What is said of those examples in which participles seem to be made the objects of verbs? 17. What is said of the teaching of Murray and others, that, “The participle with its adjuncts may be considered as a *substantive phrase*?” 18. How does the English participle compare with the Latin gerund? 19. How do Dr. Adam and others suppose “the gerund in English” to become a “substantive,” or noun? 20. How does the French construction of participles and infinitives compare with the English?

#### LESSON XXVIII.—PARTICIPLES.

21. What difference does it make, whether we use the possessive case before words in *ing*, or not? 22. What is said of the distinguishing or confounding of different parts of speech, such as verbs, participles, and nouns? 23. With how many other parts of speech does W. Allen confound the participle? 24. How is the distinguishing of the participle from the verbal noun inculcated by Allen, and their difference of meaning by Murray? 25. Is it pretended that the authorities and reasons which oppose the mixed construction of participles, are sufficient to prove such usage altogether inadmissible? 26. Is it proper to teach, in general terms, that the noun or pronoun which limits the meaning of a participle should be put in the possessive case? 27. What is remarked of different cases used indiscriminately before the participle or verbal noun? 28. What say Crombie and others about this disputable phraseology? 29. What says Brown of this their teaching? 30. How do Priestley and others pretend to distinguish between the participial and the substantive use of verbals in *ing*? 31. What does Brown say of this doctrine? 32. If when a participle

becomes an adjective it drops its regimen, should it not also drop it on becoming a noun? 33. Where the sense admits of a choice of construction in respect to the participle, is not attention due to the analogy of general grammar? 34. Does it appear that nouns before participles are less frequently subjected to their government than pronouns? 35. Why must a grammarian discriminate between idioms, or peculiarities, and the common mode of expression? 36. Is the Latin gerund, like the verbal in *ing*, sometimes active, sometimes passive; and when the former governs the genitive, do we imitate the idiom in English? 37. Is it agreed among grammarians, that the Latin gerund may govern the genitive of the agent? 38. What distinction between the participial and the substantive use of verbals in *ing* do Crombie and others propose to make? 39. How does this accord with the views of Murray, Lowth, Adam, and Brown? 40. How does Hiley treat the English participle? 41. What further is remarked concerning false teaching in relation to participles?

#### LESSON XXIX.—ADVERBS.

1. What is replied to Dr. Adam's suggestion, "Adverbs sometimes qualify substantives?" 2. Do not adverbs sometimes relate to participial nouns? 3. If an adverbial word relates directly to a noun or pronoun, does not that fact constitute it an adjective? 4. Are such expressions as, "the *then* ministry," "the *above* discourse," good English, or bad—well authorized, or not? 5. When words commonly used as adverbs assume the construction of nouns, how are they to be parsed? 6. Must not the parser be careful to distinguish adverbs used substantively or adjectively, from such as may be better resolved by the supposing of an ellipsis? 7. How is an adverb to be parsed, when it seems to be put for a verb? 8. How are adverbs to be parsed in such expressions as, "*Away with him*?" 9. What is observed of the relation of conjunctive adverbs, and of the misuse of *when*? 10. What is said in regard to the placing of adverbs? 11. What suggestions are made concerning the word *no*? 12. What is remarked of two or more negatives in the same sentence? 13. Is that a correct rule which says, "Two negatives, in English, destroy each other, or are equivalent to an affirmative?" 14. What is the dispute among grammarians concerning the adoption of *or* or *nor* after *not* or *no*? 15. What fault is found with the opinion of Priestley, Murray, Ingersoll, and Smith, that "either of them may be used with nearly equal propriety?" 16. How does John Burn propose to settle this dispute? 17. How does Churchill treat the matter? 18. What does he say of the manner in which "the use of *nor* after *not* has been introduced?" 19. What other common modes of expression are censured by this author under the same head? 20. How does Brown review these criticisms, and attempt to settle the question? 21. What critical remark is made on the misuse of *ever* and *never*? 22. How does Churchill differ from Lowth respecting the phrase, "*ever so wisely*," or "*never so wisely*?" 23. What is observed of *never* and *ever* as seeming to be adjectives, and being liable to contraction? 24. What strictures are made on the classification and placing of the word *only*? 25. What is observed of the term *not but*, and of the adverbial use of *but*? 26. What is noted of the ambiguous use of *but* or *only*? 27. What notions are inculcated by different grammarians about the introductory word *there*?

#### LESSON XXX.—CONJUNCTIONS.

1. When two declinable words are connected by a conjunction, why are they of the same case? 2. What is the power, and what the position, of a conjunction that connects sentences or clauses? 3. What further is added concerning the terms which conjunctions connect? 4. What is remarked of two or more conjunctions coming together? 5. What is said of *and* as supposed to be used to call attention? 6. What relation of case occurs

between nouns connected by *as*? 7. Between what other related terms can *as* be employed? 8. What is *as* when it is made the subject or the object of a verb? 9. What questions are raised among grammarians, about the construction of *as follow* or *as follows*, and other similar phrases? 10. What is said of Murray's mode of treating this subject? 11. Has Murray written any thing which goes to show whether *as follows* can be right or not, when the preceding noun is plural? 12. What is the opinion of Nixon, and of Crombie? 13. What conjunction is frequently understood? 14. What is said of ellipsis after *than* or *as*? 15. What is suggested concerning the character and import of *than* and *as*? 16. Does *than* as well as *as* usually take the same case after it that occurs before it? 17. Is the Greek or Latin construction of the latter term in a comparison usually such as ours? 18. What inferences have our grammarians made from the phrase *than whom*? 19. Is *than* supposed by Murray to be capable of governing any other objective than *whom*? 20. What grammarian supposes *whom* after *than* to be "in the objective case *absolute*?" 21. How does the author of this work dispose of the example? 22. What notice is taken of O. B. Peirce's Grammar, with reference to his manner of parsing words after *than* or *as*? 23. What says Churchill about the notion that certain conjunctions govern the subjunctive mood? 24. What is said of the different parts of speech contained in the list of correspondents?

#### LESSON XXXI.—PREPOSITIONS.

1. What is said of the parsing of a preposition? 2. How can the terms of relation which pertain to the preposition be ascertained? 3. What is said of the transposition of the two terms? 4. Between what parts of speech, as terms of the relation, can a preposition be used? 5. What is said of the ellipsis of one or the other of the terms? 6. Is *to* before the infinitive to be parsed just as any other preposition? 7. What is said of Dr. Adam's "*To* taken *absolutely*?" 8. What is observed in relation to the exceptions to Rule 23d? 9. What is said of the placing of prepositions? 10. What is told of two prepositions coming together? 11. In how many and what ways does the relation of prepositions admit of complexity? 12. What is the difference between *in* and *into*? 13. What notice is taken of the application of *between*, *betwixt*, *among*, *amongst*, *amid*, *amidst*? 14. What erroneous remark have Priestley, Murray, and others, about two prepositions "in the same construction?" 15. What false doctrine have Lowth, Murray, and others, about the separating of the preposition from its noun? 16. What is said of the prepositions which follow *averse* and *aversion*, *except* and *exception*? 17. What is remarked concerning the use of *of*, *to*, *on*, and *upon*? 18. Can there be an inelegant use of prepositions which is not positively ungrammatical?

#### LESSON XXXII.—INTERJECTIONS.

1. Are all interjections to be parsed as being put absolute? 2. What is said of *O* and the vocative case? 3. What do Nixon and Kirkham erroneously teach about cases governed by interjections? 4. What say Murray, Ingersoll, and Lennie, about interjections and cases? 5. What is shown of the later teaching to which Murray's erroneous and unoriginal remark about "*O*, *oh*, and *ah*," has given rise? 6. What notice is taken of the application of the rule for "*O*, *oh*, and *ah*," to nouns of the second person? 7. What is observed concerning the further extension of this rule to nouns and pronouns of the third person? 8. What authors teach that interjections are put absolute, and have no government? 9. What is the construction of the pronoun in "*Ah me!*" "*Ah him!*" or any similar exclamation? 10. Is the common rule for interjections, as requiring certain cases after them, sustained by any analogy from the Latin syntax? 11. Can it be shown, on good authority, that *O* in Latin

may be followed by the nominative of the first person or the accusative of the second? 12. What errors in the construction and punctuation of interjectional phrases are quoted from Fisk, Smith, and Kirkham? 13. What is said of those sentences in which an interjection is followed by a preposition or the conjunction *that*? 14. What is said of the place of the interjection? 15. What says O. B. Peirce about the name and place of the interjection? 16. What is offered in refutation of Peirce's doctrine?

[Now parse the six lessons of the *Thirteenth Praxis*; taking, if the teacher please, the *Italic* or difficult words only; and referring to the exceptions or observations under the rules, as often as there is occasion. Then proceed to the correction of the eighteen lessons of *False Syntax* contained in Chapter Twelfth, or the General Review.]

#### LESSON XXXIII.—GENERAL RULE.

1. Why were the general rule and the general or critical notes added to the foregoing code of syntax? 2. What is the general rule? 3. How many are there of the general or critical notes? 4. What says Critical Note 1st of *the parts of speech*? 5. What says Note 2d of *the doubtful reference* of words? 6. What says Note 3d of *definitions*? 7. What says Note 4th of *comparisons*? 8. What says Note 5th of *falsities*? 9. What says Note 6th of *absurdities*? 10. What says Note 7th of *self-contradiction*? 11. What says Note 8th of *senseless jumbling*? 12. What says Note 9th of *words needless*? 13. What says Note 10th of *improper omissions*? 14. What says Note 11th of *literary blunders*? 15. What says Note 12th of *literary perversions*? 16. What says Note 13th of *literary awkwardness*? 17. What says Note 14th of *literary ignorance*? 18. What says Note 15th of *literary silliness*? 19. What says Note 16th of *errors incorrigible*? 20. In what place are the rules, exceptions, notes, and observations, in the foregoing system of syntax, enumerated and described? 21. What suggestions are made in relation to the number of rules or notes, and the completeness of the system? 22. What is remarked on the place and character of the critical notes and the general rule? 23. What is noted in relation to the unamendable imperfections sometimes found in ancient writings?

[Now correct—(or at least read, and compare with the Key—) the sixteen lessons of *False Syntax*, arranged under appropriate heads, for the application of the General Rule; the sixteen others adapted to the Critical Notes; and the five concluding ones, for which the rules are various.]

### CHAPTER XV.—FOR WRITING.

#### EXERCISES IN SYNTAX.

☞ [When the pupil has been sufficiently exercised in *syntactical parsing*, and has corrected *orally*, according to the formulas given, all the examples of false syntax designed for oral exercises, or so many of them as may be deemed sufficient; he should write out the following exercises, correcting them according to the principles of syntax given in the rules, notes, and observations, contained in the preceding chapters; but omitting or varying the references, because his corrections cannot be ascribed to the books which contain these errors.]

#### EXERCISE I.—ARTICLES.

“They are institutions not merely of an useless, but of an hurtful nature.”—*Blair's Rhet.*, p. 344. “Quintilian prefers the full, the copious, and the amplifying style.”—*Ib.*, p.

Gram.*, p. 21. “This, of all others, is the most encouraging circumstance in these times.”—*Sheridan’s Elocution*, p. 37. “The putting any constraint on the organs of speech, or urging them to a more rapid action than they can easily perform in their tender state, must be productive of indistinctness in utterance.”—*Ib.*, p. 35. “Good articulation is the foundation of a good delivery, in the same manner as the sounding the simple notes in music, is the foundation of good singing.”—*Ib.*, p. 33. “The offering praise and thanks to God, implies our having a lively and devout sense of his excellencies and of his benefits.”—ATTERBURY: *Blair’s Rhet.*, p. 295. “The pause should not be made till the fourth or sixth syllable.”—*Blair, ib.*, p. 333. “*Shenstone’s* pastoral ballad, in four parts, may justly be reckoned one of the most elegant poems of this kind, which we have in English.”—*Ib.*, p. 394. “What need Christ to have died, if heaven could have contained imperfect souls?”—*Baxter*. “Every person is not a man of genius, nor is it necessary that he should.”—*Seattle’s Moral Science*, i, 69. “They were alarmed from a quarter where they least expected.”—*Goldsmith’s Greece*, ii, 6.

“If thou more murmur’st, I will rend an oak,  
And peg thee in his knotty intrails.”—SHAK.: *White’s Verb*, p. 94.

### EXERCISE XIII.—TWO ERRORS.

“In consequence of this, much time and labor are unprofitably expended, and a confusion of ideas introduced into the mind, which, by never so wise a method of subsequent instruction, it is very difficult completely to remove.”—*Grenville’s Gram.*, p. 3. “So that the restoring a natural manner of delivery, would be bringing about an entire revolution, in its most essential parts.”—*Sheridan’s Elocution*, p. 170. “‘Thou who loves us, will protect us still:’ here *who* agrees with *thou*, and is nominative to the verb loves.”—*Alex. Murray’s Gram.*, p. 67. “The Active voice signifies action; the Passive, suffering, or being the object of an action.”—*Adam’s Latin Gram.*, p. 80; *Gould’s*, 77. “They sudden set upon him, fearing no such thing.”—*Walker’s Particles*, p. 252. “*That* may be used as a pronoun, an adjective, and a conjunction, depending on the office which it performs in the sentence.”—*Kirkham’s Gram.*, p. 110. “This is the distinguishing property of the church of Christ from all other antichristian assemblies or churches.”—*Barclay’s Works*, i, 533. “My lords, the course which the legislature formerly took with respect to the slave-trade, appears to me to be well deserving the attention both of the government and your lordships.”—BROUGHAM: *Antislavery Reporter*, Vol. ii, p. 218. “We speak that we do know, and testify that we have seen.”—*John*, iii, 11. “This is a consequence I deny, and remains for him to prove.”—*Barclay’s Works*, iii, 329. “To back this, He brings in the Authority of Accursius, and Consensus Romanus, to the latter of which he confesses himself beholding for this Doctrine.”—*Johnson’s Gram. Com.*, p. 343. “The compound tenses of the second order, or those in which the participle present is made use of.”—*Priestley’s Gram.*, p. 24. “To lay the accent always on the same syllable, and the same letter of the syllable, which they do in common discourse.”—*Sheridan’s Elocution*, p. 78. “Though the converting the *w* into a *v* is not so common as the changing the *v* into a *w*.”—*Ib.*, p. 46. “Nor is this

all; for by means of accent, the times of pauses also are rendered quicker, and their proportions more easily to be adjusted and observed.”—*Ib.*, p. 72. “By mouthing, is meant, dwelling upon syllables that have no accent: or prolonging the sounds of the accented syllables, beyond their due proportion of time.”—*Ib.*, p. 76. “Taunt him with the license of ink; if thou thou’st him thrice, it shall not be amiss.”—SHAK.: *Joh. Dict.*, *w. Thou*. “The eye that mocketh at his father, and despiseth to obey his mother, the ravens of the valley shall pick it out, and the young eagles shall eat it.”—*Prov.*, xxx, 17. “Copying, or merely imitating others, is the death of arts and sciences.”—*Spurzheim, on Ed.*, p. 170. “He is arrived at that degree of perfection, as to surprise all his acquaintance.”—*Ensell’s Gram.*, p. 296. “Neither the King *nor* Queen are gone.”—*Buchanan’s E. Syntax*, p. 155. “*Many* is pronounced as if it were wrote *manny*.”—*Dr. Johnson’s Gram.*, with *Dict.*, p. 2.

“And as the music on the waters float,  
Some bolder shore returns the soften’d note.”—*Crabbe, Borough*, p. 118.

#### EXERCISE XIV.—THREE ERRORS.

“It appears that the Temple was then a building, because these Tiles must be supposed to be for the covering it.”—*Johnson’s Gram. Com.*, p. 281. “It was common for sheriffs to omit or excuse the not making returns for several of the boroughs within their counties.”—*Brown’s Estimate*, Vol. ii, p. 132. “The conjunction *as* when it is connected with the pronoun, such, many, or same, is sometimes called a relative pronoun.”—*Kirkham’s Gram.*, the Compend. “Mr. Addison has also much harmony in his style; more easy and smooth, but less varied than Lord Shaftesbury.”—*Blair’s Rhet.*, p. 127; *Jamieson’s*, 129. “A number of uniform lines having all the same pause, are extremely fatiguing; which is remarkable in French versification.”—*Kames, El. of Crit.*, Vol. ii, p. 104. “Adjectives qualify or distinguish one noun from another.”—*Fowle’s True Eng. Gram.*, p. 13. “The words *one*, *other*, and *none*, are used in both numbers.”—*Kirkham’s Gram.*, p. 107. “A compound word is made up of two or more words, usually joined by an hyphen, as summer-house, spirit-less, school-master.”—*Blair’s Gram.*, p. 7. “There is an inconvenience in introducing new words by composition which nearly resembles others in use before; as, *disserve*, which is too much like *deserve*.”—*Priestley’s Gram.*, p. 145. “For even in that case, the transgressing the limits in the least, will scarce be pardoned.”—*Sheridan’s Lect.*, p. 119. “What other are the foregoing instances but describing the passion another feels.”—*Kames, El. of Crit.*, i, 388. “‘Two and three are five.’ If each *substantive* is to be taken separately as a subject, then ‘two *is* five,’ and ‘three *is* five.’”—*Goodenow’s Gram.*, p. 87. “The article *a* joined to the simple *pronoun other* makes *it* the compound *another*.”—*Priestley’s Gram.*, p. 96. “The *word another* is composed of the indefinite *article prefixed* to the *word other*.”—*Murray’s Gram.*, p. 57; et al. “In relating things that were formerly expressed by another person, we often meet with modes of expression similar to the following.”—*Ib.*, p. 191. “Dropping one *l* prevents the recurrence of three very near each other.”—*Churchill’s Gram.*, p. 202. “Sometimes two or more genitive cases succeed each other; as, ‘John’s wife’s father.’”—*Dalton’s Gram.*, p. 14. “Sometimes, though rarely, two nouns in the possessive case immediately succeed each other, in the following form: ‘My friend’s wife’s sister.’”—*Murray’s Gram.*, p. 45.

#### EXERCISE XV.—MANY ERRORS.

“Number is of a two fold nature,—Singular and Plural: and comprehends, accordingly to its application, the distinction between them.”—*Wright’s Gram.*, p. 37. “The former, Figures of Words, are commonly called Tropes, and *consists* in a word’s being employed to

signify something, *which* is different from its original and primitive meaning.”—*Murray’s Gram.*, 8vo, p. 337. “The former, figures of words, are commonly called tropes, and *consist* in a word’s being employed to signify something *that* is different from its original and primitive meaning.”—*Blair’s Rhet.*, p. 132. “A particular number of connected syllables are called feet, or measured paces.”—*Blair’s Gram.*, p. 118. “Many poems, and especially songs, are written in the dactyl or anapæstic measure, some consisting of eleven or twelve syllables, and some of less.”—*Ib.*, p. 121. “A Diphthong makes always a long Syllable, unless one of the vowels be dropped.”—*British Gram.*, p. 34. “An Adverb is generally employed as an attributive, to denote some peculiarity or manner of action, with respect to the time, place, or order, of the noun or circumstance to which it is connected.”—*Wright’s Definitions, Philos. Gram.*, pp. 35 and 114. “A Verb expresses the action, the suffering or enduring, or the existence or condition of a noun.”—*Ib.*, pp. 35 and 64. “These three adjectives should be written our’s, your’s, their’s.”—*Fowle’s True Eng. Gram.*, p. 22. “Never was man so teized, or suffered half the uneasiness as I have done this evening.”—*Tattler*, No. 160; *Priestley’s Gram.*, p. 200; *Murray’s*, i, 223. “There may be reckoned in English four different cases, or relations of a substantive, called the subjective, the possessive, the objective, and the absolute cases.”—*Goodenow’s Gram.*, p. 31. “To avoid the too often repeating the Names of other Persons or Things of which we discourse, the words *he, she, it, who, what*, were invented.”—*Brightland’s Gram.*, p. 85. “Names which denote a number of the same things, are called nouns of multitude.”—*Infant School Gram.*, p. 21. “But lest he should think, this were too slightly a passing over his matter, I will propose to him to be considered these things following.”—*Barclay’s Works*, Vol. iii, p. 472. “In the pronunciation of the letters of the Hebrew proper names, we find nearly the same rules prevail as in those of Greek and Latin.”—*Walker’s Key*, p. 223. “The distributive pronominal adjectives *each, every, either*, agree with *the* nouns, *pronouns, and* verbs of the singular number only.”—*Lowth’s Gram.*, p. 89. “*Having treated* of the different *sorts* of *words*, and *their* various modifications, *which is* the first part of Etymology, *it* is now proper to explain the *methods* by which *one word* is derived from another.”—*L. Murray’s Gram.*, p. 130.

#### EXERCISE XVI.—MANY ERRORS.

“A Noun with its Adjectives (or any governing Word with its Attendants) is one compound Word, whence the Noun and Adjective so joined, do often admit another Adjective, and sometimes a third, and so on; as, a Man, an old Man, a very good old Man, a very learned, judicious, sober Man.”—*British Gram.*, p. 195; *Buchanan’s*, 79. “A substantive *with* its adjective *is* reckoned as one *compounded* word; whence *they* often take *another* adjective, and sometimes a third, and so on: as, ‘An old man; a good old man; a very learned, judicious, good old man.’”—*L. Murray’s Gram.*, p. 169; *Ingersoll’s*, 195; *and others*. “But though this elliptical style *be* intelligible, and *is* allowable in conversation *and* epistolary *writing*, yet in all *writings* of a serious or dignified kind, *is* ungraceful.”—*Blair’s Rhet.*, p. 112. “There is no talent *so useful* towards rising in the world, *or which* puts men more out of the reach of fortune, than that quality generally possessed by the dullest sort of people, and is, in common language, called discretion.”—SWIFT: *Blair’s Rhet.*, p. 113. “Which to allow, is just as reasonable as to own, that ‘tis the greatest ill of a body to be in the utmost *manner* maimed or distorted; but *that* to lose the use *only* of one limb, or to be impaired in some single organ or member, is no ill worthy the least notice.”—SHAFTESBURY: *ib.*, p. 115; *Murray’s Gram.*, p. 322. “If the singular nouns *and* pronouns, which *are joined* together by a copulative conjunction, *be* of *several* persons, in *making* the plural pronoun *agree* with them in person, the second person

takes *place of* the third, and the *first of* both.”—*Murray’s Gram.*, p. 151; *et al.* “The painter \* \* \* cannot exhibit various stages of the same action.’ *In* this sentence we see that *the* painter *governs*, or agrees with, the verb *can*, as *its nominative* case.”—*Ib.*, p. 195. “It expresses *also* facts *which* exist *generally*, at *all times*, general truths, attributes *which* are permanent, habits, customary actions, and the like, without the reference to a specific time.”—*Ib.*, p. 73; *Webster’s Philos. Gram.*, p. 71. “The different species of animals may therefore be considered, as so many different nations speaking different languages, *that have* no commerce with *each* other; each of *which* consequently understands *none* but *their* own.”—*Sheridan’s Elocution*, p. 142. “It is also important to *understand and* apply the principles of grammar in our common conversation; not only because *it* enables us to make our language *understood by educated* persons, but because it furnishes the readiest evidence *of our* having received a good education *ourselves*.”—*Frost’s Practical Gram.*, p. 16.

#### EXERCISE XVII.—MANY ERRORS.

“This faulty Tumour in Stile is like an huge unpleasant Rock in a Champion Country, that’s difficult to be transcended.”—*Holmes’s Rhet.*, Book ii, p. 16. “For there are no Pelops’s, nor Cadmus’s, nor Danaus’s dwell among us.”—*Ib.*, p. 51. “None of these, except *will*, is ever used as a principal verb, but as an auxiliary to some principal, either expressed or understood.”—*Ingersoll’s Gram.*, p. 134. “Nouns which signify either the male or female are common gender.”—*Perley’s Gram.*, p. 11. “An Adjective expresses the kind, number, or quality of a noun.”—*Parker and Fox’s Gram.*, Part I, p. 9. “There are six tenses; the Present, the Imperfect, the Perfect, the Pluperfect, the Future, and the Future Perfect tenses.”—*Ib.*, p. 18. “*My* refers to the first person singular, either gender. *Our* refers to the first person plural, either gender. *Thy* refers to the second person singular, either gender. *Your* refers to the second person plural, either gender. *Their* refers to the third person plural, either gender.”—*Parker and Fox’s Gram.*, Part II, p. 14. “Good use, which for brevity’s sake, shall hereafter include reputable, national, and present use, is not always uniform in her decisions.”—*Jamieson’s Rhet.*, p. 44. “Nouns which denote but one object are considered in the singular number.”—*Edward’s First Lessons in Gram.*, p. 35. “If, therefore, the example of Jesus should be plead to authorize accepting an invitation to dine on the sabbath, it should be plead just as it was.”—*Barnes’s Notes*: on Luke, xiv, 1. “The teacher will readily dictate what part may be omitted, the first time going through it.”—*Ainsworth’s Gram.*, p. 4. “The contents of the following pages have been drawn chiefly, with various modifications, from the same source which has supplied most modern writers on this subject, viz. LINDLEY MURRAY’S GRAMMAR.”—*Felton’s Gram.*, p. 3. “The term *person* in grammar distinguishes between the speaker, the person or thing spoken to, and the person or thing spoken of.”—*Ib.*, p. 9. “In my father’s garden grow the Maiden’s Blush and the Prince’ Feather.”—*Felton, ib.*, p. 15. “A preposition is a word used to connect words with one another, and show the relation between them. They generally stand before nouns and pronouns.”—*Ib.*, p. 60. “Nouns or pronouns addressed are always either in the second person, singular or plural.”—*Hallock’s Gram.*, p. 54. “The plural MEN not ending in s, is the reason for adding the apostrophie’s.”—*T. Smith’s Gram.*, p. 19. “*Pennies* denote real coin; *pence*, their value in computation.”—*Hazen’s Gram.*, p. 24. “We commence, first, with *letters*, which is termed *Orthography*; secondly, with *words*, denominated *Etymology*; thirdly, with *sentences*, styled *Syntax*; fourthly, with *orations* and *poems*, called *Prosody*.”—*Barrett’s Gram.*, p. 22. “Care must be taken, that sentences of proper construction and obvious import be not rendered obscure by the too free use of the ellipsis.”—*Felton’s Grammar, Stereotype Edition*, p. 80.

## EXERCISE XVIII.—PROMISCUOUS.

“Tropes and metaphors so closely resemble *each* other that it is not always easy, nor is it important to *be able* to distinguish the *one* from the *other*.”—*Parker and Fox*, Part III, p. 66. “With regard to *relatives*, it may be further observed, that obscurity often arises from *the* too frequent repetition of them, particularly of the pronouns WHO, and THEY, and THEM, and THEIRS. When we find *these personal pronouns* crowding too fast upon us, we have often no method left, but to throw the whole sentence into some other form.”—*Ib.*, p. 90; *Murray’s Gram.*, p. 311; *Blair’s Rhet.*, p. 106. “Do scholars acquire any valuable knowledge, by learning to repeat long strings of words, without any definite ideas, or *several jumbled* together like rubbish in a corner, and apparently with no application, *either* for the improvement of mind *or of* language?”—*Cutler’s Gram.*, *Pref.*, p. 5. “The being officiously good natured and civil are things so uncommon in the world, that one cannot hear a man make professions of them without being surprised, or at least, suspecting the disinterestedness of his intentions.”—FABLES: *Cutler’s Gram.*, p. 135. “Irony is the intentional use of words to express a sense contrary to that which the speaker or writer means to convey.”—*Parker and Fox’s Gram.*, Part III, p. 68. “The term *Substantive* is derived from *substare*, to *stand*, to *distinguish it* from an adjective, which cannot, like the noun, stand alone.”—*Hiley’s Gram.*, p. 11. “They have two numbers, *like nouns*, the singular and plural; and three persons in each number, namely, *I*, the first person, represents the speaker. *Thou*, the second person, represents the person spoken to. *He, she, it*, the third person, represents the person or thing spoken of.”—*Ib.*, p. 23. “*He, She, It*, is the Third Person singular; but *he with others, she with others, or it with others*, make each of them *they*, which is the Third Person plural.”—*White, on the English Verb*, p. 97. “The words *had I been*, that is, the Third Past Tense of the Verb, marks the Supposition, as referring itself, not to the Present, but to some former period of time.”—*Ib.*, p. 88. “A pronoun is a word used instead of a noun, to avoid a too frequent repetition of the same word.”—*Frazee’s Improved Gram.*, p. 122.

“That which he cannot use, and dare not show,  
And would not give—why longer should he owe?”—*Crabbe*.

## PART IV. PROSODY.

Prosody treats of punctuation, utterance, figures, and versification.

### OBSERVATIONS.

OBS. 1.—The word *prosody*, (from the Greek—πρὸς, *to*, and ᾠδὴ, *song*;) is, with regard to its derivation, exactly equivalent to *accent*, or the Latin *accentus*, which is formed from *ad*, *to*, and *cantus*, *song*: both terms, perhaps, originally signifying a *singing with*, or *sounding to*, some instrument or voice. PROSODIA, as a Latin word, is defined by Littleton, “Pars Grammaticæ quæ docet *accentus*, *h. e.* rationem atollendi et depremendi syllabas, tum quantitatem carundem.” And in English, “*The art of ACCENTING, or the rule of pronouncing syllables truly*, LONG *or* SHORT.”—*Litt. Dict.*, 4to. This is a little varied by Ainsworth thus: “*The rule of ACCENTING, or pronouncing syllables truly, whether LONG or SHORT.*”—*Ains. Dict.*, 4to. Accent, in English, belongs as much to prose as to poetry; but some deny that in Latin it belongs to either. There is also much difficulty about the import of the word; since some prosodists identify *accent* with *tone*; some take it for the *inflections* of voice; some call it the *pitch* of vocal sounds; and some, like the authors just cited, seem to confound it with *quantity*,—“LONG *or* SHORT.” \*

---

\* (1.) “*Accent* is the *tone* with which one speaks. For, in speaking, the voice of every man is sometimes *more grave* in the sound, and at other times *more acute* or shrill.”—*Beattie’s Moral Science*, p. 25. “*Accent* is the *tone* of the voice with which a syllable is pronounced.”—*Dr. Adam’s Latin and English Gram.*, p. 266.

(2.) “*Accent* in a peculiar *stress* of the voice on some syllable in a word to distinguish it from the others.”—*Gould’s Adam’s Lat. Gram.*, p. 243.

(3.) “The *tone* by which one syllable is distinguished from another is the *accent*; which is a greater *stress and elevation* of voice on that particular syllable.”—*Bicknell’s Eng. Gram.*, Part II, p. 111.

(4.) “*Quantity* is the Length or Shortness of Syllables; and the Proportion, generally speaking, betwixt a long and [a] short Syllable, is two to one; as in *Music*, two *Quavers* to one *Crotchet*.—*Accent* is the *rising and falling* of the Voice, above or under its usual Tone, but an Art of which we have little Use, and know less, in the *English* Tongue; nor are we like to improve our Knowledge in this Particular, unless the Art of *Delivery* or *Utterance* were a little more study’d.”—*Brightland’s Gram.*, p. 156.

(5.) “ACCENT, s. m. (*inflexion* de la voix.) Accent, *tone*, pronunciation.”—*Nouveau Dictionnaire Universel*, 4to, Tome Premier, sous le mot *Accent*.

“ACCENT, *subst.* (*tone* or *inflection* of the voice.) Accent, *ton* ou *inflexion* de voix.”—*Same Work*, *Garner’s New Universal Dictionary*, 4to, under the word *Accent*.

(6.) “The word *accent* is derived from the Latin language and signifies *the tone of the voice*.”—*Parker and Fox’s English Gram.*, Part III, p. 32.

(7.) “The unity of the word consists in the *tone or accent*, which binds together the two parts of the composition.”—*Fowler’s E. Gram.*, §360.

(8.) “The accent of the ancients is the opprobrium of modern criticism. Nothing can show more evidently the fallibility of the human faculties, than the *total ignorance* we are in at present of the nature of the Latin and Greek accent.”—*Walker’s Principles*, No. 486; Dict., p. 53.

(9.) “It is not surprising, that the accent and quantity of the ancients should be so obscure and mysterious, when two such learned men of our own nation as Mr. Foster and Dr. Gaily, differ about the very existence of quantity in our own language.”—*Walker’s Observations on Accent*, &c.; Key, p. 311.

(10.) “What these accents are has puzzled the learned so much that they seem neither to understand each other nor themselves.”—*Walker’s Octavo Dict.*, w. *Barytone*.

(11.) “The ancients designated the *pitch* of vocal sounds by the term *accent*; making three kinds of accents, the acute (é), the grave (è), and the circumflex (ê), which signified severally the rise, the fall, and the turn of the voice, or union of acute and grave on the same syllable.”—*Sargent’s Standard Speaker*, p. 18.

OBS. 2.—“*Prosody*,” says a late writer, “strictly denotes only that *musical tone* or *melody* which accompanies speech. But the usage of modern grammarians justifies an extremely general application of the term.”—*Frost’s Practical Grammar*, p. 160. This remark is a note upon the following definition: “PROSODY is that part of grammar which treats of the structure of Poetical Composition.”—*Ibid.* Agreeably to this definition, Frost’s *Prosody*, with all the generality the author claims for it, embraces only a brief account of Versification, with a few remarks on “Poetical License.” Of Pronunciation and the Figures of Speech, he takes no notice; and Punctuation, which some place with Orthography, and others distinguish as one of the chief parts of grammar, he exhibits as a portion of Syntax. Not more comprehensive is this part of grammar, as exhibited in the works of several other authors; but, by Lindley Murray, R. C. Smith, and some others, both Punctuation and Pronunciation are placed here; though no mention is made of the former in their subdivision of *Prosody*, which, they not very aptly say, “consists of *two* parts, Pronunciation and Versification.” Dr. Bullions, no less deficient in method, begins with saying, “PROSODY consists of two parts; Elocution and Versification;” (*Principles of E. Gram.*, p. 163;) and then absurdly proceeds to treat of it under the following *six* principal heads: viz., Elocution, Versification, Figures of Speech, Poetic License, Hints for Correct and Elegant Writing, and Composition.

OBS. 3.—If, in regard to the subjects which may be treated under the name of *Prosody*, “the usage of *modern* grammarians justifies an extremely general application of the term,” such an application is certainly not *less* warranted by the usage of *old* authors. But, by the practice of neither, can it be *easily* determined how many and what things *ought* to be embraced under this head. Of the different kinds of verse, or “the structure of Poetical Composition,” some of the old prosodists took little or no notice; because they thought it their chief business, to treat of syllables, and determine the orthoëpy of words. The *Prosody* of Smetius, dated 1509, (my edition of which was published in Germany in 1691,) is in fact a *pronouncing dictionary* of the Latin language. After a brief abstract of the old rules of George Fabricius concerning quantity and accent, it exhibits, in alphabetic order, and with all their syllables marked, about twenty-eight thousand words, with a poetic line quoted against each, to prove the pronunciation just. The *Prosody* of John Genuensis, an other immense work, concluded by its author in 1286, improved by Badius in 1506, and printed at Lyons in 1514, is also mainly a *Latin dictionary*, with derivations and definitions as in other dictionaries. It is a folio volume of seven hundred and thirty closely-printed pages; six hundred of which are devoted to the vocabulary, the rest to orthography, accent, etymology, syntax, figures, points—almost everything *but versification*. Yet this vast sum of grammar has been entitled *Prosody*—“*Prosodia seu Catholicon*”—“*Catholicon seu Universale Vocabularium ac Summa Grammatices*.”—See pp. 1 and 5.

## CHAPTER I—PUNCTUATION.

Punctuation is the art of dividing literary composition, by points, or stops, for the purpose of showing more clearly the sense and relation of the words; and of noting the different pauses and inflections required in reading.

The following are the principal points, or marks; namely, the Comma [,], the Semicolon [;], the Colon [:], the Period [.] , the Dash [—], the Eroteme, or Note of Interrogation [?], the Ecphoneme, or Note of Exclamation [!], and the Curves, or Marks of Parenthesis, [()].

The Comma denotes the shortest pause; the Semicolon, a pause double that of the comma; the Colon, a pause double that of the semicolon; and the Period, or Full Stop, a pause double that of the colon. The pauses required by the other four, vary according to the structure of the sentence, and their place in it. They may be equal to any of the foregoing.

### OBSERVATIONS.

OBS. 1.—The pauses that are made in the natural flow of speech, have, in reality, no definite and invariable proportions. Children are often told to pause at a comma while they might count *one*; at a semicolon, *one, two*; at a colon, *one, two, three*; at a period, *one, two, three, four*. This may be of some use, as teaching them to observe the necessary stops, that they may catch the sense; but the standard itself is variable, and so are the times which good sense gives to the points. As a final stop, the period is immeasurable; and so may be the pause after a question or an exclamation.

OBS. 2.—The first four points take their names from the parts of discourse, or of a sentence, which are distinguished by them. The *Period*, or *circuit*, is a complete *round* of words, often consisting of several clauses or members, and always bringing out full sense at the close. The *Colon*, or *member*, is the greatest division or *limb* of a period, and is the chief constructive part of a compound sentence. The *Semicolon*, *half member*, or *half limb*, is the greatest division of a colon, and is properly a smaller constructive part of a compound sentence. The *Comma*, or *segment*, is a small part of a clause *cut off*, and is properly the least constructive part of a compound sentence. A *simple sentence* is sometimes a whole period, sometimes a chief member, sometimes a half member, sometimes a segment, and sometimes perhaps even less. Hence it may require the period, the colon, the semicolon, the comma, or even no point, according to the manner in which it is used. A sentence whose relatives and adjuncts are all taken in a restrictive sense, may be considerably complex, and yet require no division by points; as,

“Thank him who puts me loath to this revenge  
On you who wrong me not for him who wrong’d.”—*Milton*.

OBS. 3.—The system of punctuation now used in English, is, in its main features, common to very many languages. It is used in Latin, French, Spanish, Italian, Portuguese, Dutch, German, and perhaps most of the tongues in which books are now written or printed. The Germans, however, make less frequent use of the comma than we; and the Spaniards usually mark a question or an exclamation *doubly*, inverting the point at the beginning of the sentence. In Greek, the difference is greater: the colon, expressed by the upper dot alone, is the only point between the comma and the period; the ecphoneme, or note of exclamation, is hardly recognized, though some printers of the classics have occasionally introduced it; and the eroteme, or note of interrogation, retains in that language its pristine form, which is that of our semicolon. In Hebrew, a full stop is denoted by a heavy colon, or something like it; and this is the only pointing adopted, when the vowel points and the accents are not used.

OBS. 4.—Though the points in use, and the principles on which they ought to be applied, are in general well fixed, and common to almost all sorts of books; yet, through the negligence of editors, the imperfections of copy, the carelessness of printers, or some other means, it happens, that different editions and different versions of the same work

are often found pointed very variously. This circumstance, provided the sense is still preserved, is commonly thought to be of little moment. But all *writers* will do well to remember, that they owe it to their readers, to show them at once how they mean to be read; and since the punctuation of the early printers was unquestionably very *defective*, the republishers of ancient books should not be over scrupulous about an exact imitation of it; they may, with proper caution, correct obvious faults.

OBS. 5.—The precise origin of the points, it is not easy to trace in the depth of antiquity. It appears probable, from ancient manuscripts and inscriptions, that the period is the oldest of them; and it is said by some, that the first system of punctuation consisted in the different positions of this dot alone. But after the adoption of the small letters, which improvement is referred to the ninth century, both the comma and the colon came into use, and also the Greek note of interrogation. In old books, however, the comma is often found, not in its present form, but in that of a straight stroke, drawn up and down obliquely between the words. Though the colon is of Greek origin, the practice of writing it with two dots we owe to the Latin authors, or perhaps to the early printers of Latin books. The semicolon was first used in Italy, and was not adopted in England till about the year 1600. Our marks for questions and exclamations were also derived from the same source, probably at a date somewhat earlier. The curves of the parenthesis have likewise been in use for several centuries. But the clash is a more recent invention: Lowth, Ash, and Ward,—Buchanan, Bicknell, and Burn,—though they name all the rest, make no mention of this mark; but it appears by their books, that they all occasionally *used* it.

OBS. 6.—Of the *colon* it may be observed, that it is now much less frequently used than it was formerly; its place being usurped, sometimes by the semicolon, and sometimes by the period. For this ill reason, some late grammarians have discarded it altogether. Thus Felton: “The COLON is now so seldom used by good writers, that rules for its use are unnecessary.”—*Concise Manual of English Gram.*, p. 140. So Nutting: “It will be noticed, that the *colon* is omitted in this system; because it is omitted by the majority of the writers of the present age; three points, with the dash, being considered sufficient to mark the different lengths of the pauses.”—*Practical Grammar*, p. 120. These critics, whenever they have occasion to copy such authors as Milton and Pope, do not scruple to mutilate their punctuation by putting semicolons or periods for all the colons they find. But who cannot perceive, that without the colon, the semicolon becomes an absurdity? It can no longer be a *semicolon*, unless the half can remain when the whole is taken away! The colon, being the older point of the two, and once very fashionable, is doubtless on record in more instances than the semicolon; and, if now, after both have been in common use for some hundreds of years, it be found out that only one is needed, perhaps it would be more reasonable to prefer the former. Should public opinion ever be found to coincide with the suggestions of the two authors last quoted, there will be reason to regret that Caxton, the old English typographer of the fifteenth century, who for a while successfully withstood, in his own country, the introduction of the semicolon, had not the power to prevent it forever. In short, to leave no literary extravagance unbroached, the latter point also has not lacked a modern impugner. “One of the greatest improvements in punctuation,” says Justin Brenan, “is the rejection of the eternal semicolons of our ancestors. In latter times, the semicolon has been gradually disappearing, not only from the newspapers, but from books.”—*Brenan’s “Composition and Punctuation familiarly Explained”*, p. 100; London, 1830. The colon and the semicolon are both useful, and, not unfrequently, necessary; and all correct writers will, I doubt not, continue to use both.

OBS. 7—Since Dr. Blair published his emphatic caution against too frequent a use of *parentheses*, there has been, if not an abatement of the kind of error which he intended to censure, at least a diminution in the use of the *curves*, the sign of a parenthesis. These, too, some inconsiderate grammarians now pronounce to be out of vogue. “The parenthesis is now generally exploded as a deformity.”—*Churchill’s Gram.*, p. 362. “The Parenthesis, () has become nearly obsolete, except in mere references, and the like; its place, by modern writers, being usually supplied by the use of the comma, and the dash.”—*Nutting’s Practical Gram.*, p. 126; *Frazer’s Improved Grammar*, p. 187. More use may have been made of the curves than was necessary, and more of the parenthesis itself than was agreeable to good taste; but, the sign being well adapted to the construction, and the construction being sometimes sprightly and elegant, there are no good reasons for wishing to discard either of them; nor is it true, that the former “has become nearly obsolete.”

OBS. 8—The name *parenthesis* is, which literally means a *putting-in-between*, is usually applied both to the *curves*, and to the incidental *clause* which they enclose. This twofold application of the term involves some inconvenience, if not impropriety. According to Dr. Johnson, the enclosed “*sentence*” alone is the *parenthesis*; but Worcester, agreeably to common usage, defines the word as meaning also “the *mark* thus ().” But, as this sign consists of two distinct parts, two corresponding curves, it seems more natural to use a plural name: hence L. Murray, when he would designate the sign only, adopted a plural expression; as, “*the parenthetical characters*,”—“*the parenthetical marks*.” So, in another case, which is similar: “the *hooks* in which words are included,” are commonly called *crotchets* or *brackets*; though Bucke, in his Classical Grammar, I know not why, calls the two “[ ] a *Crochet*,” (p. 23;) and Webster, in his octavo Dictionary, defines a “*Bracket*, in printing,” as Johnson does a “*Crochet*” by a plural noun: “hooks; thus, [ ].” Again, in his grammars, Dr. Webster rather confusedly says: “The parenthesis () and hooks [] include a remark or clause, not essential to the sentence in construction.”—*Philosophical Gram.*, p. 219; *Improved Gram.*, p. 154. But, in his Dictionary, he forgets both the hooks and the parenthesis that are here spoken of; and, with still worse confusion or inaccuracy, says: “The *parenthesis* is usually included in *hooks* or curved lines, thus, ().” Here he either improperly calls these regular little curves “*hooks*,” or erroneously suggests that both the hooks and the curves are usual and appropriate signs of “*the parenthesis*.” In Garner’s quarto Dictionary, the French word *Crochet*, as used by printers, is translated, “*A brace, a crotchet, a parenthesis*,” and the English word *Crochet* is defined, “The *mark* of a *parenthesis*, in printing, thus [ ].” But Webster defines *Crochet*, “In printing, a *hook* including words, a *sentence* or a *passage* distinguished from the rest, thus [ ].” This again is both ambiguous and otherwise inaccurate. It conveys no clear idea of what a crotchet is. *One* hook *includes* nothing. Therefore Johnson said: “*Hooks* in which words are included [thus].” But if each of the hooks is a crotchet, as Webster suggests, and almost every body supposes, then both lexicographers are wrong in not making the whole expression plural: thus, “*Crotchets*, in printing, are angular *hooks* usually including some explanatory words.” But is this all that Webster meant? I cannot tell. He may be understood as saying also, that a *Crochet* is “a sentence or a *passage* distinguished from the rest, thus [ ];” and doubtless it would be much better to call a hint thus marked, a *crotchet*, than to call it a *parenthesis*, as some have done. In Parker and Fox’s Grammar, and also in Parker’s Aids to English Composition, the term *Brackets* only is applied to these angular hooks; and, contrary to all usage of other authors, so far as I know, the name of *Crotchets* is there given to the *Curves*. And then, as if this application of the word were general, and its propriety indisputable, the pupil is simply told: “The *curved lines* between which a parenthesis is enclosed are called *Crotchets*.”—*Gram.*, Part III, p. 30;

*Aids*, p. 40. “Called *Crotchets*” by whom? That not even Mr. Parker himself knows them by that name, the following most inaccurate passage is a proof: “The *note* of admiration *and* interrogation, as also the *parenthesis*, the *bracket*, and the reference marks, [are noted in the margin] in the same manner as the apostrophe.”—*Aids*, p. 314. In some late grammars, (for example, *Hazen’s* and *Day’s*,) the parenthetical curves are called “*the Parentheses*” From this the student must understand that it always takes *two parentheses* to make *one parenthesis*! If then it is objectionable, to call the two marks “*a parenthesis*,” it is much more so, to call each of them by that name, or both “*the parentheses*.” And since Murray’s phrases are both entirely too long for common use, what better name can be given them than this very simple one, *the Curves*?

OBS. 9.—The words *eroteme* and *ecphoneme*, which, like *aposteme* and *philosopheme*, are orderly derivatives from Greek roots,\* I have ventured to suggest as fitter names for the two marks to which they are applied as above, than are any of the long catalogue which other grammarians, each choosing for himself have presented. These marks have not unfrequently been called “*the interrogation* and the *exclamation*,” which names are not very suitable, because they have other uses in grammar. According to Dr. Blair, as well as L. Murray and others, interrogation and exclamation are “passionate *figures*” of rhetoric, and oftentimes also plain “unfigured” expressions. The former however are frequently and more fitly called by their Greek names *erotesis* and *ecphonesis*, terms to which those above have a happy correspondence. By Dr. Webster and some others, all *interjections* are called “*exclamations*,” and, as each of these is usually followed by the mark of emotion, it cannot but be inconvenient to call both by the same name.

OBS. 10.—For things so common as the marks of asking and exclaiming, it is desirable to have simple and appropriate *names*, or at least some settled mode of denomination; but, it is remarkable, that Lindley Murray, in mentioning these characters six times, uses six different modes of expression, and all of them complex: (1.) “Notes of Interrogation and Exclamation.” (2.) “The point of Interrogation,?”—“The point of Exclamation,!” (3.) “The Interrogatory Point.”—“The Exclamatory Point.” (4.) “A note of interrogation,”—“The note of exclamation.” (5.) “The interrogation and exclamation points.” (6.) “The points of Interrogation and Exclamation.”—*Murray, Flint, Ingersoll, Alden, Pond*. With much better taste, some writers denote them uniformly thus: (7.) “The Note of Interrogation,”—“The Note of Exclamation.”—*Churchill, Hiley*. In addition to these names, all of which are too long, there may be cited many others, though none that are unobjectionable: (8.) “The Interrogative sign,”—“The Exclamatory sign.”—*Peirce, Hazen*. (9.) “The Mark of Interrogation,”—“The Mark of Exclamation.”—*Ward, Felton, Hendrick*. (10.) “The Interrogative point,”—“The Exclamation point.”—*T. Smith, Alger*. (11.) “The interrogation point,”—“The exclamation point.”—*Webster, St. Quentin, S. Putnam*. (12.) “A Note of Interrogation,”—“A Note of Admiration.”—*Coar, Nutting*. (13.) “The Interrogative point,”—“The Note of Admiration, or of vocation.”—*Bucke*. (14.) “Interrogation (?),”—“Admiration (!) or Exclamation.”—*Lennie, Bullions*. (15.) “A Point of Interrogation,”—“A Point of Admiration or Exclamation.”—*Buchanan*. (16.) “The Interrogation Point (?),”—“The Admiration Point (!).”—*Perley*. (17.) “An interrogation (?),”—“An exclamation (!).”—*Cutler*. (18.) “The interrogator?”—“The exclaimor!”—*Day’s Gram.*, p. 112. [The putting of “exclaimor” for *exclaimer*, like this author’s changing of *quoters* to “*quotors*,” as a name for the guillemets,

\* “Interrogatio, Græcè *Erotema*, Accentum quoque transfert; ut, Ter. *Siccine ais Parmenó?* Voss. Susenbr.”—*Prat’s Latin Grammar*, 8vo, Part II, p. 190.

is probably a mere sample of ignorance.] (19.) “Question point,”—“Exclamation point.”—*Sanborn*, p. 272.

## SECTION I.—THE COMMA.

The Comma is used to separate those parts of a sentence, which are so nearly connected in sense, as to be only one degree removed from that close connexion which admits no point.

### RULE I.—SIMPLE SENTENCES.

A simple sentence does not, in general, admit the comma; as, “The weakest reasoners are the most positive.”—*W. Allen’s Gram.*, p. 202. “Theology has not hesitated to make or support a doctrine by the position of a comma.”—*Tract on Tone*, p. 4.

“Then pain compels the impatient soul to seize  
On promis’d hopes of instantaneous ease.”—*Crabbe*.

### EXCEPTION.—LONG SIMPLE SENTENCES.

When the nominative in a long simple sentence is accompanied by inseparable adjuncts, or when several words together are used in stead of a nominative, a comma should be placed immediately before the verb; as, “Confession of sin without amendment, obtains no pardon.”—*Dillwyn’s Reflections*, p. 6. “To be totally indifferent to praise or censure, is a real defect in character.”—*Murray’s Gram.*, p. 268.

“O that the tenor of my just complaint,\*  
Were sculpt with steel in rocks of adamant!”—*Sandys*.

### RULE II.—SIMPLE MEMBERS.

The simple members of a compound sentence, whether successive or involved, elliptical or complete, are generally divided by the comma; as,

1. “Here stand we both, and aim we at the best.”—*Shak*.
2. “I, that did never weep, now melt in woe.”—*Id*.
3. “Tide life, tide death, I come without delay.”—*Id*.
4. “I am their mother, who shall bar me from them?”—*Id*.
5. “How wretched, were I mortal, were my state!”—*Pope*.

---

\* In regard to the admission of a comma before the verb, by the foregoing exception, neither the practice of authors nor the doctrine of punctuators is entirely uniform; but, where a considerable pause is, and must be, made in the reading, I judge it not only allowable, but necessary, to mark it in writing. In W. Day’s “Punctuation Reduced to a System,” a work of no inconsiderable merit, this principle is disallowed; and even when the adjunct of the nominative is a *relative clause*, which, by Rule 2d below and its first exception, requires a comma after it but none before it, this author excludes both, putting no comma before the principal verb. The following is an example: “But it frequently happens, that punctuation is not made a prominent exercise in schools; and the brief *manner* in which the subject is there dismissed *has proved* insufficient to impress upon the minds of youth a due sense of its importance.”—*Day’s Punctuation*, p. 32. A pupil of mine would here have put a comma after the word *dismissed*. So, in the following examples, after *sake*, and after *dispenses*: “The *vanity* that would accept power for its own sake *is* the pettiest of human passions.”—*Ib.*, p. 75. “The generous *delight* of beholding the happiness he dispenses *is* the highest enjoyment of man.”—*Ib.*, p. 100.

6. "Go; while thou mayst, avoid the dreadful fate."—*Id.*
7. "Grief aids disease, remember'd folly stings,  
And his last sighs reproach the faith of kings."—*Johnson.*

#### EXCEPTION I.—RESTRICTIVE RELATIVES.

When a relative immediately follows its antecedent, and is taken in a restrictive sense, the comma should not be introduced *before* it; as, "For the things *which* are seen, are temporal; but the things *which* are not seen, are eternal."—2 *Cor.*, iv, 18. "A letter is a character *that* expresses a sound without any meaning."—*St. Quentin's General Gram.*, p. 3.

#### EXCEPTION II.—SHORT TERMS CLOSELY CONNECTED.

When the simple members are short, and closely connected by a conjunction or a conjunctive adverb, the comma is generally omitted; as, "Honest poverty is better *than* wealthy fraud."—*Dillwyn's Ref.*, p. 11. "Let him tell me *whether* the number of the stars be even or odd."—TAYLOR: *Joh. Dict.*, *w. Even*. "It is impossible *that* our knowledge of words should outstrip our knowledge of things."—CAMPBELL: *Murray's Gram.*, p. 359.

#### EXCEPTION III.—ELLIPTICAL MEMBERS UNITED.

When two simple members are immediately united, through ellipsis of the relative, the antecedent, or the conjunction *that*, the comma is not inserted; as, "Make an experiment on the first man you meet."—*Berkley's Alciphron*, p. 125. "Our philosophers do infinitely despise and pity whoever shall propose or accept any other motive to virtue."—*Ib.*, p. 126. "It is certain we imagine before we reflect."—*Ib.*, p. 359.

"The same good sense that makes a man excel,  
Still makes him doubt he ne'er has written well."—*Young.*

#### RULE III.—MORE THAN TWO WORDS.

When more than two words or terms are connected in the same construction, or in a joint dependence on some other term, by conjunctions expressed or understood, the comma should be inserted after every one of them but the last; and, if they are nominatives before a verb, the comma should follow the last also:\* as,

1. "Who, to the enraptur'd heart, and ear, and eye,  
Teach beauty, virtue, truth, and love, and melody."—*Beattie.*
2. "Ah! what avails \* \* \* \* \*  
All that art, fortune, enterprise, can bring,  
If envy, scorn, remorse, or pride, the bosom wring?"—*Id..*

---

\* When several nominatives are connected, some authors and printers put the comma only where the conjunction is omitted. W. Day separates them all, one from an other; but after the last, when this is singular before a plural verb, he inserts no point. Example: "Imagination is one of the principal ingredients which enter into the complex idea of genius; but *judgment*, *memory*, *understanding*, *enthusiasm*, and *sensibility* are also included."—*Day's Punctuation*, p. 52. If the points are to be put where the pauses naturally occur, here should be a comma after *sensibility*; and, if I mistake not, it would be more consonant with current usage to set one there. John Wilson, however, in a later work, which is for the most part a very good one, prefers the doctrine of Day, as in the following instance: "*Reputation*, *virtue*, and *happiness* depend greatly on the choice of companions."—*Wilson's Treatise on Punctuation*, p. 30.

3. "Women are soft, mild, pitiful, and flexible;  
Thou, stern, obdurate, flinty, rough, remorseless."—*Shak.*
4. "She plans, provides, expatiates, triumphs there."—*Young.*
5. ————— "So eagerly the Fiend  
O'er bog, or steep, through strait, rough, dense, or rare,  
With head, hands, wings, or feet, pursues his way,  
And swims, or sinks, or wades, or creeps, or flies."—*Milton.*

#### RULE IV.—ONLY TWO WORDS.

When only two words or terms are connected by a conjunction, they should not be separated by the comma; as, "It is a *stupid and barbarous* way to extend dominion by arms; for true power is to be got by *arts and industry*"—*Spectator*, No. 2.

"*Despair and anguish* fled the struggling soul."—*Goldsmith.*

#### EXCEPTION I.—TWO WORDS WITH ADJUNCTS.

When the two words connected have several adjuncts, or when one of them has an adjunct that relates not to both, the comma is inserted; as, "I shall spare no pains to make their instruction agreeable, and their diversion useful."—*Spectator*, No. 10. "*Who* is applied to persons, or things personified."—*Bullions.*

"With listless eyes the dotard views the store,  
He views, and wonders that they please no more."—*Johnson.*

#### EXCEPTION II.—TWO TERMS CONTRASTED.

When two connected words or phrases are contrasted, or emphatically distinguished, the comma is inserted; as, "The vain are easily obliged, and easily disobliged."—*Kames.*

"Liberal, not lavish, is kind Nature's hand."—*Beattie.*

"'Tis certain he could write, and cipher too."—*Goldsmith.*

#### EXCEPTION III.—ALTERNATIVE OF WORDS.

When there is merely an alternative of names, or an explanatory change of terms, the comma is usually inserted; as, "We saw a large opening, or inlet."—*W. Allen.* "Have we not power to lead about a sister, a wife, as well as other apostles?"—*Cor.*, ix, 5.

#### EXCEPTION IV.—CONJUNCTION UNDERSTOOD.

When the conjunction is understood, the comma is inserted; and, if two separated words or terms refer alike to a third term, the second requires a second comma: as, "Reason, virtue, answer one great aim."—*L. Murray*, Gram., p. 269.

"To him the church, the realm, their pow'rs consign."—*Johnson.*

"She thought the isle that gave her birth.  
The sweetest, wildest land on earth."—*Hogg.*

## RULE V.—WORDS IN PAIRS.

When successive words are joined in pairs by conjunctions, they should be separated in pairs by the comma; as, "Interest and ambition, honour and shame, friendship and enmity, gratitude and revenge, are the prime movers in public transactions."—*W. Allen*. "But, whether ingenious or dull, learned or ignorant, clownish or polite, every innocent man, without exception, has as good a right to liberty as to life."—*Beattie's Moral Science*, p. 313.

"Then say how hope and fear, desire and hate,  
O'erspread with snares the crowded maze of fate."—*Dr. Johnson*.

## RULE VI.—WORDS PUT ABSOLUTE.

Nouns or pronouns put absolute, should, with their adjuncts, be set off by the comma; as, "The prince, *his father being dead*, succeeded."—"This done, we parted."—"Zaccheus, make haste and come down."—"His proctorship in Sicily, what did it produce?"—*Cicero*.

"Wing'd with his fears, on foot he strove to fly,  
*His steeds too distant*, and *the foe too nigh*"—*Pope, Iliad*, xi, 440.

## RULE VII.—WORDS IN APPPOSITION.

Words in apposition, (especially if they have adjuncts,) are generally set off by the comma; as, "He that now calls upon thee, is Theodore, *the hermit of Teneriffe*."—*Johnson*. "LOWTH, *Dr. Robert, bishop of London*, born in 1710, died in 1787."—*Biog. Dict.* "HOME, *Henry, lord Kames*."—*Ib.*

"What next I bring shall please thee, be assur'd,  
Thy *likeness*, thy fit *help*, thy other *self*,  
Thy *wish* exactly to thy heart's desire."—*Milton, P. L.*, viii, 450.

"And he, their prince, shall rank among my peers."—*Byron*.

## EXCEPTION I.—COMPLEX NAMES.

When several words, in their common order, are used as one compound name, the comma is not inserted; as, "Dr. Samuel Johnson,"—"Publius Gavius Cosanus."

## EXCEPTION II.—CLOSE APPPOSITION.

When a common and a proper name are closely united, the comma is not inserted; as, "The brook Kidron,"—"The river Don,"—"The empress Catharine,"—"Paul the Apostle."

## EXCEPTION III.—PRONOUN WITHOUT PAUSE.

When a pronoun is added to an other word merely for emphasis and distinction, the comma is not inserted; as, "Ye men of Athens,"—"I myself,"—"Thou flaming minister,"—"You princes."

## EXCEPTION IV.—NAMES ACQUIRED.

When a name acquired by some action or relation, is put in apposition with a preceding noun or pronoun, the comma is not inserted; as, "I made the *ground* my *bed*,"—"To make *him king*,"—"Whom they revered as *God*,"—"With *modesty* thy *guide*."—*Pope*.

## RULE VIII.—ADJECTIVES.

Adjectives, when something depends on them, or when they have the import of a dependent clause, should, with their adjuncts, be set off by the comma; as,

1. \_\_\_\_\_ “Among the roots  
Of hazel, *pendent o’er the plaintive stream*,  
They frame the first foundation of their domes.”—*Thomson*.
2. \_\_\_\_\_ “Up springs the lark,  
*Shrill-voic’d* and *loud*, the messenger of morn.”—*Id.*

## EXCEPTION.—ADJECTIVES RESTRICTIVE.

When an adjective immediately follows its noun, and is taken in a restrictive sense, the comma should not be used before it; as,

—“And on the coast *averse*  
From entrance or cherubic watch.”—*Milton, P. L.*, B. ix, l. 68.

## RULE IX.—FINITE VERBS.

Where a finite verb is understood, a comma is generally required; as, “From law arises security; from security, curiosity; from curiosity, knowledge.”—*Murray*.

“Else all my prose and verse were much the same;  
This, prose on stilts; that, poetry fallen lame.”—*Pope*.

## EXCEPTION.—VERY SLIGHT PAUSE.

As the semicolon must separate the clauses when the comma is inserted by this rule, if the pause for the omitted verb be very slight, it may be left unmarked, and the comma be used for the clauses; as, “When the profligate speaks of piety, the miser of generosity, the coward of valour, and the corrupt of integrity, they are only the more despised by those who know them.”—*Comstock’s Elocution*, p. 132.

## RULE X.—INFINITIVES.

The infinitive mood, when it follows a verb from which it must be separated, or when it depends on something remote or understood, is generally, with its adjuncts, set off by the comma; as, “One of the greatest secrets in composition is, *to know* when to be simple.”—*Jamieson’s Rhet.*, p. 151. “To confess the truth, I was much in fault.”—*Murray’s Gram.*, p. 271.

“The Governor of all—has interposed,  
Not seldom, his avenging arm, *to smite*  
The injurious trampler upon nature’s law.”—*Cowper*.

## RULE XI.—PARTICIPLES.

Participles, when something depends on them, when they have the import of a dependent clause, or when they relate to something understood, should, with their adjuncts, be set off by the comma; as, 1. “Law is a rule of civil conduct, *prescribed* by the supreme power in a state, *commanding* what is right, and *prohibiting* what is wrong.”—BLACKSTONE: *Beattie’s Moral Science*, p. 346.

2. "Young Edwin, *lighted by the evening star*,  
*Lingering and list'ning* wander'd down the vale."—*Beattie*.
3. "*United*, we stand; *divided*, we fall."—*Motto*.
4. "*Properly speaking*, there is no such thing as chance."

## EXCEPTION.—PARTICIPLES RESTRICTIVE.

When a participle immediately follows its noun, and is taken in a restrictive sense, the comma should not be used before it; as,

"A man *renown'd for repartee*,  
Will seldom scruple to make free  
With friendship's finest feeling."—*Couper*.

## RULE XII.—ADVERBS.

Adverbs, when they break the connexion of a simple sentence, or when they have not a close dependence on some particular word in the context, should, with their adjuncts, be set off by the comma; as, "We must not, *however*, confound this gentleness with the artificial courtesy of the world."—"Besides, the mind must be employed."—*Gilpin*. "*Most unquestionably*, no fraud was equal to all this."—*Lyttelton*. "But, *unfortunately for us*, the tide was ebbing already."

"When buttress and buttress, *alternately*,  
Seem framed of ebon and ivory."—*Scott's Lay*, p. 33.

## RULE XIII.—CONJUNCTIONS.

Conjunctions, when they are separated from the principal clauses that depend on them, or when they introduce examples, are generally set off by the comma; *as*, "*But*, by a timely call upon Religion, the force of Habit was eluded."—*Johnson*.

"They know the neck that joins the shore and sea,  
*Or*, ah! how chang'd that fearless laugh would be."—*Crabbe*.

## RULE XIV.—PREPOSITIONS.

Prepositions and their objects, when they break the connexion of a simple sentence, or when they do not closely follow the words on which they depend, are generally set off by the comma; as, "Fashion is, *for the most part*, nothing but the ostentation of riches."—"By *reading*, we add the experience of others to our own."

"In vain the sage, *with retrospective eye*,  
Would from th' apparent What conclude the Why."—*Pope*.

## RULE XV.—INTERJECTIONS.

Interjections that require a pause, though more commonly emphatic and followed by the ecphoneme, are sometimes set off by the comma; as, "For, *lo*, I will call all the families of the kingdoms of the north."—*Jeremiah*, i, 15. "*O*, 'twas about something you would not understand."—*Columbian Orator*, p. 221. "*Ha, ha!* you were finely taken in, then!"—*Aikin*. "*Ha, ha, ha!* A facetious gentleman, truly!"—*Id*.

“*Oh*, when shall Britain, conscious of her claim,  
Stand emulous of Greek and Roman fame?”—*Pope*.

#### RULE XVI.—WORDS REPEATED.

A word emphatically repeated, is generally set off by the comma; as, “Happy, happy, happy pair!”—*Dryden*. “Ay, ay, there is some comfort in that.”—*Shak*. “Ah! no, no, no.”—*Dryden*.

“The old oaken bucket, the iron-bound bucket,  
The moss-covered bucket, which hung in the well!”—*Woodworth*.

#### RULE XVII.—DEPENDENT QUOTATIONS.

A quotation, observation, or description, when it is introduced in close dependence on a verb, (as, *say*, *reply*, *cry*, or the like,) is generally separated from the rest of the sentence by the comma; as, “‘The book of nature,’ said he, ‘is before thee.’”—*Hawkesworth*. “I say unto all, Watch.”—*Mark*. “‘The boy has become a man,’ means, ‘he has *grown to be* a man.’ ‘Such conduct becomes a man,’ means, ‘such conduct *befits* him.’”—*Hart’s Gram.*, p. 116.

“While man exclaims, ‘See all things for my use!’  
‘See man for mine!’ replies a pamper’d goose.”—*Pope*.

#### IMPROPRIETIES FOR CORRECTION.

##### FALSE PUNCTUATION.—ERRORS CONCERNING THE COMMA.

##### UNDER RULE I.—OF SIMPLE SENTENCES.

“Short, simple sentences should not be separated by a comma.”—*Felton’s Gram.*, 1st Ed., p. 135; 3d Ed., Stereotyped, p. 137.

[FORMULE.—Not proper, because a needless comma is put after *short*, the sentence being simple. But, according to Rule 1st for the Comma, “A simple sentence does not, in general, admit the comma.” Therefore, this comma should be omitted; thus, “Short simple sentences should not be separated by a comma.” Or, much better: “A short simple sentence should *rarely be divided* by the comma.” For such sentences, combined to form a period, *should generally be separated*; and even a single one may have some phrase that must be set off.]

“A regular and virtuous education, is an inestimable blessing.”—*Murray’s Key*, 8vo, p. 174. “Such equivocal expressions, mark an intention to deceive.”—*Ib.*, p. 256. “They are, *This* and *that*, with their plurals *these* and *those*.”—*Bullions, E. Gram.*, p. 26; *Practical Lessons*, p. 3. “A nominative case and a verb, sometimes make a complete sentence; as, He sleeps.”—*Felton’s Gram.*, p. 78. “*Tense*, expresses the action connected with certain relations of time; *mood*, represents it as farther modified by circumstances of contingency, conditionally, &c.”—*Bullions, E. Gram.*, p. 37. “The word Noun, means name.”—*Ingersoll’s Gram.*, p. 14. “The present, or active participle, I explained then.”—*Ib.*, p. 97. “Are some verbs used, both transitively and intransitively?”—*Cooper’s Pl. and Pract. Gram.*, p. 54. “Blank verse, is verse without rhyme.”—*Hallock’s Gram.*, p. 242. “A distributive adjective, denotes each one of a number considered separately.”—*Ib.*, p. 51.

“And may at last my weary age,  
Find out the peaceful hermitage.”—*Murray’s Gr.*, 12mo, p. 205; 8vo, 255.

## UNDER THE EXCEPTION CONCERNING SIMPLE SENTENCES.

“A noun without an Article to limit it is taken in its widest sense.”—*Bullions, E. Gram.*, p. 8; *Practical Lessons*, p. 10.

[FORMULE.—Not proper, because no comma is here set before the verb *is taken*. But, according to the Exception to Rule 1st for the Comma, “When the nominative in a long simple sentence is accompanied by inseparable adjuncts, or when several words together are used in stead of a nominative, a comma should be placed immediately before the verb.” Therefore, a comma should be here inserted; thus, “A noun without an article to limit it, is taken in its widest sense.”—*Lennie’s Gram.*, p. 6.]

“To maintain a steady course amid all the adversities of life marks a great mind.”—*Day’s District School Gram.*, p. 84. “To love our Maker supremely and our neighbor as ourselves comprehends the whole moral law.”—*Ibid.* “To be afraid to do wrong is true courage.”—*Ib.*, p. 85. “A great fortune in the hands of a fool is a great misfortune.”—*Bullions, Practical Lessons*, p. 89. “That he should make such a remark is indeed strange.”—*Farnum, Practical Gram.*, p. 30. “To walk in the fields and groves is delightful.”—*Id.*, *ib.* “That he committed the fault is most certain.”—*Id.*, *ib.* “Names common to all things of the same sort or class are called *Common nouns*; as, *man, woman, day.*”—*Bullions, Pract. Les.*, p. 12. “That it is our duty to be pious *admits* not of any doubt.”—*Id.*, *E. Gram.*, p. 118. “To endure misfortune with resignation is the characteristic of a great mind,”—*Id.*, *ib.*, p. 81. “The assisting of a friend in such circumstances was certainly a duty.”—*Id.*, *ib.*, 81. “That a life of virtue is the safest is certain.”—*Hallock’s Gram.*, p. 169. “A collective noun denoting the idea of unity should be represented by a pronoun of the singular number.”—*Ib.*, p. 167.

## UNDER RULE II.—OF SIMPLE MEMBERS.

“When the sun had arisen the enemy retreated.”—*Day’s District School Gram.*, p. 85.

[FORMULE.—Not proper, because no comma here separates the two simple members which compose the sentence. But, according to Rule 2d, “The simple members of a compound sentence, whether successive or involved, elliptical or complete, are generally divided by the comma.” Therefore, a comma should be inserted after *arisen*; thus, “When the sun had arisen, the enemy retreated.”]

“If he *become* rich he may be less industrious.”—*Bullions, E. Gram.*, p. 118. “The more I study grammar the better I like it.”—*Id.*, *ib.*, p. 127. “There is much truth in the old adage that fire is a better servant than master.”—*Id.*, *ib.*, p. 128. “The verb *do*, when used as an auxiliary gives force or emphasis to the expression.”—*Day’s Gram.*, p. 39. “Whatsoever it is incumbent upon a man to do it is surely expedient to do well.”—*J. Q. Adams’s Rhetoric*, Vol. i, p. 46. “The soul which our philosophy divides into various capacities, is still one essence.”—*Channing, on Self-Culture*, p. 15. “Put the following words in the plural and give the rule for forming it.”—*Bullions, Practical Lessons*, p. 19. “We will do it if you wish.”—*Id.*, *ib.*, p. 29. “He who does well will be rewarded.”—*Id.*, *ib.*, 29. “That which is always true is expressed in the present tense.”—*Id.*, *ib.*, p. 119. “An observation which is always true must be expressed in the present tense.”—*Id.*, *Prin. of E. Gram.*, p. 123. “That part of orthography which treats of combining letters to form syllables and words is called SPELLING.”—*Day’s Gram.*, p. 8. “A noun can never be of the first person except it is in apposition with a pronoun of that person.”—*Ib.*, p. 14. “When two or more singular nouns or pronouns refer to the same object they require a singular verb and

pronoun.”—*Ib.*, p. 80. “James has gone but he will return in a few days.”—*Ib.*, 89. “A pronoun should have the same person, number, and gender as the noun for which it stands.”—*Ib.*, 89 and 80. “Though he is out of danger he is still afraid.”—*Bullions, E. Gram.*, p. 80. “She is his inferior in sense but his equal in prudence.”—*Ib.*, p. 81. “The man who has no sense of religion is little to be trusted.”—*Ib.*, 81. “He who does the most good has the most pleasure.”—*Ib.*, 81. “They were not in the most prosperous circumstances when we last saw them.”—*Ib.*, 81. “If the day continue pleasant I shall return.”—*Felton’s Gram.*, 1st Ed., p. 22; Ster. Ed., 24. “The days that are past are gone for ever.”—*Ib.*, pp. 89 and 92. “As many as are friendly to the cause will sustain it.”—*Ib.*, 89 and 92. “Such as desire aid will receive it.”—*Ib.*, 89 and 92. “Who gave you that book which you prize so much?”—*Bullions, Pract. Lessons*, p. 32. “He who made it now preserves and governs it.”—*Bullions, E. Gram.*, p. 83.

“Shall he alone, whom rational we call,  
Be pleased with nothing if not blessed with all?”—*Felton’s Gram.*, p. 126.

#### UNDER THE EXCEPTIONS CONCERNING SIMPLE MEMBERS.

“Newcastle is the town, in which Akenside was born.”—*Bucke’s Classical Gram.*, p. 54.

[FORMULE.—Not proper, because a needless comma here separates the restrictive relative *which* from its antecedent *town*. But, according to Exception 1st to Rule 2d, “When a relative immediately follows its antecedent, and is taken in a restrictive sense, the comma should not be introduced before it.” Therefore, this comma Should be omitted; thus, “Newcastle is the town in which Akenside was born.”]

“The remorse, which issues in reformation, is true repentance.”—*Campbell’s Philos. of Rhet.*, p. 255. “Men, who are intemperate, are destructive members of community.”—*Alexander’s Gram.*, p. 93. “An active-transitive verb expresses an action, which extends to an object.”—*Felton’s Gram.*, pp. 16 and 22. “They, to whom much is given, will have much to answer for.”—*Murray’s Key*, 8vo, p. 188. “The prospect, which we have, is charming.”—*Cooper’s Pl. and Pr. Gram.*, p. 143. “He is the person, who informed me of the matter.”—*Ib.*, p. 134; *Cooper’s Murray*, 120. “These are the trees, that produce no fruit.”—*Ib.*, 134; and 120. “This is the book, which treats of the subject.”—*Ib.*, 134; and 120. “The proposal was such, as pleased me.”—*Cooper, Pl. and Pr. Gram.*, p. 134. “Those, that sow in tears, shall reap in joy.”—*Id., ib.*, pp. 118 and 124; and *Cooper’s Murray*, p. 141. “The pen, with which I write, makes too large a mark.”—*Ingersoll’s Gram.*, p. 71. “Modesty makes large amends for the pain, it gives the persons, who labour under it, by the prejudice, it affords every worthy person in their favour.”—*Ib.*, p. 80. “Irony is a figure, whereby we plainly intend something very different from what our words express.”—*Bucke’s Gram.*, p. 108. “Catachresis is a figure, whereby an improper word is used instead of a proper one.”—*Ib.*, p. 109. “The man, whom you met at the party, is a Frenchman.”—*Frost’s Practical Gram.*, p. 155.

#### UNDER RULE III.—OF MORE THAN TWO WORDS.

“John, James and Thomas are here: that is, John *and* James, &c.”—*Cooper’s Plain and Practical Grammar*, p. 153.

[FORMULE.—Not proper, because no comma is here used after *James*, or after *Thomas*, or again after *John*, in the latter clause; the three nouns being supposed to be in the same construction, and all of them nominatives to the verb *are*. But, according to Rule 3d for the Comma, “When more than two words or terms are connected in the same

construction, or in a joint dependence on some other term, by conjunctions expressed or understood, the comma should be inserted after every one of them but the last; and, if they are nominatives before a verb, the comma should follow the last also.” Therefore, the comma should be inserted after each; thus, “John, James, and Thomas, are here: that is, John, *and* James, and Thomas, are here.”]\*

“Adverbs modify verbs adjectives and other adverbs.”—*Bullions, E. Gram.*, p. 97. “To Nouns belong Person, Gender, Number and Case.”—*Id.*, Practical Lessons, p. 12. “Wheat, corn, rye, and oats are extensively cultivated.”—*Id.*, *ib.*, p. 13. “In many, the definitions, rules and leading facts are prolix, inaccurate and confused.”—*Finch’s Report on Gram.*, p. 3. “Most people consider it mysterious, difficult and useless.”—*Ib.*, p. 3. “His father and mother, and uncle reside at Rome.”—*Farnum’s Gram.*, p. 11. “The relative pronouns are *who*, *which* and *that*.”—*Bullions, Practical Lessons*, p. 29. “*That* is sometimes a demonstrative, sometimes a relative and sometimes a conjunction.”—*Id.*, *ib.*, p. 33. “Our reputation, virtue, and happiness greatly depend on the choice of our companions.”—*Day’s Gram.*, p. 92. “The spirit of true religion is social, kind and cheerful.”—*Felton’s Gram.*, p. 81. “*Do*, *be*, *have* and *will* are sometimes principal verbs.”—*Ib.*, p. 26. “John and Thomas and Peter reside at Oxford.”—*Webster, Philos. Gram.*, p. 142; *Improved Gram.*, p. 96. “The most innocent pleasures are the most rational, the most delightful and the most durable.”—*Id.*, *ib.*, pp. 215 and 151. “Love, joy, peace and blessedness are reserved for the good.”—*Id.*, *ib.*, 215 and 151. “The husband, wife and children, suffered extremely.”—*Murray’s Gram.*, 4th Am. Ed., 8vo, p. 269. “The husband, wife, and children suffer extremely.”—*Sanborn’s Analytical Gram.*, p. 268. “He, you, and I have our parts assigned us.”—*Ibid.*

“He moaned, lamented, tugged and tried,  
Repented, promised, wept and sighed.”—*Felton’s Gr.*, p. 108.

#### UNDER RULE IV.—OF ONLY TWO WORDS.

“Disappointments derange, and overcome, vulgar minds.”—*Murray’s Exercises*, p. 15.

[FORMULE.—Not proper, because the two verbs here connected by *and*, are needlessly separated from each other, and from their object following. But, according to Rule 4th, “When only two words or terms are connected by a conjunction, they should not be separated by the comma.” Therefore, these two commas should be omitted; thus, “Disappointments derange and overcome vulgar minds.”]

---

\* Some printers, and likewise some authors, suppose a series of words to require the comma, only where the conjunction is suppressed. This is certainly a great error. It gives us such punctuation as comports neither with the *sense* of three or more words in the same construction, nor with the *pauses* which they require in reading. “John, James and Thomas are here,” is a sentence which plainly tells John that James and Thomas are here; and which, if read according to this pointing, cannot possibly have any other meaning. Yet this is the way in which the rules of *Cooper*, *Felton*, *Frost*, *Webster*, and perhaps others, teach us to point it, when we mean to tell somebody else that all three are here! In his pretended “Abridgment of Murray’s English Grammar,” (a work abounding in small thefts from Brown’s Institutes,) Cooper has the following example: “John, James or Joseph intends to accompany me.”—Page 120. Here, John being addressed, the punctuation is right; but, to make this noun a nominative to the verb, a comma must be put after *each of the others*. In Cooper’s “Plain and Practical Grammar,” the passage is found in this form: “John, James, or Joseph intends to accompany us.”—Page 132. This pointing is doubly wrong; because it is adapted to neither sense. If the three nouns have the same construction, the principal pause will be immediately before the verb; and surely a comma is as much required by that pause, as by the second. See the Note on Rule 3d, above.

“The hive of a city, or kingdom, is in the best condition, when there is the least noise or buzz in it.”—*Murray’s Key*, 8vo, p. 171. “When a direct address is made, the noun, or pronoun, is in the nominative case independent.”—*Ingersoll’s Gram.*, p. 88. “The verbs *love* and *teach*, make *loved*, and *taught*, in the imperfect and participle.”—*Ib.*, p. 97. “Neither poverty, nor riches were injurious to him.”—*Cooper’s Pl. and Pr. Gram.*, p. 133. “Thou, or I am in fault.”—*Wright’s Gram.*, p. 136. “A verb is a word that expresses action, or being.”—*Day’s District School Gram.*, pp. 11 and 61. “The Objective Case denotes the object of a verb, or a preposition.”—*Ib.*, pp. 17 and 19. “Verbs of the second conjugation may be either transitive, or intransitive.”—*Ib.*, p. 41. “Verbs of the fourth conjugation may be either transitive, or intransitive.”—*Ib.*, 41. “If a verb does not form its past indicative by adding *d*, or *ed* to the indicative present, it is said to be *irregular*.”—*Ib.*, 41. “The young lady is studying rhetoric, and logic.”—*Cooper’s Pl. and Pr. Gram.*, p. 143. “He writes, and speaks the language very correctly.”—*Ib.*, p. 148. “Man’s happiness, or misery, is, in a great measure, put into his own hands.”—*Murray’s Key*, 8vo, p. 183. “This accident, or characteristic of nouns, is called their *Gender*.”—*Bullions, E. Gram.*, 1843, p. 195.

“Grant that the powerful still the weak controul;  
Be Man the Wit, and Tyrant of the whole.”—POPE: *Brit. Poets*, vi, 375.

#### UNDER EXCEPTION I.—TWO WORDS WITH ADJUNCTS.

“Franklin is justly considered the ornament of the new world and the pride of modern philosophy.”—*Day’s District School Gram.*, p. 88.

[FORMULE.—Not proper, because the words *ornament* and *pride*, each of which has adjuncts, are here connected by *and* without a comma before it. But, according to Exception 1st to Rule 4th, “When the two words connected have several adjuncts, or when one of them has an adjunct that relates not to both, the comma is inserted.” Therefore, a comma should be set before *and*; thus, “Franklin is justly considered the ornament of the New World, and the pride of modern philosophy.”]

“Levity and attachment to worldly pleasures, destroy the sense of gratitude to him.”—*Murray’s Key*, 8vo, p. 183. “In the following Exercise, point out the adjectives and the substantives which they qualify.”—*Bullions, Practical Lessons*, p. 100. “When a noun or pronoun is used to explain or give emphasis to a preceding noun or pronoun.”—*Day’s Gram.*, p. 87. “Superior talents and *briliancy* of intellect do not always constitute a great man.”—*Ib.*, p. 92. “A word that makes sense after an *article* or the phrase *speak of*, is a noun.”—*Bullions, Practical Lessons*, p. 12. “All feet used in poetry, are reducible to eight kinds; four of two syllables and four of three.”—*Hiley’s Gram.*, p. 123. “He would not do it himself nor let me do it.”—*Bullions, E. Gram.*, p. 113.\* “The old writers give examples of the subjunctive mode and give other modes to explain what is meant by the words in the subjunctive.”—*O. B. Peirce’s Gram.*, p. 352.

#### UNDER EXCEPTION II.—TWO TERMS CONTRASTED.

“We often commend as well as censure imprudently.”—*Murray’s Key*, 8vo, p. 214. “It is as truly a violation of the right of property, to take little as to take much; to purloin a book, or a penknife, as to steal money; to steal fruit as to steal a horse; to defraud the

\* In punctuation, the grammar here cited is unaccountably defective. This is the more strange, because many of its errors are mere perversions of what was accurately pointed by an other hand. On the page above referred to, Dr. Bullions, in copying from Lennie’s syntactical exercises *a dozen consecutive lines*, has omitted *nine needful commas*, which Lennie had been careful to insert!

revenue as to rob my neighbour; to overcharge the public as to overcharge my brother; to cheat the postoffice as to cheat my friend.”—*Wayland's Moral Science*, 1st Edition, p. 254. “The classification of verbs has been and still is a vexed question.”—*Bullions, E. Grammar*, Revised Edition, p. 200. “Names applied only to individuals of a sort or class and not common to all, are called *Proper Nouns*.”—*Id.*, *Practical Lessons*, p. 12. “A hero would desire to be loved as well as to be revered.”—*Day's Gram.*, p. 108. “Death or some worse misfortune now divides them.”—*Cooper's Pl. and Pr. Gram.*, p. 133. “Alexander replied, ‘The world will not permit two suns nor two sovereigns.’”—*Goldsmith's Greece*, Vol. ii, p. 113.

“From nature's chain, whatever link you strike,  
Tenth or ten thousandth, breaks the chain alike.”—*Felton's Gram.*, p. 131.

#### UNDER EXCEPTION III.—ALTERNATIVE OF WORDS.

“*Metre* or *Measure* is the number of poetical feet which a verse contains.”—*Hiley's Gram.*, p. 123. “The *Cæsura* or *division*, is the pause which takes place in a verse, and which divides it into two parts.”—*Ib.*, 123. “It is six feet or one fathom deep.”—*Bullions, E. Gram.*, p. 113. “A BRACE is used in poetry at the end of a triplet or three lines which rhyme together.”—*Felton's Gram.*, p. 142. “There are four principal kinds of English verse or poetical feet.”—*Ib.*, p. 143. “The period or full stop denotes the end of a complete sentence.”—*Sanborn's Analytical Gram.*, p. 271. “The scholar is to receive as many *jetons* or counters as there are words in the sentence.”—*St. Quentin's Gram.*, p. 16. “*That* [thing] or *the thing which* purifies, fortifies also the heart.”—*Peirce's Gram.*, p. 74. “*That thing* or *the thing which* would induce a laxity in public or private morals, or indifference to guilt and wretchedness, should be regarded as the deadly Sirocco.”—*Ib.*, 74. “What is elliptically *what thing* or *that thing which*.”—*Sanborn's Gram.*, p. 99. “*Demonstrate* means *show* or *point out precisely*.”—*Ib.*, p. 139. “*The* man or *that* man, who endures to the end, shall be saved.”—*Hiley's Gram.*, p. 73. UNDER EXCEPTION IV.—A SECOND COMMA.

“Reason, passion answer one great end.”—*Bullions's E. Gram.*, p. 152; *Hiley's*, p. 112. “Reason, virtue answer one great aim.”—*Cooper's Pl. and Pract. Gram.*, p. 194; *Butler's*, 204. “Every good gift, and every perfect gift is from above.”—*Felton's Gram.*, p. 90. “Every plant, and every tree produces others after its kind.”—*Day's Gram.*, p. 91. “James, and not John was paid for his services.”—*Ib.*, 91. “The single dagger, or obelisk [Dagger] is the second.”—*Ib.*, p. 113. “It was I, not he that did it.”—*St. Quentin's Gram.*, p. 152. “Each aunt, (and) each cousin hath her speculation.”—*Sanborn's Gram.*, p. 139. “‘I shall see you *when* you come,’ is equivalent to ‘I shall see you *then*, or *at that time* when you come.’”—*Butler's Pract. Gram.*, p. 121.

“Let wealth, let honour wait the wedded dame,  
August her deed, and sacred be her fame.”—*Pope*, p. 334.

#### UNDER RULE V.—OF WORDS IN PAIRS.

“My hopes and fears, joys and sorrows centre in you.”—B. GREENLEAF: *Sanborn's Gram.*, p. 268.

[FORMULE.—Not proper, because no comma here separates the second pair of nominatives from the verb. But, according to Rule 5th, “When successive words are joined in pairs by conjunctions, they should be separated in pairs by the comma.” Therefore, an

other comma should be inserted after *sorrows*; thus, “My hopes and fears, joys and sorrows, centre in you.”]

“This mood implies possibility, or liberty, will, or obligation.”—*Ingersoll’s Gram.*, p. 113. “Substance is divided into Body, and Spirit into Extended and Thinking.”—*Brightland’s Gram.*, p. 253. “These consonants, [d and t,] like *p*, and *b*, *f*, and *v*, *k*, and hard *g*, and *s*, and *z*, are letters of the same organ.”—*Walkers Dict.*, p. 41: *Principles*, No. 358. “Neither fig nor twist pigtail nor cavendish have passed my lips since, nor ever shall they again.”—*Boston Cultivator*, Vol. vii, p. 36. “The words WHOEVER, or WHOSOEVER, WHICHEVER, or WHICHSOEVER, and WHATEVER, or WHATSOEVER are called COMPOUND RELATIVE PRONOUNS.”—*Day’s Gram.*, p. 23. “Adjectives signifying profit or disprofit, likeness or unlikeness govern the dative.”—*Bullions, Lat. Gram.*, 12th Ed., 215.

#### UNDER RULE VI.—OF WORDS ABSOLUTE.

“Thy rod and thy staff they comfort me.”—*Bullions, E. Gram.*, p. 135.

[FORMULE.—Not proper, because no comma is here set after *staff*, which, with the noun *rod*, is put absolute by pleonasm. But, according to Rule 6th, “Nouns or pronouns put absolute, should, with their adjuncts, be set off by the comma.” Therefore, a comma should be here inserted; thus, “Thy rod and thy staff, they comfort me.”—*Psalm* xxiii, 4.]

“Depart ye wicked.”—*Wright’s Gram.*, p. 70. “He saith to his mother, Woman behold thy son.”—*Gurney’s Portable Evidences*, p. 44. “Thou God seest me.”—*Bullions, E. Gram.*, p. 9; *Practical Lessons*, p. 13. “Thou, God seest me.”—*Id.*, *E. Gram.*, Revised Ed., p. 195. “John write me a letter. Henry go home.”—*O. B. Peirce’s Gram.*, p. 356. “John; write a letter. Henry; go home.”—*Ib.*, p. 317. “Now, *G. Brown*; let us reason together.”—*Ib.*, p. 326. “Smith: You say on page 11, the objective case denotes the object.”—*Ib.*, p. 344. “Gentlemen: will you always speak as you mean?”—*Ib.*, p. 352. “John: I sold my books to William for his brothers.”—*Ib.*, p. 47. “Walter and Seth: I will take my things, and leave yours.”—*Ib.*, p. 69. “Henry: Julia and Jane left their umbrella, and took yours.”—*Ib.*, p. 73. “John; harness the horses and go to the mine for some coal. William; run to the store for a few pounds of tea.”—*Ib.*, p. 160. “The king being dead the parliament was dissolved.”—*Chandler’s Gram.*, p. 119.

“Cease fond nature, cease thy strife,  
And let me languish into life.”—*Bullions’s E. Gram.*, p. 173.

“Forbear great man, in arms renown’d, forbear.”—*Ib.*, p. 174.

“Eternal sunshine of the spotless mind,  
Each prayer accepted and each wish resign’d.”—*Hiley’s Gr.*, p. 123.

#### UNDER RULE VII.—WORDS IN APPPOSITION.

“We the people of the United States, in order to form a more perfect union, establish justice,” &c.—*Hallock’s Gram.*, p. 200.

[FORMULE.—Not proper, because no comma is here set after the pronoun *We*, with which the word *people*, which has adjuncts, is in apposition. But, according to Rule 7th, “Words in apposition, (especially if they have adjuncts,) are generally set off by the comma.” Therefore, an other comma should be here inserted; thus, “We, the people of the United States,” &c.]

“The Lord, the covenant God of his people requires it.”—*Anti-Slavery Magazine*, Vol. i, p. 73. “He as a patriot deserves praise.”—*Hallock’s Gram.*, p. 124. “Thomson the watchmaker and jeweller from London, was of the party.”—*Bullions, E. Gram.*, p. 128. “Every body knows that the person here spoken of by the name of *the conqueror*, is William duke of Normandy.”—*Murray’s Gram.*, 8vo, p. 33. “The words *myself*, *thyself*, *himself*, *herself*, and their plurals *ourselves*, *yourselves*, and *themselves* are called Compound Personal Pronouns.”—*Day’s Gram.*, p. 22.

“For who to dumb forgetfulness a prey,  
This pleasing anxious being e’er resign’d,  
Left the warm precincts of the cheerful day,  
Nor cast one longing, ling’ring look behind?”—*U. Poems*, p. 68.

#### UNDER EXCEPTIONS CONCERNING APPOSITION.

“Smith and Williams’ store; Nicholas, the emperor’s army.”—*Day’s Gram.*, p. 17. “He was named William, the conqueror.”—*Ib.*, p. 80. “John, the Baptist, was beheaded.”—*Ib.*, p. 87. “Alexander, the coppersmith, did me great harm.”—*Hart’s Gram.*, p. 126. “A nominative in immediate apposition; as, ‘The boy, *Henry*, speaks.’”—*Smart’s Accidence*, p. 29. “A noun objective can be in apposition with some other; as, ‘I teach the boy, *Henry*.’”—*Ib.*, p. 30.

#### UNDER RULE VIII.—OF ADJECTIVES.

“But he found me, not singing at my work ruddy with health vivid with cheerfulness; but pale and dejected, sitting on the ground, and chewing opium.”

[FORMULE.—Not proper, because the phrases, “*ruddy with health*,” and “*vivid with cheerfulness*,” which begin with adjectives, are not here *commaed*. But, according to Rule 8th, “Adjectives, when something depends on them, or when they have the import of a dependent clause, should, with their adjuncts, be set off by the comma.” Therefore, two other commas should be here inserted; thus, “But he found me, not singing at my work, ruddy with health, vivid with cheerfulness; but pale,” &c.—*Dr. Johnson*.]

“I looked up, and beheld an inclosure beautiful as the gardens of paradise, but of a small extent.”—See *Key*. “*A* is an article, indefinite and belongs to ‘*book*.’”—*Bullions, Practical Lessons*, p. 10. “The first expresses the rapid movement of a troop of horse over the plain eager for the combat.”—*Id.*, Lat. Gram., p. 296. “He [, the Indian chieftain, King Philip,] was a patriot, attached to his native soil; a prince true to his subjects and indignant of their wrongs; a soldier daring in battle firm in adversity patient of fatigue, of hunger, of every variety of bodily suffering and ready to perish in the cause he had espoused.”—See *Key*.

“For thee, who mindful of th’ unhonour’d dead  
Dost in these lines their artless tale relate.”—*Union Poems*, p. 68.

“Some mute inglorious Milton here may rest:  
Some Cromwell guiltless of his country’s blood.”—*Day’s Gram.*, p. 117.

“Idle after dinner in his chair  
Sat a farmer ruddy, fat, and fair.”—*Hiley’s Gram.*, p. 125.

## UNDER THE EXCEPTION CONCERNING ADJECTIVES.

“When an attribute becomes a title, or is emphatically applied to a name, it follows it; as Charles, the Great; Henry, the First; Lewis, the Gross.”—*Webster’s Philos. Gram.*, p. 153; *Improved Gram.*, p. 107. “Feed me with food, convenient for me.”—*Cooper’s Practical Gram.*, p. 118. “The words and phrases, necessary to exemplify every principle progressively laid down, will be found strictly and exclusively adapted to the illustration of the principles to which they are referred.”—*Ingersoll’s Gram.*, Pref., p. x. “The *Infinitive Mode* is that form of the verb which expresses action or being, unlimited by person, or number.”—*Day’s Gram.*, p. 35. “A man, diligent in his business, prospers.”—*Frost’s Practical Gram.*, p. 113.

“O wretched state! oh bosom, black as death!”—*Hallock’s Gram.*, p. 118.

“O, wretched state! O, bosom, black as death!”—*Singer’s Shak.*, Vol. ii, p. 494.

## UNDER RULE IX.—OF FINITE VERBS.

“The Singular denotes *one*; the Plural *more* than one.”—*Bullions, E. Gram.*, p. 12; *Pract. Lessons*, p. 16; *Lennie’s Gram.*, p. 7.

[FORMULE.—Not proper, because no comma is here set after *Plural*, where the verb *denotes* is understood. But, according to Rule 9th, “Where a finite verb is understood, a comma is generally required.” Therefore, a comma should be inserted at the place mentioned; thus, “The Singular denotes *one*; the Plural, *more* than one.”]

“The *comma* represents the shortest pause; the *semicolon* a pause longer than the comma; the *colon* longer than the semicolon; and the *period* longer than the colon.”—*Hiley’s Gram.*, p. 111. “The comma represents the shortest pause; the semicolon a pause double that of the comma; the colon, double that of the semicolon; and the period, double that of the colon.”—*Bullions, E. Gram.*, p. 151; *Pract. Lessons*, p. 127. “Who is applied only to persons; which to animals and things; what to things only; and that to persons, animals, and things.”—*Day’s Gram.*, p. 23. “*A* or *an* is used before the singular number only; *the* before either singular or plural.”—*Bullions, Practical Lessons*, p. 10. “Homer was the greater genius; Virgil the better artist.”—*Day’s Gram.*, p. 96. “Homer was the greater genius, Virgil the better artist.”—POPE’S PREFACE: *British Poets*, Vol. vi, p. viii. “Words are formed of syllables; syllables of letters.”—*St. Quentin’s General Gram.*, p. 2. “The Conjugation of an active verb is styled the ACTIVE VOICE; and that of a passive verb the PASSIVE VOICE.”—*Frost’s El. of E. Gram.*, p. 19. “The CONJUGATION of an active verb is styled the ACTIVE VOICE, and that of a passive verb the PASSIVE VOICE.”—*Smith’s New. Gram.*, p. 171. “The possessive is sometimes called the genitive case; and the objective the accusative.”—*L. Murray’s Gram.*, 12mo, p. 44. “Benevolence is allied to few vices; selfishness to fewer virtues.”—*Kames, Art of Thinking*, p. 40. “Orthography treats of Letters, Etymology of Words, Syntax of Sentences, and Prosody of Versification.”—*Hart’s English Gram.*, p. 21.

“Earth praises conquerors for shedding blood;

Heaven those that love their foes, and do them good.”—See *Key*.

## UNDER RULE X.—OF INFINITIVES.

“His business is to observe the agreement or disagreement of words.”—*Bullions, E. Grammar*, Revised Edition, p. 189.

[FORMULE.—Not proper, because no comma here divides *to observe* from the preceding verb. But, according to Rule 10th, “The infinitive mood, when it follows a verb from which it must be separated, or when it depends on something remote or understood, is generally, with its adjuncts, set off by the comma.” Therefore, a comma should be inserted after *is*; thus, “His business is, to observe the agreement or disagreement of words.”]

“It is a mark of distinction to be made a member of this society.”—*Farnum’s Gram.*, 1st Ed., p. 25; 2d Ed., p. 23. “To distinguish the conjugations let the pupil observe the following rules.”—*Day’s D. S. Gram.*, p. 40. “He was now sent for to preach before the Parliament.”—*Life of Dr. J. Owen*, p. 18. “It is incumbent on the young to love and honour their parents.”—*Bullions, E. Gram.*, p. 83. “It is the business of every man to prepare for death.”—*Id.*, *ib.*, p. 83. “It argued the sincerest candor to make such an acknowledgement.”—*Id.*, *ib.*, p. 115. “The proper way is to complete the construction of the first member, and leave that of the second understood.”—*Id.*, *ib.*, p. 125. “ENEMY is a name. It is a term of distinction given to a certain person to show the character in which he is represented.”—*O. B. Peirce’s Gram.*, p. 23. “The object of this is to preserve the soft sound of *c* and *g*.”—*Hart’s Gram.*, p. 29. “The design of grammar is to facilitate the *reading, writing, and speaking* of a language.”—*Barrett’s Gram.*, 10th Ed., Pref., p. iii. “Four kinds of type are used in the following pages to indicate the portions that are considered more or less elementary.”—*Hart’s Gram.*, p. 3.

#### UNDER RULE XI.—OF PARTICIPLES.

“The chancellor being attached to the king secured his crown.”—*Wright’s Gram.*, p. 114.

[FORMULE.—Not proper, because the phrase, “being attached to the king,” is not *commaed*. But, according to Rule 11th, “Participles, when something depends on them, when they have the import of a dependent clause, or when they relate to something understood, should, with their adjuncts, be set off by the comma.” Therefore, two commas should be here inserted; thus, “The chancellor, being attached to the king, secured his crown.”—*Murray’s Gram.*, p. 66.]

“The officer having received his orders, proceeded to execute them.”—*Day’s Gram.*, p. 108. “Thus used it is in the present tense.”—*Bullions, E. Gram.*, Revised Ed., p. 33. “The *Imperfect* tense has three distinct forms corresponding to those of the present tense.”—*Id.*, *ib.*, p. 40. “Every possessive case is governed by some noun denoting the thing possessed.”—*Id.*, *ib.*, p. 87. “The word *that* used as a conjunction is preceded by a comma.”—*Id.*, *ib.*, p. 154. “His narrative being composed upon such good authority, deserves credit.”—*Cooper’s Pl. and Pr. Gram.*, p. 97. “The hen being in her nest, was killed and eaten there by the eagle.”—*Murray’s Key*, 8vo. p. 252. “Pronouns being used instead of nouns are subject to the same modifications.”—*Sanborn’s Gram.*, p. 92. “When placed at the beginning of words they are consonants.”—*Hallock’s Gram.*, p. 14. “Man starting from his couch, shall sleep no more.”—*Id.*, p. 222. “*His* and *her* followed by a noun are possessive pronouns: not followed by a noun they are personal pronouns.”—*Bullions, Practical Lessons*, p. 33.

“He with viny crown advancing,

First to the lively pipe his hand addressed.”—*Id.*, *E. Gram.*, p. 83.

## UNDER THE EXCEPTION CONCERNING PARTICIPLES.

“But when they convey the idea of many, acting individually, or separately, they are of the plural number.”—*Day’s Gram.*, p. 15. “Two or more singular antecedents, connected by *and* require verbs and pronouns of the plural number.”—*Ib.*, pp. 80 and 91. “Words ending in *y*, preceded by a consonant, change *y* into *i* when a termination is added.”—*Butlers Gram.*, p. 11. “A noun, used without an article to limit it, is generally taken in its widest sense.”—*Ingersoll’s Gram.*, p. 30. “Two nouns, meaning the same person or thing, frequently come together.”—*Bucke’s Gram.*, p. 89. “Each one must give an account to God for the use, or the abuse of the talents, committed to him.”—*Coopers Pl. and Pract. Gram.*, p. 133. “Two vowels, united in one sound, form a diphthong.”—*Frost’s El. of Gram.*, p. 6. “Three vowels, united in one sound, form a triphthong.”—*Ib.* “Any word, joined to an adverb, is a secondary adverb.”—*Barrett’s Revised Gram.*, p. 68. “The person, spoken to, is put in the Second person. The person, spoken of, in the Third person.”—*Cutler’s Gram.*, p. 14. “A man, devoted to his business, prospers.”—*Frost’s Pr. Gram.*, p. 113.

## UNDER RULE XII.—OF ADVERBS.

“So in indirect questions; as, ‘Tell me *when* he will come.’”—*Butler’s Gram.*, p. 121.

[FORMULE.—Not proper, because the adverb *So* is not set off by the comma. But according to Rule 12th, “Adverbs, when they break the connexion of a simple sentence, or when they have not a close dependence on some particular word in the context, should, with their adjuncts, be set off by the comma.” Therefore, a comma should be inserted after *So*; thus, “So, in indirect questions; as,” &c.]

“Now when the verb tells what one person or thing does to another, the verb is transitive.”—*Bullions, Pract. Les.*, p. 37. “Agreeably to your request I send this letter.”—*Id.*, *E. Gram.*, p. 141. “There seems therefore, to be no good reason for giving them a different classification.”—*Id.*, *E. Gram.*, p. 199. “Again the kingdom of heaven is like unto a merchantman, seeking goodly pearls.”—ALGER’S BIBLE: *Matt.*, xiii, 45. “Again the kingdom of heaven is like unto a net, that was cast into the sea.”—*Ib.*, *ib.*, verse 47. “*Cease* however, is used as a transitive verb by our best writers.”—*Webster’s Philos. Gram.*, p. 171. “Time admits of three natural divisions, namely: Present, Past, and Future.”—*Day’s Gram.*, p. 37. “There are three kinds of comparison, namely: regular, irregular, and adverbial.”—*Ib.*, p. 31. “There are five Personal Pronouns namely: *I*, *thou*, *he*, *she*, and *it*.”—*Ib.*, p. 22. “Nouns have three cases, viz. the Nominative, Possessive, and Objective.”—*Bullions, E. Gram.*, p. 16; *P. Lessons*, p. 19. “Hence in studying Grammar, we have to study words.”—*Frazee’s Gram.*, p. 18. “Participles like Verbs relate to Nouns and Pronouns.”—*Miller’s Ready Grammarian*, p. 23. “The time of the participle like that of the infinitive is estimated from the time of the leading verb.”—*Bullions, Lat. Gram.*, p. 97.

“The dumb shall sing the lame his crutch forego,  
And leap exulting like the bounding roe.”—*Hiley’s Gram.*, p. 123.

## UNDER RULE XIII.—OF CONJUNCTIONS.

“But he said, Nay; lest while ye gather up the tares, ye root up also the wheat with them.”—FRIENDS’ BIBLE, and SMITH’S: *Matt.*, xiii, 29.

[FORMULE.—Not proper, because no comma is inserted after *lest*. But, according to Rule 13th, “Conjunctions, when they are separated from the principal clauses that depend on them, or when they introduce examples, are generally set off by the comma.” Therefore,

a comma should be put after the word *lest*; thus, "But he said, Nay; lest, while ye gather up the tares, ye root up also the wheat with them."—SCOTT'S BIBLE, ALGER'S, BRUCE'S.]

"Their intentions were good; but wanting prudence, they missed the mark at which they aimed."—*Murray's Key*, 8vo, Vol. ii, p. 221. "The verb *be* often separates the name from its attribute; as war is expensive."—*Webster's Philos. Gram.*, p. 153. "*Either* and *or* denote an alternative; as 'I will take *either* road at your pleasure.'"—*Ib.*, p. 63; *Imp. Gram.*, 45. "*Either* is also a substitute for a name; as '*Either* of the roads is good.'"—*Webster, both Grams.*, 63 and 45. "But alas! I fear the consequence."—*Day's Gram.*, p. 74. "Or if he ask a fish, will he for a fish give him a serpent?"—*Scott's Bible, and Smith's*. "Or if he shall ask an egg, will he offer him a scorpion?"—*Smiths Bible*. "The infinitive sometimes performs the office of a nominative case, as 'To enjoy is to obey.'—POPE."—*Cutler's Gram.*, p. 62. "The plural is commonly formed by adding *s* to the singular, as *book, books*."—*Bullions, E. Gram.*, p. 12. "As 'I *were* to blame, if I did it.'"—*Smart's Accidence*, p. 16.

"Or if it be thy will and pleasure  
Direct my plough to find a treasure."—*Hiley's Gram.*, p. 124.

"Or if it be thy will and pleasure,  
Direct my plough to find a treasure."—*Hart's Gram.*, p. 185.

#### UNDER RULE XIV.—OF PREPOSITIONS.

"Pronouns agree with the nouns for which they stand in gender, number, and person."—*Butler's Practical Gram.*, pp. 141 and 148; *Bullions's Analyt. and Pract. Gram.*, p. 150.

[FORMULE.—Not proper, because the preposition *in* has not the comma before it, as the text requires. But, according to Rule 14th, "Prepositions and their objects, when they break the connexion of a simple sentence, or when they do not closely follow the words on which they depend, are generally set off by the comma." Therefore, a comma should be here inserted; thus, "Pronouns agree with the nouns for which they stand, in gender, number, and person." Or the words may be transposed, and the comma set before *with*; thus, "Pronouns agree *in* gender, number, and person, *with* the nouns for which they stand."]

"In the first two examples the antecedent is *person*, or something equivalent; in the last it is *thing*."—*Butler, ib.*, p. 53. "In what character he was admitted is unknown."—*Ib.*, p. 55. "To what place he was going is not known."—*Ib.*, p. 55. "In the preceding examples *John, Cæsar*, and *James* are the subjects."—*Ib.*, p. 59. "*Yes* is generally used to denote assent in *the* answer to a question."—*Ib.*, p. 120. "*That* in its origin is the passive participle of the Anglo-Saxon verb *thean, to take*"—*Ib.*, p. 127. "But in all these sentences *as* and *so* are *adverbs*."—*Ib.*, p. 127. "After an interjection or exclamatory sentence is placed the mark of exclamation."—*Blair's Gram.*, p. 116. "Intransitive verbs from their nature can have no distinction of voice."—*Bullions, E. Gram.*, p. 30. "To the inflection of verbs belong Voices, Moods, Tenses, Numbers, and Persons."—*Id., ib.*, p. 33; *Pract. Lessons*, p. 41. "*As* and *so* in the antecedent member of a comparison are properly adverbs."—*Id., E. Gram.*, p. 113. "In the following Exercise point out the words in apposition."—*Id., P. Lessons*, p. 103. "In the following Exercise point out the noun or pronoun denoting the possessor."—*Id., ib.*, p. 105. "*Its* is not found in the Bible except by misprint."—*Hallock's Gram.*, p. 68. "No one's interest is concerned except mine."—*Ib.*, p. 70. "In most of the modern languages there are four concords."—*St. Quentin's Gen. Gram.*,

p. 143. "In illustration of these remarks let us suppose a case."—*Hart's Gram.*, p. 104. "On the right management of the emphasis depends the life of pronunciation."—*ib.*, p. 172; *Murray's*, 8vo, p. 242.

#### UNDER RULE XV.—OF INTERJECTIONS.

"Behold he is in the desert."—SCOTT'S BIBLE: *Matt.*, xxiv, 26.

[FORMULE.—Not proper, because the interjection *Behold*, which has usually a comma after it in Scripture, has here no point. But, according to Rule 15th, "Interjections that require a pause, though more commonly emphatic and followed by the ecphoneme, are sometimes set off by the comma." In this instance, a comma should be used; thus, "Behold, he is in the desert."—*Common Bible*.]

"And Lot said unto them, Oh not so my Lord."—SCOTT'S BIBLE: *Gen.*, xix, 18. "Oh let me escape thither, (is it not a little one?) and my soul shall live."—SCOTT: *Gen.*, xix, 20. "Behold! I come quickly.—BIBLE."—*Day's Gram.*, p. 74. "Lo! I am with you always."—*Day's Gram.*, pp. 10 and 73. "And lo! I am with you always."—*ib.*, pp. 78 and 110. "And lo, I am with you alway."—*Scott's Bible*, and BRUCE'S: *Matt.*, xxviii, 20. "Ha! ha! ha! how laughable that is."—*Bullions, Pract. Les.*, p. 83. "Interjections of *Laughter*,—Ha! he! hi! ho!"—*Wright's Gram.*, p. 121.

#### UNDER RULE XVI.—OF WORDS REPEATED.

"Lend lend your wings! I mount! I fly!"—*Example varied*.

[FORMULE.—Not proper, because the repeated word *lend* has here no comma. But, according to Rule 16th, "A word emphatically repeated, is generally set off by the comma." In this instance, a comma is required after the former *lend*, but not after the latter; thus,

"Lend, lend your wings! I mount! I fly!"—*Pope's Poems*, p. 317.]

"To bed to bed to bed. There is a knocking at the gate. Come come come. What is done cannot be undone. To bed to bed to bed."—See *Burgh's Speaker*, p. 130. "I will roar, that the duke shall cry, Encore encore let him roar let him roar once more once more."—See *ib.*, p. 136.

"Vital spark of heav'nly flame,  
Quit oh quit this mortal frame."—*Hiley's Gram.*, p. 126.

"Vital spark of heav'nly flame,  
Quit, oh quit, this mortal frame!"—*Bullions, E. Gr.*, p. 172.

"O the pleasing pleasing  
Anguish, When we love, and when we languish."—*Ward's Gram.*, p. 161.

"Praise to God immortal praise  
For the love that crowns our days!"—*Hiley's Gram.*, p. 124.

#### UNDER RULE XVII.—OF DEPENDENT QUOTATIONS.

"Thus, of an infant, we say '*It* is a lovely creature.'"—*Bullions, Prin. of E. Gram.*, p. 12.

[FORMULE.—Not proper, because no comma is here inserted between *say* and the citation which follows. But, according to Rule 17th, "A quotation, observation, or description, when it is introduced in close dependence on a verb, (as, *say, reply, cry*, or

the like.) is generally separated from the rest of the sentence by the comma.” Therefore, a comma should be put after *say*; as, “Thus, of an infant, we say, ‘It is a lovely creature.’”]

“No being can state a falsehood in saying *I am*; for no one can utter it, if it is not true.”—*Cardell’s Gram.*, 18mo, p. 118. “I know they will cry out against this and say ‘should he pay, means if he should pay.’”—*O. B. Peirce’s Gram.*, p. 352. “For instance, when we say ‘*the house is building*,’ the advocates of the new theory ask, ‘building *what?*’ We might ask in turn, when you say ‘the field ploughs well,’ ploughs *what?* ‘Wheat sells well,’ sells *what?* If *usage* allows us to say ‘wheat *sells* at a dollar’ in a sense that is not active, why may it not also allow us to say ‘wheat *is selling* at a dollar’ in a sense that is not active?”—*Hart’s English Gram.*, p. 76. “*Man* is accountable, equals *mankind* are accountable.”—*S. Barrett’s Revised Gram.*, p. 37. “Thus, when we say ‘He may be reading,’ *may* is the real verb; the other parts are verbs by name only.”—*Smart’s English Accidence*, p. 8. “Thus we say *an apple*, *an hour*, that two vowel sounds may not come together.”—*Ib.*, p. 27. “It would be as improper to say *an unit*, as to say *an youth*; to say *an one*, as to say *an wonder*.”—*Ib.*, p. 27. “When we say ‘He died for the truth,’ *for* is a preposition.”—*Ib.*, p. 28. “We do not say ‘I might go yesterday,’ but ‘I might have gone yesterday.’”—*Ib.*, p. 11. “By student, we understand one who has by matriculation acquired the rights of academical citizenship; but, by bursché, we understand one who has already spent a certain time at the university.”—*Howitt’s Student-Life in Germany*, p. 27.

## SECTION II.—THE SEMICOLON.

The Semicolon is used to separate those parts of a compound sentence, which are neither so closely connected as those which are distinguished by the comma, nor so little dependent as those which require the colon.

### RULE I.—COMPLEX MEMBERS.

When two or more complex members, or such clauses as require the comma in themselves, are constructed into a period, they are generally separated by the semicolon: as, “In the regions inhabited by angelic natures, unmingled felicity forever blooms; joy flows there with a perpetual and abundant stream, nor needs any mound to check its course.”—*Carter*. “When the voice rises, the gesture naturally ascends; and when the voice makes the falling inflection, or lowers its pitch, the gesture follows it by a corresponding descent; and, in the level and monotonous pronunciation of the voice, the gesture seems to observe a similar limitation, by moving rather in the horizontal direction, without much varying its elevation.”—*Comstock’s Elocution*, p. 107.

“The wide, the unbounded prospect lies before me;  
But shadows, clouds, and darkness, rest upon it.”—*Addison*.

### RULE II.—SIMPLE MEMBERS.

When two or more simple members, or such clauses as complete their sense without subdivision, are constructed into a period; if they require a pause greater than that of the comma, they are usually separated by the semicolon: as, “Straws swim upon the surface; but pearls lie at the bottom.”—*Murray’s Gram.*, p. 276. “Every thing grows old; every thing passes away; every thing disappears.”—*Hiley’s Gram.*, p. 115. “Alexander asked them the distance of the Persian capital; what forces the king of Persia could bring into the field; what the Persian government was; what was the character of the king; how he treated his enemies; what were the most direct ways into Persia.”—*Whelpley’s Lectures*, p. 175.

“A longer care man’s helpless kind demands;  
That longer care contracts more lasting bands.”—*Pope*.

### RULE III.—OF APPPOSITION, &C.

Words in apposition, in disjunct pairs, or in any other construction, if they require a pause greater than that of the comma, and less than that of the colon, may be separated by the semicolon: as, “Pronouns have three cases; the nominative, the possessive, and the objective.”—*Murray’s Gram.*, p. 51. “Judge, judgement; lodge, lodgement; acknowledge, acknowledgement.”—*Butler’s Gram.*, p. 11. “Do not the eyes discover humility, pride; cruelty, compassion; reflection, dissipation; kindness, resentment?”—*Sheridan’s Elocution*, p. 159. “This rule forbids parents to lie to children, and children to parents; instructors to pupils, and pupils to instructors; the old to the young, and the young to the old; attorneys to jurors, and jurors to attorneys; buyers to sellers, and sellers to buyers.”—*Wayland’s Moral Science*, p. 304.

“*Make, made; have, had; pay, paid; say, said; leave, left; Dream, dreamt; mean, meant; reave and bereave have reft.*”—*Ward’s Gr.*, p. 66.

### IMPROPRIETIES FOR CORRECTION.

#### FALSE PUNCTUATION.—ERRORS CONCERNING THE SEMICOLON.

##### UNDER RULE I.—OF COMPLEX MEMBERS.

“The buds spread into leaves, and the blossoms swell to fruit, but they know not how they grow, nor who causes them to spring up from the bosom of the earth.”—*Day’s E. Gr.*, p. 72.

[FORMULE.—Not proper, because the two chief members which compose this period, are separated only by the comma after “*fruit*.” But, according to Rule 1st for the Semicolon, “When two or more complex members, or such clauses as require the comma in themselves, are constructed into a period, they are generally separated by the semicolon.” Therefore, the pause after “*fruit*” should be marked by a semicolon.]

“But he used his eloquence chiefly against Philip, king of Macedon, and, in several orations, he stirred up the Athenians to make war against him.”—*Bullions, E. Gram.*, p. 84. “For the sake of euphony, the *n* is dropped before a consonant, and because most words begin with a consonant, this of course is its more common form.”—*Ib.*, p. 192. “But if I say ‘Will *a* man be able to carry this burden?’ it is manifest the idea is entirely changed, the reference is not to number, but to the species, and the answer might be ‘No; but a horse will.’”—*Ib.*, p. 193. “In direct discourse, a noun used by a speaker or writer to designate himself, is said to be of the *first* person—used to designate the person addressed, it is said to be of the *second* person, and when used to designate a person or thing spoken of, it is said to be of the *third* person.”—*Ib.*, p. 195. “Vice stings us, even in our pleasures, but virtue consoles us, even in our pains.”—*Day’s Gram.*, p. 84. “Vice is infamous though in a prince, and virtue honorable though in a peasant.”—*Ib.*, p. 72. “Every word that is the name of a person or thing, is a *Noun*, because ‘A noun is the name of any person, place, or thing.’”—*Bullions, Pract. Les.*, p. 83.

“This is the sword, with which he did the deed,  
And that the shield by which he was defended.”—*Bucke’s Gram.*, p. 56.

## UNDER RULE II.—OF SIMPLE MEMBERS.

“A deathlike paleness was diffused over his countenance, a chilling terror convulsed his frame; his voice burst out at intervals into broken accents.”—*Principles of Eloquence*, p. 73.

[FORMULE.—Not proper, because the first pause in this sentence is not marked by a suitable point. But, according to Rule 2d for the Semicolon, “When two or more simple members, or such clauses as complete their sense without subdivision, are constructed into a period; if they require a pause greater than that of the comma, they are usually separated by the semicolon.” Therefore, the comma after “*countenance*” should be changed to a semicolon.]

“The Lacedemonians never traded—they knew no luxury—they lived in houses built of rough materials—they lived at public tables—fed on black broth, and despised every thing effeminate or luxurious.”—*Whelpley’s Lectures*, p. 167. “Government is the agent. Society is the principal.”—*Wayland’s Moral Science*, 1st Ed., p. 377. “The essentials of speech were anciently supposed to be sufficiently designated by the *Noun* and the *Verb*, to which was subsequently added, the *Conjunction*”—*Bullions, E. Gram.*, p. 191. “The first faint gleamings of thought in its mind are but the reflections from the parents’ own intellect,—the first manifestations of temperament are from the contagious parental fountain,—the first aspirations of soul are but the warmings and promptings of the parental spirit.”—*Jocelyn’s Prize Essay*, p. 4. “*Older* and *oldest* refer to maturity of age, *elder* and *eldest* to priority of right by birth. *Farther* and *farthest* denote place or distance: *Further* and *furthest*, quantity or addition.”—*Bullions, E. Gram.*, p. 148. “Let the divisions be *natural*, such as obviously suggest themselves to the mind, and as may aid your main design, and be easily remembered.”—*Goldsbury’s Manual of Gram.*, p. 91.

“Gently make haste, of labour not afraid:

A hundred times consider what you’ve said.”—*Dryden’s Art of Poetry*.

## UNDER RULE III.—OF APPPOSITION, &amp;C.

(1.) “Adjectives are divided into two classes: *Adjectives denoting quality*, and *Adjectives denoting number*.”—*Frost’s Practical Gram.*, p. 31.

[FORMULE.—Not proper, because the colon after the word “*classes*,” is not the most suitable sign of the pause required. But according to Rule 3d for the Semicolon, “Words in apposition, in disjunct pairs, or in any other construction if they require a pause greater than that of the comma, and less than that of the colon, maybe separated by the semicolon.” In this case, the semicolon should have been preferred to the colon.]

(2.) “There are two classes of adjectives—*qualifying* adjectives, and *limiting* adjectives.”—*Butler’s Practical Gram.*, p. 33. (3.) “There are three Genders, the *Masculine*, the *Feminine*, and the *Neuter*.”—*Frost’s Pract. Gram.*, p. 51; *Hiley’s Gram.*, p. 12; *Alger’s*, 16; *S. Putnam’s*, 14; *Murray’s*, 8vo, 37; *and others*. (4.) “There are three genders: the MASCULINE, the FEMININE, and the NEUTER.”—*Murray’s Gram.*, 12mo. p. 39; *Jaudon’s*, 25. (5.) “There are three genders: The *Masculine*, the *Feminine*, and the *Neuter*.”—*Hendrick’s Gram.*, p. 15. (6.) “The Singular denotes ONE, and the Plural MORE THAN ONE.”—*Hart’s Gram.*, p. 40. (7.) “There are three Cases viz., the *Nominative*, the *Possessive*, and the *Objective*”—*Hendrick’s Gram.*, p. 7. (8.) “Nouns have three cases, the nominative, the possessive, and the objective.”—*Kirkham’s Gram.*, p. 41. In *d*, *t*, *n*, when *suffering's* confess'd."—*Brightland's Gram.*, p. 93.

#### MIXED EXAMPLES OF ERROR.

"In old books *i* is often used for *j*, *v* for *u*, *vv* for *w*, and *ii* or *ij* for *y*."—*Hart's E. Gram.*, p. 22. "The forming of letters into words and syllables is also called *Spelling*."—*Ib.*, p. 21. "Labials are formed chiefly by the *lips*, dentals by the *teeth*, palatals by the *palate*, gutturals by the *throat*, nasals by the *nose*, and linguals by the *tongue*."—*Ib.*, p. 25. "The labials are *p*, *b*, *f*, *v*; the dentals *t*, *d*, *s*, *z*; the palatals *g* soft and *j*; the gutturals *k*, *q*, and *c* and *g* hard; the nasals *m* and *n*; and the linguals *l* and *r*."—*Ib.*, p. 25. "Thus, 'the man *having finished* his letter, will carry it to the post office.'"—*Ib.*, p. 75. "Thus, in the sentence 'he had a dagger *concealed* under his cloak,' *concealed* is passive, signifying *being* concealed; but in the former combination, it goes to make up a form, the force of which is active."—*Ib.*, p. 75. "Thus, in Latin, 'he had concealed the dagger' would be '*pugionem abdiderat*;' but 'he had the dagger concealed' would be '*pugionem abditum habebat*.'"—*Ib.*, p. 75. "*Here*, for instance, means 'in this place,' *now*, 'at this time,' &c."—*Ib.*, p. 90. "Here *when* both declares the *time* of the action, and so is an adverb, and also *connects* the two verbs, and so is a conjunction."—*Ib.*, p. 91. "The principal parts of a sentence are the subject, the attribute, and the object, in other words the nominative, the verb, and the objective."—*Ib.*, p. 104. "Thus, the adjective is connected with the noun, the adverb with the verb or adjective, pronouns with their antecedents, &c."—*Ib.*, p. 104. "Verbs are of three kinds, Active, Passive, and Neuter."—*Lennie's Gram.*, p. 19; *Bullions, Prin.*, 2d Ed., p. 29 "Verbs are divided into two classes: Transitive and Intransitive."—*Hendrick's Gram.*, p. 28 "The Parts of Speech in the English language are nine, viz. The Article, Noun, Adjective, Pronoun, Verb, Adverb, Preposition. Interjection and Conjunction."—*Bullions, Prin. of E. Gram.*, p. 7 "Of these the Noun, Pronoun, and Verb are declined, the rest are

indeclinable.”—*Id.*, *ib.*, p. 7; *Practical Lessons*, p. 9. “The first expression is called the ‘Active form.’ The second the ‘Passive form.’”—*Welds Gram.*, 2d Ed., p. 83; Abridged, p. 66.

“O ‘tis a godlike privilege to save,  
And he that scorns it is himself a slave.”—*Cowper*, Vol. i., p. 123

### SECTION III.—THE COLON.

The Colon is used to separate those parts of a compound sentence, which are neither so closely connected as those which are distinguished by the semicolon, nor so little dependent as those which require the period.

#### RULE I.—ADDITIONAL REMARKS.

When the preceding clause is complete in itself, but is followed by some additional remark or illustration, especially if no conjunction is used, the colon is generally and properly inserted: as, “Avoid evil doers: in such society, an honest man may become ashamed of himself.”—“See that moth fluttering incessantly round the candle: man of pleasure, behold thy image!”—*Art of Thinking*, p. 94. “Some things we can, and others we cannot do: we can walk, but we cannot fly.”—*Beanie’s Moral Science*, p. 112.

“Remember Heav’n has an avenging rod:  
To smite the poor, is treason against God.”—*Cowper*.

#### RULE II.—GREATER PAUSES.

When the semicolon has been introduced, or when it must be used in a subsequent member, and a still greater pause is required within the period, the colon should be employed: as, “Princes have courtiers, and merchants have partners; the voluptuous have companions, and the wicked have accomplices: none but the virtuous can have friends.”—“Unless the truth of our religion be granted, a Christian must be the greatest monster in nature: he must at the same time be eminently wise, and notoriously foolish; a wise man in his practice, and a fool in his belief: his reasoning powers must be deranged by a constant delirium, while his conduct never swerves from the path of propriety.”—*Principles of Eloquence*, p. 80.

“A decent competence we fully taste;  
It strikes our sense, and gives a constant feast:  
More we perceive by dint of thought alone;  
The rich must labour to possess their own.”—*Young*.

#### RULE III.—INDEPENDENT QUOTATIONS.

A quotation introduced without a close dependence on a verb or a conjunction, is generally preceded by the colon; as, “In his last moments, he uttered these words: ‘I fall a sacrifice to sloth and luxury.’”—“At this the king hastily retorted: ‘No put-offs, my lord; answer me presently.’”—*Churchill’s Gram.*, p. 367. “The father addressed himself to them to this effect: ‘O my sons, behold the power of unity!’”—*Ripplingham’s Art of Speaking*, p. 85.

## IMPROPRIETIES FOR CORRECTION.

## FALSE PUNCTUATION.—ERRORS CONCERNING THE COLON.

## UNDER RULE I.—ADDITIONAL REMARKS.

“*Of* is a preposition, it expresses the relation between *fear* and *Lord*.”—*Bullions, E. Gram.*, p. 133.

[FORMULE.—Not proper, because the additional remark in this sentence is not sufficiently separated from the main clause, by the comma after the word *preposition*. But, according to Rule 1st for the Colon, “When the preceding clause is complete in itself, but is followed by some additional remark or illustration, especially if no conjunction is used, the colon is generally and properly inserted.” Therefore, the colon should here be substituted for the comma.]

“Wealth and poverty are both temptations to man; *that* tends to excite pride, *this* discontentment.”—*Id.*, *ib.*, p. 93; see also *Lennie’s Gram.*, p. 81; *Murray’s*, 56; *Ingersoll’s* 61; *Alger’s*, 25; *Merchant’s*, 44; *Hart’s*, 137; *et al.* “Religion raises men above themselves, irreligion sinks them beneath the brutes; *this* binds them down to a poor pitiable speck of perishable earth, *that* opens for them a prospect in the skies.”—*Bullions, E. Gram.*, p. 98; *Lennie’s Gram.*, p. 81. “Love not idleness, it destroys many.”—*Ingersoll’s Gram.*, p. 71. “Children, obey your parents; honour thy father and mother, is the first commandment with promise.”—*Bullions, Pract. Lessons*, p. 88. “Thou art my hiding place, and my shield, I hope in thy promises.”—*O. B. Peirce’s Gram.*, p. 56. “The sun shall not smite me by day nor the moon by night. The Lord will preserve from evil. He will save my soul.—*Bible*.”—*Id.*, p. 57. “Here Greece is assigned the highest place in the class of objects among which she is numbered—the nations of antiquity—she is one of them.”—*Lennie’s Gram.*, p. 79.

“From short (as usual) and disturb’d repose

I wake; how happy they who wake no more!”—*Hallock’s Gram.*, p. 216.

## UNDER RULE II.—GREATER PAUSES.

“A taste *of* a thing, implies actual enjoyment of it; but a taste for it, implies only capacity for enjoyment; as, ‘When we have had a true taste of the pleasures of virtue, we can have no relish *for* those of vice.’”—*Bullions, E. Gram.*, p. 147.

[FORMULE.—Not proper, because the pause after *enjoyment* is marked only by a semicolon. But, according to Rule 2d for the Colon, “When the semicolon has been introduced, or when it must be used in a subsequent member, and a still greater pause is required within the period, the colon should be employed.” Therefore, the second semicolon here should be changed to a colon.]

“The Indicative mood simply declares a thing; as, He *loves*; He is *loved*; Or, it asks a question; as, *Lovest* thou me?”—*Id.*, *ib.*, p. 35; *Pract. Lessons*, p. 43; *Lennie’s Gr.*, p. 20. “The Indicative Mood simply indicates or declares a thing: as, ‘He *loves*, he is *loved*.’ or it asks a question: as, ‘Does he love?’ ‘Is he loved?’”—*L. Murray’s Gram.*, 8vo, p. 63; 12mo, p. 63. “The Imperfect (or Past) tense represents an action or event indefinitely as past; as, Cæsar *came*, and *saw*, and *conquered*; or it represents the action definitely as unfinished and continuing at a certain time, now entirely past; as, My father *was coming* home when I met him.”—*Bullions, P. L.*, p. 45; *E. Gr.*, 39. “Some nouns have no plural; as, *gold*, *silver*, *wisdom*, *health*; others have no singular; as, *ashes*, *shears*, *tongs*; others are alike in both numbers; as, *sheep*, *deer*, *means*, *news*”—*Day’s School Gram.*, p. 15. “The same verb may be transitive in one sense, and intransitive in another; thus, in the sentence, ‘He believes

my story,' *believes* is transitive; but in this phrase, 'He believes in God,' it is intransitive."—*Butler's Gram.*, p. 61. "Let the divisions be *distinct*; one part should not include another, but each should have its proper place, and be of importance in that place, and all the parts well fitted together and united, should present a whole."—*Goldsbury's C. S. Gram.*, p. 91. "In the use of the transitive verb there are always *three* things implied,—the *actor*, the *act*, and the *object* acted upon. In the use of the intransitive there are only *two*—the *subject* or thing spoken of, and the *state*, or *action* attributed to it."—*Bullions, E. Gram.*

"Why labours reason? instinct were as well;  
Instinct far better; what can choose, can err."—*Brit. Poets*, Vol. viii.

#### UNDER RULE III.—INDEPENDENT QUOTATIONS.

"The sentence may run thus; 'He is related to the same person, and is governed by him.'"—*Hart's Gram.*

[FORMULE.—Not proper, because the semicolon is here inserted, in an unusual manner, before a quotation not closely dependent. But, according to Rule 3d for the Colon, "A quotation introduced without a close dependence on a verb or a conjunction, is generally preceded by the colon." Therefore, the colon should be here preferred.]

"Always remember this ancient proverb, 'Know thyself.'"—*Hallock's Gram.* "Consider this sentence. The boy runs swiftly."—*Frazee's Gram.*, Stereotype Ed. 1st Ed. "The comparative is used thus; 'Greece was more polished than any *other* nation of antiquity.' The same idea is expressed by the superlative when the word *other* is left out. Thus, 'Greece was the most polished nation of antiquity'"—*Bullions, E. Gram.* see *Lennie's Gram.* "Burke, in his speech on the Carnatic war, makes the following allusion to the well known fable of Cadmus's sowing dragon's teeth;—'Every day you are fatigued and disgusted with this cant, the Carnatic is a country that will soon recover, and become instantly as prosperous as ever. They think they are talking to innocents, who believe that by the sowing of dragon's teeth, men may come up ready grown and ready made.'"—*Hiley's Gram.*, see also *Hart's*.

That all was lost."—*Cooper's Pl. and Pr. Gram.*

#### SECTION IV.—THE PERIOD.

The Period, or Full Stop, is used to mark an entire and independent sentence, whether simple or compound.

##### RULE I.—DISTINCT SENTENCES.

When a sentence, whether long or short, is complete in respect to sense, and independent in respect to construction, it should be marked with the period: as, "Every deviation from truth is criminal. Abhor a falsehood. Let your words be ingenuous. Sincerity possesses the most powerful charm."—"The force of a true individual is felt through every clause and part of a right book; the commas and dashes are alive with it."—*R. W. Emerson*.

"By frequent trying, TROY was won.  
All things, by trying, may be done."—*Lloyd*, p. 184.

##### RULE II.—ALLIED SENTENCES.

The period is often employed between two sentences which have a general connexion, expressed by a personal pronoun, a conjunction, or a conjunctive adverb: as, "The selfish man languishes in his narrow circle of pleasures. *They* are confined to what affects his own interests. *He* is obliged to repeat the same gratifications, till they become insipid. *But* the man of virtuous sensibility moves in a wider sphere of felicity."—*Blair*.

“And whether we shall meet again, I know not.

*Therefore* our everlasting farewell take.”—*Shak.*, J. C.

### RULE III.—ABBREVIATIONS.

The period is generally used after abbreviations, and very often to the exclusion of other points; but, as in this case it is not a constant sign of pause, other points may properly follow it, if the words written in full would demand them: as, A.D. for *Anno Domini*;—Pro tem. for *pro tempore*;—Ult. for *ultimo*;—i.e. for *id est*, that is;—*Add.*, *Spect.*, No. 285; i.e., *Addison, in the Spectator, Number 285th*.

“Consult the statute; ‘quart.’ I think, it is,

‘Edwardi sext.,’ or ‘prim. et quint. Eliz.’”—*Pope*, p. 399.

### OBSERVATIONS.

OBS. 1.—It seems to be commonly supposed, whether correctly or not, that short sentences which are in themselves distinct, and which in their stated use must be separated by the period, may sometimes be rehearsed as examples, in so close succession as not to require this point: as, “But if thou wilt enter into life, keep the commandments. He saith unto him, Which? Jesus said, Thou shalt do no murder, Thou shalt not commit adultery, Thou shalt not steal, Thou shalt not bear false witness, Honour thy father and thy mother: and, Thou shalt love thy neighbour as thyself.”—SCOTT, ALGER, AND OTHERS: *Matt.*, xix, 17, 18, 19. “The following sentences exemplify the possessive pronouns:—‘*My* lesson is finished; *Thy* books are defaced; He loves *his* studies; She performs *her* duty; We own *our* faults; *Your* situation is distressing; I admire *their* virtues.’”—*L. Murray’s Gram.*, 8vo, p. 55. What mode of pointing is best adapted to examples like these, is made a very difficult question by the great diversity of practice in such cases. The semicolon, with guillemets, or the semicolon and a dash, with the quotation marks, may sometimes be sufficient; but I see no good reason why the *period* should not in general be preferred to the comma, the semicolon, or the colon, where full and distinct sentences are thus recited. The foregoing passage of Scripture I have examined in five different languages, ten different translations, and seventeen different editions which happened to be at hand. In these it is found pointed in twelve different ways. In Leusden’s, Griesbach’s, and Aitton’s Greek, it has nine colons; in Leusden’s Latin from Montanus, eight; in the common French version, six; in the old Dutch, five; in our Bibles, usually one, but not always. In some books, these commandments are mostly or wholly divided by periods; in others, by colons; in others, by semicolons; in others, as above, by commas. The first four are negative, or prohibitory; the other two, positive, or mandatory. Hence some make a greater pause after the fourth, than elsewhere between any two. This greater pause is variously marked by the semicolon, the colon, or the period; and the others, at the same time, as variously, by the comma, the semicolon, or the colon. Dr. Campbell, in his *Four Gospels*, renders and points the latter part of this passage thus: “Jesus answered, ‘Thou shalt not commit murder. Thou shalt not commit adultery. Thou shalt not steal. Thou shalt not give false testimony. Honour thy father and mother; and love thy neighbour as thyself.’” But the corresponding passage in Luke, xviii 20, he exhibits thus: “Thou knowest the commandments. Do not commit adultery; do not commit murder; do not steal; do not give false testimony; honour thy father and thy mother.” This is here given as present advice, *referring to* the commandments, but not actually *quoting* them; and, in this view of the matter, semicolons, not followed by capitals may be right. See the common reading under Rule XIV for Capitals, on page 166.

OBS. 2.—Letters written for *numbers*, after the manner of the Romans, though read as words, are never words in themselves; nor are they, except perhaps in one or two instances, abbreviations of words. C, a hundred, comes probably from *Centum*; and M, a thousand, is the first letter of *Mille*; but the others, I, V, X, L, D, and the various combinations of them all, are direct numerical signs, as are the Arabic figures. Hence it is not really necessary that the period should be set after them, except at the end of a sentence, or where it is suitable as a sign of pause. It is, however, and always has been, a prevalent custom, to mark numbers of this kind with a period, as if they were abbreviations; as, “While pope Sixtus V. who succeeded Gregory XIII. fulminated the thunder of the church against the king of Navarre.”—*Smollet’s Eng.*, iii, 82. The period is here inserted where the reading requires only the comma; and, in my opinion, the latter point should have been preferred. Sometimes, of late, we find other points set after this period; as, “Otho II., surnamed the Bloody, was son and successor of Otho I.; he died in 983.”—*Univ. Biog. Dict.* This may be an improvement on the former practice, but double points are not *generally* used, even where they are proper; and, if the period is not indispensable, a simple change of the point would perhaps sooner gain the sanction of general usage.

OBS. 3.—Some writers, judging the period to be wrong or needless in such cases, omit it, and insert only such points as the reading requires; as, “For want of doing this, Judge Blackstone has, in Book IV, Chap. 17, committed some most ludicrous errors.”—*Cobbett’s Gram.*, Let. XIX, ¶ 251. To insert points needlessly, is as bad a fault as to omit them when they are requisite. In Wm. Day’s “Punctuation Reduced to a System,” (London, 1847,) we have the following obscure and questionable RULE: “*Besides denoting a grammatical pause*, the *full point* is used to mark *contractions*, and is requisite after *every abbreviated word*, as well as after *numeral letters*.”—Page 102. This seems to suggest that both a pause and a contraction may be denoted by the same point. But what are properly called “*contractions*,” are marked not by the period, but by the apostrophe, which is no sign of pause; and the confounding of these with words “*abbreviated*,” makes this rule utterly absurd. As for the period “after *numeral letters*,” if they really needed it at all, they would need it *severally*, as do the abbreviations; but there are none of them, which do not uniformly dispense with it, when not final to the number; and they may as well dispense with it, in like manner, whenever they are not final to the sentence.

OBS. 4.—Of these letters, Day gives this account: “*M.* denotes *mille*, 1,000; *D.*, *dimidium mille*, half a thousand, or 500; *C.* *centum*, 100; *L.* represents the lower half of *C.*, and expresses 50; *X.* resembles *V. V.*, the one upright, the other inverted, and signifies 10; *V.* stands for 5, because its sister letter U is the fifth vowel; and *I.* signifies 1, probably because it is the plainest and simplest letter in the alphabet.”—*Day’s Punctuation*, p. 103. There is some fancy in this. Dr. Adam says, “The letters employed for this purpose [i.e., to express *numbers*.] were C. I. L. V. X.”—*Latin and Eng. Gram.*, p. 288. And again: “A thousand is marked thus CI[C-reversed], which in later times was *contracted* into M. *Five hundred* is marked thus, I[C-reversed], or by *contraction*, D.”—*Ib.* Day inserts periods thus: “IV. means 4; IX., 9; XL., 40; XC., 90; CD., 400; CM., 900.”—Page 703. And again: “4to., *quarto*, the fourth of a sheet of paper; 8vo., *octavo*, the eighth part of a sheet of paper; 12mo., *duodecimo*, the twelfth of a sheet of paper; N. L., 8°. 9’. 10”. North latitude, eight degrees, nine minutes, ten seconds.”—Page 104. But IV may mean 4, without the period; 4to or 8vo has no more need of it than 4th or 8th; and N. L. 8° 9’ 10” is an expression little to be mended by commas, and not at all by additional periods.

OBS. 5.—To allow the period of abbreviation to supersede all other points wherever it occurs, as authors generally have done, is sometimes plainly objectionable; but, on the other hand, to suppose double points to be always necessary wherever abbreviations or Roman numbers have pauses less than final, would sometimes seem more nice than wise, as in the case of Biblical and other references. A concordance or a reference Bible pointed on this principle, would differ greatly from any now extant. In such references, *numbers* are very frequently pointed with the period, with scarcely any regard to the pauses required in the reading; as, “DIADEM, *Job* 29. 14. Isa. 28. 5. and 62. 3. Ezek. 21. 26.”—*Brown’s Concordance*. “Where no vision is, the people perish, Prov. xxix. 18. Acts iv. 12. Rom. x. 14.”—*Brown’s Catechism*, p. 104. “What I urge from 1. Pet. 3. 21. in my Apology.”—*Barclay’s Works*, iii, 498. “I. Kings—II. Kings.”—*Alger’s Bible*, p. iv. “Compare iii. 45. with 1. *Cor.* iv. 13.”—*Scott’s Bible*, Pref. to Lam. Jer. “Hen. v. A. 4. Sc. 5.”—*Butler’s Gram.*, p. 41. “See Rule iii. Rem. 10.”—*Ib.*, p. 162. Some set a *colon* between the number of the chapter and that of the verse; which mark serves well for distinction, where both numbers are in Arabic figures: as, “He that formed the eye, shall he not see?”—*Ps.* 94: 9.”—*Wells’s Gram.*, p. 126. “He had only a lease-hold title to his service. Lev. 25: 39, Exod. 21: 2.”—*True Amer.*, i. 29. Others adopt the following method which seems preferable to any of the foregoing: “Isa. Iv, 3; Ezek. xviii, 20; Mic. vi, 7.”—*Gurney’s Essays*, p. 133. Churchill, who is uncommonly nice about his punctuation, writes as follows: “*Luke.* vi, 41, 42. See also Chap. xv, 8; and *Phil.*, iii. 12.”—*New Gram.*, p. 353.

OBS. 6.—Arabic figures used as ordinals, or used for the numeral adverbs, *first*, or *firstly*, *secondly*, *thirdly*, &c., are very commonly pointed with the period, even where the pause required after them is less than a full stop; as, “We shall consider these words, 1. as expressing *resolution*; and 2. as expressing *futurity*.”—*Butler’s Gram.*, p. 106. But the period thus followed by a small letter, has not an agreeable appearance, and some would here prefer the comma, which is, undoubtedly, better suited to the pause, A fitter practice, however, would be, to change the expression thus: “We shall consider these words, 1st, as expressing *resolution*; and, 2dly, as expressing *futurity*.”

OBS. 7.—Names vulgarly shortened, then written as they are spoken, are not commonly marked with a period; as, *Ben* for *Benjamin*. “O RARE BEN JOHNSON!”—*Biog. Dict.*

“From whence the inference is plain,

Your friend MAT PRIOR wrote with pain.”—LLOYD: *B. P.*, Vol. viii, p. 188.

## IMPROPRIETIES FOR CORRECTION.

### FALSE PUNCTUATION.—ERRORS CONCERNING THE PERIOD.

#### UNDER RULE I.—DISTINCT SENTENCES.

“The third person is the position of the name spoken of; as, Paul and Silas were imprisoned, the earth thirsts, the sun shines.”—*Frazee’s Gram.*, 1st Ed., p. 21; Ster. Ed., p. 23.

[FORMULE.—Not proper, because three totally distinct sentences are here thrown together as examples, with no other distinction than what is made by two commas. But, according to Rule 1st for the Period, “When a sentence, whether long or short, is complete in respect to sense, and independent in respect to construction, it should be marked with the period.” Therefore, these commas should be periods; and, of course, the first letter of each example must be a capital.]

“Two and three and four make nine; if he were here, he would assist his father and mother, for he is a dutiful son; they live together, and are happy, because they enjoy each other’s society; they went to Roxbury, and tarried all night, and came back the next day.”—*Goldsbury’s Parsing Lessons in his Manual of E. Gram.*, p. 64.

“We often resolve, but seldom perform; she is wiser than her sister; though he is often advised, yet he does not reform; reproof either softens or hardens its object; he is as old as his classmates, but not so learned; neither prosperity, nor adversity, has improved him; let him that standeth, take heed lest he fall; he can acquire no virtue, unless he make some sacrifices.”—*Ibid.*

“Down from his neck, with blazing gems array’d,  
Thy image, lovely Anna! hung portray’d,  
Th’ unconscious figure, smiling all serene,  
Suspended in a golden chain was seen,”—*S. Barrett’s E. Gr.*, p. 92.

#### UNDER RULE II.—ALLIED SENTENCES.

“This life is a mere prelude to another, which has no limits, it is a little portion of duration. As death leaves us, so the day of judgment will find us.”—*Merchant’s School Gram.*, p. 76.

[FORMULE.—Not proper, because the pause after *limits*, which is sufficient for the period, is marked only by the comma. But, according to Rule 2d, “The period is often employed between two sentences which have a general connexion, expressed by a personal pronoun, a conjunction, or a conjunctive adverb.” It would improve the passage, to omit the first comma, change the second to a period, and write the pronoun *it* with a capital. *Judgment* also might be bettered with an *e*, and *another* is properly two words.]

“He went from Boston to New York; he went from Boston; he went to New York; in walking across the floor, he stumbled over a chair.”—*Goldsbury’s Manual of E. Gram.*, p. 62.

“I saw him on the spot, going along the road, looking towards the house; during the heat of the day, he sat on the ground, under the shade of a tree.”—*Id.*, *ib.*

“George came home, I saw *him* yesterday, here; the word *him*, can extend only to the individual *George*”—*S. Barrett’s E. Gram.*, 10th Ed., p. 45.

“Commas are often used now, where parentheses were formerly; I cannot, however, esteem this an improvement.”—See the *Key*.

“Thou, like a sleeping, faithless sentinel  
Didst let them pass unnoticed, unimproved,  
And know, for that thou slumb’rest on the guard,  
Thou shalt be made to answer at the bar  
For every fugitive.”—*Hallock’s Gram.*, p. 222; *Enfield’s Sp.*, p. 380.

#### UNDER RULE III.—OF ABBREVIATIONS.

“The term pronoun (Lat *pronomēn*) strictly means a word used for, or instead of a noun.”—*Bullions, E. Gram.*, p. 198.

[FORMULE.—Not proper, because the syllable here put for the word *Latin*, is not marked with a period. But, according to Rule 3d, “The period is generally used after abbreviations,

and very often to the exclusion of other points; but, as in this case it is not a constant sign of pause, other points may properly follow it, if the words written in full would demand them.” In this instance, a period should mark the abbreviation, and a comma be set after *of*. By analogy, *in stead* is also more properly two words than one.]

“The period is also used after abbreviations; as, A. D. P. S. G. W. Johnson.”—*Butler’s Pract. Gram.*, p. 211. “On this principle of classification, the later Greek grammarians divided words into eight classes or parts of speech, viz: the Article, Noun, Pronoun, Verb, Participle, Adverb, Preposition, and Conjunction.”—*Bullions, E. Gram.*, p. 191.

“‘*Metre* is not confined to verse: there is a tune in all good prose; and Shakspeare’s was a sweet one.’—*Epea Pter*, II, 61. Mr. H. Tooke’s idea was probably just, agreeing with Aristotle’s, but not accurately expressed.”—*Churchill’s New Gram.*, p. 385.

“Mr. J. H. Tooke was educated at Eton and at Cambridge, in which latter college he took the degree of A. M; being intended for the established church of England, he entered into holy orders when young, and obtained the living of Brentford, near London, which he held ten or twelve years.”—*Div. of Purley*, 1st Amer. Edition, Vol. i, p. 60.

“I, nor your plan, nor book condemn,  
But why your name, and why A. M!”—*Lloyd*.

#### MIXED EXAMPLES OF ERROR.

“If thou *turn* away thy foot from the sabbath, &c. *Isaiah*. lviii. 7.”—*Butler’s Gram.*, p. 67. “He that hath eeris of herynge, *here he*. *Wiclif*. Matt xi.”—*Butler’s Gram.*, p. 76. “See General Rules for Spelling, iii., v., and vii.”—*Butler’s Gram.*, p. 81. “False witnesses *did* rise up.’ *Ps*. xxxv. ii.”—*Butlers Gram.*, p. 105.

“An *explicative* sentence is used for explaining. An *interrogative* sentence for enquiring. An *imperative* sentence for commanding.”—*S. Barrett’s Prin. of Language*, p. 87. “In October, corn is gathered in the field by men, who go from hill to hill with baskets, into which they put the ears; Susan labors with her needle for a livelihood; notwithstanding his poverty, he is a man of integrity.”—*Goldsbury’s Parsing, Manual of E. Gram.*, p. 62.

“A word of one syllable, is called a monosyllable. A word of two syllables; a dissyllable. A word of three syllables; a trissyllable. A word of four or more syllables; a polysyllable.”—*Frazee’s Improved Gram.*, 1st Ed., p. 15. “A word of one syllable, is called a monosyllable. A word of two syllables, a dissyllable. A word of three syllables, a trissyllable. A word of four or more syllables, a polysyllable.”—*Frazee’s Improved Gram.*, Ster. Ed., p. 17.

“If I say, ‘*if it did not rain*, I would take a walk;’ I convey the idea that it *does rain*, at the time of speaking, *If it rained*, or *did it rain*, in the present time, implies, it does not rain; *If it did not rain*, or *did it not rain*, in present time, implies that *it does rain*; thus in this peculiarity, an *affirmative* sentence always implies a *negation*, and a *negative sentence* an *affirmation*.”—*Frazee’s Gram.*, 1st Ed., p. 61; Ster. Ed., 62. “*If I were loved*, and, *were I loved*, imply, I am *not* loved; *if I were not loved*, and, *were I not loved*, imply, I am loved; a negative sentence implies an affirmation; and an affirmative sentence implies a negation, in these forms of the subjunctive.”—*Ib.*, Old Ed., p. 73; Ster. Ed., 72.

“What is Rule III.?”—*Hart’s Gram.*, p. 114. “How is Rule III. violated?”—*Ib.*, p. 115. “How do you parse ‘letter’ in the sentence, ‘James writes a *letter*’?” *Ans.*—‘Letter is a noun com., of the MASC. gend., in the 3d p., sing. num., and *objective case*, and is governed by the verb ‘writes,’ according to Rule III., which says. ‘A transitive verb,’ &c.”—*Ib.*, p. 114.\*

“Creation sleeps. ‘T is as the general pulse  
Of life stood still, and nature made a pause;  
An awful pause! prophetic of her end,  
And let her prophecy be soon fulfilled;  
Fate drop the curtain; I can lose no more.”—*Hallock’s Gram.*, p. 216.

## SECTION V.—THE DASH.

The Dash is mostly used to denote an unexpected or emphatic pause, of variable length; but sometimes it is a sign of faltering, or of the irregular stops of one who hesitates in speaking: as, “Then, after many pauses, and inarticulate sounds, he said: ‘He was very sorry for it, was extremely concerned it should happen so—but—a—it was necessary—a—’ Here lord E——stopped him short, and bluntly demanded, if his post were destined for an other.”—See *Churchill’s Gram.*, p. 170.

### RULE I.—ABRUPT PAUSES.

A sudden interruption, break, or transition, should be marked with the dash; as, 1. “I must inquire into the affair; and if—‘And *if*’ interrupted the farmer.”

2. “Whom I—But first ‘t is fit the billows to restrain.”—*Dryd. Virg.*
3. “HERE LIES THE GREAT—False marble! where?  
Nothing but sordid dust lies here.”—*Young.*

### RULE II.—EMPHATIC PAUSES.

To mark a considerable pause, greater than the structure or the sentence or the points inserted would seem to require, the dash may be employed; as, 1. “I pause for a reply.—None?—Then none have I offended.—I have done no more to Cæsar, than you should do to Brutus.”—SHAKESPEARE: *Enfields Speaker*, p. 182.

2. “Tarry a little. There is something else.—  
This bond—doth give thee here—no jot of blood.”—ID.: *Burgh’s Sp.*, p. 167.
3. “It thunders;—but it thunders to preserve.”—*Young.*
4. “Behold the picture!—Is it like?—Like whom?”—*Cowper.*

### RULE III.—FAULTY DASHES.

Dashes needlessly inserted, or substituted for other stops more definite, are in general to be treated as errors in punctuation; as, “Here Greece stands by *itself* as opposed to the *other* nations of antiquity—She was none of the *other nations*—She was more polished than they.”—*Lennie’s Gram.*, p. 78. “Here Greece stands by *herself*, as opposed to the *other* nations of antiquity. She was none of the *other nations*: She was more polished than

\* Needless abbreviations, like most that occur in this example, are in *bad taste*, and *ought to be avoided*. The great faultiness of this text as a model for learners, compels me to vary the words considerably in suggesting the correction. See the *Key*.—G. B.

they.”—*Bullions, E. Gram.*, p. 114. If this colon is sufficient, the capital after it is needless: a period would, perhaps, be better.

### OBSERVATIONS.

OBS. 1.—The dash does not appear to be always a rhetorical stop, or always intended to lengthen the pause signified by an other mark before it. As one instance of a different design, we may notice, that it is now very often employed between a text and a reference;—i.e., between a quotation and the name of the author of the book quoted;—in which case, as Wm. Day suggests, “it serves as a *connecting mark* for the two.”—*Day’s Punctuation*, p. 131. But this usage, being comparatively recent, is, perhaps, not so general or so necessary, that a neglect of it may properly be censured as false punctuation.

OBS. 2.—An other peculiar use of the dash, is its application to *side-titles*, to set them off from other words in the same line, as is seen often in this Grammar as well as in other works. Day says of this, “When the *substance* of a paragraph is given as a side-head, a dash is *necessary* to *connect* it with its relative matter.”—*Ibid.* Wilson also approves of this usage, as well as of the others here named; saying, “The dash should be inserted between a title and the subject-matter, and also between the subject-matter, and the authority from which it is taken, when they occur in the same paragraph.”—*Wilson’s Punctuation*, Ed. of 1850, p. 139.

OBS. 3.—The dash is often used to signify the omission of something; and, when set between the two extremes of a series of numbers, it may represent all the intermediate ones; as, “Page 10-15;” i. e., “Page 10, 11, 12, &c. to 15.”—*Matt*, vi, 9-14.”

### IMPROPRIETIES FOR CORRECTION.

#### FALSE PUNCTUATION.—ERRORS CONCERNING THE DASH.

##### UNDER RULE I.—ABRUPT PAUSES.

“And there is something in your very strange story, that resembles ... Does Mr. Bevil know your history particularly?”—See *Key*.

[FORMULE.—Not proper, because the abrupt pause after *resembles* is here marked by three periods. But, according to Rule 1st for the Dash. “A sudden interruption, break, or transition, should be marked with the dash.” Therefore, the dash should be preferred to these points.]

“Sir, Mr. Myrtle, Gentlemen! You are friends; I am but a servant. But.”—See *Key*.

“Another man now would have given plump into this foolish story; but I? No, no, your humble servant for that.”—See *Key*.

“Do not plunge thyself too far in anger lest thou hasten thy trial; which if Lord have mercy on thee for a hen!”—See *Key*.

“But ere they came, O, let me say no more!  
Gather the sequel by that went before.”—See *Key*.

## UNDER RULE II.—EMPHATIC PAUSES.

“*M*, Malvolio; *M*, why, that begins my name.”

[FORMULE.—Not proper, because the pauses after *M* and *Malvolio* seem not to be sufficiently indicated here. But, according to Rule 2d for the Dash, “To mark a considerable pause, greater than the structure of the sentence or the points inserted would seem to require, the dash may be employed.” Therefore, a dash may be set after the commas and the semicolon, in this sentence.]

“Thus, by the creative influence of the Eternal Spirit, were the heavens and the earth finished in the space of six days, so admirably finished, an unformed chaos changed into a system of perfect order and beauty, that the adorable Architect himself pronounced it very good, and all the sons of God shouted for joy.”—See *Key*.

“If I were an American, as I am an Englishman, while a foreign troop remained in my country, I NEVER would lay down my arms; NEVER, NEVER, NEVER.”—*Columbian Orator*, p. 265.

“Madam, yourself are not exempt in this,  
Nor your son Dorset, Buckingham, nor you.”—See *Key*.

## UNDER RULE III.—FAULTY DASHES.

“—You shall go home directly, Le Fevre, said my uncle Toby, to my house,—and we’ll send for a doctor to see what’s the matter,—and we’ll have an apothecary,—and the corporal shall be your nurse;—and I’ll be your servant, Le Fevre.”—STERNE: *Enfield’s Speaker*, p. 306.

[FORMULE.—Not proper, because all the dashes here quoted, except perhaps the last, are useless, or obviously substituted for more definite marks. But, according to Rule 3d, “Dashes needlessly inserted, or substituted for other stops more definite, are in general to be treated as errors in punctuation.” Therefore, the first of these should be simply expunged; the second, third, and fourth, with their commas, should be changed to semicolons; and the last, with its semicolon, may well be made a colon.]

“He continued—Inferior artists may be at a stand, because they want materials.”—HARRIS: *Enfield’s Speaker*, p. 191. “Thus, then, continued he—The end in other arts is ever distant and removed.”—*Id.*, *ib.*

“The nouns must be coupled with *and*, and when a pronoun is used it must be plural, as in the example—When the nouns are *disjoined* the pronoun must be singular.”—*Lennie’s Gram.*, 5th Ed., p. 57.

“*Opinion* is a noun or substantive common,—of the singular number,—neuter gender,—nominative case,—and third person.”—*Wright’s Philos. Gram.*, p. 228.

“The mountain—thy pall and thy prison—may keep thee;  
I shall see thee no more; but till death I will weep thee.”—*Felton’s Gram.*, p. 146.

## MIXED EXAMPLES OF ERROR

“If to accommodate man and beast, heaven and earth; if this be beyond me, ‘tis not possible.—What consequence then follows? or can there be any other than this—if I seek

an interest of my own, detached from that of others; I seek an interest which is chimerical, and can never have existence.”—HARRIS: *Enfield's Speaker*, p. 139.

“Again—I must have food and clothing—Without a proper genial warmth, I instantly perish—Am I not related, in this view, to the very earth itself? To the distant sun, from whose beams I derive vigour?”—*Id.*, *ib.*, p. 140.

“Nature instantly ebb'd again—the film returned to its place—the pulse flutter'd—stopp'd—went on—throbb'd—stopp'd again—mov'd—stopp'd—shall I go on?—No.”—STERNE: *ib.*, p. 307.

“Write ten nouns of the masculine gender. Ten of the feminine. Ten of the neuter. Ten indefinite in gender.”—*Pardon Davis's Gram.*, p. 9.

“The Infinitive Mode has two tenses—the Indicative, six—the Potential, two—the Subjunctive, six, and the Imperative, one.”—*Frazee's Gram.*, Ster. Ed., p. 39; 1st Ed., 37. “Now notice the following sentences. John runs,—boys run—thou runnest.”—*Id.*, Ster. Ed., p. 50; 1st Ed., p. 48.

“The Pronoun sometimes stands for a name—sometimes for an adjective—a sentence—a part of a sentence—and, sometimes for a whole series of propositions.”—*O. B. Peirce's Gram.*, 1st Ed., 12mo, p. 321.

“The self-applauding bird, the peacock, see—  
Mark what a sumptuous pharisee is he!”—*Couper*, i, 49.

## SECTION VI.—THE EROTEME.

The Eroteme, or Note of Interrogation, is used to designate a question.

### RULE I.—QUESTIONS DIRECT.

Questions expressed directly as such, if finished, should always be followed by the note of interrogation; as, “Was it possible that virtue so exalted should be erected upon injustice? that the proudest and the most ambitious of mankind should be the great master and accomplished pattern of humility? that a doctrine so pure as the Gospel should be the work of an uncommissioned pretender? that so perfect a system of morals should be established on blasphemy?”—*Jerningham's Essay*, p. 81.

“In life, can love be bought with gold?  
Are friendship's pleasures to be sold?”—*Johnson*.

### RULE II.—QUESTIONS UNITED.

When two or more questions are united in one compound sentence, the comma, semicolon, or dash, is sometimes used to separate them, and the eroteme occurs after the last only; as, 1. “When—under what administration—under what exigencies of war or peace—did the Senate ever before deal with such a measure in such a manner? Never, sir, never.”—*D. Webster, in Congress*, 1846.

2. “Canst thou, and honour'd with a Christian name,  
Buy what is woman-born, and feel no shame;

Trade in the blood of innocence, and plead  
Expedience as a warrant for the deed?"—*Cowper*.

3. "Truths would you teach, or save a sinking land?  
All fear, none aid you, and few understand."—*Pope*.

### RULE III.—QUESTIONS INDIRECT.

When a question is mentioned, but not put directly as a question, it loses both the quality and the sign of interrogation; as, "The Cyprians asked me *why I wept*."—*Murray*.

### OBSERVATIONS.

OBS. 1.—The value of the eroteme as a sign of pause, is stated very differently by different grammarians; while many of the vast multitude, by a strange oversight, say nothing about it. It is unquestionably *variable*, like that of the dash, or of the ecphoneme. W. H. Wells says, "The comma requires a momentary pause; the semicolon, a pause somewhat longer than the comma; the colon, a pause somewhat longer than the semicolon; and the period, a full stop. The note of interrogation, or the note of exclamation, *may take the place of* EITHER *of these*, and accordingly requires a pause of the same length as the point for which it is substituted."—*Wells's School Gram.*, p. 175. This appears to be accurate in idea, though perhaps hardly so in language. Lindley Murray has stated it thus: "The interrogation and exclamation points are *intermediate* as to their quantity or time, and may be equivalent in that respect to a semicolon, a colon, or a period, as the sense may require."—*Octavo Gram.*, p. 280. But Sanborn, in regard to his "*Question Point*," awkwardly says: "*This pause* is generally *some longer* than that of a period."—*Analytical Gram.*, p. 271. Buchanan, as long ago as 1767, taught as follows: "The Pause after the two Points of Interrogation and Admiration ought to be equal to that of the Period, or a Colon at least."—*English Syntax*, p. 160. And J. S. Hart avers, that, "A question is reckoned as equal to a complete sentence, and the mark of interrogation as equal to a period."—*Hart's English Gram.*, p. 166. He says also, that, "the first word after a note of interrogation should begin with a capital."—*Ib.*, p. 162. In some instances, however, he, like others, has not adhered to these exceptionable principles, as may be seen by the false grammar cited below.

OBS. 2.—Sometimes a series of questions may be severally complete in sense, so that each may require the interrogative sign, though some or all of them may be so united in construction, as not to admit either a long intermediate pause or an initial capital; as, "Is there no honor in generosity? nor in preferring the lessons of conscience to the impulses of passion? nor in maintaining the supremacy of moral principle, and in paying reverence to Christian truth?"—*Gannett*. "True honour is manifested in a steady, uniform train of actions, attended by justice, and directed by prudence. Is this the conduct of the duellist? will justice support him in robbing the community of an able and useful member? and in depriving the poor of a benefactor? will it support him in preparing affliction for the widow's heart? in filling the orphan's eyes with tears?"—*Jerningham's Essay*, p. 113. But, in this latter example, perhaps, commas might be substituted for the second and fourth erotemes; and the word *will* might, in both instances, begin with a capital.

OBS. 3.—When a question is mentioned in its due form, it commonly retains the sign of interrogation, though not actually asked by the writer; and, except perhaps when it consists of some little interrogative word or phrase, requires the initial capital: as, "To

know when this point ought to be used, do not say:[,] ‘Is a question asked?’ but, ‘Does the sentence ask a question?’—*Churchill’s Gram.*, p. 368. “They put their huge inarticulate question, ‘What do you mean to do with us?’ in a manner audible to every reflective soul in the kingdom.”—*Carlyle’s Past and Present*, p. 16. “An adverb may be generally known, by its answering to the question, How? how much? when? or where? as, in the phrase, ‘He reads *correctly*,’ the answer to the question, How does he read? is *correctly*.”—*L. Murray’s Gram.*, p. 28. This passage, which, without ever arriving at great accuracy, has been altered by Murray and others in ways innumerable, is everywhere exhibited with five interrogation points. But, as to capitals and commas, as well as the construction of words, it would seem no easy matter to determine what impression of it is nearest right. In Flint’s Murray it stands thus: “An adverb may generally be known by its answering the question, How? How much? When? or Where? As in the phrase, ‘He reads *correctly*. The answer to the question, ‘How does he read?’ is, ‘*correctly*.’” Such questions, when the pause is slight, do not, however, in all cases, require capitals: as,

“*Rosal*. Which of the visors was it, that you wore?

*Biron*. Where? when? what visor? why demand you this?”

*Shakspeare, Love’s Labour Lost*, Act V, Sc. 2.

OBS. 4.—A question is sometimes put in the form of a mere declaration; its interrogative character depending solely on the eroteme, and the tone, or inflection of voice, adopted in the utterance: as, “I suppose, Sir, you are his apothecary?”—SWIFT: *Burgh’s Speaker*, p. 85. “I hope, you have, upon no account, promoted sternutation by hellebore?”—*Id.*, *ib*. “This priest has no pride in him?”—SINGER’S SHAK., *Henry VIII*, ii, 2.

#### UNDER RULE II.—QUESTIONS UNITED.

“Who knows what resources are in store? and what the power of God may do for thee?”

[FORMULE.—Not proper, because an eroteme is set after *store*, where a comma would be sufficient. But, according to Rule 2d for the Eroteme, “When two or more questions are united in one compound sentence, the comma, semicolon, or dash, is sometimes used to separate them, and the eroteme occurs after the last only.” Therefore, the comma should here be preferred, as the author probably wrote the text. “If it be asked, why a pause should any more be necessary to emphasis than to an accent? or why an emphasis alone, will not sufficiently distinguish the members of sentences from each other, without pauses, as accent does words? the answer is obvious; that we are pre-acquainted with the sound of words, and cannot mistake them when distinctly pronounced, however rapidly; but we are not pre-acquainted with the meaning of sentences, which must be pointed out to us by the reader or speaker.”—*Sheridan’s Rhet. ### SECTION VII—THE ECAPHONEME.

The Ecphoneme, or Note of Exclamation, is used to denote a pause with some strong emotion of admiration, joy, grief, or other feeling; and, as a sign of great wonder, it is sometimes, though not very elegantly, repeated: as, “Grammatical consistency!!! What a gem!”—*Peirce's Gram.*, p. 352.

#### RULE I.—INTERJECTIONS, &C.

Emphatic interjections, and other expressions of great emotion, are generally followed by the note of exclamation; as, “Hold! hold! Is the devil in you? Oh! I am bruised all over.”—MOLIERE: *Burgh's Speaker*, p. 250.

“And O! till earth, and seas, and heav'n decay,

Ne'er may that fair creation fade away!”—*Dr. Lowth*.

## RULE II.—INVOCATIONS.

After an earnest address or solemn invocation, the note of exclamation is now generally preferred to any other point; as, “Whereupon, O king Agrippa! I was not disobedient unto the heavenly vision.”—*Acts*, xxvi, 19.

“Be witness thou, immortal Lord of all!  
Whose thunder shakes the dark ærial hall.”—*Pope*.

## RULE III.—EXCLAMATORY QUESTIONS.

Words uttered with vehemence in the form of a question, but without reference to an answer, should be followed by the note of exclamation; as, “How madly have I talked!”—*Young*.

“An Author! ‘Tis a venerable name!  
How few deserve it, and what numbers claim!”—*Id.*, Br. Po., viii, 401.

### SECTION VIII.—THE CURVES.

The Curves, or Marks of Parenthesis, are used to distinguish a clause or hint that is hastily thrown in between the parts of a sentence to which it does not properly belong; as, “Their enemies (and enemies they will always have) would have a handle for exposing their measures.”—*Walpole*.

“To others do (the law is not severe)

What to thyself thou wishest to be done.”—*Beattie*.

OBS.—The incidental clause should be uttered in a lower tone, and faster than the principal sentence. It always requires a pause as great as that of a comma, or greater.

#### RULE I.—THE PARENTHESIS.

A clause that breaks the unity of a sentence or passage too much to be incorporated with it, and only such, should be inclosed within curves, as a parenthesis; as, “For I know that in me, (that is, in my flesh,) dwelleth no good thing.”—*Rom.*, vii, 18.

“Know then this truth, (enough for man to know,)

Virtue alone is happiness below.”—*Pope*.

#### RULE II.—INCLUDED POINTS.

The curves do not supersede other stops; and, as the parenthesis terminates with a pause equal to that which precedes it, the same point should be included, except when the sentences differ in form: as, 1. “Now for a recompense in the same, (I speak as unto my children,) be ye also enlarged.”—2 *Cor.*, vi, 13.

2. “Man’s thirst of happiness declares it is:

And now *you* burst; ah! cruel from my arms.”

Here is an unnecessary change from the second person singular to the second plural. It would have been better thus,

“Now, now I seize, I clasp *your* charms,  
And now *you* burst; ah! cruel from my arms.”—*J. Burn's Gram.*, p. 193.

### SECTION IX.—THE OTHER MARKS.

There are also several other marks, which are occasionally used for various purposes, as follow:—

I. ['] The APOSTROPHE usually denotes either the possessive case of a noun, or the elision of one or more letters of a word: as, “The *girl's* regard to her *parents'* advice;”—‘*gan*,

*lov'd, e'en, thro'*; for *began, loved, even, through*. It is sometimes used in pluralizing a mere letter or sign; as, Two *a's*—three *6's*.\*

II. [-] The HYPHEN connects the parts of many compound words, especially such as have two accents; as, *ever-living*. It is also frequently inserted where a word is divided into syllables; as, *con-tem-plate*. Placed at the end of a line, it shows that one or more syllables of a word are can led forward to the next line.

III. ["] The DIÆRESIS, or DIALYSIS, placed over either of two contiguous vowels, shows that they are not a diphthong; as, *Dan<sup>æ</sup>e, a<sup>æ</sup>erial*.

IV. ['] The ACUTE ACCENT marks the syllable which requires the principal stress in pronunciation; as, *e'qual, equal'ity*. It is sometimes used in opposition to the grave accent, to distinguish a close or short vowel; as, "*Fáncy*:" (*Murray*;) or to denote the rising inflection of the voice; as, "Is it *hé*?"

V. [˘] The GRAVE ACCENT is used in opposition to the acute, to distinguish an open or long vowel; as, "*Fàvour*:" (*Murray*;) or to denote the falling inflection of the voice; as, "*Yès*; it is *hè*." It is sometimes placed over a vowel to show that it is not to be suppressed in pronunciation; as,

"Let me, though in humble speech,  
Thy refinèd maxims teach."—*Amer. Review*, May, 1848.

VI. [ˆ] The CIRCUMFLEX generally denotes either the broad sound of *a* or an unusual sound given to some other vowel; as in *âll, hêir, machîne*. Some use it to mark a peculiar *wave* of the voice, and when occasion requires, reverse it; as, "If you said *sô*, then I said *sô*."

VII. [˘] The BREVE, or STENOTONE, is used to denote either the close, short, *shut* sound of a vowel, or a syllable of short quantity; as, *līve*, to have life,—*rāv'en*, to devour,<sup>†</sup>—*cālāmūs*, a reed.

VIII. [—] The MACRON, or MACROTONE,\* is used to denote either the open, long, *primal* sound of a vowel, or a syllable of long quantity; as, *līve*, having life,—*rā'ven*, a bird,—*ē'quīne*, of a horse.

\* In the works of some of our older poets, the apostrophe is sometimes irregularly inserted, and perhaps needlessly, to mark a prosodial synsæresis, or synalepha, where no letter is cut off or left out; as,

"Retire, or taste thy *folly*', and learn by proof,  
Hell-born, not to contend with *spir'its* of Heaven."—*Milton, P. L.*, ii, 686.

In the following example, it seems to denote nothing more than the open or long sound of the preceding vowel *e*:

"That sleep and feeding may prorogue his honour,  
Even till a *lethe'd* dulness."—*Singer's Shakspeare*, Vol. ii, p. 280.

† The breve is properly a mark of *short quantity*, only when it is set over an unaccented syllable or an unemphatic monosyllable, as it often is in the scanning of verses. In the examples above, it marks the close or short power of the *vowels*; but, *under the accent*, even this power may become part of a *long syllable*; as it does in the word *rāv'en*, where the syllable *rāv*, having twice the length of that which follows, must be reckoned *long*. In poetry, *rāv-en* and *rā-ven* are both *trochees*, the former syllable in each being long, and the latter short.

IX. [—] or [\* \* \*] or [...] The ELLIPSIS, or SUPPRESSION, denotes the omission of some letters or words: as, *K—g*, for *King*; *c\*\*\*\*d*, for *coward*; *d....d*, for *damned*.

X. [^] The CARET, used only in writing, shows where to insert words or letters that have been accidentally omitted.

XI [{}] The BRACE serves to unite a triplet; or, more frequently, to connect several terms with something to which they are all related. XII. [§] The SECTION marks the smaller divisions of a book or chapter; and, with the help of numbers, serves to abridge references.

XIII. [¶] The PARAGRAPH (chiefly used in the Bible) denotes the commencement of a new subject. The parts of discourse which are called paragraphs, are, in general, sufficiently distinguished by beginning a new line, and carrying the first word a little forwards or backwards. The paragraphs of books being in some instances numbered, this character may occasionally be used, in lieu of the word *paragraph*, to shorten references.

XIV. [“”] The GUILLEMETS, or QUOTATION POINTS, distinguish words that are exhibited as those of an other author or speaker. A quotation within a quotation, is usually marked with single points; which, when both are employed, are placed within the others: as, “And again he saith, ‘Rejoice, ye Gentiles, with his people.’”—*Rom.*, xv, 10.

XV. [[]] The CROTCHETS, or BRACKETS, generally inclose some correction or explanation, but sometimes the sign or subject to be explained; as, “He [Mr. Maurice] was of a different opinion.”—*Allen’s Gram.*, p. 213.

XVI. ☞ The INDEX, or HAND, points out something remarkable, or what the reader should particularly observe.

---

\* 1. The signs of long and short sounds, and especially of the former, have been singularly slow in acquiring *appropriate names*—or any appellatives suited to their nature, or such as could obtain the sanction of general use. The name *breve*, from the French *brève*, (which latter word came, doubtless, originally from the neuter of the Latin adjective *brevis*, short,) is now pretty generally applied to the one; and the Greek term *macron*, long, (also originally a neuter adjective,) is perhaps as common as any name for the other. But these are not quite so well adapted to each other, and to the things named, as are the substitutes added above.

2. These signs are explained in our grammars under various names, and often very unfit ones, to say the least; and, in many instances, their use is, in some way, awkwardly stated, without any attempt to name them, or more than one, if either. The Rev. T. Smith names them “Long (—), and Short (˘).”—*Smith’s Murray*, p. 72. Churchill calls them “The *long* — and the *short* ˘.”—*New Gram.*, p. 170. Gould calls them “a horizontal line” and “a curved line.”—*Gould’s Adam’s Gram.*, p. 3. Coar says, “Quantity is distinguished by the characters of — long, and ˘ short.”—*Eng. Gram.*, p. 197. But, in speaking of the *signs*, he calls them, “A long syllable —,” and “A short syllable ˘.”—*Gram.*, pp. 222 and 228. S. S. Greene calls them “the *long sound*,” and “the *breve* or *short sound*.”—*Gram.*, p. 257. W. Allen says, “The *long-syllable mark*, (—) and the *breve*, or *short-syllable mark*, (˘) denote the quantity of *words* poetically employed.”—*Gram.*, p. 215. Some call them “the *Long Accent*,” and “the *Short Accent*,” as does *Guy’s Gram.*, p. 95. This naming seems to confound accent with quantity. By some, the *Macron* is improperly called “a *Dash*,” as by *Lennie*, p. 137; by *Bullions*, p. 157; by *Hiley*, p. 123; by *Butler*, p. 215. Some call it “a *small dash*,” as does *Well’s*, p. 183; so *Hiley*, p. 117. By some it is absurdly named “Hyphen,” as by *Buchanan*, p. 162; by *Alden*, p. 165; by *Chandler*, 183; by *Parker and Fox*, iii, 36; by *Jaudon*, 193. Sanborn calls it “the *hyphen*, or *macron*.”—*Analyt. Gr.*, p. 279. Many, who name it not, introduce it to their readers by a “this —,” or “thus ˘,” as do *Alger*, *Blair*, *Dr. Adam*, *Comly*, *Cooper*, *Ingersoll*, *L. Murray*, *Sanders*, *Wright*, and others!

XVII. [\*] The ASTERISK, or STAR, [†] the OBELISK, or DAGGER, [‡] the DIESIS, or DOUBLE DAGGER, and [||] the PARALLELS, refer to marginal notes. The SECTION also [§], and the PARAGRAPH [¶], are often used for marks of reference, the former being usually applied to the fourth, and the latter to the sixth note on a page; for, by the usage of printers, these signs are commonly introduced in the following order: 1, \*; 2, †; 3, ‡; 4, §; 5, ||; 6, ¶; 7, \*\*; 8, ††; &c. Where many references are to be made, the *small letters* of the alphabet, or the *numerical figures*, in their order, may be conveniently used for the same purpose.

XVIII. [\*\*\*] The ASTERISM, or THREE STARS, a sign not very often used, is placed before a long or general note, to mark it as a note, without giving it a particular reference.

XIX. [,] The CEDILLA is a mark borrowed from the French, by whom it is placed under the letter *c*, to give it the sound of *s*, before *a* or *o*; as in the words, “façade,” “Alençon.” In Worcester’s Dictionary, it is attached to three other letters, to denote their soft sounds: viz., “Ç as J; Š as Z; ȝ as gz.”

☞ [Oral exercises in punctuation should not be confined to the correction of errors. An application of its principles to points rightly inserted, is as easy a process as that of ordinary syntactical parsing, and perhaps as useful. For this purpose, the teacher may select a portion of this grammar, or of any well-pointed book, to which the foregoing rules and explanations may be applied by the pupil, as reasons for the points that occur.]

#### IMPROPRIETIES FOR CORRECTION.

##### FALSE PUNCTUATION.—MIXED EXAMPLES OF ERROR.

“The principal stops are the following:—

The Comma (,) the semicolon (;) the colon (:) the period, or fall stop (.) the note of interrogation (?) the note of exclamation (!) the parenthesis () and the dash (—) [.]—*Bullions, E. Gram.*, p. 151; *Pract. Les.*, p. 127. “The modern punctuation in Latin is the same as in English. The marks employed, are the *Comma* (,); *Semicolon* (;); *Colon* (:); *Period* (.); *Interrogation* (?); *Exclamation* (!).”—*Bullions, Lat. Gram.*, p. 3.

“Plato reproving a young man for playing at some childish game; you chide me, says the youth, for a trifling fault. Custom, replied the philosopher, is no trifle. And, adds Montagnie, he was in the right; for our vices begin in infancy.”—*Home’s Art of Thinking*, (N. Y. 1818,) p. 54.

“A merchant at sea asked the skipper what death his father died? ‘My father,’ says the skipper, my grandfather, and my great-grandfather, were all drowned. ‘Well,’ replies the merchant, and are not you afraid of being drowned too?”—*Ib.*, p. 135.

“The use of inverted comma’s derives from France, where one Guillemet was the author of them; [and] as an acknowledgement for the improvement his countrymen call them after his name GUILLEMETS.”—*History of Printing*, (London, 1770,) p. 266.

“This, however, is seldom if ever done unless the word following the possessive begins with *s*; thus we do not say, ‘the prince’ feather,’ but, ‘the prince’s feather.’”—*Bullions, E.*

“Discoveries of such a character are sometimes made in grammar also, and such, too, is often their origin and their end.”—*Bullions, E. Gram.*, p. 191.

“Nouns have three persons, FIRST, SECOND, and THIRD. The First person is the speaker, the Second is the one spoken to, the Third is the one spoken of.”—*Hiley’s Gram.*, p. 44.

“Nouns have three cases, NOMINATIVE, POSSESSIVE, and OBJECTIVE. The relation indicated by the case of a noun includes three ideas, viz: those of *subject*, *object*, and *ownership*.”—*Ib.*, p. 45.

“In speaking of animals that are of inferior size, or whose sex is not known or not regarded, they are often considered as without sex: thus, we say of a *cat* ‘*it* is treacherous,’ of an infant ‘*it* is beautiful,’ of a *deer* ‘*it* was killed.’”—*Ib.*, p. 39.

“When *this* or *these*, *that* or *those*, refers to a preceding sentence; *this*, or *these*, refers to the latter member or term; *that*, or *those*, to the former.”—*Churchill’s Gram.*, p. 136; see *Lowth’s Gram.*, p. 102.

“The rearing of them [i. e. of plants] became his first care, their fruit his first food, and marking their kinds his first knowledge.”—*N. Butler’s Gram.*, p. 44.

“After the period used with abbreviations we should employ other points, if the construction demands it; thus, after Esq. in the last example, there should be, besides a period, a comma.”—*Ib.*, p. 212.

“In the plural, the verb is the same in all the persons; and hence the principle in *Rem.* 5, under Rule iii. [that the first or second person takes precedence,] is not applicable to verbs.”—*Ib.*, p. 158.

“Rex and Tyrannus are of very different characters. The one rules his people by laws to which they consent; the other, by his absolute will and power: *that* is called freedom, this, *tyranny*.”—*Murray’s Key*, 8vo, p. 190.

“A noun is the name of any person, place, or thing, which can be known, or mentioned, as: George; London; America; goodness; charity.”—*Cooper's Plain and Pract. Gram.*, p. 17.

“Etymology treats of the classification of words; their various modifications and derivations.”—*Day's School Gram.*, p. 9. “To punctuate correctly implies a thorough acquaintance with the meaning of words and phrases, as well as of all their corresponding connexions”—*W. Day's Punctuation*, p. 31.

“All objects which belong to neither the male nor female kind are called neuter.”—*Weld's Gram.*, 2d Ed., p. 57. “All objects, which belong to neither the male nor female kind, are said to be of the neuter gender.”—*Weld's Gram., Abridged*, p. 51.

“The Analysis of the Sounds in the English language presented in the preceding statements are sufficiently exact for the purpose in hand. Those who wish to pursue it further can consult Dr. Rush's admirable work, ‘The Philosophy of the Human Voice.’”—*Fowlers E. Gram.*, 1850, §65. “Nobody confounds the name of *w* or *y* with their sound or phonetic import.”—*Ib.*, §74.

“Order is Heaven's first law; and this confest,  
Some are and must be, greater than the rest.”—*Ib.*, p. 96.

## LESSON II.—UNDER VARIOUS RULES.

“In adjectives of one syllable, the Comparative is formed by adding *-er* to the positive; and the Superlative by adding *-est*; as, *sweet, sweeter, sweetest*.”—*Bullions, Prin. of E. Gram.*, p. 19.

“In monosyllables the comparative is formed by adding *er* or *r* to the positive, and the superlative by adding *est* or *st*; as, *tall, taller, tallest; wise, wiser, wisest*.”—*Id., Pract. Les.*, p. 24.

“By this method the confusion and unnecessary labor occasioned by studying grammars in these languages, constructed on different principles is avoided, the study of one is rendered a profitable introduction to the study of another, and an opportunity is furnished to the enquiring student of comparing the languages in their grammatical structure, and seeing at once wherein they agree, and wherein they differ.”—*Bullions, Prin. of E. Gram.*, Pref. to 5th Ed., p. vii.

“No larger portion should be assigned for each recitation than the class can easily master, and till this is done, a new portion should not be given out.”—*Id., ib.*, p. viii. “The acquisitions made in every new lesson should be rivetted and secured by repeated *revisals*.”—*Id., ib.*, p. viii.

“The personal pronouns may be parsed briefly thus; *I*, the first personal pronoun, masculine (or feminine), singular, the nominative. *His*, the third personal pronoun, masculine, singular, the possessive, &c.”—*Bullions, E. Gram.*, p. 23: *Pract. Les.*, p. 28.

“When the male and female are expressed by distinct terms; as, *shepherd, shepherdess*, the masculine term has also a general meaning, expressing both male and

female, and is always to be used when the office, occupation, profession, &c., and not the sex of the individual, is chiefly to be expressed. The feminine term is used only when the discrimination, of sex is indispensably necessary. Thus, when it is said ‘the Poets of this country are distinguished by correctness of taste,’ the term ‘Poet’ clearly includes both male and female writers of poetry.”—*Id.*, *E. Gram.*, p. 12; *his Analyt. and Pract. Gram.*, 24.

“Nouns and pronouns, connected by conjunctions, must be in the same cases.”—*Ingersoll’s Gram.*, p. 78. “Verbs, connected by conjunctions, must be in the same moods and tenses, and, when in the subjunctive present, they must be in the same form.”—*Id.*, p. 112.

“This will habituate him to reflection—exercise his judgment on the meaning of the author, and without any great effort on his part, impress indelibly on his memory, the rules which he is required to give. After the exercises under the rule have been gone through as directed in the note page 96, they may be read over again in a corrected state the pupil making an emphasis on the correction made, or they may be presented in writing at the next recitation.”—*Bullions, Prin. of E. Gram.*, 2d Ed. Revised and Cor., p. viii.

“Man, but for *that*, no action *could* attend  
And but for *this*, be *thoughtful* to no end.”—*O. B. Peirce’s Gram.*, Pref. p. 5.

### LESSON III.—UNDER VARIOUS RULES.

“‘Johnson the bookseller and stationer,’ indicates that the bookseller and the stationer are epithets belonging to the same person; ‘the bookseller and the stationer’ would indicate that they belong to different persons.”—*Bullions, E. Gram.*, p. 127.

“*Past* is an adjective; *passed*, the past tense or perfect participle of the verb, and they ought not, as is frequently done, to be confounded with each other.”—*Id.*, *ib.*, p. 148.

“Not only the nature of the thoughts and sentiments, but the very selection and arrangement of the words, gives English poetry a character, which separates it widely from common prose.”—*Id.*, *ib.*, p. 178.

“Men of sound, discriminating, and philosophical minds—men prepared for the work by long study, patient investigation, and extensive acquirements, have labored for ages to improve and perfect it, and nothing is hazarded in asserting, that should it be unwisely abandoned, it will be long before another equal in beauty, stability and usefulness, be produced in its stead.”—*Id.*, *ib.*, p. 191.

“The Article *The*, on the other hand, is used to restrict, and is therefore termed *Definite*. Its proper office is to call the attention to a particular individual or class, or to any number of such, and is used with nouns in either the singular or plural number.”—*Id.*, *ib.*, p. 193.

“Hence also the infinitive mood, a participle, a member of a sentence, or a proposition, forming together the subject of discourse, or the object of a verb or preposition, and being the name of an act or circumstance, are in construction, regarded as nouns, and are usually called ‘substantive phrases;’ as ‘*To play* is pleasant,’ ‘*His being an expert dancer* is no recommendation,’ ‘Let your motto be *Honesty is the best policy*.’”—*Id.*, *ib.*, p. 194.

“In accordance with his definition, Murray has divided verbs into three classes, *Active*, *Passive*, and *Neuter*, and includes in the first class *transitive* verbs only, and in the last all verbs used intransitively”—*Id.*, *ib.*, p. 200.

“Moreover, as the name of the speaker or the person spoken to is seldom expressed, (the pronouns *I* and *thou* being used in its stead,) a noun is very seldom in the first person, not often in the second, and almost never in either, unless it be a proper noun, or a common noun personified.”—*Bullions, Pract. Les.*, p. 13.

“In using the above exercises it will save much time, which is all important, if the pupil be taught to say every thing belonging to the nouns in the fewest words possible, and to say them always in the same order as above.”—*Id.*, *ib.*, p. 21.

“In any phrase or sentence the adjectives qualifying a noun may generally be found by prefixing the phrase ‘What kind of,’ to the noun in the form of a question; as, What kind of a horse? What kind of a stone? What kind of a way? The word containing the answer to the question is an adjective.”—*Id.*, *ib.*, p. 22.

“In the following exercise let the pupil first point out the nouns, and then the adjectives; and tell how he knows them to be so.”—*Id.*, *ib.*, p. 23.

“In the following sentences point out the improper ellipsis. Show why it is improper, and correct it.”—*Id.*, *ib.*, p. 124.

#### “SINGULAR PRONOUNS.

2. Thou—art being smitten.
3. He—is being smitten.

#### PLURAL PRONOUNS.

1. We—are being smitten.
2. Ye *or* you—are being smitten.
3. They—are being smitten.”

## CHAPTER II—UTTERANCE.

Utterance Is the art or act of vocal expression. It includes the principles of articulation, of pronunciation, and of elocution.

### SECTION I.—OF ARTICULATION.

Articulation is the forming of words; by the voice, with reference to their component letters and sounds.

### ARTICLE I.—OF THE DEFINITION.

Articulation differs from pronunciation, in having more particular regard to the elements of words, and in not embracing accent.\* A recent author defines it thus:

---

\* “As soon as language proceeds, from mere *articulation*, to coherency, and connection, *accent* becomes the guide of the voice. It is founded upon an obscure perception of symmetry, and proportion, between the different sounds that are uttered.”—*Noehden’s Grammar of the German Language*, p. 66.

“ARTICULATION is the act of forming, with the organs of speech, the elements of vocal language.”—*Comstock’s Elocution*, p. 16. And again: “A good articulation is the *perfect* utterance of the elements of vocal language.”—*Ibid*.

An other describes it more elaborately thus: “ARTICULATION, in language, is the forming of the human voice, accompanied by the breath, in some few consonants, into the simple and compound sounds, called vowels, consonants, and diphthongs, by the assistance of the organs of speech; and the uniting of those vowels, consonants, and diphthongs, together, so as to form syllables and words, and constitute spoken language.”—*Bolles’s Dict., Introd.*, p. 7.

## ARTICLE II—OF GOOD ARTICULATION.

Correctness in articulation is of such importance, that without it speech or reading becomes not only inelegant, but often absolutely unintelligible. The opposite faults are mumbling, muttering, mincing, lisping, slurring, mouthing, drawling, hesitating, stammering, misreading, and the like. “A good articulation consists in giving every letter in a syllable its due proportion of sound, according to the most approved custom of pronouncing it; and in making such a distinction between the syllables of which words are composed, that the ear shall without difficulty acknowledge their number; and perceive, at once, to which syllable each letter belongs. Where these points are not observed, the articulation is proportionably defective.”—*Sheridan’s Rhetorical Grammar*, p. 50.

Distinctness of articulation depends, primarily, upon the ability to form the simple elements, or sounds of letters, by the organs of speech, in the manner which the custom of the language demands; and, in the next place, upon the avoidance of that precipitancy of utterance, which is greater than the full and accurate play of the organs will allow. If time be not given for the full enunciation of any word which we attempt to speak, some of the syllables will of course be either lost by elision or sounded confusedly.

Just articulation gives even to a feeble voice greater power and reach than the loudest vociferation can attain without it. It delivers words from the lips, not mutilated, distorted, or corrupted, but as the acknowledged sterling currency of thought;—“as beautiful coins newly issued from the mint, deeply and accurately impressed, perfectly finished, neatly struck by the proper organs, distinct, sharp, in due succession, and of due weight.”—*Austin’s Chironomia*, p. 38.

OBS.—The principles of articulation constitute the chief exercise of all those who are learning either to speak or to read. So far as they are specifically taught in this work, they will be found in those sections which treat of the powers of the letters.

## SECTION II.—OF PRONUNCIATION.

Pronunciation, as distinguished from elocution, or delivery, is the utterance of words taken separately. The correct pronunciation of words, or that part of grammar which teaches it, is frequently called *Orthoëpy*.

Pronunciation, or orthoëpy, requires a knowledge of the just powers of the letters in all their combinations; of the distinction of quantity in vowels and syllables; and of the force and seat of the accent.

## ARTICLE I—OF THE POWERS OF LETTERS.

The JUST POWERS of the letters, are those sounds which are given to them by the best readers. These are to be learned, as reading is learned, partly from example, and partly from such books as show or aid the pronunciation of words.

It is to be observed, however, that considerable variety, even in the powers of the letters, is produced by the character and occasion of what is uttered. It is noticed by Walker, that, “Some of the vowels, when neither under the accent, nor closed by a consonant, have a longer or a shorter, an opener or a closer sound, according to the solemnity or familiarity, the deliberation or rapidity of our delivery.”—*Pronouncing Dict., Preface*, p. 4. In cursory speech, or in such reading as imitates it, even the best scholars utter many letters with quicker and obscurer sounds than ought ever to be given them in solemn discourse. “In public speaking,” says Rippingham, “every word should be uttered, as though it were spoken singly. The solemnity of an oration justifies and demands such scrupulous distinctness. That careful pronunciation which would be ridiculously pedantic in colloquial intercourse, is an essential requisite of good elocution.”—*Art of Public Speaking*, p. xxxvii.

## ARTICLE II—OF QUANTITY.

QUANTITY, or TIME in pronunciation, is the measure of sounds or syllables in regard to their duration; and, by way of distinction, is supposed ever to determine them to be either *long* or *short*.\*

The absolute time in which syllables are uttered, is very variable, and must be different to suit different subjects, passions, and occasions; but their relative length or shortness may nevertheless be preserved, and generally must be, especially in reciting poetry.

---

\* According to Johnson, Walker, Webster, Worcester, and perhaps all other lexicographers, *Quantity*, in grammar, is—“The measure of *time* in pronouncing a *syllable*.” And, to this main idea, are conformed, so far as I know, all the different definitions ever given of it by grammarians and critics, except that which appeared in Asa Humphrey’s *English Prosody*, published in 1847. In this work—the most elaborate and the most comprehensive, though not the most accurate or consistent treatise we have on the subject—*Time* and *Quantity* are explained separately, as being “*two distinct things*,” and the latter is supposed not to have regard to *duration*, but solely to the *amount* of sound given to each syllable.

This is not only a fanciful distinction, but a radical innovation—and one which, in any view, has little to recommend it. The author’s explanations of both *time* and *quantity*—of their characteristics, differences, and subdivisions—of their relations to each other, to poetic numbers, to emphasis and cadence, or to accent and non-accent—as well as his derivation and history of “these technical terms, *time* and *quantity*”—are hardly just or clear enough to be satisfactory. According to his theory, “Poetic numbers are composed of *long* and *short* syllables alternately;” (page 5;) but the difference or proportion between the times of these classes of syllables he holds to be *indeterminable*, “because their lengths are various.” He began with destroying the proper distinction of quantity, or time, as being *either long or short*, by the useless recognition of an indefinite number of “*intermediate lengths*,” saying of our syllables at large, “some are LONG, some SHORT, and some are of INTERMEDIATE LENGTHS; as, *mat*, *not*, *con*, &c. are short sounds; *mate*, *note*, *cone*, and *grave* are long. Some of our diphthongal sounds are LONGER STILL; as, *voice*, *noise*, *sound*, *bound*, &c. OTHERS are seen to be of INTERMEDIATE *lengths*.”—*Humphrey’s Prosody*, p. 4.

On a scheme like this, it must evidently be impossible to determine, with any certainty, either what syllables are *long* and what *short*, or what is the difference or ratio between *any two* of the innumerable “lengths” of that time, or quantity, which is *long*, *short*, *variously intermediate*, or *longer still*, and again *variously intermediate*! No marvel then that the ingenious author scans some lines in a manner peculiar to himself.

Our long syllables are chiefly those which, having sounds naturally capable of being lengthened at pleasure, are made long by falling under some stress either of accent or of emphasis. Our short syllables are the weaker sounds, which, being the less significant words, or parts of words, are uttered without peculiar stress.

OBS.—As quantity is chiefly to be regarded in the utterance of poetical compositions, this subject will be farther considered under the head of Versification.

### ARTICLE III.—OF ACCENT.

ACCENT, as commonly understood, is the peculiar stress which we lay upon some particular syllable of a word, whereby that syllable is distinguished from and above the rest; as, *gram'-mar*, *gram-ma'-ri-an*.

Every word of more than one syllable, has one of its syllables accented; and sometimes a compound word has two accents, nearly equal in force; as, *e'ven-hand'ed*, *home'-depart'ment*.\*

Besides the *chief* or *primary* accent, when the word is long, for the sake of harmony or distinctness, we often give a *secondary* or less forcible accent to an other syllable; as, to the last of *tem'-per-a-ture*', and to the second of *in dem'-ni-fi-ca'-tion*.

“Accent seems to be regulated, in a great measure, by etymology. In words from the Saxon, the accent is generally on the root; in words from the learned languages, it is generally on the termination; and if to these we add the different accent we lay on some words, to distinguish them from others, we seem to have the three great principles of accentuation; namely, the radical, the terminational, and the distinctive.”—*Walker's Principles*, No. 491; *L. Murray's Grammar*, 8vo, p. 236.

A full and open pronunciation of the long vowel sounds, a clear articulation of the consonants, a forcible and well-placed accent, and a distinct utterance of the unaccented syllables, distinguish the elegant speaker.

### OBSERVATIONS.

OBS. 1.—The pronunciation of the English language is confessedly very difficult to be mastered. Its rules and their exceptions are so numerous, that few become thoroughly

---

\* It was the doctrine of Sheridan, and perhaps of our old lexicographers in general, that no English word can have more than one *full accent*; but, in some modern dictionaries, as Bolles's, and Worcester's, many words are marked as if they had two; and a few are given by Bolles's as having three. Sheridan erroneously affirmed, that “*every word* has an accent,” even “all monosyllables, the particles alone excepted.”—*Lecture on Elocution*, pp. 61 and 71. And again, yet more erroneously: “The *essence* of English words consisting in accent, as that of syllables in articulation; we know that there are *as many syllables as we hear articulate sounds*, and *as many words as we hear accents*.”—*Ib.*, p. 70. Yet he had said before, in the same lecture: “The longer polysyllables, have frequently *two accents*, but one is so much stronger than the other, as to shew that it is but one word; and the inferior accent is always less forcible, than any accent that is the single one in a word.”—*Ib.*, p. 31. Wells defines accent as if it might lie on *many* syllables of a word; but, in his examples, he places it on no more than one: “*Accent* is *the stress* which is laid on *one or more syllables* of a word, in pronunciation; as, reverberate, undertake.”—*Wells's School Gram.*, p. 185. According to this loose definition, he might as well have accented at least one other syllable in each of these examples; for there seems, certainly, to be some little stress on *ate* and *un*. For sundry other definitions of accent, see Chap. IV, Section 2d, of *Versification*; and the marginal note referring to Obs. 1st on *Prosody*.

acquainted with any general system of them. Nor, among the different systems which have been published, is there any which is worthy in all respects to be accounted a STANDARD. And, if we appeal to custom, the custom even of the best speakers is far from an entire uniformity. Perhaps the most popular directory on this subject is Walker's Critical Pronouncing Dictionary. The "Principles of English Pronunciation," which this author has furnished, occupy fifty-six closely-printed octavo pages, and are still insufficient for the purpose of teaching our orthoëpy by rule. They are, however, highly valuable, and ought to be consulted by every one who wishes to be master of this subject. In its vocabulary, or stock of words, this Dictionary is likewise deficient. Other lexicographers have produced several later works, of high value to the student; and, though no one has treated the subject of pronunciation so elaborately as did Walker, some may have given the results of their diligence in a form more useful to the generality of their consulters. Among the good ones, is the Universal and Critical Dictionary of Joseph E. Worcester.

OBS. 2.—Our modern accentuation of Greek or Latin words is regulated almost wholly by the noted rule of Sanctius, which Walker has copied and Englished in the Introduction to his Key, and of which the following is a new version or paraphrase, never before printed:

#### RULE FOR THE ACCENTING OF LATIN.

*One* syllable has stress of course,  
And words of *two* the *first* enforce;  
In *longer* words the *penult* guides,  
Its *quantity* the point decides;  
If *long*, 'tis *there* the accent's due,  
If *short*, accent the *last but two*;  
For accent, in a Latin word,  
Should ne'er go higher than the third.

This rule, or the substance of it, has become very important by long and extensive use; but it should be observed, that stress on monosyllables is more properly *emphasis* than *accent*; and that, in English, the accent governs quantity, rather than quantity the accent.

### SECTION III.—OF ELOCUTION.

Elocution is the graceful utterance of words that are arranged into sentences, and that form discourse.

Elocution requires a knowledge, and right application, of emphasis, pauses, inflections, and tones.

#### ARTICLE I—OF EMPHASIS.

EMPHASIS is the peculiar stress of voice which we lay upon some particular word or words in a sentence, which are thereby distinguished from the rest as being more especially significant.\*

---

\* According to Dr. Rush, Emphasis is—"a stress of voice on one or more words of a sentence, distinguishing them by intensity or peculiarity of meaning."—*Philosophy of the Voice*, p. 282. Again, he defines thus: "Accent is the fixed but inexpressive distinction of syllables *by quantity and stress*: alike both in place and nature, whether the words are pronounced singly from the columns of a vocabulary, or

As accent enforces a syllable, and gives character to a word; so emphasis distinguishes a word, and often determines the import of a sentence. The right placing of accent, in the utterance of words, is therefore not more important, than the right placing of emphasis, in the utterance of sentences. If no emphasis be used, discourse becomes vapid and inane; if no accent, words can hardly be recognized as English.

“Emphasis, besides its other offices, is the great regulator of quantity. Though the quantity of our syllable is fixed, in words separately pronounced, yet it is mutable, when [the] words are [ar]ranged in[to] sentences; the long being changed into short, the short into long, according to the importance of the words with regard to meaning: and, as it is by emphasis only, that the meaning can be pointed out, emphasis must be the regulator of the quantity.”—*L. Murray’s Gram.*, p. 246.\* “Emphasis changes, not only the quantity of words and syllables, but also, in particular cases, the sent of the accent. This is demonstrable from the following examples: ‘He shall *in*crease, but I shall *de*crease.’ ‘There is a difference between giving and *for*giving.’ ‘In this species of composition, *plaus*ibility is much more essential than *prob*ability.’ In these examples, the emphasis requires the accent to be placed on syllables to which it does not commonly belong.”—*Ib.*, p. 247.

In order to know what words are to be made emphatic, the speaker or reader must give constant heed to *the sense* of what he utters; his only sure guide, in this matter, being a just conception of the force and spirit of the sentiment which he is about to pronounce. He must also guard against the error of multiplying emphatic words too much; for, to overdo in this way, defeats the very purpose for which emphasis is used. To manage this stress with exact propriety, is therefore one of the surest evidences both of a quick understanding, and of a delicate and just taste.

---

connectedly in the series of discourse. *Emphasis* may be defined to be the *expressive* but occasional distinction of a syllable, and consequently of the whole word, by one or more of the specific modes of *time*, *quality*, *force*, or *pitch*.”—*Ibid.*

\* 1. This doctrine, though true in its main intent, and especially applicable to the poetic quantity of *monosyllables*, (the class of words most frequently used in English poetry,) is, perhaps, rather too strongly stated by Murray; because it agrees not with other statements of his, concerning the power of *accent* over quantity; and because the effect of accent, as a “regulator of quantity,” *may*, on the whole, be as great as that of emphasis. Sheridan contradicts himself yet more pointedly on this subject; and his discrepancies may have been the efficients of Murray’s. “The *quantity* of our syllables is perpetually varying with the sense, and is *for the most part regulated by* EMPHASIS.”—*Sheridan’s Rhetorical Gram.*, p. 65. Again: “It is by the ACCENT *chiefly* that the *quantity* of our syllables is regulated.”—*Sheridan’s Lectures on Elocution*, p. 57. See Chap. IV, Sec. 2d, Obs. 1; and marginal note on Obs. 8.

2. Some writers erroneously confound *emphasis* with *accent*; especially those who make accent, and not quantity, the foundation of verse. Contrary to common usage, and to his own definition of accent, Wells takes it upon him to say, “The term *accent* is also applied, in poetry, to the stress laid on monosyllabic words; as,

‘Content is *wealth*, *the riches of the mind*.’—*Dryden*.”—*Wells’s School Grammar*, p. 185.

It does not appear that stress laid on monosyllables is any more fitly termed accent, when it occurs in the reading of poetry, than when in the utterance of prose. Churchill, who makes no such distinction, thinks accent essential alike to emphasis and to the quantity of a long vowel, and yet, as regards monosyllables, dependent on them both! His words are these: “Monosyllables are sometimes accented, sometimes not. This depends chiefly on *their* being *more or less emphatic*; and on the vowel *sound* being *long or short*. We cannot give *emphasis* to any word, or it’s [its] proper duration to a *long vowel*, without *accenting* it.”—*Churchill’s New Gram.*, p. 182.

## ARTICLE II.—OF PAUSES.

Pauses are cessations in utterance, which serve equally to relieve the speaker, and to render language intelligible and pleasing.

Pauses are of three kinds: first, *distinctive* or *sentential* pauses,—such as form the divisions required by the sense; secondly, *emphatic* or *rhetorical* pauses,—such as particularly call the hearer's attention to something which has been, or is about to be, uttered; and lastly, *poetical* or *harmonic* pauses,—such as are peculiar to the utterance of metrical compositions.

The duration of the distinctive pauses should be proportionate to the degree of connexion between the parts of the discourse. The shortest are long enough for the taking of some breath; and it is proper, thus to relieve the voice at every stop, if needful. This we may do, slightly at a comma, more leisurely at a semicolon, still more so at a colon, and completely at a period.

Pauses, whether in reading or in public discourse, ought always to be formed after the manner in which we naturally form them in ordinary, sensible conversation; and not after the stiff, artificial manner which many acquire at school, by a mere mechanical attention to the common punctuation.

Forced, unintentional pauses, which accidentally divide words that ought to be spoken in close connexion, are always disagreeable; and, whether they arise from exhaustion of breath, from a habit of faltering, or from unacquaintance with the text, they are errors of a kind utterly incompatible with graceful elocution.

Emphatic or rhetorical pauses, the kind least frequently used, may be made immediately before, or immediately after, something which the speaker thinks particularly important, and on which he would fix the attention of his audience. Their effect is similar to that of a strong emphasis; and, like this, they must not be employed too often.

The harmonic pauses, or those which are peculiar to poetry, are of three kinds: the *final pause*, which marks the end of each line; the *cæsural* or *divisional pause*, which commonly divides the line near the middle; and the *minor rests*, or *demi-cæsuras*, which often divide it still further.

In the reading of poetry, these pauses ought to be observed, as well as those which have reference to the sense; for, to read verse exactly as if it were prose, will often rob it of what chiefly distinguishes it from prose. Yet, at the same time, all appearance of singsong, or affected tone, ought to be carefully guarded against.

## ARTICLE III.—OF INFLECTIONS.

INFLECTIONS are those peculiar variations of the human voice, by which a continuous sound is made to pass from one note, key, or pitch, into an other. The passage of the voice from a lower to a higher or shriller note, is called the *rising* or *upward* inflection. The passage of the voice from a higher to a lower or graver note, is called the *falling* or *downward* inflection. These two opposite inflections may be heard in the following examples: 1. The rising, "Do you mean to *gó*?" 2. The falling, "*When* will you *gò*?"

In general, questions that may be answered by *yes* or *no*, require the rising inflection; while those which demand any other answer, must be uttered with the falling inflection. These slides of the voice are not commonly marked in writing, or in our printed books; but, when there is occasion to note them, we apply the acute accent to the former, and the grave accent to the latter.\*

A union of these two inflections upon the same syllable, is called a *circumflex*, a *wave*, or a "*circumflex inflection*." When the slide is first downward and then upward, it is called the *rising circumflex*, or "the *gravo-acute circumflex*;" when first upward and then downward, it is denominated the *falling circumflex*, or "the *acuto-grave circumflex*." Of these complex inflections of the voice, the emphatic words in the following sentences may be uttered as examples: "And it shall go *hård* but I will *ûse* the information."—"Ô! but he *paüsed* upon the brink."

When a passage is read without any inflection, the words are uttered in what is called a *monotone*; the voice being commonly pitched at a grum note, and made to move for the time, slowly and gravely, on a perfect level.

"Rising inflections are far more numerous than falling inflections; the former constitute the main body of oral language, while the latter are employed for the purposes of emphasis, and in the formation of cadences. Rising inflections are often emphatic; but their emphasis is weaker than that of falling inflections."—*Comstock's Elocution*, p. 50.

"Writers on Elocution have given numerous rules for the regulation of inflections; but most of these rules are better calculated to make *bad* readers than good ones. Those founded on the construction of sentences might, perhaps, do credit to a *mechanic*, but they certainly do none to an *elocutionist*."—*Ib.*, p. 51.

"The reader should bear in mind that a falling inflection gives more importance to a word than a rising inflection. Hence it should never be employed merely for the sake of *variety*; but for *emphasis* and *cadences*. Neither should a rising inflection be used for the sake of mere '*harmony*,' where a falling inflection would better express the meaning of the author. The *sense* should, in *all* cases, determine the direction of inflections."—*Ib.*

---

\* Not only are these inflections denoted occasionally by the accentual marks, but they are sometimes expressly *identified with accents*, being called by that name. This practice, however, is plainly objectionable. It confounds things known to be different,—mere stress with elevation or depression,—and may lead to the supposition, that to accent a syllable, is to inflect the voice upon it. Such indeed has been the guess of many concerning the nature of Greek and Latin accents, but of the English accent, the common idea is, that it is only a greater force distinguishing some one syllable of a word from the rest. Walker, however, in the strange account he gives in his *Key*, of "what we mean by *the accent and quantity* of our own language," charges this current opinion with error, dissenting from Sheridan and Nares, who held it; and, having asserted, that, "in speaking, the voice is continually *sliding* upwards or downwards," proceeds to contradict himself thus: "As high and low, loud and soft, forcible and feeble, are comparative terms, words of one syllable pronounced alone, and without relation to other words or syllables, *cannot be said to have any* ACCENT. The only distinction to which such words are liable, is an *elevation or depression* of voice, when we compare the beginning with the end of the word or syllable. Thus a monosyllable, considered singly, rises from a lower to a higher tone in the question *Nó?* *which* may therefore be called *the acute* ACCENT: and falls from a higher to a lower tone upon the same word in the answer *Nò*, *which* may therefore be called *the grave* [ACCENT]."—*Walker's Key*, p. 316. Thus he tells of different accents on "*a monosyllable*," which, by his own showing, "cannot be said to have any accent"! and others read and copy the text with as little suspicion of its inconsistency! See *Worcester's Universal and Critical Dictionary*, p. 934.

*Cadence* is a fall of the voice, which has reference not so much to pitch as to force, though it may depress both; for it seems to be generally contrasted with emphasis,\* and by some is reprehended as a fault. “Support your voice steadily and firmly,” says Rippingham, “and pronounce the concluding words of the sentence with force and vivacity, rather than with a languid cadence.”—*Art of Speaking*, p. 17. The pauses which L. Murray denominates the suspending and the closing pause, he seems to have discriminated chiefly by the inflections preceding them, if he can be said to have distinguished them at all. For he not only teaches that the former may sometimes be used at the close of a sentence, and the latter sometimes where “the sense is not completed;” but, treating cadence merely as a defect, adds the following caution: “The closing pause must not be confounded with that fall of the voice, or *cadence*, with which many readers uniformly finish a sentence. Nothing is more destructive of propriety and energy than this habit. The tones and inflections of the voice at the close of a sentence, ought to be diversified, according to the general nature of the discourse, and the particular construction and meaning of the sentence.”—*Murray’s Gram.*, 8vo, p. 250; 12mo, p. 200.

#### ARTICLE IV.—OF TONES.

TONES are those modulations of the voice which depend upon the feelings of the speaker. They are what Sheridan denominates “the language of emotions.” And it is of the utmost importance, that they be natural, unaffected, and rightly adapted to the subject and to the occasion; for upon them, in a great measure, depends all that is pleasing or interesting in elocution.

“How much of the propriety, the force, and [the] grace of discourse, must depend on these, will appear from this single consideration; that to almost every sentiment we utter, more especially to every strong emotion, nature has adapted some peculiar tone of voice; insomuch, that he who should tell another that he was angry, or much grieved, in a tone that did not suit such emotions, instead of being believed, would be laughed at.”—*Blair’s Rhet.*, p. 333.

“The different passions of the mind must be expressed by different tones of the voice. *Love*, by a soft, smooth, languishing voice; *anger*, by a strong, vehement, and elevated voice; *joy*, by a quick, sweet, and clear voice; *sorrow*, by a low, flexible, interrupted voice; *fear*, by a dejected, tremulous, hesitating voice; *courage*, by a full, bold, and loud voice; and *perplexity*, by a grave and earnest voice. In *exordiums*, the voice should be low, yet clear; in *narrations*, distinct; in *reasoning*, slow; in *persuasions*, strong; it should thunder in *anger*, soften in *sorrow*, tremble in *fear*, and melt in *love*.”—*Hiley’s Gram.*, p. 121.

OBS.—Walker observes, in his remarks on the nature of Accent and Quantity, “As to the tones of the passions, which are so many and various, these, in the opinion of one of

---

\* In Humphrey’s English Prosody, *cadence* is taken for the reverse of *accent*, and is obviously identified or confounded with *short quantity*, or what the author inclines to call “*small quantity*.” He defines it as follows: “Cadence is the reverse or counterpart *to* accent; a falling or depression of voice on syllables unaccented: *and by which* the sound is shortened and depressed.”—P. 3. This is not exactly what is generally understood by the word *cadence*. Lord Kames also contrasts *cadence* with *accent*; but, by the latter term, he seems to have meant something different from our ordinary accent. “Sometimes to humour the sense,” says he, “and sometimes the melody, a particular syllable is sounded *in a higher tone*; and this is termed *accenting a syllable*, or gracing it with an accent. Opposed to the accent, is the *cadence*, which I have not mentioned as one of the requisites of verse, because it is entirely regulated by the sense, and hath no peculiar relation to verse.”—*Elements of Criticism*, Vol. ii, p. 78.

the best judges in the kingdom, are *qualities* of sound, occasioned by certain vibrations of the organs of speech, independent *on* [say *of*] high, low, loud, soft, quick, slow, forcible, or feeble: which last may not improperly be called different *quantities* of sound.”—*Walker’s Key*, p. 305.

### CHAPTER III.—FIGURES.

A Figure, in grammar, is an intentional deviation from the ordinary spelling, formation, construction, or application, of words. There are, accordingly, figures of Orthography, figures of Etymology, figures of Syntax, and figures of Rhetoric. When figures are judiciously employed, they both strengthen and adorn expression. They occur more frequently in poetry than in prose; and several of them are merely poetic licenses.

#### SECTION I.—FIGURES OF ORTHOGRAPHY.

A Figure of Orthography is an intentional deviation from the ordinary or true spelling of a word. The principal figures of Orthography are two; namely, *Mi-me’-sis* and *Ar’-cha-ism*.

#### EXPLANATIONS.

I. *Mimesis* is a ludicrous imitation of some mistake or mispronunciation of a word, in which the error is mimicked by a false spelling, or the taking of one word for another; as, “*Maister*, says he, have you any *uery* good *ueal* in you *vället*?”—*Columbian Orator*, p. 292. “Ay, he was *porn* at Monmouth, captain Gower.”—*Shak*. “I will *description* the matter to you, if you be *capacity* of it.”—*Id*.

“*Perdigious*! I can hardly stand.”—LLOYD: *Brit. Poets*, Vol. viii, p. 184.

II. An *Archaism* is a word or phrase expressed according to ancient usage, and not according to our modern orthography; as, “*Newe grene chese of smalle clammynes comfortethe a hotte stomake*.”—T. PAYNEL: *Tooke’s Diversions*, ii, 132. “He *hath holpen* his servant Israel.”—*Luke*, i, 54.

“With him was rev’rend Contemplation *pight*,  
Bow-bent with *eld*, his beard of snowy hue.”—*Beattie*.

OBS.—Among the figures of this section, perhaps we might include the foreign words or phrases which individual authors now and then adopt in writing English; namely, the *Scotticisms*, the *Gallicisms*, the *Latinisms*, the *Grecisms*, and the like, with which they too often garnish their English style. But these, except they stand as foreign quotations, in which case they are exempt from our rules, are in general offences against the *purity* of our language; and it may therefore be sufficient, just to mention them here, without expressly putting any of them into the category of grammatical figures.

#### SECTION II.—FIGURES OF ETYMOLOGY.

A Figure of Etymology is an intentional deviation from the ordinary formation of a word. The principal figures of Etymology are eight; namely, *A-phoer’-e-sis*, *Pros’-the-sis*, *Syn’-co-pe*, *A-poc’-o-pe*, *Par-a-go’-ge*, *Di-oe’-e-sis*, *Syn-oe’-e-sis*, and *Tme’-sis*.

## EXPLANATIONS.

I. *Aphæresis* is the elision of some of the initial letters of a word: as, ‘*gainst*, for *against*; ‘*gan*, for *began*; ‘*neath*, for *beneath*; ‘*thout*, for *without*.

II. *Prosthesis* is the prefixing of an expletive syllable to a word: as, *adown*, for *down*; *appaid*, for *paid*; *bestrown*, for *strown*; *evanished*, for *vanished*; *yclad*, for *clad*.

III. *Syn’copè* is the elision of some of the middle letters of a word: as, *med’cine*, for *medicine*; *e’en*, for *even*; *o’er*, for *over*; *conq’ring*, for *conquering*; *se’nnight*, for *sevensnight*.

IV. *Apoc’opè* is the elision of some of the final letters of a word: as, *tho’* for *though*; *th’*, for *the*; *t’other*, for *the other*; *thro’*, for *through*.

V. *Parago’gè* is the annexing of an expletive syllable to a word: as, *Johnny*, for *John*; *deary*, for *dear*; *withouten*, for *without*.

VI. *Diæresis* is the separating of two vowels that might be supposed to form a diphthong: as, *coöperate*, not *cooperate*; *aëronaut*, not *æronaut*; *or’thoëpy*, not *orthoëpy*.

VII. *Synæresis* is the sinking of two syllables into one: as, *seest*, for *sëest*; *tacked*, for *tack-ed*; *drowned*, for *drown-ed*; *spoks’t*, for *spok-est*; *show’dst*, for *show-edst*; ‘*tis*, for *it is*; *I’ll*, for *I will*.

VIII. *Tmesis* is the inserting of a word between the parts of a compound, or between two words which should be united if they stood together: as, “On *which* side *soever*.”—*Rolla*. “To us *ward*,” “To God *ward*.”—*Bible*. “The *assembling* of ourselves *together*.”—*Id*. “With *what* charms *soe’er* she will.”—*Couper*. “So *new* a *fashion’d* robe.”—*Shak*. “Lament the *live* day *long*.”—*Burns*.

OBS.—In all our pronunciation, except that of the solemn style, such verbal or participial terminations as can be so uttered, are usually sunk by *synæresis* into mere modifications of preceding syllables. The terminational consonants, if not uttered with one vowel, must be uttered with an other. When, therefore, a vowel is entirely suppressed in pronunciation, (whether retained in writing or not,) the consonants connected with it, necessarily fall into an other syllable: thus, *tried*, *triest*, *sued*, *suest*, *loved*, *lovest*, *mov’d*, *mov’s*, are monosyllables; and *studied*, *studiest*, *studi’dst*, *argued*, *arguest*, *argu’dst*, are dissyllables; except in solemn discourse, in which the *e* is generally retained and made vocal.

## SECTION III.—FIGURES OF SYNTAX.

A Figure of Syntax is an intentional deviation from the ordinary construction of words. The principal figures of Syntax are five; namely, *El-lip’-sis*, *Ple’-o-nasm*, *Syl-lep’-sis*, *En-al’-la-ge*, and *Hy-per’-ba-ton*.

## EXPLANATIONS.

I. *Ellipsis* is the omission of some word or words which are necessary to complete the construction, but not necessary to convey the meaning. Such words are said, in technical

phrase, to be *understood*;<sup>\*</sup> because they are received as belonging to the sentence, though they are not uttered.

Of compound sentences, a vast many are more or less elliptical; and sometimes, for brevity's sake, even the most essential parts of a simple sentence, are suppressed;<sup>†</sup> as, "But more of this hereafter."—*Harris's Hermes*, p. 77. This means, "But *I shall say* more of this hereafter." "Prythee, peace."—*Shak*. That is, "*I pray* thee, *hold thou thy* peace."

There may be an omission of any of the parts of speech, or even of a whole clause, when this repeats what precedes; but the omission of mere articles or interjections can scarcely constitute a proper ellipsis, because these parts of speech, wherever they are really necessary to be recognized, ought to be expressed.

#### EXAMPLES OF ELLIPSIS SUPPLIED.

1. Of the ARTICLE:—"A man and [*a*] woman."—"The day, [*the*] month, and [the] year."—"She gave me an apple and [*a*] pear, for a fig and [*an*] orange."—*Jaudon's Gram.*, p. 170.

2. Of the NOUN:—"The common [*law*] and the statute law."—"The twelve [*apostles*]."—"The same [*man*] is he."—"One [*book*] of my books."—"A dozen [*bottles*] of wine."—"Conscience, I say; not thine own [*conscience*], but [*the conscience*] of the other."—1 *Cor.*, x, 29. "Every moment subtracts *from* [*our lives*] what it adds *to* our lives."—*Dillwyn's Ref.*, p. 8. "Bad actions mostly lead to worse" [*actions*].—*Ib.*, p. 5.

3. Of the ADJECTIVE:—"There are subjects proper for the one, and not [*proper*] for the other."—*Kames*. "A just weight and [*a just*] balance are the Lord's."—*Prov.*, xvi, 11. True ellipses of the adjective alone, are but seldom met with.

4. Of the PRONOUN:—"Leave [*thou*] there thy gift before the altar, and go [*thou*] thy way; first be [*thou*] reconciled to thy brother, and then come [*thou*] and offer [*thou*] thy gift,"—*Matt.*, v, 24. "Love [*ye*] your enemies, bless [*ye*] them that curse you, do [*ye*] good to them that hate you."—*Ib.*, v, 44. "Chastisement does not always immediately follow error, but [it] sometimes comes when [*it is*] least expected."—*Dillwyn, Ref.*, p. 31. "Men generally put a greater value upon the favours [*which*] they bestow, than upon those [*which*] they receive."—*Art of Thinking*, p. 48. "Wisdom and worth were all [*that*] he had."—*Allen's Gram.*, p. 294.

5. Of the VERB:—"The world is crucified unto me, and I [*am crucified*] unto the world."—*Gal.*, vi, 14. "Hearts should not [differ], though heads may, differ."—*Dillwyn*, p. 11. "Are ye not much better than they" [*are*]?"—*Matt.*, vi, 26. "Tribulation worketh patience; and patience [*worketh*] experience; and experience [*worketh*] hope."—*Romans*, v, 4. "Wrongs are engraved on marble; benefits [*are engraved*] on sand."—*Art of Thinking*, p. 41. "To whom thus Eve, yet sinless" [*spoke*].—*Milton*.

<sup>\*</sup> The Latin term, (made plural to agree with *verba*, *words*,) is *subaudita*, *underheard*—the perfect participle of *subaudio*, to *underhear*. Hence the noun, *subauditio*, *subaudition*, the recognition of ellipses.

<sup>†</sup> "Thus, in the Proverbs of all Languages, many Words are usually left to be supplied from the trite obvious Nature of what they express; as, *out of Sight out of Mind*; *the more the merrier*, &c."—*W. Ward's Pract. Gram.*, p. 147.

6. Of the PARTICIPLE:—"That [*being*] o'er, they part."—"Animals of various natures, some adapted to the wood, and some [*adapted*] to the wave."—*Melmoth, on Scripture*, p. 13.

"His knowledge [*being*] measured to his state and place,  
His time [*being*] a moment, and a point [*being*] his space."—*Pope*.

7. Of the ADVERB:—"He can do this independently of me, if not [*independently*] of you."

"She shows a body rather than a life;  
A statue, [*rather*] than a breather."—*Shak., Ant. and Cleo.*, iii, 3.

8. Of the CONJUNCTION:—"But the fruit of the Spirit is love, [*and*] joy, [*and*] peace, [*and*] long suffering, [*and*] gentleness, [*and*] goodness, [*and*] faith, [*and*] meekness, [*and*] temperance."—*Gal.*, v, 22. The repetition of the conjunction is called *Polysyndeton*; and the omission of it, *Asyndeton*.

9. Of the PREPOSITION:—"It shall be done [*on*] this very day."—"We shall set off [*at*] some time [*in*] next month."—"He departed [*from*] this life."—"He gave [*to*] me a book."—"We walked [*through*] a mile."—"He was banished [*from*] the kingdom."—*W. Allen*. "He lived like [*to*] a prince."—*Wells*.

10. Of the INTERJECTION:—"Oh! the frailty, [*oh!*] the wickedness of men."—"Alas for Mexico! and [*alas*] for many of her invaders!"

11. Of PHRASES or CLAUSES:—"The active commonly do more than they are bound to do; the indolent [*commonly do*] less" [*than they are bound to do*].—"Young men, angry, mean less than they say; old men, [*angry, mean*] more" [*than they say*].—"It is the duty of justice, not to injure men; [*it is the duty*] of modesty, not to offend them."—*W. Allen*.

### OBSERVATIONS.

OBS. 1.—Grammarians in general treat of ellipsis without *defining* it; and exhibit such rules and examples as suppose our language to be a hundred-fold more elliptical than it really is.\* This is a great error, and only paralleled by that of a certain writer elsewhere noticed, who denies the existence of all ellipsis whatever. (See Syntax, Obs. 24th on Rule 22d.) Some have defined this figure in a way that betrays a very inaccurate notion of what it is: as, "ELLIPSIS is *when* one or more words are wanting *to complete the sense*."—*Adam's Lat. and Eng. Gram.*, p. 235; *Gould's*, 229. "ELLIPSIS is the omission of one or more words necessary *to complete the sense*."—*Bullions, Lat. Gram.*, p. 265. These definitions are decidedly worse than none; because, if they have any effect, they can only mislead. They absurdly suggest that every elliptical sentence lacks a part of its own meaning! Ellipsis is, in fact, the mere omission or absence of certain *suggested words*; or of words that may be spared from utterance, *without defect in the sense*. There never can be an ellipsis of any thing which is either unnecessary to the construction or necessary to the sense; for to say what we mean and nothing more, never can constitute a deviation from the ordinary

\* Lindley Murray and some others say, "As *the ellipsis occurs in almost every sentence in the English language*, numerous examples of it might be given."—*Murray's Gram.*, p. 220; *Weld's*, 292; *Fisk's*, 147. They could, without doubt, have exhibited many true specimens of Ellipsis; but most of those which they have given, are only fanciful and false ones; and their notion of the frequency of the figure, is monstrously hyperbolic.

grammatical construction of words. As a figure of Syntax, therefore, the *ellipsis* can only be of such words as are so evidently suggested to the reader, that the writer is as fully answerable for them as if he had written them.

OBS. 2.—To suppose an ellipsis where there is none, or to overlook one where it really occurs, is to pervert or mutilate the text, in order to accommodate it to the parser's or reader's ignorance of the principles of syntax. There never can be either a general uniformity or a self-consistency in our methods of parsing, or in our notions of grammar, till the true nature of an ellipsis is clearly ascertained; so that the writer shall distinguish it from a *blundering omission* that impairs the sense, and the reader or parser be barred from an *arbitrary insertion* of what would be cumbrous and useless. By adopting loose and extravagant ideas of the nature of this figure, some pretenders to learning and philosophy have been led into the most whimsical and opposite notions concerning the grammatical construction of language. Thus, with equal absurdity, *Cardell* and *Sherman*, in their *Philosophic Grammars*, attempt to confute the doctrines of their predecessors, by supposing *ellipses* at pleasure. And while the former teaches, that prepositions do not govern the objective case, but that every verb is transitive, and governs at least two objects, expressed or *understood*, its own and that of a preposition: the latter, with just as good an argument, contends that no verb is transitive, but that every objective case is governed by a preposition expressed or *understood*. A world of nonsense for lack of a *definition!*

II. PLEONASM is the introduction of superfluous words; as, "But of the tree of the knowledge of good and evil, thou shalt not eat *of it*."—*Gen.*, ii, 17. This figure is allowable only, when, in animated discourse, it abruptly introduces an emphatic word, or repeats an idea to impress it more strongly; as, "*He* that hath ears to hear, let him hear."—*Bible*. "All ye inhabitants of the world, and *dwellers on the earth*."—*Id*. "There shall not be left one stone upon another *that shall not be thrown down*."—*Id*. "I know thee *who thou art*."—*Id*. A Pleonasm, as perhaps in these instances, is sometimes impressive and elegant; but an unemphatic repetition of the same idea, is one of the worst faults of bad writing.

OBS.—Strong passion is not always satisfied with saying a thing once, and in the fewest words possible; nor is it natural that it should be. Hence repetitions indicative of intense feeling may constitute a beauty of the highest kind, when, if the feeling were wanting, or supposed to be so, they would be reckoned intolerable tautologies. The following is an example, which the reader may appreciate the better, if he remembers the context: "At her feet he bowed, he fell, he lay down; at her feet he bowed, he fell; where he bowed, there he fell down dead."—*Judges*, v, 27.

III. SYLLEPSIS is agreement formed according to the figurative sense of a word, or the mental conception of the thing spoken of, and not according to the literal or common use of the term; it is therefore in general connected with some figure of rhetoric: as "The *Word* was made flesh, and dwelt amongst us, and we beheld *his* glory."—*John*, i, 14. "Then Philip went down to the *city* of Samaria, and preached Christ unto *them*."—*Acts*, viii, 5. "The *city* of London *have* expressed *their* sentiments with freedom and firmness."—*Junius*, p. 159. "And I said [to backsliding *Israel*,] after *she* had done all these things, Turn *thou* unto me; but *she* returned not: and *her* treacherous *sister Judah* saw it."—*Jer.*, iii, 7. "And he surnamed them *Boanerges, which is*, The sons of thunder."—*Mark*, iii, 17.

"While *Evening* draws *her* crimson curtains round."—*Thomson*, p. 63.

“The *Thunder* raises *his* tremendous voice.”—*Id.*, p. 113.

### OBSERVATIONS.

OBS. 1.—To the parser, some explanation of that agreement which is controlled by tropes, is often absolutely necessary; yet, of our modern grammarians, none appear to have noticed it; and, of the oldest writers, few, if any, have given it the rank which it deserves among the figures of syntax. The term *Syllepsis* literally signifies *conception*, *comprehension*, or *taking-together*. Under this name have been arranged, by the grammarians and rhetoricians, many different forms of unusual or irregular agreement; some of which are quite too unlike to be embraced in the same class, and not a few, perhaps, too unimportant or too ordinary to deserve any classification as figures. I therefore omit some forms of expression which others have treated as examples of *Syllepsis*, and define the term with reference to such as seem more worthy to be noticed as deviations from the ordinary construction of words. Dr. Webster, allowing the word two meanings, explains it thus: “SYLLEPSIS, *n.* [Gr. *syllæpsis*.] 1. In *grammar*, a figure by which we conceive the sense of words otherwise than the words import, and construe them according to the intention of the author; otherwise called *substitution*.\* 2. The agreement of a verb or adjective, not with the word next to it, but with the most worthy in the sentence.”—*American Dict.*

OBS. 2.—In short, *Syllepsis* is a *conception* of which grammarians have *conceived* so variously, that it has become doubtful, what definition or what application of the term is now the most appropriate. Dr. Prat, in defining it, cites one notion from Sanctius, and adds an other of his own, thus: “SYLLEPSIS, id est, *Conceptio*, est quoties Generibus, aut Numeris videntur voces discrepare. Sanct. l. 4. c. 10. Vel sit Comprehensio indignioris sub digniore.”—*Prat’s Lat. Gram.*, Part ii, p. 164. John Grant ranks it as a mere form or species of *Ellipsis*, and expounds it thus: “*Syllepsis* is *when* the adjective or verb, joined to different substantives, agrees with the more worthy.”—*Institutes of Lat. Gram.*, p. 321. Dr. Littleton describes it thus: “SYLLEPSIS,—A Grammatical figure *where* two Nominative Cases singular of different persons are joined to a Verb plural.”—*Latin Dict.*, 4to. By Dr. Morell it is explained as follows: “SYLLEPSIS,—A grammatical figure, *where* one is put for many, and many for one, Lat. *Conceptio*.”—*Morell’s Ainsworth’s Dict.*, 4to, Index Vitand. IV. *Enallage* is the use of one part of speech, or of one modification, for an other. This figure borders closely upon solecism; and, for the stability of the language, it should be sparingly indulged. There are, however, several forms of it which can appeal to good authority: as,

1. “*You know* that *you are* Brutus, that *say* this.”—*Shak.*
2. “They fall *successive*[ly], and *successive*[ly] rise.”—*Pope.*
3. “Than *whom* [who] a fiend more fell is nowhere found.”—*Thomson.*
4. “Sure some disaster has *befell*” [befallen].—*Gay.*
5. “So furious was that onset’s shock,  
Destruction’s gates at once *unlock*” [unlocked].—*Hogg.*

---

\* Who besides Webster has called syllepsis “*substitution*,” I do not know. *Substitution* and *conception* are terms of quite different import, and many authors have explained syllepsis by the latter word. Dr. Webster gives to “SUBSTITUTION” two meanings, thus: “1. The act of putting one person or thing in the *place* of another to *supply* [his or] *its* place.—2. In *grammar*, syllepsis, or the use of one word for another.”—*American Dict.*, 8vo. This explanation seems to me inaccurate; because it confounds both substitution and syllepsis with *enallage*. It has signs of carelessness throughout; the former sentence being both tautological and ungrammatical.—G. B.

**OBSERVATIONS.**

OBS. 1.—*Enallage* is a Greek word, signifying *commutation*, *change*, or *exchange*. “*Enallage*, in a general sense, is the change of words, or of their accidents, one for another.”—*Grant’s Latin Gram.*, p. 322. The word *Antimeria*, which literally expresses *change of parts*, was often used by the old grammarians as synonymous with *Enallage*; though, sometimes, the former was taken only for the substitution of one *part of speech* for an other, and the latter, only, or more particularly, for a change of *modification*—as of mood for mood, tense for tense, or number for number. The putting of one *case* for an other, has also been thought worthy of a particular name, and been called *Antiptosis*. But *Enallage*, the most comprehensive of these terms, having been often of old applied to all such changes, reducing them to one head, may well be now defined as above, and still applied, in this way, to all that we need recognize as figures. The word *Enallaxis*, preferred by some, is of the same import. “ENALLAXIS, so called by *Longinus*, or ENALLAGE, is an *Exchange* of *Cases*, *Tenses*, *Persons*, *Numbers*, or *Genders*.”—*Holmes’s Rhet.*, Book i, p. 57.

“An ENALLAXIS changes, when it pleases,  
Tenses, or Persons, Genders, Numbers, Cases.”—*Ib.*, B. ii, p. 50.

OBS. 2.—Our most common form of *Enallage* is that by which a single person is addressed in the plural number. This is so fashionable in our civil intercourse, that some very polite grammarians improperly dispute its claims to be called a *figure*; and represent it as being more ordinary, and even more literal than the regular phraseology; which a few of them, as we have seen, would place among the *archaisms*. The next in frequency, (if indeed it can be called a different form,) is the practice of putting *we* for *I*, or the plural for the singular in the *first person*. This has never yet been claimed as literal and regular syntax, though the usages differ in nothing but commonness; both being honourably authorized, both still improper on some occasions, and, in both, the *Enallage* being alike obvious. Other varieties of this figure, not uncommon in English, are the putting of adjectives for adverbs, of adverbs for nouns, of the present tense for the preterit, and of the preterit for the perfect participle. But, in the use of such liberties, elegance and error sometimes approximate so nearly, there is scarcely an obvious line between them, and grammarians consequently disagree in making the distinction.

OBS. 3.—Deviations of this kind are, *in general*, to be considered solecisms; otherwise, the rules of grammar would be of no use or authority. *Despauter*, an ancient Latin grammarian, gave an improper latitude to this figure, or to a species of it, under the name of *Antiptosis*; and *Behourt* and others extended it still further. But *Sanctius* says, “*Antiptosi grammaticorum nihil imperitius, quod figmentum si esset verum, frustra quæreretur, quem casum verba regerent.*” And the *Messieurs De Port Royal* reject the figure altogether. There are, however, some changes of this kind, which the grammarian is not competent to condemn, though they do not accord with the ordinary principles of construction.

V. *Hyperbaton* is the transposition of words; as, “He wanders *earth around*.”—*Cowper* “*Rings the world* with the vain stir.”—*Id.* “*Whom* therefore ye ignorantly worship, *him declare I* unto you.”—*Acts*, xvii, 23. “‘*Happy*’, says *Montesquieu*, ‘*is that nation* whose annals are tiresome.’”—*Corwin*, *in Congress*, 1847. This figure is much employed in poetry. A judicious use of it confers harmony, variety, strength, and vivacity upon

composition. But care should be taken lest it produce ambiguity or obscurity, absurdity or solecism.

OBS.—A confused and intricate arrangement of words, received from some of the ancients the name of *Syn'chysis*, and was reckoned by them among the figures of grammar. By some authors, this has been improperly identified with *Hyper'baton*, or elegant inversion; as may be seen under the word *Synchysis* in *Littleton's Dictionary*, or in *Holmes's Rhetoric*, at page 58th. *Synchysis* literally means *confusion*, or *commixtion*; and, in grammar, is significant only of some poetical jumble of words, some verbal *kink* or *snarl*, which cannot be grammatically resolved or disentangled: as,

“*Is piety* thus *and* pure *devotion* paid?”—*Milton, P. L.*, B. xi, l. 452.

“An ass will with his long ears fray  
The flies that tickle him away;  
But man delights to have *his ears*  
*Blown maggots in* by flatterers.”—*Butler's Poems*, p. 161.

#### SECTION IV.—FIGURES OF RHETORIC.

A Figure of Rhetoric is an intentional deviation from the ordinary application of words. Several of this kind of figures are commonly called *Tropes*, i.e., *turns*; because certain words are turned from their original signification to an other.\*

Numerous departures from perfect simplicity of diction, occur in almost every kind of composition. They are mostly founded on some similitude or relation of things, which, by the power of imagination, is rendered conducive to ornament or illustration.

The principal figures of Rhetoric are sixteen; namely, *Sim'i-le*, *Met'a-phor*, *Al'-le-gor-y*, *Me-ton'y-my*, *Syn-ec'-do-che*, *Hy-per'-bo-le*, *Vis'-ion*, *A-pos'-tro-phe*, *Per-son'-i-fi-ca'-tion*, *Er-o-te'-sis*, *Ec-pho-ne'-sis*, *An-tith'-e-sis*, *Cl'i-max*, *I-ro-ny*, *A-poph'-a-sis*, and *On-o-ma-to-poe'-ia*.

#### EXPLANATIONS.

I. A *Simile* is a simple and express comparison; and is generally introduced by *like*, *as*, or *so*: as, “Such a passion is *like falling in love with a sparrow flying over your head*; you have but one glimpse of her, and she is out of sight.”—*Colliers Antoninus*. “Therefore they shall be *as the morning cloud*, and *as the early dew* that passeth away; *as the chaff* that is

\* Between Tropes and Figures, some writers attempt a full distinction; but this, if practicable, is of little use. According to Holmes, “TROPES affect only single *Words*; but FIGURES, whole *Sentences*.”—*Rhetoric*, B. i, p. 28. “The CHIEF TROPES in Language,” says this author, “are seven; a *Metaphor*, an *Allegory*, a *Metonymy*, a *Synecdoche*, an *Irony*, an *Hyperbole*, and a *Catachresis*.”—*Ib.*, p. 30. The term *Figure* or *Figures* is more comprehensive than *Trope* or *Tropes*; I have therefore not thought it expedient to make much use of the latter, in either the singular or the plural form. Holmes's seven tropes are all of them defined in the main text of this section, except *Catachresis*, which is commonly explained to be “an *abuse* of a trope.” According to this sense, it seems in general to differ but little from impropriety. At best, a Catachresis is a forced expression, though sometimes, perhaps, to be indulged where there is great excitement. It is a sort of figure by which a word is used in a sense different from, yet connected with, or analogous to, its own; as,

“And pity, like a naked new-born babe,  
Striding the blast, as heaven's cherubim  
*Hors'd* upon the sightless *couriers* of the air,  
Shall blow the horrid deed in every eye,  
That tears shall drown the wind.”—*Shak., Macbeth*, Act i, Sc. 7.

driven with the whirlwind out of the floor, and *as the smoke* out of the chimney.”—*Hosea*, xiii.

“At first, *like thunder’s distant tone*,  
The rattling din came rolling on.”—*Hogg*.

“Man, *like the generous vine*, supported lives;  
The strength he gains, is from th’ embrace he gives.”—*Pope*.

OBS.—Comparisons are sometimes made in a manner sufficiently intelligible, without any express term to point them out. In the following passage, we have a triple example of what seems the *Simile*, without the usual sign—without *like*, *as*, or *so*: “Away with all tampering with such a question! Away with all trifling with the man in fetters! *Give a hungry man a stone, and tell what beautiful houses are made of it;—give ice to a freezing man, and tell him of its good properties in hot weather;—throw a drowning man a dollar, as a mark of your good will;*—but do not mock the bondman in his misery, by giving him a Bible when he cannot read it.”—FREDERICK DOUGLASS: *Liberty Bell*, 1848.

II. A *Metaphor* is a figure that expresses or suggests the resemblance of two objects by applying either the name, or some attribute, adjunct, or action, of the one, directly to the other; as,

1. “The LORD is my *rock*, and my *fortress*.”—*Psal.*, xviii 1.
2. “His eye was *morning’s brightest ray*.”—*Hogg*.
3. “An *angler* in the *tides* of fame.”—*Id.*, *Q. W.*
4. “Beside him *sleeps* the warrior’s bow.”—*Langhorne*.
5. “Wild fancies in his moody brain *Gambol’d unbridled* and unbound.”—*Hogg*, *Q. W.*
6. “Speechless, and fix’d in all the *death* of wo.”—*Thomson*.

OBS.—A *Metaphor* is commonly understood to be only the tropical use of some *single word*, or *short phrase*; but there seem to be occasional instances of one *sentence*, or *action*, being used metaphorically to represent an other. The following extract from the London Examiner has several figurative expressions, which perhaps belong to this head: “In the present age, nearly all people are critics, even to the pen, and treat the gravest writers with a sort of *taproom* familiarity. If they are dissatisfied, *they throw a short and spent cigar in the face of the offender*; if they are pleased, *they lift the candidate off his legs, and send him away with a hearty slap on the shoulder*. Some of the shorter, when they are bent to mischief, *dip a twig in the gutter, and drag it across our polished boots*: on the contrary, when they are inclined to be gentle and generous, *they leap boisterously upon our knees, and kiss us* with bread-and-butter in their mouths.”—WALTER SAVAGE LANDOR.

III. An *Allegory* is a continued narration of fictitious events, designed to represent and illustrate important realities. Thus the Psalmist represents the *Jewish nation* under the symbol of a *vine*: “Thou hast brought a vine out of Egypt: thou hast cast out the heathen, and planted it. Thou preparedst room before it, and didst cause it to take deep root; and it filled the land. The hills were covered with the shadow of it, and the boughs thereof were like the goodly cedars.”—*Psalms*, lxxx, 8-10.

OBS.—The *Allegory*, agreeably to the foregoing definition of it, includes most of those similitudes which in the Scriptures are called *parables*; it includes also the better sort of *fables*. The term *allegory* is sometimes applied to a *true history* in which something else is intended, than is contained in the words literally taken. See an instance in *Galatians*, iv, 24. In the *Scriptures*, the term *fable* denotes an idle and groundless story: as, in 1 *Timothy*, iv, 7; and 2 *Peter*, i, 16. It is now commonly used in a better sense. “A *fable* may be defined to be an analogical narrative, intended to convey some moral lesson, in which irrational animals or objects are introduced as speaking.”—*Philological Museum*, Vol. i, p. 280.

IV. A *Metonymy* is a change of names between things related. It is founded, not on resemblance, but on some such relation as that of *cause* and *effect*, of *progenitor* and *posterity*, of *subject* and *adjunct*, of *place* and *inhabitant*, of *container* and *thing contained*, or of *sign* and *thing signified*: as, (1.) “God is our *salvation*,” i.e., *Saviour*. (2.) “Hear, O *Israel*,” i.e. O *ye descendants of Israel*. (3.) “He was the *sigh* of her secret soul,” i.e., the *youth* she loved. (4.) “They smote the *city*,” i.e., the *citizens*. (5.) “My son, give me thy *heart*,” i.e., *affection*. (6.) “The *sceptre* shall not depart from Judah,” i.e., *kingly power*. (7.) “They have *Moses and the prophets*,” i.e., *their writings*. See *Luke*, xvi, 29.

V. *Synecdoche*, (that is, *Comprehension*,) is the naming of a part for the whole, or of the whole for a part; as, (1.) “This *roof* [i.e., house] protects you.” (2.) “Now the *year* [i.e., summer] is beautiful.” (3.) “A *sail* [i.e., a ship or vessel] passed at a distance.” (4.) “Give us this day our daily *bread*,” i.e., food. (5.) “Because they have taken away *my Lord*, [i.e., the body of Jesus,] and I know not where they have laid him.”—*John*. (6.) “The same day there were added unto them about three thousand *souls*,” i.e., persons.—*Acts*. (7.) “There went out a decree from Cæsar Augustus, that all *the world* [i.e., the Roman empire] should be taxed.”—*Luke*, ii, 1.

VI. *Hyperbole* is extravagant exaggeration, in which the imagination is indulged beyond the sobriety of truth; as, “My little finger *shall be thicker* than my father’s loins.”—2 *Chron.*, x, 10. “When I washed my *steps with butter*, and the rock poured me out *rivers of oil*.”—*Job*, xxix, 6.

“The sky *shrunk upward with unusual dread*,  
And trembling Tiber *div’d beneath his bed*.”—*Dryden*.

VII. *Vision*, or *Imagery*, is a figure by which the speaker represents the objects of his imagination, as actually before his eyes, and present to his senses; as,

“I see the dagger-crest of Mar!  
I see the Moray’s silver star  
Wave o’er the cloud of Saxon war,  
That up the lake comes winding far!”—*Scott, L. L.*, vi, 15.

VIII. *Apostrophe* is a turning from the regular course of the subject, into an animated address; as, “Death is swallowed up in victory. O Death! where is thy sting? O Grave! where is thy victory?”—1 *Cor.*, xv, 55.

IX. *Personification* is a figure by which, in imagination, we ascribe intelligence and personality to unintelligent beings or abstract qualities; as,

1. "The *Worm*, aware of his intent,  
Harangued him thus, right eloquent."—*Cowper*.
2. "Lo, steel-clad *War* his gorgeous standard rears!"—*Rogers*.
3. "Hark! *Truth* proclaims, thy triumphs cease!"—*Idem*.

X. *Erotesis* is a figure in which the speaker adopts the form of interrogation, not to express a doubt, but, in general, confidently to assert the reverse of what is asked; as, "Hast thou an arm like God? or canst thou thunder with a voice like him?"—*Job*, xl, 9. "He that planted the ear, shall he not hear? he that formed the eye, shall he not see?"—*Psalms*, xciv, 9.

XI. *Ecphonesis* is a pathetic exclamation, denoting some violent emotion of the mind; as, "O liberty!—O sound once delightful to every Roman ear!—O sacred privilege of Roman citizenship!—once sacred—now trampled upon."—*Cicero*. "And I said, O that I had wings like a dove! for then would I fly away, and be at rest."—*Psalms*, lv, 6.

XII. *Antithesis* is a placing of things in opposition, to heighten their effect by contrast; as, "I will talk of things *heavenly*, or things *earthly*; things *moral*, or things *evangelical*; things *sacred*, or things *profane*; things *past*, or things *to come*; things *foreign*, or things *at home*; things more *essential*, or things *circumstantial*; provided that all be done to our profit."—*Bunyan*, P. P., p. 90.

"Contrasted faults through all his manners reign;  
Though *poor*, *luxurious*; though *submissive*, *vain*;  
Though *grave*, yet *trifling*; *zealous*, yet *untrue*;  
And e'en *in penance*, *planning sins* anew."—*Goldsmith*.

XIII. *Climax* is a figure in which the sense is made to advance by successive steps, to rise gradually to what is more and more important and interesting, or to descend to what is more and more minute and particular; as, "And besides this, giving all diligence, add to your faith, virtue; and to virtue, knowledge; and to knowledge, temperance; and to temperance, patience; and to patience, godliness; and to godliness, brotherly kindness; and to brotherly kindness, charity."—2 *Peter*, i, 5.

XIV. *Irony* is a figure in which the speaker sneeringly utters the direct reverse of what he intends shall be understood; as, "We have, to be sure, great reason to believe the modest man would not ask him for a debt, when he pursues his life."—*Cicero*. "No doubt but ye are the people, and wisdom shall die with you."—*Job*, xii, 2. "They must esteem learning *very much*, when they see its professors used with such little ceremony!"—*Goldsmith's Essays*, p. 150.

XV. *Apophasis*, or *Paralipsis*,\* is a figure in which the speaker or writer pretends to omit what at the same time he really mentions; as, "I Paul have written it with mine own

---

\* Holmes, in his *Art of Rhetoric*, writes this word "*Paraleipsis*" retaining the Greek orthography. So does Fowler in his recent "English Grammar," §646. Webster, Adam, and some others, write it "*Paralepsis*." I write it as above on the authority of Littleton, Ainsworth, and some others; and this is according to the analogy of the kindred word *ellipsis*, which we never write either *ellepsis*, or, as the Greek, *elleipsis*.

hand, I will repay it; albeit *I do not say to thee*, how thou owest unto me even thine own self besides.”—*Philemon*, 19.

XVI. *Onomatopoeia* is the use of a word, phrase, or sentence, the sound of which resembles, or intentionally imitates, the sound of the thing signified or spoken of: as, “Of a knocking at the door, *Rat a tat tat*.”—J. W. GIBBS: *in Fowler’s Gram.*, p. 334. “Ding-dong! ding-dong! Merry, merry, go the bells, *Ding-dong! ding-dong!*”—*H. K. White*. “Bow’wow *n*. The loud bark of a dog. *Booth*.”—*Worcester’s Dict*. This is often written separately; as, “*Bow wow*.”—*Fowler’s Gram.*, p. 334. The imitation is better with three sounds: “*Bow wow wow*.” The following verses have been said to exhibit this figure:

“But when loud surges lash the sounding shore,  
The hoarse rough verse should like the torrent roar.”—*Pope, on Crit.*, l. 369.

OBS.—The whole number of figures, which I have thought it needful to define and illustrate in this work, is only about thirty. These are the *chief* of what have sometimes been made a very long and minute catalogue. In the hands of some authors, Rhetoric is scarcely anything else than a detail of figures; the number of which, being made to include almost every possible form of expression, is, according to these authors, not less than two hundred and forty. Of their *names*, John Holmes gives, in his index, two hundred and fifty-three; and he has not all that might be quoted, though he has more than there are of the forms named, or the figures themselves. To find a learned name for every particular mode of expression, is not necessarily conducive to the right use of language. It is easy to see the inutility of such pedantry; and Butler has made it sufficiently ridiculous by this caricature:

“For all a rhetorician’s rules  
Teach nothing but to name his tools.”—*Hudibras*, P. i, C. i, l. 90.

### PRAXIS XIV.—PROSODICAL.

*In the Fourteenth Praxis, are exemplified the several Figures of Orthography, of Etymology, of Syntax, and of Rhetoric, which the parser may name and define; and by it the pupil may also be exercised in relation to the principles of Punctuation, Utterance, Analysis, or whatever else of Grammar, the examples contain.*

### MIMESIS AND ARCHAISM.

“I *ax’d* you what you had to sell. I am fitting out a *wessel* for *Wenice*, loading her with *various keinds* of *provisions*, and *wittualling* her for a long *woyage*; and I want several *undred* weight of *weal*, *wenison*, &c., with plenty of *inyons* and *winegar*, for the *preservation* of *ealth*.”—*Columbian Orator*, p. 292.

“God bless you, and lie still quiet (*says* I) a bit longer, for my *shister’s* afraid of ghosts, and would die on the spot with the fright, *was* she to see you come to life all on a sudden this way without the least preparation.”—*Edgeworth’s Castle Rackrent*, p. 143.

“None [else are] so desperately *evill*, as they that may *bee* good and will not: or have *beene* good and are not.”—*Rev. John Rogers*, 1620. “A Carpenter finds his work as *hee* left it, but a Minister shall find his *sett* back. You need preach continually.”—*Id.*

“Here *whilom ligg’d* th’ Esopus of his age,  
But call’d by Fame, in soul *ypricked* deep.”—*Thomson*.

“It was a fountain of Nepenthe rare,  
Whence, as Dan Homer sings, huge *pleasaunce* grew.”—*Id.*

## LESSON II.—FIGURES OF ETYMOLOGY.

APHÆRESIS, PROSTHESIS, SYNCOPE, APOCOPE, PARAGOGE, DIÆRESIS, SYNÆRESIS, AND TMESIS.

“Bend ‘*gainst* the steepy hill thy breast,  
Burst down like torrent from its crest.”—*Scott*.

“‘*Tis* mine to teach *th’* inactive hand to reap  
Kind nature’s bounties, *o’er* the globe *diffus’d*.”—*Dyer*.

“Alas! alas! how impotently true  
*Th’ aërial* pencil forms the scene anew.”—*Cawthorne*.

“Here a deformed monster *joy’d* to won,  
Which on fell rancour ever was *ybent*.”—*Lloyd*.

“*Withouten* trump was proclamation made.”—*Thomson*.

“The gentle knight, who saw their rueful case,  
Let fall *adown* his silver beard some tears.  
‘Certes,’ quoth he, ‘it is not *e’en* in grace,  
*T’* undo the past and eke your broken years.”—*Id.*

“Vain *tamp’ring* has but *foster’d* his disease;  
‘*Tis desprate*, and he sleeps the sleep of death.”—*Cowper*.

“I have a pain upon my forehead here’—  
‘Why *that’s* with watching; ‘*twill* away again.”—*Shakspeare*.

“I’ll to the woods, among the happier brutes;  
Come, *let’s* away; hark! the shrill horn resounds.”—*Smith*.

“*What* prayer and supplication *soever* be made.”—*Bible*. “By the grace of God, we have had our conversation in the world, and more abundantly *to* you *ward*.”—*Ib.*

“The cottage curs at [—] early pilgrim bark.”—*Id.*

“‘Tis granted, and no plainer truth appears,  
Our most important [—] are our earliest years.”—*Cowper*.

“To earn her aid, with fix’d and anxious eye,  
He looks on nature’s [—] and on fortune’s course.”—*Akenside*.

"For longer in that paradise to dwell,  
The law [—] I gave to nature him forbids."—*Milton*.

"So little mercy shows [—] who needs so much."—*Cowper*.

"Bliss is the same [—] in subject, as [—] in king;  
In [—] who obtain defence, and [—] who defend."—*Pope*.

"Man made for kings! those optics are but dim  
That tell you so—say rather, they [—] for him."—*Cowper*.

"Man may dismiss compassion from his heart,  
But God will never [—]."—*Id.*

"Vigour [—] from toil, from trouble patience grows."—*Beattie*.

"Where now the rill melodious, [—] pure, and cool,  
And meads, with life, and mirth, and beauty crown'd?"—*Id.*

"How dead the vegetable kingdom lies!  
How dumb the tuneful [—]!"—*Thomson*.

"Self-love and Reason to one end aspire,  
Pain [—] their aversion, pleasure [—] their desire;  
But greedy that its object would devour,  
This [—] taste the honey, and not wound the flower."—*Pope*.

"*According* to their deeds, *accordingly* he will *repay*, fury to his adversaries, *recompense* to his enemies; to the islands he will repay recompense."—*Isaiah*, lix, 18. "Open to me, my sister, my love, my dove, my undefiled: for my head is filled with dew, *and my locks with the drops of the night*."—*Song of Sol.*, v, 2. "Thou hast chastised me, *and I was chastised*, as a bullock unaccustomed to the yoke: turn thou me, *and I shall be turned*; for thou art the Lord my God."—*Jer.*, xxxi, 18. "Consider the *lilies* of the field how *they grow*."—*Matt.*, vi, 28. "*He* that glorieth, let *him* glory in the Lord."—2 *Cor.*, x, 17.

"*He* too is witness, noblest of the train  
That wait on man, the flight-performing horse."—*Cowper*.

##### FIGURE III.—SYLLEPSIS.

"Thou art Simon the son of Jona: thou shalt be called *Cephas*:' *which* is, by interpretation a stone."—*John*, i, 42. "Thus saith the Lord of hosts, 'Behold, I will break the bow of *Elam*, the chief of *their* might.'"—*Jer.*, xlix, 35. "Behold, I lay in Sion a *stumbling-stone* and *rock* of offence: and whosoever believeth on *him* shall not be ashamed."—*Rom.*, ix, 33.

"Thus *Conscience* pleads *her* cause within the breast,  
Though long rebell'd against, not yet suppressed."—*Cowper*.

"*Knowledge* is proud that *he* has learn'd so much;  
*Wisdom* is humble that *he* knows no more."—*Id.*

"For those the *race* of Israel oft forsook  
*Their* living *strength*, and unfrequented left

 Making the green one red!”—*Shakspeare*.

## FIGURE VII.—VISION.

“How mighty is their defence who reverently trust in the arm of God! How powerfully do they contend who fight with lawful weapons! Hark! ‘Tis the voice of eloquence, pouring forth the living energies of the soul; pleading, with generous indignation and holy emotion, the cause of injured humanity against lawless might, and reading the awful destiny that awaits the oppressor!—I see the stern countenance of despotism overawed! I see the eye fallen, that kindled the elements of war! I see the brow relaxed, that scowled defiance at hostile thousands! I see the knees tremble, that trod with firmness the embattled field! Fear has entered that heart which ambition had betrayed into violence! The tyrant feels himself a man, and subject to the weakness of humanity!—Behold! and tell me, is that power contemptible which can thus find access to the sternest hearts?”—*Author*.

**CHAPTER IV.—VERSIFICATION.**

Versification is the forming of that species of literary composition which is called *verse*; that is, *poetry*, or *poetic numbers*.

## SECTION I.—OF VERSE.

Verse, in opposition to prose, is language arranged into metrical lines of some determinate length and rhythm—language so ordered as to produce harmony, by a due succession of poetic feet, or of syllables differing in quantity or stress.

## DEFINITIONS AND PRINCIPLES.

The *rhythm* of verse is its relation of quantities; the modulation of its numbers; or, the kind of metre, measure, or movement, of which it consists, or by which it is particularly distinguished.

The *quantity* of a syllable, as commonly explained, is the relative portion of time occupied in uttering it. In poetry, every syllable is considered to be either long or short. A long syllable is usually reckoned to be equal to two short ones.

In the construction of English verse, long quantity coincides always with the primary accent, generally also with the secondary, as well as with emphasis; and short quantity, as reckoned by the poets, is found only in unaccented syllables, and unemphatical monosyllabic words.\*

The quantity of a syllable, whether long or short, does not depend on what is called the long or the short sound of a vowel or diphthong, or on a supposed distinction of accent as affecting vowels in some cases and consonants in others, but principally on the degree of energy or loudness with which the syllable is uttered, whereby a greater or less portion of time is employed.

The open vowel sounds, which are commonly but not very accurately termed *long*, are those which are the most easily protracted, yet they often occur in the shortest and feeblest syllables; while, on the other hand, no vowel sound, that occurs under the usual stress of accent or of emphasis, is either so short in its own nature, or is so “quickly joined to the succeeding letter,” that the syllable is not one of long quantity.

Most monosyllables, in English, are variable in quantity, and may be made either long or short, as strong or weak sounds suit the sense and rhythm; but words of greater length are, for the most part, fixed, their accented syllables being always long, and a syllable immediately before or after the accent almost always short.

One of the most obvious distinctions in poetry, is that of rhyme and blank verse. *Rhyme* is a similarity of sound, combined with a difference: occurring usually between the last syllables of different lines, but sometimes at other intervals; and so ordered that the rhyming syllables begin differently and end alike. *Blank verse* is verse without rhyme.

The principal rhyming syllables are almost always long. Double rhyme adds one short syllable; triple rhyme, two. Such syllables are redundant in iambic and anapestic verses; in lines of any other sort, they are generally, if not always, included in the measure.

---

\* To this principle there seems to be now and then an exception, as when a weak dissyllable begins a foot in an anapestic line, as in the following examples:—

“I think—let me see—yes, it is, I declare,  
As long *ago now* as that Buckingham there.”—*Leigh Hunt*.  
“And Thomson, though best in his indolent fits,  
Either slept himself weary, or blasted his wits.”—*Id*.

Here, if we reckon the feet in question to be anapests, we have dissyllables with both parts short. But some, accenting “ago” on the latter syllable, and “Either” on the former, will call “ago now” a bacchy, and “Either slept” an amphimac: because *they make them such* by their manner of reading.—G. B.

A *Stanza* is a combination of several verses, or lines, which, taken together, make a regular division of a poem. It is the common practice of good versifiers, to form all stanzas of the same poem after one model. The possible variety of stanzas is infinite; and the actual variety met with in print is far too great for detail.

### OBSERVATIONS.

OBS. 1.—Verse, in the broadest acceptation of the term, is poetry, or metrical language, in general. This, to the eye, is usually distinguished from prose by the manner in which it is written and printed. For, in very many instances, if this were not the case, the reader would be puzzled to discern the difference. The division of poetry into its peculiar lines, is therefore not a mere accident. The word *verse*, from the Latin *versus*, literally signifies a *turning*. Each full line of metre is accordingly called a verse; because, when its measure is complete, the writer *turns* to place another under it. A *verse*, then, in the primary sense of the word with us, is, “A *line* consisting of a certain succession of sounds, and number of syllables.”—*Johnson, Walker, Todd, Bottes*, and others. Or, according to *Webster*, it is, “A poetic *line*, consisting of a certain number of long and short syllables, disposed according to the rules of the species of poetry which the author intends to compose.”—See *American Dict.*, 8vo.

OBS. 2.—If to settle the theory of English verse on true and consistent principles, is as difficult a matter, as the manifold contrarieties of doctrine among our prosodists would indicate, there can be no great hope of any scheme entirely satisfactory to the intelligent examiner. The very elements of the subject are much perplexed by the incompatible dogmas of authors deemed skillful to elucidate it. It will scarcely be thought a hard matter to distinguish true verse from prose, yet is it not well agreed, wherein the difference consists: what the generality regard as the most essential elements or characteristics of the former, some respectable authors dismiss entirely from their definitions of both verse and versification. The existence of quantity in our language; the dependence of our rhythms on the division of syllables into long and short; the concurrence of our accent, (except in some rare and questionable instances,) with long quantity only; the constant effect of emphasis to lengthen quantity; the limitation of quantity to mere duration of sound; the doctrine that quantity pertains to all *syllables* as such, and not merely to vowel sounds; the recognition of the same general principles of syllabication in poetry as in prose; the supposition that accent pertains not to certain *letters* in particular, but to certain *syllables* as such; the limitation of accent to stress, or percussion, only; the conversion of short syllables into long, and long into short, by a change of accent; our frequent formation of long syllables with what are called short vowels; our more frequent formation of short syllables with what are called long or open vowels; the necessity of some order in the succession of feet or syllables to form a rhythm; the need of framing each line to correspond with some other line or lines in length; the propriety of always making each line susceptible of scansion by itself: all these points, so essential to a true explanation of the nature of English verse, though, for the most part, well maintained by some prosodists, are nevertheless denied by some, so that opposite opinions may be cited concerning them all. I would not suggest that all or any of these points are thereby made *doubtful*; for there may be opposite judgements in a dozen cases, and yet concurrence enough (if concurrence *can* do it) to establish them every one.

OBS. 3.—An ingenious poet and prosodist now living,\* Edgar Allan Poe, (to whom I owe a word or two of reply,) in his “Notes upon English Verse,” with great self-complacency, represents, that, “While much has been written upon the structure of the Greek and Latin rhythms, comparatively *nothing* has been done as regards the English;” that, “It may be said, indeed, we are *without a treatise* upon our own versification;” that “The very best *definition* of versification† to be found in any of “*our ordinary treatises* on the topic,” has “*not a single point* which does not involve an error;” that, “A *leading deft* in each of these treatises is the confining of the subject to mere *versification*, while metre, or rhythm, in general, is the real question at issue;” that, “Versification is *not* the art, but the *act*—of making verses;” that, “A correspondence in the *length* of lines is by no means essential;” that “*Harmony*” produced “by the regular alternation of syllables differing in quantity,” does not include “*melody*;” that “A *regular alternation*, as described, forms *no part* of the principle of metre;” that “There is no necessity of *any regularity* in the succession of *feet*,” that, “By consequence,” he ventures to “dispute the *essentiality* of any alternation, regular or irregular, of *syllables* long and short;” that, “For *anything more intelligible* or *more satisfactory* than this definition [i. e., *G. Brown*’s former definition of versification,] we shall look in vain in *any published* treatise upon the subject;” that, “So general and *so total a failure* can be referred only to some *radical misconception*,” that, “The word *verse* is derived (through *versus* from the Latin *verto*, *I turn*,) and \* \* \* \* it can be nothing but *this derivation*, which has led to *the error* of our writers upon prosody;” that, “*It is this* which *has seduced them* into regarding the *line* itself—the *versus*, or turning—as an essential, or principle of metre;” that, “Hence the term *versification* has been employed as sufficiently general, or inclusive, for treatises upon rhythm in general;” that, “Hence, also, [comes] the precise catalogue of a few varieties of English *lines*, when these varieties are, in fact, almost without limit;” that, “*I*,” the aforesaid Edgar Allan Poe, “*shall dismiss entirely*, from the consideration of the principle of *rhythm*, the idea of *versification*, or the construction of verse;” that, “In so doing, *we* shall avoid *a world of confusion*;” that, “*Verse* is, indeed, an *afterthought*, or an *embellishment*, or an *improvement*, rather than an element of rhythm;” that, “*This fact* has induced the easy admission, into the realms of Poesy, of *such works* as the ‘Télémaque’ of Fenelon;” because, forsooth, “In the elaborate modulation of their sentences, THEY FULFIL THE IDEA OF METRE.”—*The Pioneer, a Literary and Critical Magazine* (Boston, March, 1843,) Vol. I, p. 102 to 105.

OBS. 4.—“Holding these things in view,” continues this sharp connoisseur, “the prosodist who rightly examines that which constitutes the external, or most immediately *recognisable*, form of Poetry, will commence with the definition of *Rhythm*. Now *rhythm*, from the Greek *ῥιθμος*, *number*, is a term which, in its present application, very nearly *conveys its own idea*. No more *proper* word could be employed to present *the conception intended*; for *rhythm*, in prosody, is, in its *last analysis*, identical with *time* in music. *For this reason*,” says he, “I have used, throughout this article, as synonymous with *rhythm*, the word *metre* from *μετρον*, *measure*. Either the one or the other may be defined as *the arrangement of words into two or more consecutive, equal, pulsations of time*. These pulsations are *feet*. Two feet, at least, are requisite to constitute a *rhythm*; just as, in

\* “Edgar A. Poe, the author, died at Baltimore on Sunday” [the 7th].—*Daily Evening Traveller*, Boston Oct. 9, 1849. This was eight or ten months after the writing of these observations.—G. B.

† “Versification is the art of arranging words into lines of correspondent length, so as to produce harmony by the regular alternation of syllables differing in quantity”—*Brown’s Institutes of E. Gram.*, p. 235.

mathematics, two units are necessary to form [a] *number*.\* The syllables of which the foot consists, when the foot is not a syllable in itself, are subdivisions of the pulsations. No equality is demanded in these subdivisions. It is only required that, so far as regards two consecutive feet at least, the sum of the times of the syllables in one, shall be equal to the sum of the times of the syllables in the other. Beyond two pulsations there is no necessity for equality of time. All beyond is arbitrary or conventional. A third or fourth pulsation may embody half, or double, or any proportion of the time occupied in the two first. Rhythm being thus understood, the prosodist should proceed to define *versification* as *the making of verses*, and *verse* as *the arbitrary or conventional isolation of rhythm into masses of greater or less extent*.”—*Ib.*, p. 105.

OBS. 5.—No marvel that all usual conceptions and definitions of rhythm, of versification, and of verse, should be found dissatisfactory to the critic whose idea of *metre* is fulfilled by the pompous *prose* of Fenelon’s *Télémaque*. No right or real examination of this matter can ever make the most immediately *recognizable* form of poetry to be any thing else than the form of *verse*—the form of writing in *specific lines*, ordered by number and chime of syllables, and not squared by gage of the composing-stick. And as to the derivation and primitive signification of *rhythm*, it is plain that in the extract above, both are misrepresented. The etymology there given is a gross error; for, “the Greek *ἀριθμος*, *number*,” would make, in English, not *rhythm*, but *arithm*, as in *arithmetic*. Between the two combinations, there is the palpable difference of three or four letters in either six; for neither of these forms can be varied to the other, but by dropping one letter, and adding an other, and changing a third, and moving a fourth. *Rhythm* is derived, not thence, but from the Greek *ῥυθμος*; which, according to the lexicons, is a primitive word, and means, *rhythmus*, *rhythm*, *concinnity*, *modulation*, *measured tune*, or *regular flow*, and *not* “*number*.”

OBS. 6.—*Rhythm*, of course, like every other word not misapplied, “conveys *its own idea*,” and that, not qualifiedly, or “*very nearly*,” but *exactly*. That this idea, however, was originally that of arithmetical *number*, or is nearly so now, is about as fanciful a notion, as the happy suggestion added above, that *rhythm* in lieu of *arithm* or *number*, is the fittest of words, *because* “rhythm in prosody is *time* in music!” Without dispute, it is important to

---

\* This appears to be an error; for, according to Dilworth, and other arithmeticians, “*a unit is a number*,” and so is it expounded by Johnson, Walker, Webster, and Worcester. See, in the *Introduction*, a note at the foot of p. 117. Mulligan, however, contends still, that *one is no number*; and that, “to talk of the *singular number* is absurd—a contradiction in terms;”—because, “in common discourse,” a “*number*” is “always a *plurality*, except”—when it is “*number one*!”—See *Grammatical Structure of the E. Language*, §33. Some prosodists have taught the absurdity, that two feet are necessary to constitute *a metre*, and have accordingly applied the terms, *monometer*, *dimeter*, *trimeter*, *tetrameter*, *pentameter*, and *hexameter*,—or so many of them as they *could so misapply*,—in a sense very different from the usual acceptation. The proper principle is, that, “One foot constitutes a metre.”—*Dr. P. Wilson’s Greek Prosody*, p. 53. And verses are to be denominated *Monometer*, *Dimeter*, *Trimeter*, &c., according to “THE NUMBER OF FEET.”—See *ib.* p. 6. But *Worcester’s Universal and Critical Dictionary* has the following not very consistent explanations: “MONOMETER, *n.* One metre. *Beck.* DIMETER, *n.* A poetic measure of *four feet*; a *series of two* meters. *Beck.* TRIMETER, *a.* Consisting of three poetical *measures*, forming an *iambic* of *six feet*. *Tyrwhitt.* TETRAMETER, *n.* A Latin or Greek verse consisting of *four feet*; a series of four metres. TETRAMETER, *a.* Having *four* metrical *feet*. *Tyrwhitt.* PENTAMETER, *n.* A Greek or Latin verse of *five feet*; a series of five metres. PENTAMETER, *a.* Having *five* metrical *feet*. *Warton.* HEXAMETER, *n.* A verse or line of poetry, having *six feet*, either dactyls or spondees; the heroic, and most important, verse among the Greeks and Romans;—a rhythmical series of six metres. HEXAMETER, *a.* Having *six* metrical *feet*. *Dr. Warton.*” According to these definitions, Dimeter has as many feet as Tetrameter; and Trimeter has as many as Hexameter!

the prosodist, and also to the poet or versifier, to have as accurate an idea as possible of the import of this common term, though it is observable that many of our grammarians make little or no use of it. That it has some relation to *numbers*, is undeniable. But what is it? Poetic numbers, and numbers in arithmetic, and numbers in grammar, are three totally different sorts of things. *Rhythm* is related only to the first. Of the signification of this word, a recent expositor gives the following brief explanation: "RHYTHM, *n.* Metre; verse; *numbers*. Proportion applied to any motion whatever."—*Bolles's Dictionary*, 8vo. To this definition, Worcester prefixes the following: "The consonance of measure and time in poetry, *prose composition*, and music;—also in dancing."—*Universal and Critical Dict.* In verse, the proportion which forms rhythm—that is, the chime of quantities—is applied to the *sounds* of syllables. Sounds, however, may be considered as a species of *motion*, especially those which are rhythmical or musical.\* It seems more strictly correct, to regard rhythm as a *property* of poetic numbers, than to identify it with them. It is their proportion or modulation, rather than the numbers themselves. According to Dr. Webster, "RHYTHM, or RHYTHMUS, in *music* [is] variety in the movement as to quickness or slowness, or length and shortness of the notes; or *rather* the proportion which the parts of the motion have to each other."—*American Dict.* The "*last analysis*" of rhythm can be nothing else than the reduction of it to its *least parts*. And if, in this reduction, it is "identical with *time*," then it is here the same thing as *quantity*, whether prosodical or musical; for, "The *time* of a note, or syllable, is called *quantity*. The time of a *rest* is also called quantity; because *rests*, as well as notes are a constituent of rhythm."—*Comstock's Elocution*, p. 64. But rhythm is, in fact, neither time nor quantity; for the analysis which would make it such, destroys the relation in which the thing consists.

## SECTION II.—OF ACCENT AND QUANTITY.

Accent and Quantity have already been briefly explained in the second chapter of Prosody, as items coming under the head of Pronunciation. What we have to say of them here, will be thrown into the form of *critical observations*; in the progress of which, many quotations from other writers on these subjects, will be presented, showing what has been most popularly taught.

---

\* It is common, at any rate, for prosodists to speak of "the *movement* of the voice," as do Sheridan, Murray, Humphrey, and Everett; but Kames, in treating of the Beauty of Language from Resemblance, says "There is *no resemblance* of sound to motion, nor of sound to sentiment."—*Elements of Criticism*, Vol. ii, p. 63. This usage, however, is admitted by the critic, had cited to show how, "causes that have no resemblance may produce resembling effects."—*Ib.* 64. "By a number of syllables in succession, an emotion is sometimes raised extremely similar to that raised by successive motion: which may be evident even to those who are defective in taste, from the following fact, that the term *movement* in all languages is equally applied to both."—*Ib.* ii. 66.

**OBSERVATIONS.**

OBS. 1.—Accent and quantity are distinct things;\* the former being the stress, force, loudness, or percussion of voice, that distinguishes certain syllables from others; and the latter, the *time*, distinguished as *long* or *short*, in which a syllable is uttered. But, as the *great* sounds which we utter, naturally take more time than the *small* ones, there is a necessary connexion between quantity and accent in English,—a connexion which is sometimes expounded as being the mere relation of *cause and effect*; nor is it in fact much different from that. “As no utterance can be agreeable to the ear, which is void of proportion; and as *all quantity*, or proportion of time in utterance, depends upon a due observation of the *accent*; it is a matter of absolute necessity to all, who would arrive at a good and graceful delivery, to be master of that point. Nor is the use of *accent* in our language confined to *quantity* alone; but it is also the chief mark by which words are distinguished from mere syllables. Or rather I may say, it is the *very essence* of words, which without that, would be only so many collections of syllables.”—*Sheridan’s Lectures on Elocution*, p. 61. “As no utterance *which is void of proportion*, can be agreeable to the ear; and as quantity, or proportion of time in utterance, *greatly* depends *on* a due *attention* to the *accent*; it is *absolutely necessary for every person*, who would attain a *just* and *pleasing* delivery, to be master of that point.”—*Murray’s Gram.*, 8vo, p. 241; 12mo, 194.

OBS. 2.—In the first observation on Prosody, at page 770, and in its marginal notes, was reference made to the fact, that the nature and principles of *accent* and *quantity* are involved in difficulty, by reason of the different views of authors concerning them. To this source of embarrassment, it seems necessary here again to advert; because it is upon the distinction of syllables in respect to quantity, or accent, or both, that every system of versification, except his who merely counts, is based. And further, it is not only requisite that the principle of distinction which we adopt should be clearly made known, but also proper to consider which of these three modes is the best or most popular foundation for a theory of versification. Whether or wherein the accent and quantity of the ancient languages, Latin and Greek, differed from those of our present English, we need not now inquire. From the definitions which the learned lexicographers Littleton and Ainsworth give to *prosodia*, prosody, it would seem that, with them, “the art of *accenting*” was nothing else than the art of giving to syllables their right *quantity*, “whether long or short.” And some have charged it as a glaring error, long prevalent among English grammarians, and still a fruitful source of disputes, to confound accent with quantity in our language.†

---

\* “From what has been said of accent and quantity in our own language, we may conclude them to be essentially distinct *and perfectly separable*: nor is it to be doubted that they were *equally separable* in the learned languages.”—*Walkers’s Observations on Gr. and Lat. Accent and Quantity*, §20; Key, p. 326. In the speculative essay here cited, Walker meant by *accent* the rising or the falling *inflection*,—an upward or a downward *slide* of the voice; and by *quantity*, nothing but the open or close sound of some vowel; as of “the *a* in *scatter*” and in “*skater*,” the initial syllables of which words be supposed to differ in quantity as much as any two syllables can!—*Ib.*, §24; Key, p. 331. With these views *of the things*, it is perhaps the less to be wondered at, that Walker, who appears to have been a candid and courteous writer, charges “that excellent scholar Mr. Forster—with a *total ignorance* of the accent and quantity of his own language,” (*Ib.*, Note on §8; Key, p. 317;) and, in regard to accent, ancient or modern, elsewhere confesses his own ignorance, and that of every body else, to be *as total*.” See marginal note on Obs. 4th below.

† (1.) “We shall now take a view of sounds when united into *syllables*. Here a beautiful variation of *quantity* presents itself as the next object of our attention. The knowledge of *long* and *short* syllables, is the most excellent and most neglected quality in the whole art of pronunciation.

The disputes of our modern writers on this subject, have arisen chiefly from an absurd notion that has long prevailed; viz. that there is no difference between the *accent* and the *quantity*, in the English language; that the accented syllables are always *long*, and the unaccented always *short*.

This charge, however, there is reason to believe, is sometimes, if not in most cases, made on grounds rather fanciful than real; for some have evidently mistaken the notion of concurrence or coincidence for that of identity. But, to affirm that the stress which we call accent, coincides always and only with long quantity, does not necessarily make accent and quantity to be one and the same thing. The greater force or loudness which causes the accented syllable to occupy more time than any other, is in itself something different from time. Besides, quantity is divisible,—being either *long* or *short*: these two species of it are acknowledged on all sides, and some few prosodists will have a third, which they call “common.”\* But, of our English accent, the word being taken in its usual acceptation, no *such* division is ever, with any propriety, made; for even the stress which we call *secondary accent*, pertains to *long* syllables rather than to short ones; and the mere absence of stress, which produces short quantity, we do not call *accent*.†

An absurdity so glaring, does not need refutation. Pronounce any one line from Milton, and the ear will determine whether or not the accent and quantity always coincide. Very seldom they do.”—HERRIES: *Bicknell's Gram.*, Part ii, p. 108.

(2.) “Some of our Moderns (especially Mr. *Bishe*, in his *Art of Poetry*) and lately Mr. *Mattaire*, in what he calls, *The English Grammar*, erroneously use *Accent* for *Quantity*, one signifying the Length or Shortness of a Syllable, the other the raising or falling of the Voice in *Discourse*.”—*Brightland's Gram.*, London, 1746, p. 156.

(3.) “Tempus cum accentu a nonnullis malè confunditur; quasi idem sit acui et produci. Cum brevis autem syllaba acuitur, elevatur quidem vox in eâ proferendâ, sed tempus non augetur. Sic in voce *hominibus* acuitur *mi*; at *ni* quæ sequitur, æquam in efferendo moram postulat.”—*Lily's Gram.*, p. 125. Version: “By some persons, *time* is improperly confounded with *accent*; as if to acute and to lengthen were the same. But when a short syllable is acuted, the voice indeed is raised in pronouncing it, but the time is not increased. Thus, in the word *hominibus*, *mi* as the acute accent; but *ni*, which follows, demands equal slowness in the pronunciation.” To English ears, this can hardly seem a correct representation; for, in pronouncing *hominibus*, it is not *mi*, but *min*, that we accent; and this syllable is manifestly as much longer than the rest, as it is louder.

\* (1.) “Syllables, with respect to their *quantity*, are either *long*, *short*, or *common*.”—*Gould's Adam's Lat. Gram.*, p. 243. “Some syllables are *common*; that is, sometimes long, and sometimes short.”—*Adam's Lat. and Eng. Gram.*, p. 252. *Common* is here put for *variable*, or *not permanently settled in respect to quantity*; in this sense, from which no third species ought to be inferred, our language is, perhaps, more extensively “*common*” than any other.

(2.) “Most of our Monosyllables either take this Stress or not, according as they are more or less emphatical; and therefore English Words of one Syllable may be considered as *common*; i.e. either as long or short in certain Situations. These Situations are chiefly determined by the Pause, or Censure, of the Verse, and this Pause by the Sense. And as the English abounds in Monosyllables, there is probably no Language in which the Quantity of Syllables is more regulated by the Sense than in English.”—*W. Ward's Gram.*, Ed. of 1765, p. 156.

(3.) Bicknell's theory of quantity, for which he refers to Herries, is this: “The English *quantity* is divided into *long*, *short*, and *common*. The longest species of syllables are those that end in a vowel, and are under the accent; as, *mo* in *harmonious*, *sole* in *console*, &c. When a monosyllable, which is unemphatic, ends in a vowel, it is always short; but when the emphasis is placed upon it, it is always long. *Short* syllables are such as end in any of the six mutes; as *cut*, *stop*, *rapid*, *rugged*, *lock*. In *all such syllables* the sound cannot be lengthened: they are necessarily and invariably *short*. If another consonant intervenes between the vowel and mute, as *rend*, *soft*, *flask*, the syllable is rendered *somewhat longer*. The other species of syllables called *common*, are such as terminate in a half-vowel or aspirate. For instance, in the words *run*, *swim*, *crush*, *purl*, the concluding sound can be continued or shortened, as we please. This scheme of quantity,” it is added, “is founded on fact and experience.”—*Bicknell's Gram.*, Part ii, p. 109. But is it not a *fact*, that such words as *cuttest*, *stopping*, *rapid*, *rugged*, are *trochees*, in verse? and is not *unlock* an *iambus*? And what becomes of syllables that end with vowels or liquids and are not accented?

† I do not say the mere absence of stress is *never* called *accent*; for it is, plainly, the doctrine of some authors that the English accent differs not at all in its nature from the accent of the ancient Greeks or Romans, which was distinguished as being of three sorts, *acute*, *grave*, *inflex*; that “the stronger breathing, or higher sound,” which distinguishes one syllable of a word from or above the rest, is *the acute accent* only; that “the softer breathing, or lower sound,” which belongs to an *unacuted* (or *unaccented*) syllable, is *the*

OBS. 3.—The impropriety of affirming *quantity* to be the same as *accent*, when its most frequent species occurs only in the absence of accent, must be obvious to every body; and those writers who anywhere suggest this identity, must either have written absurdly, or have taken *accent* in some sense which includes the sounds of our *unaccented* syllables. The word sometimes means, “The *modulation* of the voice in speaking.”—*Worcester’s Dict.*, *u. Accent*. In this sense, the lighter as well as the more impressive sounds are included; but still, whether both together, considered as accents, can be reckoned the same as long and short quantities, is questionable. Some say, they cannot; and insist that they are yet as different, as the variable tones of a *trumpet*, which swell and fall, are different from the merely loud and soft notes of the monotonous *drum*. This illustration of the “easy Distinction betwixt *Quantity* and *Accent*” is cited with commendation, in Brightland’s Grammar, on page 157th,\* the author of which grammar, *seems* to have understood *Accent*, or *Accents*, to be the same as *Inflections*—though these are still unlike to quantities, if he did so. (See an explanation of Inflections in Chap. II, Sec. iii, Art. 3, above.) His exposition is this: “*Accent* is the *rising* and *falling* of the Voice, above or under its usual *Tone*. There are three Sorts of Accents, an *Acute*, a *Grave*, and an *Inflex*, which is also call’d a *Circumflex*. The *Acute*, or *Sharp*, naturally *raises* the Voice; and the *Grave*, or *Base*, as naturally *falls* it. The *Circumflex* is a kind of *Undulation*, or *Waving* of the Voice.”—*Brightland’s Gram.*, Seventh Ed., Lond., 1746, p. 156.

OBS. 4.—Dr. Johnson, whose great authority could not fail to carry some others with him, too evidently identifies accent with quantity, at the commencement of his Prosody. “PRONUNCIATION is just,” says he, “when every letter has its proper sound, and when every syllable has its proper accent, or which in English versification is *the same*, its proper quantity.”—*Johnson’s Gram.*, before Dict., 4to, p. 13; *John Burn’s Gram.*, p. 240; *Jones’s Prosodial Gram.*, before Dict., p. 10. Now our most common notion of *accent*—the sole notion with many—and that which the accentuation of Johnson himself everywhere inculcates—is, that it belongs *not* to “every syllable,” but only to some particular syllables, being either “a *stress of voice* on a certain syllable,” or a *small mark* to denote such stress.—See *Scott’s Dict.*, or *Worcester’s*. But Dr. Johnson, in the passage above, must have understood the word *accent* agreeably to his own imperfect definition of it; to wit, as “the sound given to the syllable pronounced.”—*Joh. Dict.* An *unaccented* syllable must have been to him a syllable unpronounced. In short he does not appear to have recognized any syllables as being unaccented. The word *unaccented* had no place in his lexicography, nor could have any without inconsistency. It was unaptly added to his text, after sixty years, by one of his amenders, Todd or Chalmers; who still blindly neglected to amend his definition of *accent*. In these particulars, Walker’s dictionaries exhibit the same deficiencies as Johnson’s; and yet no author has more frequently used the words *accent*

---

*grave accent*; and that a combination of these two sounds, or “breathings,” upon one syllable, constitutes the *inflex or circumflex accent*. Such, I think, is the teaching of Rev. William Barnes; who further says, “English verse is constructed upon sundry orders of *acute and grave accents* and matchings of rhymes, while the poetic language of the Romans and Greeks is formed upon rules of the sundry clusterings of *long and short syllables*.”—*Philological Grammar*, p. 263. This scheme is not wholly consistent, because the author explains accent or accents as being applicable only to “words of two or more syllables;” and it is plain, that the accent which includes the three sorts above, must needs be “some other thing than what we call accent,” if this includes only the acute.

\* Sheridan used the same comparison, “To illustrate the difference between the accent of the ancients and that of *ours*” [our tongue]. Our accent he supposed, with Nares and others, to have “no reference to *inflections* of the voice.”—See *Art of Reading*, p. 75; *Lectures on Elocution*, p. 56; *Walker’s Key*, p. 313.

and *unaccented*, than did Walker.\* *Mason's Supplement*, first published in 1801, must have suggested to the revisers of Johnson the addition of the latter term, as appears by the authority cited for it: "UNA'CCENTED, *adj.* Not accented. 'It being enough to make a syllable long, if it be accented, and short, if it be *unaccented*.' *Harris's Philological Inquiries*."—*Mason's Sup.*

OBS. 5—This doctrine of Harris's, that long quantity accompanies the accent, and unaccented syllables are short, is far from confounding or identifying accent with quantity, as has already been shown; and, though it plainly contradicts some of the elementary teaching of Johnson, Sheridan, Walker, Murray, Webster, Latham, Fowler, and others, in regard to the length or shortness of certain syllables, it has been clearly maintained by many excellent authors, so that no opposite theory is better supported by authority. On this point, our language stands not alone; for the accent controls quantity in some others.† G H. Noehden, a writer of uncommon ability, in his German Grammar for

\* (1.) It may in some measure account for these remarkable omissions, to observe that Walker, in his lexicography, followed Johnson in almost every thing but pronunciation. On this latter subject, his own authority is perhaps as great as that of any single author. And here I am led to introduce a remark or two touching *the accent and quantity* with which he was chiefly concerned; though the suggestions may have no immediate connexion with the error of confounding these properties.

(2.) Walker, in his theory, regarded the *inflections* of the voice as pertaining to *accent*, and as affording a satisfactory solution of the difficulties in which this subject has been involved; but, as an English orthoëpist, he treats of accent in no other sense, than as *stress laid on a particular syllable of a word*—a sense implying contrast, and necessarily dividing all syllables into accented and unaccented, except monosyllables. Having acknowledged our "*total ignorance* of the nature of the Latin and Greek accent," he adds: "The accent of the English language, which is constantly sounding in our ears, and every moment open to investigation, seems *as much a mystery* as that accent which is removed almost two thousand years from our view. Obscurity, perplexity, and confusion, run through every treatise on the subject, and nothing could be so hopeless as an attempt to explain it, did not a circumstance present itself, which at once accounts for the confusion, and affords a clew to lead us out of it. Not one writer on accent has given such a definition of the voice as acquaints us with its essential properties. \* \* \* But let us once divide the voice into its rising and falling inflections, the obscurity vanishes, and accent becomes as intelligible as any other part of language. \* \* \* On the present occasion it will be sufficient to observe, that *the stress we call accent* is as well understood as is necessary for the pronunciation of single words, which is the object of this treatise."—*Walker's Dict.*, p. 53, *Princip.* 486, 487, 488.

(3.) Afterwards, on introducing *quantity*, as an orthoëpical topic, he has the following remark: "In treating this part of pronunciation, it will not be necessary to enter into the nature of *that quantity which constitutes poetry*; the quantity here considered will be that which relates to words taken singly; and this is *nothing more than the length or shortness of the vowels*, either as they stand alone, or as they are differently combined with the vowels or consonants." *Ib.*, p. 62, *Princip.* 529. Here is suggested a distinction which has not been so well observed by grammarians and prosodists, or even by Walker himself, as it ought to have been. So long as the practice continues of denominating certain mere *vowel sounds* the *long* and the *short*, it will be very necessary to notice that these are not the same as the *syllabic quantities*, long and short, which constitute English verse.

† (1.) In the Latin and Greek languages, this is not commonly supposed to be the case; but, on the contrary, the quantity of syllables is professedly adjusted by its own rules independently of what we call accent; and, in our English pronunciation of these languages, the accentuation of all long words is regulated by the quantity of the last syllable but one. Walker, in the introduction to his Key, speaks of "The English pronunciation of Greek and Latin [as] injurious to quantity." And no one can deny, that we often accent what are called short syllables, and perhaps oftener leave unaccented such as are called long; but, after all, were the quantity of Latin and Greek syllables always judged of by their actual time, and not with reference to the vowel sounds called long and short, these our violations of the old quantities would be found much fewer than some suppose they are.

(2.) Dr. Adam's view of the accents, acute and grave, appears to be peculiar; and of a nature which may perhaps come nearer to an actual identity with the quantities, long and short, than any other. He says,

"1. The *acute* or *sharp* accent raises the voice in pronunciation, and is thus marked [']; *prófero*, *prófer*. [The English word is written, not thus, but with two Effs, *proffer*.—G. B.]

Englishmen, defines accent to be, as we see it is in English, “that *stress* which marks a particular syllable in speaking;” and recognizing, as we do, both a full accent and a partial one, or “demi-accent,” presents the syllables of his language as being of three conditions: the “*accented*,” which “cannot be used otherwise than as *long*,” the “*half-accented*” which “must be regarded as ambiguous, or common;” and the “*accentless*,” which “are in their nature *short*.”—See *Noehden’s Gram.*, p. 87. His middle class, however, our prosodists in general very properly dispense with. In Fiske’s History of Greek Literature, which is among the additions to the Manual of Classical Literature from the German of Eschenburg, are the following passages: “The *tone* [i.e. accent] in Greek is placed upon short syllables as well as long; in German, it accompanies regularly only long syllables.”—“In giving an accent to a syllable in an English word we *thereby* render it a long syllable, whatever may be the sound given to its vowel, and in whatever way the syllable may be composed; so that as above stated in relation to the German, an English accent, or stress in pronunciation, accompanies only a long syllable.”—*Manual of Class. Lit.*, p. 437. With these extracts, accords the doctrine of some of the ablest of our English grammarians. “In the English Pronunciation,” says William Ward, “there is a certain Stress of the Voice laid on some one syllable at least, of every Word of two or more Syllables; and that Syllable on which the Stress is laid may be considered *long*. Our Grammarians have agreed to consider this Stress of the Voice as *the Accent* in English; and therefore the Accent and long Quantity coincide in our Language.”—*Ward’s Practical Gram.*, p. 155. As to the vowel sounds, with the quantity of which many prosodists have greatly puzzled both themselves and their readers, this writer says, “they may be made as long, or as short, as the Speaker pleases.”—*Ib.*, p. 4.

OBS. 6.—From the absurd and contradictory nature of many of the *principles usually laid down* by our grammarians, for the discrimination of long quantity and short, it is quite apparent, that but very few of them have well understood either the distinction itself or their own rules concerning it. Take Fisher for an example. In Fisher’s Practical Grammar, first published in London in 1753,—a work not unsuccessful, since Wells quotes the “28<sup>th</sup> edition” as appearing in 1795, and this was not the last—we find, in the first place, the vowel sounds distinguished as long or short thus: “Q. How many Sounds has a Vowel? A. Two in general, viz. 1. A LONG SOUND, When the Syllable ends with a Vowel, either in Monosyllables, or in Words of more Syllables; as, *tāke, wē, ī, gō, nīl*; or, as, *Nāture, Nēro, Nītre, Nōvice, Nūisance*. 2. A SHORT SOUND, When the Syllable ends with a

---

“2. The *grave* or *base* accent depresses the voice, or keeps it in its natural tone; and is thus marked [˘]; as, doctè. ☞ *This accent properly belongs to all syllables which have no other.*

“The accents are hardly ever marked in English books, except in dictionaries, grammars, spelling-books, or the like, where the acute accent only is used. The accents are likewise seldom marked in Latin books, unless for the sake of distinction; as in these adverbs, *aliquò, continuò, doctè, unà*, &c.”—*Adam’s Latin and English Grammar*, p. 266.

(3.) As stress naturally lengthens the syllables on which it falls, if we suppose the grave accent to be the opposite of this, and to belong to all syllables which have no peculiar stress,—are not enforced, not acuted, not circumflected, not emphasized; then shall we truly have an accent with which our short quantity may fairly coincide. But I have said, “the mere absence of stress, which produces short quantity, we do not call *accent*,” and it may be observed, that the learned improver of Dr. Adam’s Grammar, B. A. Gould, has totally rejected all that his predecessor taught concerning *accent*, and has given an entirely different definition of the thing. See marginal notes on page 771, above. Dr. Johnson also cites from *Holder* a very different explanation of it, as follows: “*Accent*, as in the Greek names and usage, seems to have regarded the tune of the voice; the acute accent, raising the voice in some certain syllables, to a higher, (i.e. more acute) pitch or tone; and the grave, depressing it lower; ☞ *and both having some emphasis*, i.e. *more vigorous pronunciation*. HOLDER.”—*Johnson’s Quarto Dict.*, w. *Accent*.

Consonant, either in Monosyllables, or others; as *Hāt, hēr, bīt, rōb, Tūn*; or, as *Bārber, bīten, Būttōn*.”—See p. 5. To this rule, the author makes needless exceptions of all such words as *balance* and *banish*, wherein a single consonant between two vowels goes to the former; because, like Johnson, Murray, and most of our old grammarians, he divides on the vowel; falsely calls the accented syllable short; and imagines the consonant to be heard *twice*, or to have “*a double Accent*.” On page 35th, he tells us that, “*Long and short Vowels*, and *long and short Syllables*, are *synonymous* [—*synonymous*, from συνώνυμος—] Terms;” and so indeed have they been most erroneously considered by sundry subsequent writers; and the consequence is, that all who judge by their criteria, mistake the poetic quantity, or prosodical value, of perhaps one half the syllables in the language. Let each syllable be reckoned long that “ends with a Vowel,” and each short that “ends with a Consonant,” and the decision will probably be oftener wrong than right; for more syllables end with consonants than with vowels, and of the latter class a majority are without stress and therefore short. Thus the foregoing principle, contrary to the universal practice of the poets, determines many *accented* syllables to be “*short*,” as the first in “*barber, bitten, button, balance, banish*;—“and many *unaccented* ones to be “*long*,” as the last in *sofa, specie, noble, metre, sorrow, daisy, valley, nature, native*; or the first in *around, before, delay, divide, remove, seclude, obey, cocoon, presume, propose*, and other words innumerable.

OBS. 7.—Fisher’s conceptions of accent and quantity, as constituting prosody, were much truer to the original and etymological sense of the words, than to any just or useful view of English versification: in short, this latter subject was not even mentioned by him; for prosody, in his scheme, was nothing but the right pronunciation of words, or what we now call *orthoëpy*. This part of his Grammar commences with the following questions and answers:

“Q. What is the Meaning of the Word PROSODY? A. It is a Word borrowed from the Greek; which, in Latin, is rendered *Accentus*, and in English *Accent*.

“Q. What do you mean by *Accent*? A. Accent originally signified a Modulation of the Voice, or chanting to a musical Instrument; but is now generally used to signify *Due Pronunciation*, i.e. the pronouncing [of] a syllable according to its Quantity, (whether it be long or short,) with a stronger Force or Stress of Voice than the other Syllables in the same Word; as, *a* in *able*, *o* in *above*, &c.

“Q. What is *Quantity*? A. Quantity is the different Measure of *Time* in pronouncing Syllables, from whence they are called long or short.

“Q. What is the *Proportion* between a long and a short Syllable? A. Two to one; that is, a long Syllable is twice as long in pronouncing as a short one; as, *Hate, Hat*. This mark (˘) set over a Syllable, shows that it is long, and this (˙) that it is short; as, *rēcord, rēcord*.

“Q. How do you *know* long and short Syllables? A. A Syllable is long or short according to the Situation of the Vowel, i.e. it is generally long when it ends with a Vowel, and short when with a Consonant; as, *Fā-* in *Favour*, and *Mān-* in *Manner*.”—*Fisher’s Practical Gram.*, p. 34.

Now one grand mistake of this is, that it supposes syllabication to fix the quantity, and quantity to determine the accent; whereas it is plain, that accent controls quantity, so far at least that, in the construction of verse, a syllable fully accented cannot be reckoned short. And this mistake is practical; for we see, that, in three of his examples, out of the four above, the author himself misstates the quantity, because he disregards the accent: the verb *re-cord*, being accented on the second syllable, is an *iambus*; and the nouns *rec’-ord* and *man’-ner*, being accented on the first, are *trochees*; and just as plainly so, as is the word *fāvōur*. But a still greater blunder here observable is, that, as a “*due pronunciation*”

necessarily includes the utterance of every syllable, the explanation above stolidly supposes *all* our syllables to be *accented*, each “according to its Quantity, (whether it be long or short,)” and each “*with a stronger Force or Stress of Voice*, than *the other* Syllables!” Absurdity akin to this, and still more worthy to be criticised, has since been propagated by Sheridan, by Walker, and by Lindley Murray, with a host of followers, as Alger, D. Blair, Comly, Cooper, Cutler, Davenport, Felton, Fowler, Frost, Guy, Jaudon, Parker and Fox, Picket, Pond, Putnam, Russell, Smith, and others.

OBS. 8.—Sheridan was an able and practical teacher of *English pronunciation*, and one who appears to have gained reputation by all he undertook, whether as an actor, as an elocutionist, or as a lexicographer. His publications that refer to that subject, though now mostly superseded by others of later date, are still worthy to be consulted. The chief of them are, his Lectures on Elocution, his Lectures on the Art of Reading, his Rhetorical Grammar, his Elements of English, and his English Dictionary. His third lecture on Elocution, and many pages of the Rhetorical Grammar, are devoted to *accent* and *quantity*—subjects which he conceived to have been greatly misrepresented by other writers up to his time.\* To this author, as it would seem, we owe the invention of that absurd doctrine, since copied into a great multitude of our English grammars, that the accent on a syllable of two or more letters, belongs, *not to the whole of it, but only to some ONE LETTER*; and that according to the character of this letter, as vowel or consonant, the same stress serves to lengthen or shorten the syllable’s quantity! Of this matter, he speaks thus: “The *great distinction* of our accent depends upon its *seat*; which may be either upon a vowel or a consonant. Upon a vowel, as in the words, glóry, fáther, hóly. Upon a consonant, as in the words, hab’it, bor’row, bat’le. When the accent is on the vowel, the syllable is long; because the accent is *made by dwelling* upon the vowel. When it is on the consonant, the *syllable is short*;† because the accent is *made by passing rapidly* over the vowel, and giving a smart stroke of the voice to the following consonant. *Obvious as this point is*, it *has wholly escaped the observation of all our grammarians and compilers of*

---

\* (1.) “Amongst them [the ancients,] we know that accents were marked by certain *inflexions* [inflections] of the voice like musical notes; and the grammarians to this day, with great formality inform their pupils, that the acute accent, is the raising [of] the voice on a certain syllable; the grave, a depression of it; and the circumflex, a raising and depression both, in one and the same syllable. *This jargon they constantly preserve*, though they have no sort of ideas annexed to these words; for if they are asked to shew how this is to be done, they cannot tell, and their practice always belies their precept.”—*Sheridan’s Lectures on Eloc.*, p. 54.

(2.) “It is by the accent chiefly that the quantity of our syllables is regulated; but not according to the *mistaken rule* laid down by *all who have written* on the subject, that the accent *always makes the syllable long*; than which *there cannot be any thing more false*.”—*Ib.*, p. 57.

(3.) “And here I cannot help taking notice of a circumstance, which shews in the strongest light, the *amazing deficiency* of those, who have hitherto employed their labours on that subject, [accent, or pronunciation,] *in point of knowledge* of the true genius and constitution of our tongue. Several of the compilers of dictionaries, vocabularies, and spelling books, have undertaken to mark the accents of our words; but so *little acquainted* were they with the nature of our accent, that they thought it necessary only to mark *the syllable* on which the stress is to be laid, without marking the *particular letter* of the syllable to which the accent belongs.”—*Ib.*, p. 59.

(4.) “The mind thus taking a bias under the prejudice of false rules, never arrives at a knowledge of the true nature of *quantity*; and accordingly we find that *all attempts hitherto* to settle the prosody of our language, have been vain and fruitless.”—*Sheridan’s Rhetorical Gram.*, p. 52.

† In the following extract, this matter is stated somewhat differently: “The *quantity* depends upon the seat of the accent, whether it be on the vowel or [on the] consonant; if on the vowel, the syllable is necessarily long; as it makes the vowel long; if on the consonant, *it may be either long or short*, according to the nature of the consonant, or *the time taken up* in dwelling upon it.”—*Sheridan’s Lectures on Eloc.*, p. 57. This last clause shows the “distinction” to be a very weak one.—G. BROWN.

*dictionaries*; who, instead of examining the peculiar genius of our tongue, implicitly and pedantically have followed the Greek method of always placing the accentual mark over a vowel.”—*Sheridan’s Rhetorical Gram.*, p. 51. The author’s reprehension of the old mode of accentuation, is not without reason; but his “great distinction” of short and long syllables is only fit to puzzle or mislead the reader. For it is plain, that the first syllables of *hab’it*, *bor’row*, and *bat’le*, are twice as long as the last; and, in poetry, these words are trochees, as well as the other three, *glo’ry*, *fa’ther*, and *ho’ly*.

OBS. 9.—The only important distinction in our accent, is that of the *primary* and the *secondary*, the latter species occurring when it is necessary to enforce more syllables of a word than one; but Sheridan, as we see above, after rejecting all the old distinctions of *rising* and *falling*, *raising* and *depressing*, *acute* and *grave*, *sharp* and *base*, *long* and *short*, contrived a new one still more vain, which he founded on that of vowels and consonants, but “referred to *time*, or *quantity*.” He recognized, in fact, a *vowel accent* and a *consonant accent*; or, in reference to quantity, a *lengthening accent* and a *shortening accent*. The discrimination of these was with him “THE GREAT DISTINCTION of our accent.” He has accordingly mentioned it in several different places of his works, and not always with that regard to consistency which becomes a precise theorist. It led him to new and variant ways of *defining* accent; some of which seem to imply a division of consonants from their vowels in utterance, or to suggest that syllables are not the least parts of spoken words. And no sooner has he told us that our accent is but one single mode of distinguishing a syllable, than he proceeds to declare it two. Compare the following citations: “As the pronunciation of English words is chiefly regulated by *accent*, it will be necessary to have a *precise idea* of that term. Accent with us means *no more* than *a certain stress* of the voice upon *one letter* of a syllable, which distinguishes it from all the *other letters* in a word.”—*Sheridan’s Rhetorical Gram.*, p. 39. Again: “Accent, in the English language, means *a certain stress* of the voice upon *a particular letter* of a syllable which distinguishes it from the rest, and, at the same time, *distinguishes the syllable itself* to which it belongs from the others which compose the word.”—*Same work*, p. 50. Again: “But as *our accent consists in stress only*, it can just as well be placed on a consonant as [on] a vowel.”—*Same*, p. 51. Again: “By the word *accent*, is meant *the stress* of the voice on *one letter* in a syllable.”—*Sheridan’s Elements of English*, p. 55. Again: “The term [*accent*] with us has no reference to *inflexions* of the voice, or musical notes, but only means *a peculiar manner of distinguishing one syllable of a word from the rest*, denominated by us *accent*; and the term for that reason [is] used by us in the singular number.—This distinction is made by us in *two ways*; either by *dwelling longer upon one syllable* than the rest; or by *giving it a smarter percussive* of the voice in utterance. Of the first of these, we have instances in the words, *glōry*, *fāther*, *hōly*; of the last, in *bat’le*, *hab’it*, *bor’row*. So that accent, with us, is not referred to tune, but to *time*; to *quantity*, not quality; to the more *equable* or *precipitate* motion of the voice, not to the variation of notes or *inflexions*.”—*Sheridan’s Lectures on Elocution*, p. 56; *Flint’s Murray’s Gram.*, p. 85.

OBS. 10.—How “precise” was Sheridan’s idea of accent, the reader may well judge from the foregoing quotations; in four of which, he describes it as “*a certain stress*,” “*the stress*,” and “*stress only*,” which enforces some “*letter*,” while, in the other, it is whimsically made to consist in two different modes of pronouncing “*syllables*”—namely, with *equability*, and with *precipitance*—with “*dwelling longer*,” and with “*smarter percussive*”—which terms the author very improperly supposes to be *opposites*: saying, “For the two ways of distinguishing syllables by accent, as mentioned before, are *directly opposite*, and produce *quite contrary effects*; the one, by *dwelling* on the syllable, necessarily makes it long; the

other, by the *smart percussion*—of the voice, as necessarily *makes it short*—*Ib.*, p. 57. Now it is all a mistake, however common, to suppose that our accent, consisting as it does, in stress, enforcement, or “percussion of voice,” can ever *shorten* the syllable on which it is laid; because what increases the quantum of a vocal sound, cannot diminish its length; and a syllable accented will always be found *longer* as well as *louder*, than any unaccented one immediately before or after it. Though weak sounds may possibly be protracted, and shorter ones be exploded loudly, it is not the custom of our speech, so to deal with the sounds of syllables.

OBS. 11.—Sheridan admitted that some syllables are naturally and necessarily short, but denied that any are naturally and necessarily long. In this, since syllabic length and shortness are relative to each other, and to the cause of each, he was, perhaps, hardly consistent. He might have done better, to have denied both, or neither. Bating his new division of accent to subject it sometimes to short quantity, he recognized very fully the dependence of quantity, long or short, whether in syllables or only in vowels, upon the presence or absence of accent or emphasis. In this he differed considerably from most of the grammarians of his day; and many since have continued to uphold other views. He says, “It is an *infallible rule* in our tongue that no vowel ever has a long sound in an unaccented syllable.”—*Lectures on Elocution*, p. 60. Again: “In treating of the simple elements or letters, I have shown that some, both vowels and consonants, are *naturally short*; that is, whose sounds *cannot possibly* be prolonged; and these are the [short or shut] sounds of *ē, ī, and ū*, of vocal sounds; and three pure mutes, *k, p, t*, of the consonant; as in the words *beck, lip, cut*. I have shown also, that the sounds of all the other vowels, and of the consonant semivowels, may be prolonged to what degree we please; but at the same time it is to be observed, that all these may also be reduced to a short quantity, and are capable of being uttered in as short a space of time as those which are naturally short. So that they who speak of syllables as absolutely in their own nature long, *the common cant of prosodians*, speak of a nonentity: for though, as I have shown above, there are syllables absolutely short, which cannot possibly be prolonged by any effort of the speaker, yet it is in his power to shorten or prolong the others to what degree he pleases.”—*Sheridan’s Rhetorical Gram.*, p. 52. And again: “I have already mentioned that when the accent is on the vowel, it of course makes the syllable *long*; and when the accent is on the consonant, the syllable may be *either long or short*, according to the nature of the consonant, or *will of the speakers*. And as *all unaccented syllables are short*, the quantity of our syllables is adjusted by the easiest and simplest rule in the world, and in the exactest proportion.”—*Lect. on Elocution*, p. 66.

OBS. 12.—This praise of our rule for the adjustment of quantity, would have been much more appropriate, had not the rule itself been greatly mistaken, perplexed, and misrepresented by the author. If it appear, on inspection, that “*beck, lip, cut*,” and the like syllables, are twice as long when under the accent, as they are when not accented, so that, with a short syllable annexed or a long one prefixed, they may form *trochees*; then is it *not true*, that such syllables are either always necessarily and *inherently* short, or always, “by the smart percussion of the voice, as necessarily *made* short;” both of which inconsistent ideas are above affirmed of them. They may not be so long as some other long syllables; but, if they are twice as long as the accompanying short ones, they are not short. And, if not short, then that remarkable distinction in accent, which assumes that they are so, is as needless as it is absurd and perplexing. Now let the words, *beck’ on, lip’ ping, cut’ ter*, be properly pronounced, and their syllables be compared with each other, or with those of *lim’beck, fil’lip, Drā’cut*; and it cannot but be perceived, that *beck, lip*, and

*cut*, like other syllables in general, are *lengthened* by the accent, and shortened only in its absence; so that all these words are manifestly trochees, as all similar words are found to be, in our versification. To suppose “as many words as we hear accents,” or that “it is the laying of an accent on *one* syllable, which *constitutes a word*,” and then say, that “no unaccented syllable or vowel is ever to be accounted long,” as this enthusiastic author does in fact, is to make strange scansion of a very large portion of the trissyllables and polysyllables which occur in verse. An other great error in Sheridan’s doctrine of quantity, is his notion that all monosyllables, except a few small particles, are *accented*; and that their quantity is determined to be long or short by the *seat* or the *mode* of the accent, as before stated. Now, as our poetry abounds with monosyllables, the relative time of which is adjusted by emphasis and cadence, according to the nature and importance of the terms, and according to the requirements of rhythm, with no reference to this factitious principle, no conformity thereto but what is accidental, it cannot but be a puzzling exercise, when these difficulties come to be summed up, to attempt the application of a doctrine so vainly conceived to be “the easiest and simplest rule in the world!”

OBS. 13.—Lindley Murray’s principles of accent and quantity, which later grammarians have so extensively copied, were mostly extracted from Sheridan’s; and, as the compiler appears to have been aware of but few, if any, of his predecessor’s errors, he has adopted and greatly spread well-nigh all that have just been pointed out; while, in regard to some points, he has considerably increased the number. His scheme, as he at last fixed it, appears to consist essentially of propositions already refuted, or objected to, above; as any reader may see, who will turn to his definition of accent, and his rules for the determination of quantity. In opposition to Sheridan, who not very consistently says, that, “*All* unaccented syllables are *short*,” this author appears to have adopted the greater error of Fisher, who supposed that the *vowel sounds* called long and short, are just the same as the long and short *syllabic quantities*. By this rule, thousands of syllables will be called long, which are in fact short, being always so uttered in both prose and poetry; and, by the other, some will occasionally be called short, which are in fact long, being made so by the poet, under a slight secondary accent, or perhaps none. Again, in supposing our numerous monosyllables to be accented, and their quantity to be thereby fixed, without excepting “the *particles*, such as *a, the, to, in, &c.*,” which were excepted by Sheridan, Murray has much augmented the multitude of errors which necessarily flow from the original rule. This principle, indeed, he adopted timidly; saying, as though he hardly believed the assertion true: “And *some writers assert*, that every monosyllable of two or more letters, has one of its letters thus distinguished.”—*Murray’s Gram.*, 8vo, p. 236; 12mo, 189. But still he *adopted* it, and adopted it *fully*, in his section on Quantity; for, of his twelve words, exemplifying syllabic time so regulated, no fewer than nine are monosyllables. It is observable, however, that, in some instances, it is not *one* letter, but *two*, that he marks; as in the words, “mōōd, hōūse.”—*Ib.*, p. 239; 12mo, 192. And again, it should be observed, that generally, wherever he marks accent, he follows the *old mode*, which Sheridan and Webster so justly condemn; so that, even when he is speaking of “the accent on the *consonant*,” the sign of stress, as that of time, is set over a *vowel*: as, “Sádly, róbber.”—*Ib.*, 8vo, 240; 12mo, 193. So in his Spelling-Book, where words are often falsely divided: as, “Vé nice,” for Ven’-ice; “Há no ver,” for Han’o-ver; &c.—See p. 101.

OBS. 14.—In consideration of the great authority of this grammarian, now backed by a score or two of copyists and modifiers, it may be expedient to be yet more explicit. Of *accent* Murray published about as many different definitions, as did Sheridan; which, as they show what notions he had at different times, it may not be amiss for some, who hold

him always in the right, to compare. In one, he describes it thus: "Accent signifies *that stress* of the voice, which is laid on *one syllable*, to distinguish it from the rest."—*Murray's Spelling-Book*, p. 138. He should here have said, (as by his examples it would appear that he meant,) "on one syllable *of a word*;" for, as the phrase now stands, it may include stress on a *monosyllable in a sentence*; and it is a matter of dispute, whether this can properly be called accent. Walker and Webster say, it is emphasis, and not accent. Again, in an other definition, which was written before he adopted the notion of accent on consonants, of accent on monosyllables, or of accent for quantity in the formation of verse, he used these words: "Accent is *the laying of* a peculiar stress of the voice on a certain *vowel* or syllable in a word, that it may be better heard than the rest, or distinguished from them; as, in the word *presúme*, the stress of the voice must be on the second syllable, *súme*, which takes the accent."—*Murray's Gram.*, Second Edition, 12mo, p. 161. In this edition, which was published at York, in 1796, his chief rules of quantity say nothing about accent, but are thus expressed: [1.] "A *vowel or syllable* is long, when *the vowel or vowels contained in it* are slowly joined in pronunciation with the *following letters*; as, 'Fáll, bále, mōōd, hōūse, fēature.' [2.] A syllable is short, when the vowel is quickly joined to the succeeding *letter*; as, 'ärt, bönnēt, hüngēr.'"—*Id.*, p. 166. Besides the absurdity of representing "*a vowel*" as having "*vowels* contained in it," these rules are *made up* of great faults. They confound syllabic quantities with vowel sounds. They suppose quantity to be, not the time of a whole syllable, but the quick or slow junction of *some* of its parts. They apply to no syllable that ends with a vowel sound. The former applies to none that ends with one consonant only; as, "*mood*" or the first of "*feat-ure*." In fact, it does not apply to *any* of the examples given; the final letter in each of the other words being *silent*. The latter rule is worse yet: it misrepresents the examples; for "*bonnet*" and "*hunger*" are trochees, and "*art*," with any stress on it, is long.

OBS. 15.—In all late editions of L. Murray's Grammar, and many modifications of it, accent is defined thus: "Accent is *the laying of* a peculiar stress of the voice, on a certain *letter* OR *syllable* in a word, that *it* may be better heard than *the rest*, or distinguished from *them*; as, in the word *presúme*, the stress of the voice must be on the *letter u*, AND [the] *second syllable*, *sume*, which takes the accent."—*Murray's Gram.*, 8vo, p. 235; 12mo, 188; 18mo, 57; *Alger's*, 72; *Bacon's*, 52; *Comly's*, 168; *Cooper's*, 176; *Davenport's*, 121; *Felton's*, 134; *Frost's El.*, 50; *Fisk's*, 32; *Merchant's*, 145; *Parker and Fox's*, iii, 44; *Pond's*, 197; *Putnam's*, 96; *Russell's*, 106; *R. O. Smith's*, 186. Here we see a curious jumble of the common idea of accent, as "stress laid on some particular *syllable* of a *word*," with Sheridan's doctrine of accenting always "a particular *letter* of a *syllable*,"—an idle doctrine, contrived solely for the accommodation of short quantity with long, *under the accent*. When this definition was adopted, Murray's scheme of quantity was also revised, and materially altered. The principles of his main text, to which his copiers all confine themselves, then took the following form:

"The quantity of a syllable, is *that* time which is occupied in pronouncing it. It is considered as LONG or SHORT.

"A *vowel or syllable* is long, when the accent is on the vowel; *which* occasions it to be slowly joined in pronunciation with the following *letters*: as, 'Fáll, bále, mōōd, hōūse, fēature.'

"A *syllable* is short, when the accent is on the consonant; *which* occasions the vowel to be quickly joined to the succeeding *letter*: as, 'ärt, bönnēt, hüngēr.'

"A long syllable generally requires double the time of a short one *in pronouncing it*: thus, 'Mâte' and 'Nôte' should be pronounced as slowly again as 'Măt' and 'Nöt.'"—*Murray's Gram.*, 8vo, p. 239; 12mo, 192; 18mo, 57; *Alger's*, 72; *D. C. Allen's*, 86; *Bacon's*,

52; *Comly's*, 168; *Cooper's*, 176; *Cutler's*, 165; *Davenport's*, 121; *Felton's*, 134; *Frost's El.*, 50; *Fisk's*, 32; *Maltby's*, 115; *Parker and Fox's*, iii, 47; *Pond's*, 198; *S. Putnam's*, 96; *R. C. Smith's*, 187; *Rev. T. Smith's*, 68.

Here we see a revival and an abundant propagation of Sheridan's erroneous doctrine, that our accent produces both short quantity and long, according to its seat; and since none of all these grammars, but the first two of Murray's, give any *other* rules for the discrimination of quantities, we must infer, that these were judged sufficient. Now, of all the principles on which any have ever pretended to determine the quantity of syllables, none, so far as I know, are more defective or fallacious than these. They are liable to more objections than it is worth while to specify. Suffice it to observe, that they divide certain accented syllables into long and short, and say nothing of the unaccented; whereas it is plain, and acknowledged even by Murray and Sheridan themselves, that in "*ant*, *bonnet*, *hunger*" and the like, the unaccented syllables are the *only short ones*: the rest can be, and here are, lengthened.\*

OBS. 16.—The foregoing principles, differently expressed, and perchance in some instances more fitly, are found in many other grammars, and in some of the very latest; but they are everywhere a *mere dead letter*, a record which, if it is not always untrue, is seldom understood, and never applied in any way to practice. The following are examples:

(1.) "In a long syllable, the vowel is accented; in a short syllable [,] the consonant; as [,] *rōll*, *pōll*; *tōp*, *cūt*."—*Rev. W. Allen's Gram.*, p. 222. (2.) "A syllable *or word* is long, when the accent is on the vowel: as *nō*, *līne*, *lā*, *mē*; and short, when on the consonant: as *nōt*, *līn*, *Lātin*, *mēt*."—*S. Barrett's Grammar*, ("Principles of Language,") p. 112.

(3.) "A syllable is long when the accent is on the vowel, as, *Pāll*, *sāle*, *mōūse*, *crēature*. A syllable is short when the accent is placed on the consonant; as *great*´, *let*´ter, *mas*´ter."—*Rev. D. Blair's Practical Gram.*, p. 117.

(4.) "When the stress is on the *vowel*, the measure of quantity is *long*: as, *Māte*, *fāte*, *complāin*, *plāyful*, *un der mīne*. When the stress is on a *consonant*, the quantity is short: as, *Mat*´, *fat*´, *com pel*´, *prog*´ress, *dis man*´tle."—*Pardon Davis's Practical Gram.*, p. 125.

(5.) "The quantity of a syllable is considered *as long or short*. It is long when the accent is on the vowel; as, *Fāll*, *bāle*, *mōod*, *hoūse*, *fēature*. It is short when the accent is placed on the consonant; as, *Mas*´ter, *let*´ter."—*Guy's School Gram.*, p. 118; *Picket's Analytical School Gram.*, 2d Ed., p. 224.

(6.) "A syllable is *long* when the accent is on the vowel; and *short*, when the accent is on the consonant. A *long* syllable requires twice the time in pronouncing it that a *short* one does. Long syllables are marked thus ¯; as, *tūbe*; short syllables, thus ˘; as, *mān*."—*Hiley's English Gram.*, p. 120.

(7.) "When the accent is on a vowel, the syllable is generally long; as *ālehoūse*, *amūsement*, *fēatures*. But when the accent is on a consonant, the syllable is mostly short; as, *hāp*´py, *mān*´ner. A long syllable requires twice as much time in the pronunciation, as a short one; as, *hāte*, *hāt*; *nōte*, *nōt*; *cāne*, *cān*; *fine*, *fīn*."—*Jaudon's Union Gram.*, p. 173.

\* "If the consonant be in its nature a short one, the syllable is necessarily short. If it be a long one, that is, one whose sound is capable of being lengthened, it *may be long or short* at the will of the speaker. By a short consonant I mean one whose sound cannot be continued after a vowel, such as c or k p t, as ac, ap, at—whilst that of long consonants *can*, as, el em en er ev, &c."—*Sheridan's Lectures on Elocution*, p. 58. Sheridan here forgets that "bor´row" is one of his examples of short quantity.

Murray admits that "accent on a *semi-vowel*" may make the syllable long; and his semivowels are these: "f, l, m, n, r, v, s, z, x, and *c* and *g* soft." See his *Octavo Gram.*, p. 240 and p. 8.

(8.) “If the syllable *be long*, the accent is on the vowel; as, in *bāle*, *mōōd*, *educātion*; &c. If *short*, the accent is on the consonant; as, in *ānt*, *bōnnet*, *hūnger*, &c.”—*Merchant’s American School Gram.*, p. 145.

The quantity of our unaccented syllables, none of these authors, except Allen, thought it worth his while to notice. But among their accented syllables, they all include *words of one syllable*, though most of them thereby pointedly contradict their own definitions of accent. To find in our language no short syllables but such as are accented, is certainly a very strange and very great oversight. Frazee says, “The pronunciation of an accented syllable *requires double the time* of that of an unaccented one.”—*Frazee’s Improved Gram.*, p. 180. If so, our poetical quantities are greatly misrepresented by the rules above cited. Allen truly says, “Unaccented syllables are generally short; as, *rētūrn*, *tūrner*.”—*Elements of E. Gram.*, p. 222. But how it was ever found out, that in these words we accent only the vowel *u*, and in such as *hunter* and *bluntly*, some one of the consonants only, he does not inform us.

OBS. 17.—As might be expected, it is not well agreed among those who accent single consonants and vowels, *what particular letter* should receive the stress and the mark. The word or syllable “*ant*,” for example, is marked “an’t” by Alger, Bacon, and others, to enforce the *n*; “ant” by Frost, Putnam, and others, to enforce the *t*; “ānt” by Murray, Russell, and others, to show, as they say, “*the accent on the consonant*!” But, in “A’NTLER,” Dr. Johnson accented the *a*; and, to mark the same pronunciation, Worcester now writes, “ĀNT’LER;” while almost any prosodist, in scanning, would mark this word “*āntlēr*” and call it a *trochee*.\* Churchill, who is in general a judicious observer, writes thus: “The *leading feature* in the English language, on which *it’s* melody both in prose and verse *chiefly depends*, is *it’s accent*. Every word in it of *more than one syllable* has one of *it’s* syllables distinguished by this from the rest; the accent being in some cases on the vowel, in others on the *consonant that closes the syllable*; on the vowel, when it has *it’s* long sound; on the consonant, when the vowel is short.”—*Churchill’s New Gram.*, p. 181. But to this, as a rule of accentuation, no attention is in fact paid nowadays. Syllables that have long vowels not final, very properly take the sign of stress on or after a consonant or a mute vowel; as, ān’gel, chām’ber, slāy’er, bēad’roll, slēa’zy, slēēp’er, slēēve’less, līve’ly, mīnd’ful, slīght’ly, slīd’ing, bōld’ness, grōss’ly, whōl’ly, ūse’less.—See *Worcester’s Dict.*

OBS. 18.—It has been seen, that Murray’s principles of quantity were greatly altered by himself, after the first appearance of his grammar. To have a full and correct view of them, it is necessary to notice something more than his main text, as revised, with which all his amenders content themselves, and which he himself thought sufficient for his Abridgement. The following positions, which, in some of his revisals, he added to the large grammar, are therefore cited:—

(1.) “Unaccented syllables are generally short: as, ‘ādmīre, bóldnēss, sinnēr.’ But to this rule there are *many* exceptions: as, ‘ālsō, éxile, gāngrēne, ūmpīre, fōretāste,’ &c.

\* On account of the different uses made of the breve, the macron, and the accents, one grammarian has proposed a new mode of marking poetic quantities. Something of the kind might be useful; but there seems to be a reversal of order in this scheme, the macrotone being here made light, and the stenotone dark and heavy. “Long and short syllables have *sometimes* been designated by the same marks *which* are used for accent, tones, and the quality of the vowels; but it will be better[,] to prevent confusion[,] to use different marks. This mark ○ may represent a long syllable, and this ● a short syllable; as,

● ● ○ ● ● ○ ● ● ○ ● ●  
‘At the close of the day when the hamlet is still.’—*Perley’s Gram.*, p. 73.

(2.) “When the accent is on the consonant, the syllable is often *more or less short*, as it ends with a *single consonant*, or with more than one: as, ‘Sádly, róbber; persíst, mâtchless.’

(3.) “When the accent is on a semi-vowel, the time of the syllable may be protracted, by dwelling upon the *semi-vowel*: as, ‘Cur´, can´, fülfil´’ but when the accent falls on a mute, the syllable *cannot be lengthened in the same manner*: as, ‘Búbble, cáptain, tótter.’”—*L. Murray’s Gram.*, 8vo, p. 240; 12mo, 193.

(4.) “In this work, and in the author’s Spelling-book, the vowels *e* and *o*, in the first syllable of such words as, behave, prejudge, domain, propose; and in the second syllable of such as pulley, turkey, borrow, follow; are considered as *long vowels*. The second syllables in such words as, baby, spicy, holy, fury, are also considered as *long syllables*.”—*Ib.*, 8vo, p. 241.

(5.) “In the words *scarecrow*, *wherefore*, both the syllables are *unquestionably long*, but not of equal length. We presume *therefore*, that the syllables under consideration, [i.e., those which end with the sound of *e* or *o* without accent,] may also be properly styled *long syllables*, though their length is not equal to that of some others.”—*Murray’s Octavo Gram.*, p. 241.

OBS. 19.—Sheridan’s “*infallible rule*, that no vowel ever has a long sound in an unaccented syllable,” is in striking contrast with three of these positions, and the exact truth of the matter is with neither author. But, for the accuracy of his doctrine, Murray appeals to “the authority of the judicious Walker,” which he thinks sufficient to prove any syllable long whose vowel is called so; while the important distinction suggested by Walker, in his Principles, No. 529, between “the length or shortness of the vowels,” and “that quantity which constitutes poetry,” is entirely overlooked. It is safe to affirm, that all the accented syllables occurring in the examples above, are *long*; and all the unaccented ones, *short*: for Murray’s long syllables vary in length, and his short ones in shortness, till not only the just proportion, but the actual relation, of long and short, is evidently lost with some of them. Does not *match* in “*match´less*,” *sad* in “*sad´ly*,” or *bub* in “*bub´ble*,” require more time, than *so* in “*al´so*,” *key* in “*tur´key*,” or *ly* in “*ho´ly*”? If so, four of the preceding positions are very faulty. And so, indeed, is the remaining one; for where is the sense of saying, that “when the accent falls *on a mute*, the syllable cannot be lengthened by *dwelling upon the semi-vowel*”? This is an apparent truism, and yet not true. For a semivowel in the middle or at the beginning of a syllable, may lengthen it as much as if it stood at the end. “*Cur*” and “*can*,” here given as protracted syllables, are certainly no longer by usage, and no more susceptible of protraction, than “*mat*” and “*not*,” “*art*” and “*ant*,” which are among the author’s examples of short quantity. And if a semivowel accented will make the syllable long, was it not both an error and a self-contradiction, to give “*bönnet*” and “*hünger*” as examples of quantity *shortened* by the accent? The syllable *man* has two semivowels; and the letter *l*, as in “*ful fil*,” is the most sonorous of consonants; yet, as we see above, among their false examples of short syllables accented, different authors have given the words “*man*” and “*man´ner*,” “*dismán´tle*” and “*com pel´*,” “*mas´ter*” and “*let´ter*,” with sundry other sounds which may easily be lengthened. Sanborn says, “The *breve* distinguishes a short syllable; as, *männer*.”—*Analytical Gram.*, p. 273. Parker and Fox say, “The Breve (thus ˘) is placed over a vowel to indicate *its short sound*; as, St. Hēlena.”—*English Gram.*, Part iii, p. 31. Both explanations of this sign are defective; and neither has a suitable example. The name “*St. Hēlē´nā*,” as pronounced by Worcester, and as commonly heard, is two trochees; but “*Hel´ena*,” for *Helen*, having the penult short, takes the accent on the first syllable, which is thereby *made long*, though the vowel sound is *called short*. Even Dr. Webster, who expressly notes the difference between

“long and short *vowels*” and “long and short *syllables*,” allows himself, on the very same page, to confound them: so that, of his three examples of a *short syllable*,—“*thāt, not, mēlon*,”—all are erroneous; two being monosyllables, which any emphasis must lengthen; and the third,—the word “*mēl’on*,”—with the first syllable marked short, and not the last! See *Webster’s Improved Gram.*, p. 157.

OBS. 20.—Among the latest of our English Grammars, is Chandler’s new one of 1847. The Prosody of this work is fresh from the mint; the author’s old grammar of 1821, which is the nucleus of this, being “confined to Etymology and Syntax.” If from anybody the public have a right to expect correctness in the details of grammar, it is from one who has had the subject so long and so habitually before him. “*Accent*” says this author, “is *the* stress on a syllable, *or letter*.”—*Chandler’s Common School Gram.*, p. 188. Now, if our less prominent words and syllables require any force at all, a definition so loose as this, may give accent to some words, or to all; to some syllables, or to all; to some letters, or to all—except those which are *silent*! And, indeed, whether the stress which distinguishes some monosyllables from others, is supposed by the writer to be accent, or emphasis, or both, it is scarcely possible to ascertain from his elucidations. “The term *emphasis*,” says he, “is used to denote a fuller sound of voice *after* certain words that come in *antithesis*; that is, contrast. ‘He can *write*, but he cannot *read*.’ Here, *read* and *write* are *antithetical* (that is, in contrast), and are *accented*, or *emphasized*.”—P. 189. The word “*after*” here may be a misprint for the word *upon*; but no preposition really suits the connexion: the participle *impressing* or *affecting* would be better. Of *quantity*, this work gives the following account: “The *quantity* of a *syllable* is that time which is required to pronounce it. A syllable may be *long* or *short*. *Hate* is long, as the vowel *a* is elongated by the final *e*; *hat* is short, and requires about half the time for pronunciation which is used for pronouncing *hate*. So of *ate*, *at*; *bate*, *bat*; *cure*, *cur*. Though unaccented syllables are usually short, yet *many* of those which are accented are short also. The following are short: *ādvent*, *sin’ner*, *sup’per*. In the following, the unaccented syllables are long: *ālsō*, *ēxile*, *gāngrene*, *ūmpire*. It maybe remarked, that the quantity of a syllable is short when the accent is on a consonant; as, *art’*, *bon’net*, *hun’ger*. The *hyphen* (-), placed over a syllable, denotes that it is long: *nā’ture*. The breve (˘) over a syllable, denotes that it is short; as, *dētrāct*.”—*Chandler’s Common School Gram.*, p. 189. This scheme of quantity is truly remarkable for its absurdity and confusion. What becomes of the elongating power of *e*, without accent or emphasis, as in *jun’cate*, *pal’ate*, *prel’ate*? Who does not know that such syllables as “*at*, *bat*, and *cur*” are often long in poetry? What more absurd, than to suppose both syllables short in such words as, “*ādvent*, *sin’ner*, *sup’per*,” and then give “*sermōn*, *filtēr*, *spīrīt*, *gāthēr*,” and the like, for regular trochees, with “the first syllable long, and the second short,” as does this author? What more contradictory and confused, than to pretend that the primal sound of a vowel lengthens an unaccented syllable, and accent on the consonant shortens an accented one, as if in “*āl’sō*” the first syllable must be short and the second long, and then be compelled, by the evidence of one’s senses to mark “*echō*” as a trochee, and “*dētrāct*” as an iambus? What less pardonable misnomer, than for a great critic to call the sign of long quantity a “*hyphen*”?

OBS. 21.—The following suggestions found in two of Dr. Webster’s grammars, are not far from the truth: “Most prosodians who have treated particularly of this subject, have been guilty of a fundamental error, in considering the movement of English verse as depending on long and short syllables, formed by long and short vowels. This hypothesis has led them into capital mistakes. The truth is, many of those syllables which are considered as *long* in verse, are formed by the shortest vowels in the language; as,

*strength, health, grand*. The doctrine that long vowels are necessary to form long syllables in poetry is at length exploded, and the principles which regulate the movement of our verse, are explained; viz. *accent* and *emphasis*. Every emphatical word, and every accented syllable, will form what is called in verse, a long syllable. The unaccented syllables, and unemphatical monosyllabic words, are considered as short syllables.”—*Webster’s Philosophical Gram.*, p. 222; *Improved Gram.*, 158. Is it not remarkable, that, on the same page with this passage, the author should have given the first syllable of “*melon*” as an example of *short* quantity?

OBS. 22.—If the principle is true, which every body now takes for granted, that the foundation of versifying is some distinction pertaining to syllables; it is plain, that nothing can be done towards teaching the Art of Measuring Verses, till it be known *upon what distinction* in syllables our scheme of versification is based, and by what rule or rules the discrimination is, or ought to be, made. Errors here are central, radical, fundamental. Hence the necessity of these present disquisitions. Without some effectual criticism on their many false positions, prosodists may continue to theorize, dogmatize, plagiarize, and blunder on, as they have done, indefinitely, and knowledge of the rhythmic art be in no degree advanced by their productions, new or old. For the supposition is, that in general the consulters of these various oracles are persons more fallible still, and therefore likely to be misled by any errors that are not expressly pointed out to them. In this work, it is assumed, that *quantity*, not laboriously ascertained by “a great variety of rules applied from the Greek and Latin Prosody,” but discriminated on principles of our own—*quantity*, dependent in some degree on the nature and number of the letters in a syllable, but still more on the presence or absence of stress—is the true foundation of our metre. It has already been stated, and perhaps proved, that this theory is as well supported by authority as any; but, since Lindley Murray, persuaded wrong by the positiveness of Sheridan, exchanged his scheme of feet formed by quantities, for a new one of “feet formed by accents”—or, rather, for an impracticable mixture of both, a scheme of supposed “*duplicates* of each foot”—it has been becoming more and more common for grammarians to represent the basis of English versification to be, not the distinction of long and short quantities, but the recurrence of *accent* at certain intervals. Such is the doctrine of Butler, Felton, Fowler, S. S. Greene, Hart, Hiley, R. C. Smith, Weld, Wells, and perhaps others. But, in this, all these writers contradict themselves; disregard their own definitions of accent; count monosyllables to be accented or unaccented; displace emphasis from the rank which Murray and others give it, as “the great regulator of quantity;” and suppose the length or shortness of syllables not to depend on the presence or absence of either accent or emphasis; and not to be of much account in the construction of English verse. As these strictures are running to a great length, it may be well now to introduce the poetic feet, and to reserve, for notes under that head, any further examination of opinions as to what constitutes the *foundation* of verse.

### SECTION III.—OF POETIC FEET.

A verse, or line of poetry., consists of successive combinations of syllables, called *feet*. A poetic *foot*, in English, consists either of two or of three syllables, as in the following examples:

1. “Cān tȳ | -rānts būt | bȳ tȳ | -rānts cōn | -quēred bē?”—*Byron*.
2. “Hōlȳ, | hōlȳ, | hōlȳ! | āll thē | sāints ā | -dōre thēe.”—*Heber*.
3. “And thē brēath | ōf thē Dē | -itȳ cīr | -clēd thē roōm.”—*Hunt*.

4. "Hail tō thē | chief whō in | trīumph ād | -vāncēs!"—*Scott*.

### EXPLANATIONS AND DEFINITIONS.

Poetic feet being arbitrary combinations, contrived merely for the measuring of verses, and the ready ascertainment of the syllables that suit each rhythm, there is among prosodists a perplexing diversity of opinion, as to the *number* which we ought to recognize in our language. Some will have only two or three; others, four; others, eight; others, twelve. The dozen are all that can be made of two syllables and of three. Latinists sometimes make feet of four syllables, and admit sixteen more of these, acknowledging and naming twenty-eight in all. The *principal* English feet are the *Iambus*, the *Trochee*, the *Anapest*, and the *Dactyl*.

1. The *Iambus*, or *Iamb*, is a poetic foot consisting of a short syllable and a long one; as, *bētrāy*, *cōnfēss*, *dēmānd*, *intent*, *dēgrēe*.

2. The *Trochee*, or *Choree*, is a poetic foot consisting of a long syllable and a short one; as, *hātefūl*, *pētīsh*, *lēgāl*, *mēasūre*, *hōlŷ*.

3. The *Anapest* is a poetic foot consisting of two short syllables and one long one; as, *cōntrāvēne*, *ācquīēsce*, *impōrtūne*.

4. The *Dactyl* is a poetic foot consisting of one long syllable and two short ones; as, *lābōurēr*, *pōssiblē*, *wōndērfūl*.

These are our principal feet, not only because they are oftenest used, but because each kind, with little or no mixture, forms a distinct order of numbers, having a peculiar rhythm. Of verse, or poetic measure, we have, accordingly, four principal kinds, or orders; namely, *Iambic*, *Trochaic*, *Anapestic*, and *Dactylic*; as in the four lines cited above.

The more pure these several kinds are preserved, the more exact and complete is the chime of the verse. But exactness being difficult, and its sameness sometimes irksome, the poets generally indulge some variety; not so much, however, as to confound the drift of the rhythmical pulsations: or, if ever these be not made obvious to the reader, there is a grave fault in the versification.

The *secondary* feet, if admitted at all, are to be admitted only, or chiefly, as occasional diversifications. Of this class of feet, many grammarians adopt four; but they lack agreement about the selection. Brightland took the *Spondee*, the *Pyrrhic*, the *Moloss*, and the *Tribrach*. To these, some now add the other four; namely, the *Amphibrach*, the *Amphimac*, the *Bacchy*, and the *Antibacchy*.

Few, if any, of these feet are really *necessary* to a sufficient explanation of English verse; and the adopting of so many is liable to the great objection, that we thereby produce different modes of measuring the same lines. But, by naming them all, we avoid the difficulty of selecting the most important; and it is proper that the student should know the import of all these prosodical terms.

5. A *Spondee* is a poetic foot consisting of two long syllables; as, *cōld nīght*, *pōōr sōuls*, *āmēn*, *shrōvetīde*.

6. A *Pyrrhic* is a poetic foot consisting of two short syllables; as, presumpt-|ũōūs, perpet-|ũāl, unhap-|pīļ, inglo-|rīōūs.

7. A *Moloss* is a poetic foot consisting of three long syllables; as, *Deāth's pāle hōrse*,—*greāt whīte thrōne*,—*dēep dāmp vāūlt*.

8. A *Tribrach* is a poetic foot consisting of three short syllables; as, *prohib-|ītōry*, *unnat-|ūrāllŷ*, *author-|ītātīve*, *innum-|ērāblē*.

9. An *Amphibrach* is a poetic foot of three syllables, having both sides short, the middle long; as, *imprūdēnt*, *cōnsīdēr*, *trānsportēd*.

10. An *Amphimac*, *Amphimacer*, or *Cretic*, is a poetic foot of three syllables, having both sides long, the middle short; as, *wīndingshēet*, *life-ēstāte*, *sōul-dīsēased*.

11. A *Bacchy* is a poetic foot consisting of one short syllable and two long ones; as, *thē whōle wōrld*,—*ā greāt vāse*,—*ōf pūre gōld*.

12. An *Antibacchy*, or *Hypobacchy*, is a poetic foot consisting of two long syllables and a short one; as, *knīght-sērvīce*, *glōbe-dāisŷ*, *grāpe-flowēr*, *gōld-bēatēr*.

Among the variegations of verse, one emphatic syllable is sometimes counted for a foot. "When a single syllable is [thus] taken by itself, it is called a *Cæsura*, which is commonly a long syllable."\*

### OBSERVATIONS.

OBS. 1.—In defining our poetic feet, many late grammarians substitute the terms *accented* and *unaccented* for *long* and *short*, as did Murray, after some of the earlier editions of his grammar; the only feet recognized in his *second* edition being the *Iambus*, the *Trochee*, the *Dactyl*, and the *Anapest*, and all these being formed by *quantities* only. This change has been made on the supposition, that accent and long quantity, as well as their opposites, nonaccent and short quantity, may oppose each other; and that the basis of English verse is not, like that of Latin or Greek poetry, a distinction in the *time* of syllables, not a difference in *quantity*, but such a course of accenting and nonaccenting as overrides all relations of this sort, and makes both length and shortness compatible alike with stress or no stress. Such a theory, I am persuaded, is untenable. Great authority, however, may be quoted for it, or for its principal features. Besides the several later grammarians who give it countenance, even "the judicious Walker," who, in his *Pronouncing Dictionary*, as before cited, very properly suggests a difference between "*that quantity which constitutes poetry*," and the mere "*length or shortness of vowels*," when he comes to explain our English accent and quantity, in his "*Observations on the Greek and Latin Accent and Quantity*," finds "accent perfectly compatible with either long or short quantity;" (*Key*, p. 312;) repudiates that vulgar accent of Sheridan and others, which "is only a greater force upon one syllable than another;" (*Key*, p. 313;) prefers the doctrine which "makes the elevation or depression of the voice inseparable from accent;" (*Key*, p. 314;) holds that, "unaccented vowels are frequently pronounced long when the accented vowels are short;" (*Key*, p. 312;) takes long or short *vowels* and long or short *syllables* to

\* *Dr. Adam's Gram.*, p. 267; *B. A. Gould's*, 257. The Latin word *cæsura* signifies "a cutting, or *division*." This name is sometimes Anglicized, and written "Cesure." See *Brightland's Gram.*, p. 161; or *Worcester's Dict.*, *w. Cesure*.

be things everywhere tantamount; saying, “We have *no conception* of quantity arising from any thing but the nature of the vowels, as they are pronounced long or short;” (*ibid.*;) and again: “Such long quantity” as consonants may produce with a close or short vowel, “an English ear *has not the least idea of*. Unless the sound of the vowel be altered, we have *not any conception* of a long or short syllable.”—*Walker’s Key*, p. 322; and *Worcester’s Octavo Dict.*, p. 935.

OBS. 2.—In the opinion of Murray, Walker’s authority should be thought sufficient to settle any question of prosodial quantities. “But,” it is added, “there are some critical writers, who dispute the propriety of his arrangement.”—*Murray’s Octavo Gram.*, p. 241. And well there may be; not only by reason of the obvious incorrectness of the foregoing positions, but because the great orthoëpist is not entirely consistent with himself. In his “*Preparatory Observations*,” which introduce the very essay above cited, he avers that, “the different states of the voice,” which are indicated by the comparative terms *high* and *low*, *loud* and *soft*, *quick* and *slow*, *forcible* and *feeble*, “may not improperly be called *quantities* of sound.”—*Walker’s Key*, p. 305. Whoever thinks this, certainly conceives of quantity as arising from *several other things* than “the nature of the vowels.” Even Humphrey, with whom, “Quantity differs materially from time,” and who defines it, “the weight, or aggregate quantum of sounds,” may find his questionable and unusual “conception” of it included among these.

OBS. 3.—Walker must have seen, as have the generality of prosodists since, that such a distinction as he makes between long syllables and short, could not possibly be the basis of English versification, or determine the elements of English feet; yet, without the analogy of any known usage, and contrary to our customary mode of reading the languages, he proposes it as applicable—and as the only doctrine conceived to be applicable—to Greek or Latin verse. Ignoring all long or short quantity not formed by what are called long or short vowels,\* he suggests, “*as a last refuge*,” (§25,) the very doubtful scheme of reading Latin and Greek poetry with the vowels conformed, agreeably to this English sense of *long* and *short* vowel sounds, to the ancient rules of quantity. Of such words as *fallo* and *ambo*, pronounced as we usually utter them, he says, “*nothing can be more evident* than the long quantity of the final vowel though without the accent, and the short quantity of the initial and accented syllable.”—*Obs. on Greek and Lat. Accent*, §23; *Key*, p. 331. Now the very reverse of this appears to me to be “evident.” The *a*, indeed, may be close or short, while the *o*, having its primal or *name* sound, is *called* long; but the first *syllable*, if fully accented, will have *twice the time* of the second; nor can this proportion be reversed but by changing the accent, and misplacing it on the latter syllable. Were the principle *true*, which the learned author pronounces so “evident,” these, and all similar words, would constitute *iambic feet*; whereas it is plain, that in English they are *trochees*; and in Latin,—where “*o* final is *common*,”—either *trochees* or *spondees*. The word *ambo*, as

\* “As to the long quantity arising from the succession of two consonants, which the ancients are uniform in asserting, if it did not mean that the preceding vowel was to lengthen its sound, *as we should do* by pronouncing the *a* in *scatter* as we do in *skater*, (one who skates,) *I have no conception of what it meant*; for if it meant that only the *time of the syllable* was prolonged, the vowel retaining the same sound, I must confess as utter an inability of *comprehending this source* of quantity in the Greek and Latin as in English.”—*Walker on Gr. and L. Accent*, §24; *Key*, p. 331. This distinguished author seems unwilling to admit, that the consonants occupy time in their utterance, or that other vowel sounds than those which *name* the vowels, can be protracted and become long; but these are *truths*, nevertheless; and, since every letter adds *something* to the syllable in which it is uttered, it is by consequence a “*source of quantity*,” whether the syllable be long or short.

every accurate scholar knows, is always a *trochee*, whether it be the Latin adjective for “*both*,” or the English noun for “*a reading desk*, or *pulpit*.”

OBS. 4.—The names of our poetic feet are all of them derived, by change of endings, from similar names used in Greek, and thence also in Latin; and, of course, English words and Greek or Latin, so related, are presumed to stand for things somewhat similar. This reasonable presumption is an argument, too often disregarded by late grammarians, for considering our poetic feet to be quantitative, as were the ancient,—not accentual only, as some will have them,—nor separately both, as some others absurdly teach. But, whatever may be the difference or the coincidence between English verse and Greek or Latin, it is certain, that, in *our* poetic division of syllables, strength and length must always concur, and any scheme which so contrasts accent with long quantity, as to confound the different species of feet, or give contradictory names to the same foot, must be radically and grossly defective. In the preceding section it has been shown, that the principles of quantity adopted by Sheridan, Murray, and others, being so erroneous as to be wholly nugatory, were as unfit to be the basis of English verse, as are Walker’s, which have just been spoken of. But, the puzzled authors, instead of reforming these their elementary principles, so as to adapt them to the quantities and rhythms actually found in our English verse, have all chosen to assume, that our poetical feet in general *differ radically* from those which the ancients called by the same names; and yet the *coincidence* found—the “*exact sameness of nature*” acknowledged—is sagely said by some of them *to duplicate each foot into two distinct sorts for our especial advantage*; while the *difference*, which they presume to exist, or which their false principles of accent and quantity would create, between feet quantitative and feet accentual, (both of which are allowed to us,) would *implicate different names*, and convert foot into foot—iambes, trochees, spondees, pyrrhics, each species into some other—till all were confusion!

OBS. 5.—In Lindley Murray’s revised scheme of feet, we have first a paragraph from Sheridan’s Rhetorical Grammar, suggesting that the ancient poetic measures were formed of syllables divided “into *long* and *short*,” and affirming, what is not very true, that, for the forming of ours, “In English, syllables are divided into *accented* and *unaccented*.”—*Rhet. Gram.*, p. 64; *Murray’s Gram.*, 8vo, 253; *Hart’s Gram.*, 182; and others. Now *some* syllables are accented, and others are unaccented; but syllables singly significant, i.e., monosyllables, which are very numerous, belong to neither of these classes. The contrast is also comparatively new; our language had much good poetry, long before *accented* and *unaccented* were ever thus misapplied in it. Murray proceeds thus: “When the feet are formed by *accent on vowels*, they are *exactly of the same nature as ancient feet*, and have the same just quantity in their syllables. So that, in this respect, *we have all that the ancients had*, and something which they had not. We have in fact *duplicates of each foot*, yet with such a *difference*, as to fit them for *different purposes*, to be applied at our pleasure.”—*Ib.*, p. 253. Again: “*We* have observed, that *English verse is composed of feet formed by accent*; and that when the accent falls on *vowels*, the feet are equivalent to those formed by quantity.”—*Ib.*, p. 258. And again: “From the preceding view of English versification, we may see *what a copious stock of materials* it possesses. For *we are not only allowed the use of all the ancient poetic feet*, in our *heroic measure*, but we have, as before observed, *duplicates of each*, agreeing in movement, though differing in measure,\*

\* Murray has here a marginal note, as follows: “Movement and measure are thus distinguished. *Movement* expresses the progressive order of sounds, whether from strong to weak, from long to short, or vice versa. *Measure* signifies the proportion of time, both in sounds *and pauses*.”—*Octavo Gram.*, p. 259.

*and which* make different impressions on the ear; *an opulence peculiar* to our language, *and which* may be the source of a boundless variety.”—*Ib.*, p. 259.

OBS. 6.—If it were not dullness to overlook the many errors and inconsistencies of this scheme, there should be thought a rare ingenuity in thus turning them all to the great advantage and peculiar riches of the English tongue! Besides several grammatical faults, elsewhere noticed, these extracts exhibit, first, the inconsistent notion—of “*duplicates with a difference*,” or, as Churchill expresses it, of “*two distinct species of each foot*,” (*New Gram.*, p. 189;) and here we are gravely assured withal, that these *different sorts*, which have no separate names, are sometimes forsooth, “*exactly of the same nature*”! Secondly, it is incompatibly urged, that, “English verse is *composed of feet formed by accent*,” and at the same time shown, that it partakes largely of *feet “formed by quantity.”* Thirdly, if “*we have all that the ancients had*,” of poetic feet, and “*duplicates of each*,” “*which they had not*” we are encumbered with an enormous surplus; for, of the twenty-eight Latin feet,\* mentioned by Dr. Adam and others, Murray never gave the names of more than eight, and his early editions acknowledged *but four*, and these *single*, not “*duplicates*”—*unigenous*, not severally of “*two species*.” Fourthly, to suppose a multiplicity of feet to be “*a copious stock of materials*” for versification, is as absurd as to imagine, in any other case, a variety of *measures* to be materials for producing the thing measured. Fifthly, “*our heroic measure*” is *iambic pentameter*, as Murray himself shows; and, to give to this, “*all the ancient poetic feet*,” is to bestow most of them where they are least needed. Sixthly, “*feet differing in measure*,” so as to “*make different impressions on the ear*,” cannot well be said to “*agree in movement*,” or to be “*exactly of the same nature*!”

OBS. 7.—Of the foundation of metre, *Wells* has the following account: “The *quantity* of a syllable is the relative time occupied in its pronunciation. A syllable may be *long* in quantity, as *fate*; or *short*, as *let*. The Greeks and Romans based their poetry on the quantity of syllables; but modern versification depends chiefly upon accent, the quantity of syllables being almost wholly disregarded.”—*School Gram.*, 1st Ed., p. 185. Again: “*Versification* is a measured arrangement of words[,] in which the *accent* is made to recur

---

This distinction is neither usual nor accurate; though Humphrey adopts it, with slight variations. Without some species of *measure*,—iambic, Trochaic, Anapestic, Dactylic, or some other,—there can be no regular *movement*, no “progressive *order* of sounds.” Measure is therefore too essential to movement to be in contrast with it. And the movement “from *strong* to *weak*, from *long* to *short*,” is but one and the same, a *trochaic* movement; its reverse, the movement, “*vice versa*,” from *weak* to *strong*, or from *short* to *long*, is, of course, that of *iambic* measure. But Murray’s doctrine is, that *strong* and *long*, *weak* and *short*, may be separated; that *strong* may be *short*, and *weak* be *long*; so that the movement from *weak* to *strong* may be from *long* to *short*, and *vice versa*: as if a trochaic movement might arise from iambic measure, and an iambic movement from trochaic feet! This absurdity comes of attempting to regulate the *movement* of verse by accent, and not by quantity, while it is admitted that quantity, and not accent, forms the *measure*, which “signifies *the proportion of time*.” The idea that *pauses belong to measure*, is an other radical error of the foregoing note. There are more pauses in poetry than in prose, but none of them are properly “*parts*” of either. Humphrey says truly, “*Feet* are the *constituent parts* of verse.”—*English Prosody*, p. 8. But L. Murray says, “Feet and pauses are the constituent parts of verse.”—*Octavo Gram.*, p. 252. Here Sheridan gave bias. Intending to treat of verse, and “the pauses peculiarly belonging to it,” the “*Cæsural*” pause and the “*Final*,” the rhetorician had *improperly* said, “The constituent *parts* of verse are, feet, and pauses.”—*Sheridan’s Rhetorical Gram.*, p. 64.

\* “But as many Ways as Quantities may be varied by Composition and Transposition, so many different Feet have the *Greek* Poets contriv’d, and that under distinct Names, from two to six Syllables, to the Number of 124. But it is the Opinion of some Learned Men in this Way, that Poetic Numbers may be sufficiently explain’d by those of two or three Syllables, into which the rest are to be resolv’d.”—*Brightland’s Grammar*, 7th Ed., p. 161.

at certain regular intervals. This definition applies only to modern verse. In Greek and Latin poetry, it is the regular recurrence of *long syllables*, according to settled laws, which constitutes verse.”—*Ib.*, p. 186. The contrasting of ancient and modern versification, since Sheridan and Murray each contrived an example of it, has become very common in our grammars, though not in principle very uniform; and, however needless where a correct theory prevails, it is, to such views of accent and quantity as were adopted by these authors, and by Walker, or their followers, but a necessary counterpart. The notion, however, that English verse has less regard to quantity than had that of the old Greeks or Romans, is a mere assumption, originating in a false idea of what quantity is; and, that Greek or Latin verse was less accentual than is ours, is another assumption, left proofless too, of what many authors disbelieve and contradict. Wells’s definition of quantity is similar to mine, and perhaps unexceptionable; and yet his idea of the thing, as he gives us reason to think, was very different, and very erroneous. His examples imply, that, like Walker, he had “no conception of quantity arising from any thing but the nature of the vowels,”—no conception of a long or a short *syllable* without what is called a long or a short *vowel sound*. That “the Greeks and Romans based their poetry on quantity” of that restricted sort,—on *such “quantity”* as “*fate*” and “*let*” may serve to discriminate,—is by no means probable; nor would it be more so, were a hundred great modern masters to declare themselves ignorant of any other. The words do not distinguish at all the long and short quantities even of our own language; much less can we rely on them for an idea of what is long or short in other tongues. Being monosyllables, both are long with emphasis, both short without it; and, could they be accented, accent too would lengthen, as its absence would shorten both. In the words *phosphate* and *streamlet*, we have the same sounds, both short; in *lettuce* and *fateful*, the same, both long. This cannot be disproved. And, in the scansion of the following stanza from Byron, the word “*Let*” twice used, is to be reckoned a *long* syllable, and not (as Wells would have it) a short one:

“Cavalier! and man of worth!  
*Let* these words of mine go forth;  
*Let* the Moorish Monarch know,  
 That to him I nothing owe:  
                     Wo is me, Alhama!”

OBS. 8.—In the English grammars of Allen H. Weld, works remarkable for their egregious inaccuracy and worthlessness, yet honoured by the Boston school committee of 1848 and ‘9, the author is careful to say, “Accent should not be confounded with emphasis. *Emphasis* is a stress of voice on a word in a sentence, to mark its importance. *Accent* is a stress of voice on a syllable in a word.” Yet, within seven lines of this, we are told, that, “A *verse* consists of a certain number of *accented and unaccented syllables*, arranged according to certain rules.”—*Weld’s English Grammar*, 2d Edition, p. 207; “Abridged Edition,” p. 137. A doctrine cannot be contrived, which will more evidently or more extensively confound accent with emphasis, than does this! In English verse, on an average, about three quarters of the words are monosyllables, which, according to Walker, “have no accent,” certainly none distinguishable from emphasis; hence, in fact, our syllables are no more “divided into *accented* and *unaccented*” as Sheridan and Murray would have them, than into *emphasized* and *unemphasized*, as some others have thought to class them. Nor is this confounding of accent with emphasis at all lessened or palliated by teaching with Wells, in its justification, that, “The term *accent* is also applied, in poetry, to *the* stress laid on monosyllabic words.”—*Wells’s School Gram.*, p. 185; 113th Ed., §273. What better is this, than to apply the term *emphasis* to the accenting of syllables in

poetry, or to all the stress in question, as is virtually done in the following citation? “In English, verse is regulated by the *emphasis*, as there should be one *emphatic* syllable in every foot; for it is by the interchange of *emphatick* and *non-emphatick* syllables, that verse grateful to the ear is formed.”—*Thomas Coar’s E. Gram.*, p. 196. In Latin poetry, the longer words predominate, so that, in Virgil’s verse, not one word in five is a monosyllable; hence accent, if our use of it were adjusted to the Latin quantities, might have much more to do with Latin verse than with English. With the following lines of Shakspeare, for example, accent has, properly speaking, no connexion;

“Good friend, thou hast no cause to say so yet;  
But thou shalt have; and creep time ne’er so slow,  
Yet it shall come, for me to do thee good.  
I had a thing to say,—But let it go.”—*King John*, *Act* iii, *Sc.* 3.

OBS. 9.—T. O. Churchill, after stating that the Greek and Latin rhythms are composed of syllables long and short, sets ours in contrast with them thus: “These terms are commonly employed also in speaking of English verse, though it is marked, *not by long and short*, but by accented and unaccented syllables; the accented syllables being *accounted* long; the unaccented, short.”—*Churchill’s New Gram.*, p. 183. This, though far from being right, is very different from the doctrine of Murray or Sheridan; because, in practice, or the scansion of verses, it comes to the *same results* as to suppose all our feet to be “formed by quantity.” To *account* syllables long or short and not *believe* them to *be* so, is a ridiculous inconsistency: it is a shuffle in the name of science.

OBS. 10.—Churchill, though not apt to be misled by others’ errors, and though his own scanning has no regard to the principle, could not rid himself of the notion, that the quantity of a syllable must depend on the “vowel sound.” Accordingly he says, “Mr. Murray *justly observes*, that our accented syllables, or those reckoned long:, may have either *a long or [a] short vowel sound*, so that we have *two distinct species* of each foot.”—*New Gram.*, p. 189. The obvious impossibility of “two distinct species” in one,—or, as Murray has it, of “duplicates fitted for different purposes,”—should have prevented the teaching and repeating of this nonsense, propound it who might. The commender himself had not such faith in it as is here implied. In a note, too plainly incompatible with this praise, he comments thus: “Mr. Murray adds, that this is ‘an opulence *peculiar* to our language, and which may be the source of a boundless variety:’ a point, on which, I confess, *I have long entertained doubts*. I am inclined to suspect that the English mode of reading verse *is analogous* to that of the ancient Greeks and Romans. Dion. Hal., *de Comp.*, *Verb.* §xi, speaks of the *rhythm of verse differing* from the proper measure of the syllables, and often reversing it: does not this imply, that the ancients, contrary to the opinion of the learned author of Metronariston, read verse as we do?”—*Churchill’s New Gram.*, p. 393, note 329.

OBS. 11.—The nature, chief sources, and true distinction of *quantity*, at least as it pertains to our language, I have set forth with clearness, first in the short chapter on Utterance, and again, more fully in this, which treats of Versification; but that the syllables, long and short, of the old Greek and Latin poets, or the feet they made of them, are to be expounded on precisely the same principles that apply to ours. I have not deemed it necessary to affirm or to deny. So far as the same laws are applicable, let them be applied. This important property of syllables,—their *quantity*, or relative time,—which is the basis of all rhythm, is, as my readers have seen, very variously treated, and in general

but ill appreciated, by our English prosodists, who ought, at least in this their own province, to understand it all alike, and as it is; and so common among the erudite is the confession of Walker, that “the accent and quantity of the ancients” are, to modern readers, “obscure and mysterious,” that it will be taken as a sign of arrogance and superficiality, to pretend to a very certain knowledge of them. Nor is the difficulty confined to Latin and Greek verse: the poetry of our own ancestors, from any remote period, is not easy of scansion. Dr. Johnson, in his *History of the English Language*, gave examples, with this remark: “Of the *Saxon* poetry some specimen is necessary, though our ignorance of the laws of their metre and the quantities of their syllables, *which it would be very difficult, perhaps impossible, to recover*, excludes us from that pleasure which the old bards undoubtedly gave to their contemporaries.”

OBS. 12.—The imperfect measures of “the father of English poetry,” are said by *Dryden* to have been *adapted to the ears* of the rude age which produced them. “The verse of Chaucer,” says he, “I confess, is not harmonious to us; but it is like the eloquence of one whom Tacitus commends, it was *auribus istius temporis accommodata*:’ they who lived with him, and sometime after him, thought it musical; and it continues so even in our judgment, if compared with the numbers of Lidgate and Gower, his contemporaries: there is the rude sweetness of a Scotch tune in it, which is natural and pleasing, though not perfect. It is true, I cannot go so far as he who published the last edition of him; for he would make us believe that the fault is in *our ears*, and that there were really ten syllables in a verse where we find but nine: but this opinion is not worth confuting; it is so gross and obvious an error, that common sense (which is a rule in every thing but matters of faith and revelation) must convince the reader that equality of numbers in every verse, which we call Heroic, was either not known, or not always practised in Chaucer’s age. It were an easy matter to produce some thousands of his verses, which are lame for want of half a foot, and sometimes a whole one, and which no pronunciation can make otherwise. We can only say, that he lived in the infancy of our poetry, and that nothing is brought to perfection at the first.”—*British Poets*, Vol. iii, p. 171.

OBS. 13.—Dryden appears to have had more faith in the ears of his own age than in those of an earlier one; but Poe, of our time, himself an ingenious versifier, in his *Notes upon English Verse*, conveys the idea that all ears are alike competent to appreciate the elements of metre. “Quantity,” according to his dogmatism, “is a point in the investigation of which the lumber of mere learning may be dispensed with, if ever in any. *Its appreciation*” says he, “*is universal*. It appertains to no region, nor race, nor era in especial. To melody and to harmony the Greeks hearkened with ears precisely similar to those which we employ, for similar purposes, at present; and a pendulum at Athens would have vibrated much after the same fashion as does a pendulum in the city of Penn.”—*The Pioneer*, Vol. i. p. 103. Supposing here not even the oscillations of the same pendulum to be more uniform than are the nature and just estimation of quantity the world over, this author soon after expounds his idea of the thing as follows: “I have already said that all syllables, in metre, are either long or short. Our usual prosodies maintain that a long syllable is equal, in its time, to two short ones; this, however, is but an approach to the truth. It should be here observed that the quantity of an English syllable *has no dependence upon* the sound of its vowel or diphthong [diphthong], but [depends] chiefly upon *accentuation*. Monosyllables are exceedingly variable, and, for the most part, may be either long or short, to suit the demand of the rhythm. In polysyllables, the accented *ones* [say, *syllables*] are always long, while those which immediately precede or succeed them, are always short. *Emphasis* will render any short syllable long.”—*Ibid.*, p. 105. In penning

the last four sentences, the writer must have had Brown's Institutes of English Grammar before him, and open at page 235.

OBS. 14.—Sheridan, in his Rhetorical Grammar, written about 1780, after asserting that a distinction of accent, and not of quantity, marks the movement of English verse, proceeds as follows: "From not having examined the peculiar genius of our tongue, our Prosodians have fallen into a variety of errors; some having adopted the rules of our neighbours, the French; and others having had recourse to those of the ancients; though neither of them, in reality, would square with our tongue, on account of an essential difference *between them*. [He means, "*between each language and ours*," and should have said so.] With regard to the French, they measured verses by the number of syllables whereof they were composed, on account of a constitutional defect in their tongue, which rendered it incapable of numbers formed by poetic feet. For it has neither accent nor quantity suited to the purpose; the syllables of their words being for the most part equally accented; and the number of long syllables being out of all proportion greater than that of the short. Hence for a long time it was supposed, *as it is by most people at present*, that our verses were composed, not of feet, but syllables; and accordingly they *are denominated* verses often, eight, six, or four syllables, *even to this day*. Thus have we lost sight of the great advantage which our language has given us over the French, in point of poetic numbers, by its being capable of a geometrical proportion, on which the harmony of versification depends; and blindly reduced ourselves to that of the arithmetical kind which contains no natural power of pleasing the ear. And hence like the French, our chief pleasure in verse arises from the poor ornament of rhyme."—*Sheridan's Rhetorical Gram.*, p. 64.

OBS. 15.—In a recent work on this subject, Sheridan is particularly excepted, and he alone, where Hallam, Johnson, Lord Kames, and other "Prosodians" in general, are charged with "astonishing ignorance of the first principles of our verse;" and, at the same time, he is as particularly commended of having "especially insisted on the subject of Quantity."—*Everett's English Versification*, Preface, p. 6. That the rhetorician was but slenderly entitled to these compliments, may plainly appear from the next paragraph of his Grammar just cited; for therein he mistakingly represents it as a central error, to regard our poetic feet as being "formed by quantity" at all. "Some few of our Prosodians," says he, "finding this to be an error, and that our verses were really composed of feet, not syllables, without farther examination, boldly applied all the rules of the Latin prosody to our versification; though scarce any of them answered exactly, and some of them were utterly incompatible with the genius of our tongue. *Thus because the Roman feet were formed by quantity, they asserted the same of ours, denominating all the accented syllables long; whereas I have formerly shewn, that the accent, in some cases, as certainly makes the syllable on which it is laid, short, as in others it makes it long.* And their whole theory of quantity, borrowed from the Roman, in which they endeavour to establish the proportion of long and short, as immutably fixed to the syllables of words constructed in a certain way, at once falls to the ground; when it is shewn, that the quantity of our syllables is *perpetually varying with the sense*, and is *for the most part regulated by EMPHASIS*: which has been fully proved in the course of Lectures on the Art of reading Verse; where it has been also shewn, that *this very circumstance* has given us an *amazing advantage over the ancients* in the point of poetic numbers."—*Sheridan's Rhetorical Gram.*, p. 64.

OBS. 16.—The lexicographer here claims to have “*shewn*” or “*proved*,” what he had only *affirmed*, or *asserted*. Erroneously taking the quality of the vowel for the quantity of the syllable, he had suggested, in his confident way, that short quantity springs from the accenting of *consonants*, and long quantity, from the accenting of *vowels*—a doctrine which has been amply noticed and refuted in a preceding section of the present chapter. Nor is he, in what is here cited, consistent with himself. For, in the first place, nothing comes nearer than this doctrine of his, to an “endeavour to establish the proportion of long and short, as immutably fixed to the syllables of words constructed in a certain way”! Next, although he elsewhere contrasts accent and emphasis, and supposes them different, he either confounds them in reference to verse, or contradicts himself by ascribing to each the chief control over quantity. And, lastly, if our poetic feet are not quantitative, not formed of syllables long and short, as were the Roman, what “advantage over the ancients,” can we derive from the fact, that quantity is regulated by stress, whether accent or emphasis?

OBS. 17.—We have, I think, no prosodial treatise of higher pretensions than Erastus Everett’s “System of English Versification,” first published in 1848. This gentleman professes to have borrowed no idea but what he has regularly quoted. “He mentions this, that it may not be supposed that this work is a compilation. It will be seen,” says he, “how great a share of it is original; and the author, having deduced his rules from the usage of the great poets, has the best reason for being confident of their correctness.”—*Preface*, p. 5. Of the place to be filled by this System, he has the following conception: “It is thought to supply an important desideratum. It is a matter of surprise to the foreign student, who attempts the study of English poetry and the structure of its verse, to find that *we have no work on which he can rely as authority on this subject*. In the other modern languages, the most learned philologers have treated of the subject of versification, in all its parts. In English alone, in a language which possesses a body of poetical literature more extensive, as well as more valuable than any other modern language, not excepting the Italian, *the student has no rules to guide him*, but a few meagre and incorrect outlines appended to elementary text-books.” Then follows this singularly inconsistent exception: “We must except from this remark two works, published in the latter part of the sixteenth century. But as they were written before the poetical language of the English tongue was fixed, and as the rules of verse were not then settled, these works can be of little practical utility.”—*Preface*, p. 1. The works thus excepted as of *reliable authority without practical utility*, are “a short tract by *Gascoyne*,” doubtless *George Gascoigne’s* ‘Notes of Instruction concerning the making of Verse or Rhyme in English,’ published in 1575, and Webbe’s ‘Discourse of English Poetry,’ dated 1586, neither of which does the kind exceptor appear to have ever seen! Mention is next made, successively, of Dr. Carey, of *Dryden*, of Dr. Johnson, of Blair, and of Lord Kames. “To these *guides*,” or at least to the last two, “the author is indebted for many valuable hints;” yet he scruples not to say, “Blair betrays a paucity of knowledge on this subject;”—“Lord Kames has slurred over the subject of Quantity,” and “shown an unpardonable ignorance of the first principles of Quantity in our verse;”—and, “Even Dr. Johnson speaks of syllables in such a manner as would lead us to suppose that he was in the same error as Kames. These inaccuracies,” it is added, “can be accounted for only from the fact that Prosodians have not thought *Quantity* of sufficient importance to merit their attention.”—See *Preface*, p. 4-6.

OBS. 18.—Everett’s Versification consists of seventeen chapters, numbered consecutively, but divided into two parts, under the two titles Quantity and Construction. Its specimens of verse are numerous, various, and beautiful. Its modes of scansion—the

things chiefly to be taught—though perhaps generally correct, are sometimes questionable, and not always consonant with the writer's own rules of quantity. From the citations above, one might expect from this author such an exposition of quantity, as nobody could either mistake or gainsay; but, as the following platform will show, his treatment of this point is singularly curt and incomplete. He is so sparing of words as not even to have given a *definition* of quantity. He opens his subject thus: "VERSIFICATION is the proper arrangement of words in *a line* according to *their quantity*, and the disposition of *these lines in* couplets, stanzas, or in blank verse, in such order, and according to such rules, as are sanctioned by usage.—A FOOT is a combination of two or *more* syllables, whether long or short.—A LINE is one foot, or more than one.—The QUANTITY of each *word* depends on its *accent*. In words of more than one syllable, all accented syllables are long, and all unaccented syllables are short. Monosyllables are long or short, according to the following Rules:—1st. All Nouns, Adjectives, Verbs, and Participles are long.—2nd. The articles are always short.—3rd, The Pronouns are long or short, according to *emphasis*.—4th. Interjections and Adverbs are generally long, but sometimes *made short by emphasis*.—5th. Prepositions and Conjunctions are almost always *short*, but sometimes *made long by emphasis*."—*English Versification*, p. 13. None of these principles of quantity are unexceptionable; and whoever follows them implicitly, will often differ not only from what is right, but from their author himself in the analysis of verses. Nor are they free from important antagonisms. "Emphasis," as here spoken of, not only clashes with "accent," but contradicts itself, by making some syllables long and some short; and, what is more mysteriously absurd, the author says, "It *frequently happens* that syllables *long by* QUANTITY become *short by* EMPHASIS."—*Everett's Eng. Versif.*, 1st Ed., p. 99. Of this, he takes the first syllable of the following line, namely, "the word *bids*," to be an example:

"Bids mē līve bŭt tō hōpe fōr pōstērītŷ's prāise."

OBS. 19.—In the American Review, for May, 1848, Everett's System of Versification is named as "an apology and occasion"—not for a critical examination of this or any other scheme of prosody—but for the promulgation of a new one, a rival theory of English metres, "the principles and laws" of which the writer promises, "at an other time" more fully "to develop." The article referred to is entitled, "*The Art of Measuring Verses*." The writer, being designated by his initials, "J. D. W.," is understood to be James D. Whelpley, editor of the Review. Believing Everett's principal doctrines to be radically erroneous, this critic nevertheless excuses them, because he thinks we have nothing better! "The views supported in the work itself," says his closing paragraph, "*are not, indeed, such as we would subscribe to, nor can we admit the numerous analyses of the English metres which it contains to be correct*," yet, as it is as complete in design and execution as anything that has yet appeared on the subject, and well calculated to excite the attention, and direct the inquiries, of English scholars, to the study of our own metres, we shall even pass it by without a word of criticism."—*American Review, New Series*, Vol. I, p. 492.

OBS. 20.—Everett, although, as we have seen, he thought proper to deny that the student of English versification had any well authorized "rules to guide him," still argues that, "The laws of our verse are just as fixed, and may be as clearly laid down, if we but attend to the usage of the great Poets, as are the laws of our syntax."—*Preface*, p. 7. But this critic, of the American Review, ingenious though he is in many of his remarks, flippantly denies that our English Prosody has either authorities or principles which one ought to respect; and accordingly cares so little whom he contradicts, that he is often inconsistent with himself. Here is a sample: "As there are *no established authorities* in this

art, and, indeed, *no acknowledged principles*—every rhymester being permitted to *invent* his own *method*, and write by *instinct* or *imitation*—the critic feels quite at liberty to say just what he pleases, and *offer his private observations* as though these were really of some moment.”—*Am. Rev.*, Vol. i, p. 484. In respect to writing, “*to invent*,” and “*to imitate*,” are repugnant ideas; and so are, *after a “method*,” and “*by instinct*.” Again, what sense is there in making the “liberty” of publishing one’s “private observations” to depend on the presumed absence of rivals? That the author did not lack confidence in the general applicability of his speculations, subversive though they are of the best and most popular teaching on this subject, is evident from the following sentence: “We intend, also, that if these principles, with the others previously expressed, are true in the given instances, *they are equally true for all languages and all varieties of metre*, even to the denial that *any* poetic metres, founded on other principles, can properly exist.”—*Ib.*, p. 491

OBS. 21.—J. D. W. is not one of those who discard quantity and supply accent in expounding the nature of metre; and yet he does not coincide very nearly with any of those who have heretofore made quantity the basis of poetic numbers. His views of the rhythmical elements being in several respects *peculiar*, I purpose briefly to notice them here, though some of the peculiarities of this new “*Art of Measuring Verses*,” should rather be quoted under the head of *Scanning*, to which they more properly belong. “Of every species of beauty,” says this author, “and more especially of the beauty of sounds, *continuousness* is the *first element*; a succession of *pulses* of sound becomes agreeable, only when the breaks or intervals cease to be heard.” Again: “Quantity, or the *division into measures of time*, is a *second element* of verse; each line must be *stuffed out with sounds*, to a certain fullness and plumpness, that will sustain the voice, and force it to dwell upon the sounds.”—*Rev.*, p. 485. The first of these positions is subsequently contradicted, or very largely qualified, by the following: “So, the line of significant sounds, in a verse, is also marked by *accents*, or *pulses*, and divided into portions called *feet*. These are necessary and natural for the very simple reason that *continuity by itself is tedious*; and the greatest pleasure arises from the union of continuity with *variety*. [That is, with “*interruption*,” as he elsewhere calls it!] In the line,

‘Full màny a tàle their mùsic tèlls,’

there are at least four accents or stresses of the voice, with faint *pauses* after them, just enough to separate the continuous stream of sound into these four parts, to be read thus:

Fullman—yataleth—eirmus—ictells,\*

by which, new combinations of sound are produced, of a singularly musical character. It is evident from the inspection of the above line, that the division of the feet by the accents is quite independent of the division of words by the sense. The sounds are melted into continuity, and *re-divided again* in a manner agreeable to the musical ear.”—*Ib.*, p. 486. Undoubtedly, the due formation of our poetic feet occasions both a blending of some

\* “THE BELLS OF ST. PETERSBURGH.”

“Those ev’ning bells, those ev’ning bells,

How many a tale their music tells!”—*Moore’s Melodies*, p. 263.

This couplet, like all the rest of the piece from which it is taken, is iambic verse, and to be divided into feet thus:—

“Those ev’ | -ning bells, | those ev’ | -ning bells,

How man | -y a tale | their mu | -sic tells!”

words and a dividing of others, in a manner unknown to prose; but still we have the authority of this writer, as well as of earlier ones, for saying, “Good verse requires to be read *with the natural quantities of the syllables*,” (p. 487,) a doctrine with which that of the *redivision* appears to clash. If the example given be read with any regard to the *cæsural pause*, as undoubtedly it should be, the *th* of *their* cannot be joined, as above, to the word *tale*; nor do I see any propriety in joining the *s* of *music* to the third foot rather than to the fourth. Can a theory which turns topsyturvy the whole plan of syllabication, fail to affect “the *natural quantities* of syllables?”

OBS. 22—Different modes of reading verse, may, without doubt, change the quantities of very many syllables. Hence a correct mode of reading, as well as a just theory of measure, is essential to correct scansion, or a just discrimination of the poetic feet. It is a very common opinion, that English verse has but few spondees; and the doctrine of Brightland has been rarely disputed, that, “*Heroic Verses* consist of five *short*, and five *long* Syllables *intermixt*, but not so very strictly as never to alter that order.”—*Gram.*, 7th Ed., p. 160.\* J. D. W., being a heavy reader, will have each line so “*stuffed out with sounds*,” and the consonants so syllabled after the vowels, as to give to our heroics three spondees for every two iambuses; and lines like the following, which, with the elisions, I should resolve into four iambuses, and without them, into three iambuses and one anapest, he supposes to consist severally of four spondees:—

“When coldness wraps this suffering clay,  
Ah! whither strays the immortal mind?”

[These are] to be read,” according to this prosodian,

“Whencoldn—esswrapsth—issuffr—ingclay,  
Ah! whith—erstraysth’—immort—almind?”

“The verse,” he contends, “is perceived to consist of *six* [probably he meant to say *eight*] heavy syllables, each composed of a vowel followed by a group of consonantal sounds, the whole measured into four equal feet. The movement is what is called spondaic, a spondee being a foot of two heavy sounds. The absence of short syllables gives the line a peculiar weight and solemnity suited to the sentiment, and doubtless prompted by it.”—*American Review*, Vol. i, p. 487. Of his theory, he subsequently says: “It maintains that good English verse is as thoroughly quantitative as the Greek, though it be *much more heavy and spondaic*.”—*Ib.*, p. 491.†

OBS. 23—For the determining of quantities and feet, this author borrows from some old Latin grammar three or four rules, commonly thought inapplicable to our tongue, and, mixing them up with other speculations, satisfies himself with stating that the “Art of Measuring Verses” requires yet the production of many more such! But, these things being the essence of his principles, it is proper to state them *in his own words*: “A short

\* Lord Kames, too, speaking of “English Heroic verse,” says: “Every line consists of ten syllables, *five short and five long*; from which [rule] there are but two exceptions, both of them rare.”—*Elements of Criticism*, Vol. ii, p. 89.

† “The Latin is a far more *stately* tongue than our own. It is essentially *spondaic*; the English is as essentially *dactylic*. The *long* syllable is the spirit of the Roman (and Greek) verse; the *short* syllable is the essence of ours.”—*Poe’s Notes upon English Verse*; Pioneer, Vol. i, p. 110. “We must search for *spondaic words*, which, in English, are rare indeed.”—*Ib.*, p. 111.

vowel sound followed by a double consonantal sound, usually makes a *long* quantity;\* so also does a long vowel like *y* in *beauty*, before a consonant. The *metrical accents*, which *often differ from the prosaic*, mostly fall upon the heavy sounds; *which must also be prolonged in reading*, and never slurred or lightened, unless to help out a bad verse. In our language *the groupings of the consonants furnish a great number of spondaic feet*, and give the language, especially its more ancient forms, as in the verse of Milton and the prose of Lord Bacon, a grand and solemn character. One vowel followed by another, unless the first be *naturally made long* in the reading, makes a short quantity, as in *th[e] old*. So, also, a short vowel followed by a single short consonant, gives a short *time* or *quantity*, as in *tō give*. ☞ A great variety of rules for the detection of long and short quantities *have yet to be invented*, or applied from the Greek and Latin prosody. *In all languages they are of course the same*, making due allowance for difference of organization; but it is as absurd to suppose that the Greeks should have a system of prosody differing in principle from our own, as that their rules of musical harmony should be different from the modern. Both result from the nature of the ear and of *the organ of speech*, and are consequently *the same* in all ages and nations.”—*Am. Rev.*, Vol. i, p. 488.

OBS. 24.—QUANTITY is here represented as “*time*” only. In this author’s first mention of it, it is called, rather less accurately, “*the division into measures of time*.” With too little regard for either of these conceptions, he next speaks of it as including both “*time and accent*.” But I have already shown that “*accents* or *stresses*” cannot pertain to *short* syllables, and therefore cannot be ingredients of quantity. The whole article lacks that *clearness* which is a prime requisite of a sound theory. Take all of the writer’s next paragraph as an example of this defect: “The two elements of musical metre, *time* and *accent*, both together constituting *quantity*, are *equally* elements of the metre of verse. Each *iambic* foot or metre, is marked by a swell of the voice, concluding abruptly in an *accent*, or *interruption*, on the *last sound* of the foot; or, [omit this ‘or:’ it is improper,] in metres of the *trochaic* order, in such words as *dandy*, *handy*, *bottle*, *favor*, *labor*, it [the foot] begins with a heavy accented sound, and declines to a faint or light one at the close. The line is thus composed of a series of swells or waves of sound, *concluding and beginning alike*. The *accents*, or points at which the voice is most forcibly exerted in the feet, *being the divisions of time*, by which a part of its musical character is given to the verse, are *usually made to coincide*, in our language, with the accents of the words as they are spoken; which [coincidence] diminishes the musical character of our verse. In Greek hexameters and Latin hexameters, on the contrary, this coincidence is avoided, as tending to monotony and a prosaic character.”—*Ibid*.

OBS. 25.—The passage just cited represents “*accent*” or “*accents*” not only as partly constituting *quantity*, but as being, in its or their turn, “*the divisions of time*,”—as being also stops, pauses, or “*interruptions*” of sound else continuous;—as being of two sorts, “*metrical*” and “*prosaic*,” which “usually coincide,” though it is said, they “often differ,” and their “interference” is “very frequent,”—as being “the points” of stress “in the *feet*,” but not always such in “the *words*,” of verse;—as striking different feet differently, “each *iambic* foot” on the latter syllable and every *trochee* on the former, yet causing, in each line, only such waves of sound as conclude and begin “*alike*,”—as coinciding with the long quantities and “*the prosaic accents*,” in iambs and trochaics, yet not coinciding with these always;—as giving to verse “a part of its musical character,” yet *diminishing* that

\* “There is a rule, in Latin prosody, that a vowel *before two consonants* is long. We moderns have not only no such rule, but profess inability to comprehend its *rationale*.”—*Poe’s Notes: Pioneer*, p. 112.

character, by their usual coincidence with “*the prose accents*,”—as being kept distinct in Latin and Greek, “*the metrical*” from “*the prosaic*” and their “coincidence avoided,” to make poetry more poetical,—though the old prosodists, in all they say of accents, acute, grave, and circumflex, give no hint of this primary distinction! In all this elementary teaching, there seems to be a want of a clear, steady, and consistent notion of the things spoken of. The author’s theory led him to several strange combinations of words, some of which it is not easy, even with his whole explanation before us, to regard as other than *absurd*. With a few examples of his new phraseology, Italicized by myself, I dismiss the subject: “It frequently happens that *word and verse accent* fall differently.”—P. 489. “The *verse syllables*, like *the verse feet*, differ *in the prosaic and* [the] *metrical reading* of the line.”—*Ib.* “If we read it by *the prosaic syllabication*, there will be no possibility of measuring the quantities.”—*Ib.* “The metrical are perfectly distinct from the *prosaic properties of verse*.”—*Ib.* “It may be called *an iambic dactyl*, formed by the substitution of two short for one long time in the last portion of the foot. *Iambic spondees and dactyls* are to be distinguished by the *metrical accent* falling on the last syllable.”—P. 491.

#### SECTION IV.—THE KINDS OF VERSE.

The principal kinds of verse, or orders of poetic numbers, as has already been stated, are four; namely, *Iambic*, *Trochaic*, *Anapestic*, and *Dactylic*. Besides these, which are sometimes called “*the simple orders*” being unmixed, or nearly so, some recognize several “*Composite orders*” or (with a better view of the matter) several kinds of mixed verse, which are said to constitute “*the Composite order*.” In these, one of the four principal kinds of feet must still be used as the basis, some other species being inserted therewith, in each line or stanza, with more or less regularity.

#### PRINCIPLES AND NAMES.

The diversification of any species of metre, by the occasional change of a foot, or, in certain cases, by the addition or omission of a short syllable, is not usually regarded as sufficient to change the denomination, or stated order, of the verse; and many critics suppose some variety of feet, as well as a studied diversity in the position of the cæsural pause, essential to the highest excellence of poetic composition.

The dividing of verses into the feet which compose them, is called *Scanning*, or *Scansion*. In this, according to the technical language of the old prosodists, when a syllable is wanting, the verse is said to be *catalectic*; when the measure is exact, the line is *acatalectic*; when there is a redundant syllable, it forms *hypermeter*.

Since the equal recognition of so many feet as twelve, or even as eight, will often produce different modes of measuring the same lines; and since it is desirable to measure verses with uniformity, and always by the simplest process that will well answer the purpose; we usually scan by the principal feet, in preference to the secondary, where the syllables give us a choice of measures, or may be divided in different ways.

A single foot, especially a foot of only two syllables, can hardly be said to constitute a line, or to have rhythm in itself; yet we sometimes see a foot so placed, and rhyming as a line. Lines of two, three, four, five, six, or seven feet, are common; and these have received the technical denominations of *dim’eter*, *trim’eter*, *tetram’eter*, *pentam’eter*, *hexam’eter*, and *heptam’eter*. On a wide page, iambics and trochaics may possibly be written in *octom’eter*; but lines of this measure, being very long, are mostly abandoned for alternate tetrameters.

## ORDER I.—IAMBIC VERSE.

In Iambic verse, the stress is laid on the even syllables, and the odd ones are short. Any short syllable added to a line of this order, is supernumerary; iambic rhymes, which are naturally single, being made double by one, and triple by two. But the adding of one short syllable, which is much practised in dramatic poetry, may be reckoned to convert the last foot into an amphibrach, though the adding of two cannot. Iambics consist of the following measures:—

## MEASURE I.—IAMBIC OF EIGHT FEET, OR OCTOMETER.

*PSALM XLVII, 1 AND 2.*

“O āll | yě pēo | -plē, clāp | yōŕ hānds, | ānd wīth | trīŭm | -phānt vōi | -cēs sīng;  
No force | the might | -ȳ power | withstands | of God, | the u | -niver | -sal King.”

See the “*Psalms of David, in Metre*,” p. 54.

Each couplet of this verse is now commonly reduced to, or exchanged for, a simple stanza of four tetrameter lines, rhyming alternately, and each commencing with a capital; but sometimes, the second line and the fourth are still commenced with a small letter: as,

“Your ut | -most skill | in praise | be shown,  
for Him | who all | the world | commands,  
Who sits | upon | his right | -eous throne,  
and spreads | his sway | o’er heath | -en lands.”

*Ib.*, verses 7 and 8; *Edition bound with Com. Prayer*, N. Y., 1819.

*AN OTHER EXAMPLE.*

“The hour | is come |—the cher | -ish’d hour,  
When from | the bus | -y world | set free,  
I seek | at length | my lone | -ly bower,  
And muse | in si | -lent thought | on thee.”

THEODORE HOOK’S REMAINS: *The Examiner*, No. 82.

## MEASURE II.—IAMBIC OF SEVEN FEET, OR HEPTAMETER.

*EXAMPLE I.—HAT-BRIMS.*

“It’s odd | how hats | expand | their brims | as youth | begins | to fade,  
As if | when life | had reached | its noon, | it want | -ed them | for shade.”

OLIVER WENDELL HOLMES: *From a Newspaper*.

*EXAMPLE II.—PSALM XLII, 1.*

“As pants | the hart | for cool | -ing streams, | when heat | -ed in | the chase;  
So longs | my soul, | O God, | for thee, | and thy | refresh | -ing grace.”

EPISCOPAL PSALM-BOOK: *The Rev. W. Allen’s Eng. Gram.*, p. 227.

*EXAMPLE III.—THE SHEPHERD’S HYMN.*

“Oh, when | I rove | the des | -ert waste, | and ‘neath | the hot | sun pant,  
The Lord | shall be | my Shep | -herd then, | he will | not let | me want;  
He’ll lead | me where | the past | -ures are | of soft | and shad | -y green,

And where | the gen | -tle wa | -ters rove, | the qui | -et hills | between.

And when | the sav | -age shall | pursue, | and in | his grasp | I sink,  
He will | prepare | the feast | for me, | and bring | the cool | -ing drink,  
And save | me harm | -less from | his hands, and strength | -en me | in toil,  
And bless | my home | and cot | -tage lands, and crown | my head | with oil.

With such | a Shep | -herd to | protect, | to guide | and guard | me still,  
And bless | my heart | with ev | -'ry good, | and keep | from ev | -'ry ill,  
*Surely* | I shall | not turn | aside, | and scorn | his kind | -ly care,  
But keep | the path | he points | me out, | and dwell | for ev | -er there.”

W. GILMORE SIMMS: *North American Reader*, p. 376.

*EXAMPLE IV.—“THE FAR, FAR EAST.”—FIRST SIX LINES.*

“It was | a dream | of earl | -y years, | the long | -est and | the last,  
And still | it ling | -ers bright | and lone | amid | the drear | -y past;  
When I | was sick | and sad | at heart | and faint | with grief | and care,  
It threw | its ra | -diant smile | athwart | the shad | -ows of | despair:  
And still | when falls | the hour | of gloom | upon | this way | -ward breast,  
Unto | THE FAR, | FAR EAST | I turn | for sol | -ace and | for rest.”

*Edinburgh Journal*; and *The Examiner*,

*EXAMPLE V.—“LAMENT OF THE SLAVE.”—EIGHT LINES FROM THIRTY-FOUR.*

“Behold | the sun | which gilds | *yon heaven*, how love | -ly it | appears!  
And must | it shine | to light | a world | of war | -fare and | of tears?  
Shall hu | -man pas | -sion ev | -er sway | this glo | *-rious world* | of God,  
And beau | -ty, wis | -dom, hap | -piness, | sleep with | the tram | -pled sod?  
Shall peace | ne’er lift | her ban | -ner up, | shall truth | and rea | -son cry,  
And men | oppress | them down | with worse | than an | -cient tyr | -anny?  
Shall all | the les | -sons time | has taught, | be so | long taught | in vain;  
And earth | be steeped | in hu | -man tears, | and groan | with hu | -man pain?”

ALONZO LEWIS: *Freedom’s Amulet*, Dec. 6, 1848.

*EXAMPLE VI.—“GREEK FUNERAL CHANT.”—FIRST FOUR OF SIXTY-FOUR LINES.*

“A wail | was heard | around | the bed, | the death | -bed of | the young;  
Amidst | her tears, | the Fu | *-neral Chant* | a mourn | -ful moth | -er sung.  
‘I-an | -this dost | thou sleep?—| Thou sleepst!—| but this | is not | the rest,  
The breath | -ing, warm, | and ros | -y calm, | I’ve pil | -low’d on | my breast!”

FELICIA HEMANS: *Poetical Works*, Vol. ii, p. 37.

Everett observes, “The *Iliad* was translated into this measure by CHAPMAN, and the *Æneid* by PHAER.”—*Eng. Versif.*, p. 68. Prior, who has a ballad of one hundred and eighty such lines, intimates in a note the great antiquity of the verse. Measures of this length, though not very uncommon, are much less frequently used than shorter ones. A practice has long prevailed of dividing this kind of verse into alternate lines of four and of three feet, thus:—

“To such | as fear | thy ho | -ly name,  
myself | I close | -ly join;

To all | who their | obe | -dient wills  
to thy | commands | resign.”

*Psalms with Com. Prayer: Psalm cxix, 63.*

This, according to the critics, is the most soft and pleasing of our lyric measures. With the slight change of setting a capital at the head of each line, it becomes the regular ballad-metre of our language. Being also adapted to hymns, as well as to lighter songs, and, more particularly, to quaint details of no great length, this stanza, or a similar one more ornamented with rhymes, is found in many choice pieces of English poetry. The following are a few popular examples:—

“When all | thy mer | -cies, O | my God!  
My ris | -ing soul | surveys,  
Transport | -ed with | the view | I’m lost  
In won | -der, love, | and praise.” *Addison’s Hymn of Gratitude.*

“John Gil | -pin was | a cit | -izen  
Of cred | -it and | renown,  
A train | -band cap | -tain eke | was he  
Of fam | -ous Lon | -don town.” *Cowper’s Poems*, Vol. i, p. 275.

“God pros | -per long | our no | -ble king,  
Our lives | and safe | -ties all;  
A wo | -ful hunt | -ing once | there did  
In Chev | -y Chase | befall,” *Later Reading of Chevy Chase.*

“Turn, An | -geli | -na, ev | -er dear,  
My charm | -er, turn | to see  
Thy own, | thy long | -lost Ed | -win here,  
Restored | to love | and thee.” *Goldsmith’s Poems*, p. 67.

“‘Come back! | come back!’ | he cried | in grief,  
Across | this storm | -y wa<sup>ter</sup>:  
‘And I’ll | forgive | your High | -land chief,  
My daugh | -ter!—oh | my daugh<sup>ter</sup>!

‘Twas vain: | the loud | waves lashed | the shore,  
Return | or aid | prevent<sup>ing</sup>:—  
The wa | -ters wild | went o’er | his child,—  
And he | was left | lament<sup>ing</sup>.”—*Campbell’s Poems*, p. 110.

The rhyming of this last stanza is irregular and remarkable, yet not unpleasant. It is contrary to rule, to omit any rhyme which the current of the verse leads the reader to expect. Yet here the word “*shore*” ending the first line, has no correspondent sound, where twelve examples of such correspondence had just preceded; while the third line, without previous example, is so rhymed within itself that one scarcely perceives the omission. Double rhymes are said by some to unfit this metre for serious subjects, and to adapt it only to what is meant to be burlesque, humorous, or satiric. The example above does not confirm this opinion, yet the rule, as a general one, may still be just. Ballad verse may in some degree imitate the language of a simpleton, and become popular by clownishness, more than by elegance: as,

“Father | and I | went down | to the camp  
Along | with cap | -tain Goodwin,

And there | we saw | the men | and boys  
As thick | as hast | -y pudding;

And there | we saw | a thun | -dering gun,—  
It took | a horn | of powder,—  
It made | a noise | like fa | -ther's gun,  
Only | a na | -tion louder.” *Original Song of Yankee Doodle.*

Even the line of seven feet may still be lengthened a little by a double rhyme: as,

How gay | -ly, o | -ver fell | and fen, | yon sports | -man light | is *dashing*!  
And gay | -ly, in | the sun | -beams bright, | the mow | —er's blade | is *flashing*!

Of this length, T. O. Churchill reckons the following couplet; but by the general usage of the day, the final *ed* is not made a separate syllable:—

“With *hic* | and *hoec*, | as Pris | -cian tells, | *sacer* | -dos was | decli | -nēd;  
But now | its gen | -der by | the pope | far bet | -ter is | *defi* | -nēd.”  
*Churchill's New Grammar*, p. 188.

MICHAEL DRAYTON: *Johnson's Quarto Dict.*, *w. Quantity*.

#### EXAMPLE II.—FROM A DESCRIPTION OF A STAG-HUNT.

“And through | the cumb | -rous thicks, | as fear | -fully | he makes,  
He with | his branch | -ed head | the ten | -der sap | -lings shakes,  
That sprink | -ling their | moist pearl | do seem | for him | to weep;

That all | the for | -est rings, | and ev | -ery neigh | -bouring place:  
And there | is not | a hound | but fall | -eth to | the chase.”

#### EXAMPLE III.—AN EXTRACT FROM SHAKESPEARE.

“If love | make me | forsworn, | how shall | I swear | to love?  
O, nev | -er faith | could hold, | if not | to beau | -ty vow'd:  
Though to | myself | forsworn, | to thee | I'll con | -stant prove;  
Those thoughts, | to me | like oaks, | to thee | like o | -siers bow'd.  
*Stūdy* | his bi | -as leaves, | and makes | his book | thine eyes,  
Where all | those pleas | -ures live, | that art | can com | -prehend.  
If knowl | -edge be | the mark, | to know | thee shall | suffice;  
Well learn | -ed is | that tongue | that well | can thee | commend;  
All ig | -norant | that soul | that sees | thee with' | *ōūt wonder*;  
Which is | to me | some praise, | that I | thy parts | admire:  
Thine eye | Jove's light | -ning seems, | thy voice | his dread | -ful thunder,  
Which (not | to an | -ger bent) | is mu | -sic and | sweet fire.  
Celes | -tial as | thou art, | O, do | not love | that wrong,

To sing | the heav | -ens' praise | with such | an earth | -ly tongue."

*EXAMPLE IV.—THE TEN COMMANDMENTS VERSIFIED.*

"Adore | no God | besides | me, to | provoke | mine eyes;  
Nor wor | -ship me | in shapes | and forms | that men | devise;  
With rev | 'rence use | my name, | nor turn | my words | to jest;  
Observe | my sab | -bath well, | nor dare | profane | my rest;  
Honor | and due | obe | -dience to | thy pa | -rents give;  
Nor spill | the guilt | -less blood, | nor let | the guilt | -y live;\*  
Preserve | thy bod | -y chaste, | and flee | th' unlaw | -ful bed;  
Nor steal | thy neigh | -bor's gold, | his gar | -ment, or | his bread;  
Forbear | to blast | his name | with false | -hood or deceit;  
Nor let | thy wish | -es loose | upon | his large | estate."

DR. ISAAC WATTS: *Lyric Poems*, p. 46.

This verse, consisting, when entirely regular, of twelve syllables in six iambs, is the *Alexandrine*; said to have been so named because it was "first used in a poem called *Alexander*."—*Worcester's Dict.* Such metre has sometimes been written, with little diversity, through an entire English poem, as in Drayton's *Polyolbion*; but, couplets of this length being generally esteemed too clumsy for our language, the Alexandrine has been little used by English versifiers, except to complete certain stanzas beginning with shorter iambs, or, occasionally, to close a period in heroic rhyme. French heroics are similar to this; and if, as some assert, we have obtained it thence, the original poem was doubtless a French one, detailing the exploits of the hero "*Alexandre*." The phrase, "*an Alexandrine verse*," is, in French, "*un vers Alexandrin*." Dr. Gregory, in his *Dictionary of Arts and Sciences*, copies Johnson's *Quarto Dictionary*, which says, "ALEXANDRINE, a kind of verse borrowed from the French, first used in a poem called *Alexander*. They [Alexandrines] consist, among the French, of twelve and thirteen syllables, in alternate couplets; and, among us, of twelve." Dr. Webster, in his *American Dictionary*, *improperly* (as I think) gives to the name two forms, and seems also to acknowledge two sorts of the English verse: "ALEXAN'DRINE, or ALEXAN'DRIAN, *n.* A kind of verse, consisting of twelve syllables, or of twelve and thirteen alternately." "The Pet-Lamb," a modern pastoral, by Wordsworth, has sixty-eight lines, all probably meant for Alexandrines; most of which have twelve syllables, though some have thirteen, and others, fourteen. But it were a great pity, that versification so faulty and unsuitable should ever be imitated. About half of the said lines, as they appear in the poet's royal octave, or "the First Complete American, from the Last London Edition," are as sheer prose as can be written, it being quite impossible to read them into any proper rhythm. The poem being designed for children, the measure should have been reduced to iambic trimeter, and made exact at that. The story commences thus:—

"The dew | was fall | -ing fast, | the stars | began | to blink;  
I heard | a voice; | it said, | 'Drink, pret | -ty crea | -ture, drink!  
And, look | -ing o'er | the hedge, | before | me I | espied  
A snow | -white moun | -tain Lamb | with ā Māid | -en at | its side."

\* The opponents of capital punishment will hardly take this for a fair version of the sixth commandment.—G. B.

All this is regular, with the exception of one foot; but who can make any thing but *prose* of the following?

“Thy limbs will shortly be twice as stout as they are now,  
Then I’ll yoke thee to my cart like a pony in the plough.”

“Here thou needest not dread the raven in the sky;  
Night and day thou art safe,—our cottage is hard by.”

WORDSWORTH’S *Poems*, New-Haven Ed., 1836, p. 4.

In some very ancient English poetry, we find lines of twelve syllables combined in couplets with others of fourteen; that is, six iambic feet are alternated with seven, in lines that rhyme. The following is an example, taken from a piece of fifty lines, which Dr. Johnson ascribes to the *Earl of Surry*, one of the wits that flourished in the reign of Henry VIII:—

“Such way | -ward wayes | hath Love, | that most | part in | discord,  
Our willes | do stand, | whereby | our hartes | but sel | -dom do | accord;  
Decyte | is hys | delighte, | and to | begyle | and mocke,  
The sim | ple hartes | which he | doth strike | with fro | -ward di | -vers stroke.  
He caus | -eth th’ one | to rage | with gold | -en burn | -ing darte,  
And doth | allay | with lead | -en cold, | again | the oth | -er’s harte;  
Whose gleames | of burn | -ing fyre | and eas | -y sparkes | of flame,  
In bal | -ance of | ũnē | -qual weyght | he pon | -dereth | by ame.”

#### MEASURE IV.—IAMBIC OF FIVE FEET, OR PENTAMETER.

##### EXAMPLE I.—*HECTOR TO ANDROMACHE*.

“Andrōm | -ächē! | mȳ sōul’s | fār bēt | -tēr pārt,  
*Whȳ with* | untime | -ly | sor | -rows heaves | thy heart?  
No hos | -tile hand | can an | -tedate | my doom,  
Till fate | condemns | me to | the si | -lent tomb.  
Fix’d is | the term | to all | the race | of earth;  
And such | the hard | conditi | -on of | our birth,  
No force | can then | resist, | no flight | can save;  
All sink | alike, | the fear | -ful and | the brave.”

POPE’S HOMER: *Iliad*, B. vi, l. 624-632.

##### EXAMPLE II.—*ANGELS’ WORSHIP*.

“No soon | -er had | th’ Almighty | -y ceas’d | *but* all  
The mul | -titude | of an | -gels with | a shout  
Loud as | from num | -bers with’ | -out num | -ber, sweet  
As from | blest voi | -ces ut | *tēr īng jōy*, | heav’n rung  
With ju | -bilee, | and loud | hosan | -nas fill’d  
Th’ eter | -nal | re | -gions; low | -ly rev | -erent  
Tow’rds ei | -ther throne | they bow, | and to | the ground  
With sol | -emn ad | -ora | -tion down | they cast  
Their crowns | inwove | with am | -arant | and gold.”

MILTON: *Paradise Lost*, B. iii, l. 344.

*EXAMPLE III.—DECEPTIVE GLOSSES.*

“The world | is still | deceiv’d | with or | -nament.  
 In law, | what plea | so taint | -ed and | corrupt,  
 But, be | -ing sea | -son’d with | a gra | -cious voice,  
 Obscures | the show | of e | -vil? In | *religiōn*,  
 What dam | —nēd er | -ror, but | some so | -ber brow  
 Will bless | it, and | approve | it with | a text,  
*Hidīng* | the gross | -ness with | fair or | -nament?”

SHAKSPEARE: *Merch. of Venice*, Act iii, Sc. 2.

*EXAMPLE IV.—PRAISE GOD.*

“Ye head | -long tor | -rents, rap | -id, and | profound;  
 Ye soft | -er floods, | that lead | the hu | -mid maze  
 Along | the vale; | and thou, | majes | -tic main,  
 A se | -cret world | of won | -ders in | thyself,  
 Sound His | stupen | -dous | praise; | whose great | -er voice  
 Or bids | you roar, | or bids | your roar | -ings fall.”

THOMSON: *Hymn to the Seasons*.

*EXAMPLE V.—THE CHRISTIAN SPIRIT.*

“Like him | the soul, | thus kin | -dled from | above,  
 Spreads wide | her arms | of u | -niver | -sal love;  
 And, still | enlarg’d | as she | receives | the grace,  
 Includes | crēā | -tion in | her close | embrace.  
 Behold | a Chris | -tian! and | without | the fires  
 The found | -*ēr ōf* | that name | alone | inspires,  
 Though all | accom | -plishment, | all knowl | -edge meet,  
 To make | the shin | -ing prod | -igy | complete,  
 Whoev | -er boasts | that name— | behold | a cheat!”

COWPER: *Charity; Poems*, Vol. i, p. 135.

*EXAMPLE VI.—TO LONDON.*

“Ten right | -eous would | have sav’d | a cit | -y once,  
 And thou | hast man | -y right | -eous.—Well | for thee—  
 That salt | preserves | thee; more | corrupt | -ed else,  
 And there | -fore more | obnox | -ious, at | this hour,  
 Than Sod | -om in | her day | had pow’r | to be,  
 For whom | God heard | his Abr’ | -ham plead | in vain.”

IDEM: *The Task*, Book iii, at the end.

This verse, the iambic pentameter, is the regular English *heroic*—a stately species, and that in which most of our great poems are composed, whether epic, dramatic, or descriptive. It is well adapted to rhyme, to the composition of sonnets, to the formation of stanzas of several sorts; and yet is, perhaps, the only measure suitable for blank verse—which latter form always demands a subject of some dignity or sublimity.

The *Elegiac Stanza*, or the form of verse most commonly used by elegists, consists of four heroics rhyming alternately; as,

“Thou knowst | how trans | -port thrills | the ten | -der breast,  
Where love | and fan | -cy fix | their ope | -ning reign;  
How na | -ture shines | in live | -lier col | -ours dress’d,  
To bless | their un | -ion, and | to grace | their train.”

SHENSTONE: *British Poets*, Vol. vii, p. 106.

Iambic verse is seldom continued perfectly pure through a long succession of lines. Among its most frequent diversifications, are the following; and others may perhaps be noticed hereafter:—

(1.) The first foot is often varied by a substitutional trochee; as,

“*Bacchus*, | that first | from out | the pur | -ple grape  
*Crush’d the* | sweet poi | -son of | mis-ūs | -ēd wine,  
*After* | the Tus | -can mar | -iners | transform’d,  
*Coasting* | the Tyr | -rhene shore, | ās thē | winds listēd,  
On Cir | -ce’s isl | -and fell. | Who knows | not Circē,  
The daugh | -ter of | the sun? | whose charm | -ēd cup  
Whoev | -er tast | -ed, lost | his up | -right shape,  
And down | -ward fell | *intō* a grov | -elling swine.”

MILTON: *Comus*; *British Poets*, Vol. ii, p. 147.

(2.) By a synæresis of the two short syllables, an anapest may sometimes be employed for an iambus; or a dactyl, for a trochee. This occurs chiefly where one unaccented vowel precedes an other in what we usually regard as separate syllables, and both are clearly heard, though uttered perhaps in so quick succession that both syllables may occupy only half the time of a long one. Some prosodists, however, choose to regard these substitutions as instances of trissyllabic feet mixed with the others; and, doubtless, it is in general easy to make them such, by an utterance that avoids, rather than favours, the coalescence. The following are examples:—

“No rest: | through man | *-y a dark* | and drear | -y vale  
They pass’d, | and man | *-y a re* | -gion dol | -orous,  
*O’er man* | *-y a fro* | -zen, man | *-y a fi* | *-ery Alp*.”—MILTON: *P. L.*, B. ii, l. 618.

“Rejoice | ye na | -tions, vin | -dicate | the sway  
Ordain’d | for com | -mon hap | -piness. | Wide, o’er  
The globe | terra | *-queous, let* | Britan | *-nia pour*  
The fruits | of plen | -ty from | her co | *-pious horn*.”—DYER: *Fleece*, B. iv, l. 658.

“*Myriads* | of souls | that knew | one pa | -rent mold,  
See sad | -ly sev | er’d by | the laws | of chance!  
*Myriads*, | in time’s | peren | *-nial list* | enroll’d,  
Forbid | by fate | to change | one tran | *-sient glance!*”

SHENSTONE: *British Poets*, Vol. vii, p. 109.

(3.) In plays, and light or humorous descriptions, the last foot of an iambic line is often varied or followed by an additional short syllable; and, sometimes, in verses of triple rhyme, there is an addition of two short syllables, after the principal rhyming syllable. Some prosodists call the variant foot, in the former instance, an *amphibrach*, and would probably, in the latter, suppose either an *additional pyrrhic*, or an amphibrach with still a *surplus syllable*; but others scan, in these cases, by the iambus only, calling what remains after the last long syllable *hypermeter*; and this is, I think, the better way. The following examples show these and some other variations from pure iambic measure:—

EXAMPLE I.—*GRIEF.*

“Each sub | stānce ōf | a grief | hath twen | -ty shad<sup>d</sup>ōws,  
Which show | like grief | itself, | but are | not so:  
For sor | -row’s eye, | glāzēd | with blind | -ing tears,  
Divides one thing | entire | to man | —y obj<sup>j</sup>ēcts;  
Like per | -spectives, | which, right | -ly gaz’d | upon,  
Show noth | -ing but | confu | -sion; ey’d | awry,  
Distin | -guish form: | so your | sweet maj | -esty,  
Loōkīng | awry | upon | your lord’s | depart<sup>ū</sup>re,  
Finds shapes | of grief, | more than | himself, | to wail;  
Which, look’d | on as | it is, | is nought | but shad<sup>d</sup>ōws.”

SHAKSPEARE: *Richard II*, Act ii, Sc. 2.

EXAMPLE II.—*A WISH TO PLEASE.*

“O, that | I had | the art | of eas | -y writ<sup>ing</sup>ing  
What should | be eas | -y read | -ing | could | I scale  
Parnas | -sus, where | the Mus | -es sit | indit<sup>ing</sup>ing  
Those pret | -ty po | -ems nev | -er known | to fail,  
How quick | -ly would | I print | (the world | deligh<sup>ting</sup>ing)  
A Gre | -cian, Syr | -ian, or | Assy | -ian tale;  
And sell | you, mix’d | with west | -ern sen | -tim<sup>entalism</sup>entalism,  
Some sam | -ples of | the fin | -est O | -ri<sup>entalism</sup>entalism.”

MEASURE V.—IAMBIC OF FOUR FEET, OR TETRAMETER.

EXAMPLE I.—*PRESIDENTS OF THE UNITED STATES OF AMERICA.*

“First stands | the loft | -y Wash | -ington,  
That no | -ble, great, | immor | -tal one;  
The eld | -er Ad | -ams next | we see;  
And Jef | -ferson | comes num | -ber three;  
Then Mad | -ison | is fourth, | you know;  
The fifth | one on | the list, | Monroe;  
The sixth | an Ad | -ams comes | again;  
And Jack | -son, sev | -enth in | the train;  
Van Bu | -ren, eighth | upon | the line;  
And Har | -rison | counts num | -ber nine;  
The tenth | is Ty | -ler, in | his turn;  
And Polk, | elev | -enth, as | we learn;

The twelfth | is Tay | -lor, peo | -ple say;  
 The next | we learn | some fu | -ture day.”

*EXAMPLE II.—THE SHEPHERD BARD.*

“The bard | on Ett | -rick’s moun | tain green  
 In Na | -ture’s bo | -som nursed | had been,  
 And oft | had marked | in for | -est lone  
 Her beau | -ties on | her moun | -tain throne;  
 Had seen | her deck | the wild | -wood tree,  
 And star | with snow | -y gems | the lea;  
 In love | *-liëst cōl* | -ours paint | the plain,  
 And sow | the moor | with pur | -ple grain;  
 By gold | -en mead | and moun | -tain sheer,  
 Had viewed | the Ett | -rick wav | -ing clear,  
 Where shad | *-ōwy flōcks* | of pur | -est snow  
 Seemed graz | -ing in | a world | below.”

JAMES HOGG: *The Queen’s Wake*, p. 76.

*EXAMPLE III.—TWO STANZAS FROM EIGHTEEN, ADDRESSED TO THE ETTRICK SHEPHERD.*

“O Shep | -herd! since | ‘tis thine | to boast  
 The fas | -cinat | -ing pow’rs | of song,  
 Far, far | above | the count | -less host,  
 Who swell | the Mus | -es’ sup | *-pliānt throng*,  
 The GIFT | OF GOD | distrust | no more,  
 His in | -spira | -tion be | thy guide;  
 Be heard | thy harp | from shore | to shore,  
 Thy song’s | reward | thy coun | -try’s pride.”

B. BARTON: *Verses prefixed to the Queen’s Wake*.

*EXAMPLE IV.—“ELEGIAC STANZAS,” IN IAMBICS OF FOUR FEET AND THREE.*

“O for | a dirge! | But why | complain?  
 Ask rath | -er a | trium | -phal strain  
 When FER | MOR’S race | is run;  
 A gar | -land of | immor | -tal boughs  
 To bind | around | the Chris | -tian’s brows,  
 Whose glo | *-rious work* | is done.  
 We pay | a high | and ho | -ly debt;  
 No tears | of pas | -sionate | regret  
 Shall stain | this vo | -tive lay;  
 Ill-wor | -thy, Beau | -mont! were | the grief  
 That flings | itself | on wild | relief  
 When Saints | have passed | away.”

WORDSWORTH: *Poetical Works*, First complete Amer. Ed., p. 208.

This line, the iambic tetrameter, is a favourite one, with many writers of English verse, and has been much used, both in couplets and in stanzas. Butler's *Hudibras*, Gay's *Fables*, and many allegories, most of Scott's poetical works, and some of Byron's, are written in couplets of this measure. It is liable to the same diversifications as the preceding metre. The frequent admission of an additional short syllable, forming double rhyme, seems admirably to adapt it to a familiar, humorous, or burlesque style. The following may suffice for an example:—

“First, this | large par | -cel brings | you *tidings*  
Of our | good Dean's | eter | -nal *chidings*;  
Of Nel | -ly's pert | -ness, Rob | -in's *leasings*,  
And Sher | -idan's | perpet | -ual *teasings*.  
This box | is cramm'd | on ev | -ery side  
With Stel | -la's mag | -iste | -rial pride.”

DEAN SWIFT: *British Poets*, Vol. v, p. 334.

The following lines have *ten syllables* in each, yet the measure is not iambic of five feet, but that of four with hypermeter:—

“There was | ān ān | -cient sage | philosopher,  
Who had | read Al | -exan | -der *Ross over*.”—*Butler's Hudibras*.

“I'll make | them serve | for per | -pendiculars,  
As true | as e'er | were us'd | by *bricklayers*.”—*Ib.*, Part ii, C. iii, l. 1020.

#### MEASURE VI.—IAMBIC OF THREE FEET, OR TRIMETER.

##### EXAMPLE.—*TO EVENING*.

“Now teach | me, maid | compos'd  
To breathe | some soft | -en'd strain.”—*Collins*, p. 39.

This short measure has seldom, if ever, been used alone in many successive couplets; but it is often found in stanzas, sometimes without other lengths, but most commonly with them. The following are a few examples:—

##### EXAMPLE I.—*TWO ANCIENT STANZAS, OUT OF MANY*,

“This while | we are | abroad,  
Shall we | not touch | our lyre?  
Shall we | not sing | an ode?  
Shall now | that ho | -ly fire,  
In us, | that strong | -ly glow'd,  
In this | cold air, | expire?  
Though in | the ut | -most peak,  
A while | we do | remain,  
Amongst | the moun | -tains bleak,  
Expos'd | to sleet | and rain,  
No sport | our hours | shall break,  
To ex | -ercise | our vein.”

DRAYTON: *Dr. Johnson's Gram.*, p. 13; *John Burn's*, p. 244.

*EXAMPLE II.—ACIS AND GALATEA.*

“For us | the zeph | -yr blows,  
 For us | distils | the dew,  
 For us | unfolds | the rose,  
 And flow’rs | display | their hue;  
 For us | the win | -ters rain,  
 For us | the sum | -mers shine,  
 Spring swells | for us | the grain,  
 And au | -tumn bleeds | the vine.”

JOHN GAY: *British Poets*, Vol. vii, p. 376.

*EXAMPLE III.—“MENE, MENE, TEKEL, UPHARSIN.”*

“The king | was on | his throne,  
 The sa | -traps thronged | the hall;  
 A thou | -sand bright | lamps shone  
 O’er that | high fes | -tival.  
 A thou | -sand cups | of gold,  
 In Ju | -dah deemed | divine—  
 Jeho | -vah’s ves | -sels, hold  
 The god | -less Hea | -then’s wine!

In that | same hour | and hall,  
 The fin | -gers of | a hand  
 Came forth | against | the wall,  
 And wrote | as if | on sand:  
 The fin | -gers of | a man,—  
 A sol | -ita | -ry hand  
 Along | the let | -ters ran,  
 And traced | them like | a wand.”

LORD BYRON: *Vision of Belshazzar*.

*EXAMPLE IV.—LYRIC STANZAS.*

“Descend, | celes | -tial fire,  
 And seize | me from | above,  
 Melt me | in flames | of pure | desire,  
 A sac | -rifice | to love.

Let joy | and wor | -ship spend  
 The rem | -nant of | my days,  
 And to | my God, | my soul | ascend,  
 In sweet | perfumes | of praise.”

WATTS: *Poems sacred to Devotion*, p. 50.

*EXAMPLE V.—LYRIC STANZAS.*

“I would | begin | the mu | -sic here,  
 And so | my soul | should rise:

O for | some heav'n | -ly notes | to bear  
My spir | -it to | the skies!

There, ye | that love | my say | -iour, sit,  
There I | would fain | have place  
Amongst | your thrones | or at | your feet,

So I | might see | his face." WATTS: *Same work*, "*Horæ Lyricæ*," p. 71.

*EXAMPLE VI.—ENGLAND'S DEAD.*

"The hur | -ricane | hath might  
Along | the In | -dian shore,  
And far, | by Gan | -ges' banks | at night,  
Is heard | the ti | -ger's roar.

But let | the sound | roll on!  
It hath | no tone | of dread  
For those | that from | their toils | are gone;—

*There* slum | -ber Eng | -land's dead."

HEMANS: *Poetical Works*, Vol. ii, p. 61.

The following examples have some of the common diversifications already noticed under the longer measures:—

*EXAMPLE I.—"LANGUEDOCIAN AIR."*

"*Lōve is* | a hunt | -er boy,  
Who makes | young hearts | his prey;  
*And in* | his nets | of joy  
Ensnares | them night | and day.

In vain | conceal'd | they lie,  
Love tracks | them ev' | -ry where;  
In vain | aloft | they fly,  
Love shoots | them fly | -ing there.

But 'tis | his joy | most sweet,  
At earl | -y dawn | to trace  
The print | of Beau | -ty's feet,  
And give | the trem | -bler chase.

And most | he loves | through snow  
To track | those foot | -steps fair,  
For then | the boy | doth know,  
None track'd | before | him there."

MOORE'S *Melodies and National Airs*, p. 274.

*EXAMPLE II.—FROM "A PORTUGUESE AIR."*

"Flow on, | thou shin | -ing *river*,  
But ere | thou reach | the sea,  
Seek El | -la's bower, | and *give her*  
The wreaths | I fling | o'er thee.

But, if | in wand' | -ring *thither*,  
 Thou find | she mocks | my pray'r,  
 Then leave | those wreaths | to *with*  
 Upon | the cold | bank there." MOORE: *Same Volume*, p. 261.

*EXAMPLE III.—RESIGNATION.*

"O Res | -igna | -tion! yet | unsung,  
 Untouch'd | by for | -mer strains;  
 Though claim | -ing ev | -*ery mu* | -se's smile,  
 And ev | -*ery po* | -et's pains!  
 All oth | -er du | -ties cres | -cents are  
 Of vir | -tue faint | -ly bright;  
 The glo | -*rious con* | -summa | -tion, thou,  
 Which fills | her orb | with light!" YOUNG: *British Poets*, Vol. viii, p. 377.

MEASURE VII.—IAMBIC OF TWO FEET, OR DIMETER.

*EXAMPLE—A SCOLDING WIFE.*

1. "There was | a man  
 Whose name | was Dan,  
 Who sel | -dom spoke;  
 His part | -ner sweet  
 He thus | did greet,  
 Without | a joke;
2. My love | -ly wife,  
 Thou art | the life  
 Of all | my joys;  
 Without | thee, I  
 Should sure | -ly die  
 For want | of noise.
3. O, prec | -ious one,  
 Let thy | tongue run  
 In a | sweet fret;  
 And this | will give  
 A chance | to live,  
 A long | time yet.
4. When thou | dost scold  
 So loud | and bold,  
 I'm kept | awake;  
 But if | thou leave,  
 It will | me grieve,  
 Till life | forsake.
5. Then said | his wife,  
 I'll have | no strife  
 With you, | sweet  
 Dan; As 'tis | your mind,

I'll let | you find  
I am | your man.

6. And fret | I will,  
To keep | you still  
Enjoy | -ing life;  
So you | may be  
Content | with me,  
A scold | -ing wife."

Iambic dimeter, like the metre of three iambs, is much less frequently used alone than in stanzas with longer lines; but the preceding example is a refutation of the idea, that no piece is ever composed wholly of this measure, or that the two feet cannot constitute a line. In Humphrey's *English Prosody*, on page 16th, is the following paragraph; which is not only defective in style, but erroneous in all its averments:—

"Poems are never composed of lines of two [-] feet metre, in succession: they [combinations of two feet] are only used occasionally in poems, hymns, odes, &c. to diversify the metre; and are, in no case, lines of poetry, or verses; but hemistichs, [*hemistichs*,] or half lines. The shortest metre of which iambic verse is composed, in lines successively, is that of three feet; and this is the shortest metre *which* can be denominated lines, or verses; and *this is not frequently used*."

In ballads, ditties, hymns, and versified psalms, scarcely any line is *more common* than the iambic trimeter, here denied to be "frequently used;" of which species, there are about seventy lines among the examples above. Dr. Young's poem entitled "Resignation," has eight hundred and twenty such lines, and as many more of iambic tetrameter. His "Ocean" has one hundred and forty-five of the latter, and two hundred and ninety-two of the species now under consideration; i.e., iambic dimeter. But how can the metre which predominates by two to one, be called, in such a case, an occasional diversification of that which is less frequent?

Lines of two iambs are not very uncommon, even in psalmody; and, since we have some lines *yet shorter*, and the lengths of all are determined only by the act of measuring, there is, surely, no propriety in calling dimeters "hemistichs," merely because they are short. The following are some examples of this measure combined with longer ones:—

*EXAMPLE I.—FROM PSALM CXLVIII.*

1. "Ye bound | -less realms | of joy,  
Exalt | your Ma | -ker's fame;  
His praise | your songs | employ  
Above | the star | -ry frame:
2. Your voi | -ces raise,  
Ye Cher | -ubim,  
And Ser | -aphim,  
To sing | his praise.

3. Thou moon, | that rul'st | the night,  
 And sun, | that guid'st | the day,  
 Ye glitt' | -ring stars | of light,  
 To him | your hom | -age pay:
4. His praise | declare,  
 Ye heavens | above,  
 And clouds | that move  
 In liq | -uid air." *The Book of Psalms in Metre*, (with *Com. Prayer*), 1819.

*EXAMPLE II.—FROM PSALM CXXXVI.*

"To God | the might | -y  
 Lord, your joy | -ful thanks | repeat;  
 To him | due praise | afford,  
 as good | as he | is great:  
 For God | does prove  
 Our con | -stant friend,  
 His bound | -less love  
 Shall nev | -er end."—*Ib.*, p. 164.

*EXAMPLE III.—GLORIA PATRI.*

"To God | the Fa | -ther, Son,  
 And Spir | -it ev | -er bless'd,  
 Eter | -nal Three | in One,  
 All wor | -ship be | address'd;  
 As here | -tofore  
 It was, | is now,  
 And shall | be so  
 For ev | -ermore."—*Ib.*, p. 179.

*EXAMPLE IV.—PART OF PSALM III.*

[O] "Lord, | how man | -y are | my foes!  
 How man | -y those  
 That [now] | in arms | against | me rise!  
*Many* | are they  
 That of | my life | distrust | -fully | thus say:  
 'No help | for him | in God | there lies.'  
 But thou, | Lord, art | my shield | my glory;  
 Thee, through | my story,  
 Th' exalt | -er of | my head | I count;  
 Aloud | I cried  
 Unto | Jeho | -vah, he | full soon | replied,  
 And heard | me from | his ho | -ly mount."

*EXAMPLE V.—SIX LINES OF AN “AIR.”*

“As when | the dove  
 Laments | her love  
 All on | the na | -ked spray;  
 When he | returns,  
 No more | she mourns,  
 But loves | the live | -long day.” JOHN GAY: *British Poets*, Vol. vii, p. 377.

*EXAMPLE VI.—FOUR STANZAS OF AN ODE.*

“XXVIII.

Gold pleas | -ure buys;  
 But pleas | -ure dies”,  
 Too soon | the gross | fruiti | -on cloys:  
 Though rapt | -ures court,  
 The sense | is short;  
 But vir | -tue kin | -dles liv | -ing joys:

XXIX.

Joys felt | alone!  
 Joys ask’d | of none!  
 Which Time’s | and For | -tune’s ar | -rows miss;  
 Joys that | subsist,  
 Though fates | resist,  
 An un | -preca | -rious, end | -less bliss!

XXX.

The soul | refin’d  
 Is most | inclin’d  
 To ev | -*ēry mōr* | -al ex | -cellence;  
 All vice | is dull,  
 A knave’s | a fool;  
 And Vir | -tue is | the child | of Sense.

XXXI.

The vir | -*tuous mind*  
 Nor wave, | nor wind,  
 Nor civ | -il rage, | nor ty | -rant’s frown,  
 The shak | -en ball,  
 Nor plan | -ets’ fall,  
 From its | firm ba | -sis can | dethrone.”

YOUNG’S “OCEAN:” *British Poets*, Vol. viii, p 277.

There is a line of five syllables and double rhyme, which is commonly regarded as iambic dimeter with a supernumerary short syllable; and which, though it is susceptible

of two other divisions into two feet, we prefer to scan in this manner, because it usually alternates with pure iambics. Twelve such lines occur in the following extract:—

LOVE TRANSITORY

“Could Love | for ever  
 Run like | a river,  
 And Time’s | endeavour  
     Be tried | in vain,—  
 No oth | -er pleasure  
 With this | could measure;  
 And like | a treasure  
     We’d hug | the chain.  
  
 But since | our sighing  
 Ends not | in dying,  
 And, formed | for flying,  
     Love plumes | his wing;  
 Then for | this reason  
 Let’s love | a season;  
 But let | that season  
     Be on | -ly spring.”

LORD BYRON: See *Everett’s Versification*, p. 19; *Fowler’s E. Gram.*, p. 650.

MEASURE VIII.—IAMBIC OF ONE FOOT, OR MONOMETER.

“The shortest form of the English Iambic,” says Lindley Murray, “consists of an Iambus with an additional short syllable: as,

Disdaining,  
 Complaining,

Consenting,  
 Repenting.

We have no poem of this measure, but it may be met with in stanzas. The Iambus, with this addition, coincides with the Amphibrach.”—*Murray’s Gram.*, 12mo, p. 204; 8vo, p. 254. This, or the substance of it, has been repeated by many other authors. Everett varies the language and illustration, but teaches the same doctrine. See *E. Versif.*, p. 15.

Now there are sundry examples which may be cited to show, that the Iambus, without any additional syllable, and without the liability of being confounded with an other foot, may, and sometimes does, stand as a line, and sustain a regular rhyme. The following pieces contain instances of this sort:—

EXAMPLE I.—“*HOW TO KEEP LENT.*”

“Is this | a Fast, | to keep  
     The lard | -er lean  
         And clean  
 From fat | of neats | and sheep?  
  
 Is it | to quit | the dish  
     Of flesh, | yet still

To fill  
 The plat | -ter high | with fish?  
 Is it | to fast | an hour,  
           Or ragg'd | to go,  
           Or show  
 A down | -cast look | and sour?  
 No:—'Tis | a Fast | to dole  
           Thy sheaf | of wheat,  
           And meat,  
 Unto | the hun | -gry soul.  
 It is | to fast | from strife,  
           From old | debate,  
           And hate;  
 To cir | -cumcise | thy life;  
 To show | a *heart* | grief-rent;  
           To starve | thy sin,  
           Not *bin*:  
 Ay, that's | to keep | thy Lent."

ROBERT HERRICK: *Clapp's Pioneer*, p. 48.

*EXAMPLE II.—"TO MARY ANN."*

#### ORDER II.—TROCHAIC VERSE.

In Trochaic verse, the stress is laid on the odd syllables, and the even ones are short. Single-rhymed trochaic omits the final short syllable, that it may end with a long one; for the common doctrine of Murray, Chandler, Churchill, Bullions, Butler, Everett, Fowler, Weld, Wells, Mulligan, and others, that this chief rhyming syllable is “*additional*” to the real number of feet in the line, is manifestly incorrect. One long syllable is, in some instances, used *as a foot*; but it is one or more *short syllables* only, that we can properly admit *as hypermeter*. Iambics and trochaics often occur in the same poem; but, in either order, written with exactness, the number of feet is always the number of the long syllables.

\* These versicles, except the two which are Italicized, are *not iambic*. The others are partly trochaic; and, according to many of our prosodists, wholly so; but it is questionable whether they are not as properly amphimacric, or Cretic.

### OBSERVATIONS.

OBS. 1.—Trochaic verse without the final short syllable, is the same as iambic would be without the *initial* short syllable;—it being quite plain, that iambic, so changed, *becomes trochaic, and* is iambic no longer. But trochaic, retrenched of its last short syllable, is trochaic still; and can no otherwise be made iambic, than by the prefixing of a short syllable to the line. Feet, and the orders of verse, are distinguished one from another by two things, and in general by two only; the number of syllables taken as a foot, and the order of their quantities. Trochaic verse is always as distinguishable from iambic, as iambic is from any other. Yet have we several grammarians and prosodies who contrive to confound them—or who, at least, mistake catalectic trochaic for catalectic iambic; and that too, where the syllable wanting affects only the last foot, and makes it perhaps but a common and needful cæsure.

OBS. 2.—To suppose that iambic verse may drop its initial short syllable, and still be iambic, still be measured as before, is not only to take a single long syllable for a foot, not only to recognize a pedal cæsure at the *beginning* of each line, but utterly to destroy the only principles on which iambs and trochaics can be discriminated. Yet Hiley, of Leeds, and Wells, of Andover, while they are careful to treat separately of these two orders of verse, not only teach that any order may take at the end "an additional syllable," but also suggest that the iambic *may drop* a syllable "from the first foot," without diminishing the number of feet,—without changing the succession of quantities,—without disturbing the mode of scansion! "Sometimes," say they, (in treating of iambs,) "a syllable is cut off from the first foot; as,

Práise | to Gód, | immór | -tal práise,  
 Fór | the lóve | that crówns | our dáy's."[—BARBAULD.]

*HILEY'S E. GRAM.*, THIRD EDITION, LONDON, P. 124; *WELLS'S*, THIRD EDITION, P. 198.

OBS. 3.—Now this couplet is the precise exemplar, not only of the thirty-six lines of which it is a part, but also of the most common of our trochaic metres; and if this may be thus scanned into iambic verse, so may all other trochaic lines in existence: distinction between the two orders must then be worse than useless. But I reject this doctrine, and trust that most readers will easily see its absurdity. A prosodist might just as well scan all iambs into trochaics, by pronouncing each initial short syllable to be hypermeter. For, surely, if deficiency may be discovered at the *beginning* of measurement, so may redundancy. But if neither is to be looked for before the measurement ends, (which supposition is certainly more reasonable,) then is the distinction already vindicated, and the scansion above-cited is shown to be erroneous.

OBS. 4.—But there are yet other objections to this doctrine, other errors and inconsistencies in the teaching of it. Exactly the same kind of verse as this, which is said to consist of "*four iambs*" from one of which "a syllable *is cut off*," is subsequently scanned by the same authors as being composed of "*three trochees* and an *additional* syllable; as,

Haste thee, | Nymph, and | bring with | *thee*  
 Jest and | youthful | Jolli | *-ty*.—MILTON.”

*Wells's School Grammar*, p. 200.

“Vītāl | spār̄k of | heāv'nly | *flāme*,  
 Qūit ōh | qūit thīs | mōrtāl | *frāme*.” \* [—POPE.]

*Hiley's English Grammar*, p. 126.

There is, in the works here cited, not only the inconsistency of teaching two very different modes of scanning the same species of verse, but in each instance the scansion is wrong; for all the lines in question are *trochaic of four feet*,—single-rhymed, and, of course, catalectic, and ending with a cæsure, or elision. In no metre that lacks but one syllable, can this sort of foot occur *at the beginning* of a line; yet, as we see, it is sometimes *imagined* to be there, by those who have never been able to find it *at the end*, where it oftenest exists!

OBS. 5.—I have hinted, in the main paragraph above, that it is a common error of our prosodists, to underrate, by one foot, the measure of all trochaic lines, when they terminate with single rhyme; an error into which they are led by an other as gross, that of taking for hypermeter, or mere surplus, the whole rhyme itself, the sound or syllable most indispensable to the verse.

“(For rhyme the *rudder* is of verses,  
 With which, like ships, they steer their courses.)”—*Hudibras*.

Iambics and trochaics, of corresponding metres, and exact in them, agree of course in both the number of feet and the number of syllables; but as the former are slightly redundant with double rhyme, so the latter are deficient as much, with single rhyme; yet, the number of feet may, and should, in these cases, be reckoned the same. An estimable author now living says, “Trochaic verse, with an additional long syllable, is the same as iambic verse, without the initial short syllable.”—*N. Butler's Practical Gram.*, p. 193. This instruction is not quite accurate. Nor would it be right, even if there could be “iambic verse without the initial short syllable,” and if it were universally *true*, that, “Trochaic verse may take an additional *long* syllable.”—*Ibid.* For the addition and subtraction here suggested, will inevitably make the difference of a foot, between the measures or verses said to be the same!

OBS. 6.—“I doubt,” says T. O. Churchill, “whether the *trochaic* can be considered as a legitimate English measure. All the examples of it given by Johnson have an additional long syllable at the end: but these are *iambics*, if we look upon the additional syllable to be at the beginning, which is much more agreeable to the analogy of music.”—*Churchill's New Gram.*, p. 390. This doubt, ridiculous as must be all reasoning in support of it, the author seriously endeavours to raise into a general conviction *that we have no trochaic order of verse!* It can hardly be worth while to notice here all his remarks. “*An additional long syllable*” Johnson never dreamed of—“at the end”—“at the beginning”—or anywhere else. For he discriminated metres, not by the number of feet, as he ought to have done, but by the number of *syllables* he found in each line. His doctrine is this: “Our *iambick* measure comprises verses—Of four syllables,—Of six,—Of eight,—Of ten. Our *trochaick* measures are—Of three syllables,—Of five,—Of seven. These are the measures *which are*

\* See exercises in Punctuation, on page 786, of this work.—G. B.

*now in use*, and above the rest those of seven, eight and ten syllables. Our ancient poets wrote verses sometimes of twelve syllables, as Drayton's Polyolbion; and of fourteen, as Chapman's Homer." "We have another measure very quick and lively, and therefore much used in songs, which may be called the *anapestick*.

'May I govern my passion with absolute sway,  
And grow wiser and better as life wears away.' *Dr. Pope*.

"In this measure a syllable is often retrenched from the first foot, [;] as [,]

'When present we love, and when absent agree,  
I th'nk not of I'ris [.] nor I'ris of mé.' *Dryden*.

"These measures are varied by many combinations, and sometimes by *double endings*, either with or without rhyme, as in the *heroick* measure.

'Tis the divinity that stirs *within us*,  
'Tis heaven itself that points out an *hereafter*.' *Addison*.

"So in that of eight syllables,

'They neither added nor confounded,  
They neither wanted nor abounded.' *Prior*.

"In that of seven,

'For resistance I could *fear none*,  
But with twenty ships had done,  
What thou, brave and happy *Vernon*,  
Hast achieved with six alone.' *Glover*.

"To these measures and their laws, may be reduced every species of English verse."—*Dr. Johnson's Grammar of the English Tongue*, p. 14. See his *Quarto Dict*. Here, except a few less important remarks, and sundry examples of the metres named, is Johnson's *whole scheme* of versification.

OBS. 7.—How, when a prosodist judges certain examples to "have an additional long syllable at the end," he can "look upon the additional syllable to be at the beginning," is a matter of marvel; yet, to abolish trochaics, Churchill not only does and advises this, but imagines short syllables removed sometimes from the beginning of lines; while sometimes he couples final short syllables with initial long ones, to make iambs, and yet does not always count these as feet in the verse, when he has done so! Johnson's instructions are both misunderstood and misrepresented by this grammarian. I have therefore cited them the more fully. The first syllable being retrenched from an *anapest*, there remains an *iambus*. But what countenance has Johnson lent to the gross error of reckoning such a foot an anapest still?—or to that of commencing the measurement of a line by including a syllable not used by the poet? The preceding stanza from Glover, is *trochaic of four feet*; the odd lines full, and of course making double rhyme; the even lines catalectic, and of course ending with a long syllable counted as a foot. Johnson cited it merely as an example of "*double endings*" imagining in it no "additional syllable," except perhaps the two which terminate the two trochees, "fear none" and "Vernon." These, it may be inferred, he improperly conceived to be additional to the regular measure; because he reckoned measures by the number of syllables, and probably supposed single rhyme to be the normal form of all rhyming verse.

OBS. 8.—There is false scansion in many a school grammar, but perhaps none more uncouthly false, than Churchill's pretended amendments of Johnson's. The second of these—wherein “the old *seven[-]foot iambic*” is professedly found in two lines of Glover's *trochaic tetrameter*—I shall quote:—

“In the anapæstic measure, Johnson himself allows, that a syllable is often retrenched from the first foot; yet he gives *as an example of trochaics with an additional syllable at the end of the even lines* a stanza, which, by adopting the *same principle*, would be in the iambic measure:

“For | resis- | tance I | could fear | none,  
But | with twen | ty ships | had done,  
What | thou, brave | and hap | py Ver- | non,  
Hast | achiev'd | with six | alone.

In fact, *the second and fourth lines* here stamp the character of the measure; ☞ *which is the old seven[-]foot iambic broken into four and three*, WITH AN ADDITIONAL SYLLABLE AT THE BEGINNING.”—*Churchill's New Gram.*, p. 391.

After these observations and criticisms concerning the trochaic order of verse, I proceed to say, trochaics consist of the following measures, or metres:—

#### MEASURE I.—TROCHAIC OF EIGHT FEET, OR OCTOMETER.

EXAMPLE I.—“*THE RAVEN*”—*FIRST TWO OUT OF EIGHTEEN STANZAS.*

1.

“Once up | -on a | midnight | dreary, | while I | pondered, | weak and | weary,  
Over | *māny ā* | quaint and | *cūrīoūs* | volume | of for | -gotten | lore,  
While I | nodded, | nearly | napping, | sudden | -ly there | came a | tapping,  
As of | some one | gently | rapping, | rapping | at my | chamber | door.  
‘Tis some | visit | -or,’ I | muttered, | ‘tapping | at my | chamber | door—  
Only | this, and | nothing | more.”

2.

Ah! dis | -tinctly | I re | -member | it was | in the | bleak De | -cember,  
And each | *sēpārāte* | dying | ember | wrought its | ghost up | -on the | floor;  
Eager | -ly I | wished the | morrow; | vainly | had I | tried to | borrow  
From my | books sur | -cease of | sorrow— | sorrow | for the | lost Le | -nore—  
For the | rare and | *rādīānt* | maiden, | whom the | angels | name Le | -nore—  
Nameless | here for | ever | -more.”

EDGAR A. POE: *American Review for February*, 1845.

Double rhymes being less common than single ones, in the same proportion, is this long verse less frequently terminated with a full trochee, than with a single long syllable counted as a foot. The species of measure is, however, to be reckoned the same, though catalectic. By Lindley Murray, and a number who implicitly re-utter what he teaches, the verse of *six trochees*, in which are *twelve syllables* only, is said “to be *the longest* Trochaic line that our language admits.”—*Murray's Octavo Gram.*, p. 257; *Weld's E. Gram.*, p. 211. The examples produced here will sufficiently show the inaccuracy of their assertion.

*EXAMPLE II.—“THE SHADOW OF THE OBELISK.”—LAST TWO STANZAS.*

 How much | less must | heroes | hope for, | in the | wreck of | human | kind!  
 Less than | e’en this | darksome | picture, | which I | tread be | -neath my | feet,  
 Copied | by a | lifeless | moonbeam | on the | pebbles | of the | street;  
 Since if | Cæsar’s | best am | -bition, | living, | was, to | be re | -nowned,  
 What shall | Cassar | leave be | -hind him, | save the | shadow | of a | sound?”

T. W. PARSONS: *Lowell and Carter’s “Pioneer,”* Vol. i, p. 120.*EXAMPLE III.—“THE SLAVES OF MARTINIQUE.”—NINE COUPLETS OUT OF THIRTY-SIX.*

“Beams of | noon, like | burning | lances, | through the | tree-tops | flash and | glisten,  
 As she | stands be | -fore her | lover, | with raised | face to | look and | listen.

Dark, but | comely, | like the | maiden | in the | ancient | Jewish | song,  
 Scarcely | has the | toil of | task-fields | done her graceful | beauty | wrong.

He, the | strong one, | and the | manly, | with the | vassal’s | garb and | hue,  
 Holding | still his | spirit’s | birthright, | to his | higher | nature | true;

Hiding | deep the | *strengthening* | purpose | of a | freeman | in his | heart,  
 As the | Greegree | holds his | Fetish | from the | white man’s | gaze a | -part.

Ever | foremost | of the | toilers, | when the | driver’s | morning | horn  
 Calls a | -way to | stifling | millhouse, | or to | fields of | cane and | corn;

Fall the | keen and | burning | lashes | never | on his | back or | limb;  
 Scarce with | look or | word of | censure, | turns the | driver | unto | him.

Yet his | brow is | always | thoughtful, | and his | eye is | hard and | stern;  
*Slavery’s* | last and | humblest | lesson | he has | never | deigned to | learn.”

“And, at evening | when his | comrades | dance be | -fore their | master’s | door,  
 Folding arms and | knitting | forehead, | stands he | silent | ever | -more.

God be | praised for | every instinct | which re | -bels a | -gainst a | lot  
 Where the | brute sur | -vives the | human, | and man’s | upright | form is | not!”—

*EXAMPLE IV.—“THE PRESENT CRISIS”—TWO STANZAS OUT OF SIXTEEN.*

“Once to | *every* | man and | nation | comes the | moment | to de | -cide,  
 In the | strife of | Truth with | Falsehood, | for the | good or | evil | side;  
 Some great | cause, God’s | new Mes | -siah, | *offering* | each the | bloom or | blight,  
 Parts the | goats up | -on the | left hand, | and the | sheep up | -on the | right,  
 And the | choice goes | by for | -ever | ’twixt that | darkness | and that | light.

Have ye | chosen, | O my | people, | on whose | party | ye shall | stand,  
 Ere the | Doom from | *its* worn | sandals | shakes the | dust a | -gainst our | land?  
 Though the | cause of | evil | prosper, | yet the | Truth a | -lone is | strong, And, al |  
*beit she* | wander | outcast | now, I | see a | -round her | throng  
 Troops of | beauti | -ful tall | angels | to en | -shield her | from all | wrong.”

JAMES RUSSELL LOWELL: *Liberator*, September 4th, 1846.

*EXAMPLE V.—THE SEASON OF LOVE.—A SHORT EXTRACT.*

“In the | Spring, a | fuller | crimson | comes up | -on the | robin’s | breast;  
 In the | Spring, the | wanton | lapwing | gets him | -self an | other | crest;  
 In the | Spring, a | *livelier* | iris | changes | on the | burnished | dove;  
 In the | Spring, a | young man’s | fancy | lightly | turns to | thoughts of | love.

Then her | cheek was | pale, and | thinner | than should | be for | one so | young;  
 And her | eyes on | all my | motions, | with a | mute ob | -servance, | hung.  
 And I | said, ‘My | cousin | Amy, | speak, and | speak the | truth to | me;  
 Trust me, | cousin, | all the | current | of my | being | sets to | thee.’”

*Poems by* ALFRED TENNYSON, Vol. ii, p. 35.

Trochaic of eight feet, as these sundry examples will suggest, is much oftener met with than iambic of the same number; and yet it is not a form very frequently adopted. The reader will observe that it requires a considerable pause after the fourth foot; at which place one might divide it, and so reduce each couplet to a stanza of four lines, similar to the following examples:—

## PART OF A SONG, IN DIALOGUE.

SYLVIA.

“Corin, | cease this | idle | teasing;  
 Love that’s | forc’d is | harsh and | sour;  
 If the | lover | be dis | -pleasing,  
 To per | -sist dis | -gusts the | more.”

CORIN.

“Tis in | vain, in | vain to | fly me,  
*Sylvia*, | I will | still pur | -sue;  
 Twenty | thousand | times de | -ny me,  
 I will | kneel and | weep a | -new.”

SYLVIA.

“Cupid | ne’er shall | make me | languish,  
 I was | born a | -verse to | love;

Lovers' | sighs, and | tears, and | anguish,  
Mirth and | pastime | to me | prove."

CORIN.

"Still I | vow with | patient | duty  
Thus to | meet your | proudest | scorn;  
You for | unre | -lenting | beauty  
I for | constant | love was | born."

*Poems by* ANNA LÆTITIA BARBAULD, p. 56.

PART OF A CHARITY HYMN.

1.

"Lord of | life, all | praise ex | -celling,  
thou, in | glory | uncon | -fin'd,  
Deign'st to | make thy | humble | dwelling  
with the | poor of | humble | mind.

2.

As thy | love, through | all cre | -ation,  
beams like | thy dif | -fusive | light;  
So the | scorn'd and | humble | station  
shrinks be | -fore thine | equal | sight.

3.

Thus thy | care, for | all pro | -viding,  
warm'd thy | faithful | prophet's | tongue;  
Who, the | lot of | all de | -ciding,  
to thy | chosen | *Israel* | sung:

4.

"When thine | harvest | yields thee | pleasure,  
thou the | golden | sheaf shalt | bind;  
To the | poor be | -longs the | treasure  
of the | scatter'd | ears be | -hind."

*Psalms and Hymns of the Protestant Episcopal Church*, Hymn LV.

A still more common form is that which reduces all these tetrameters to single rhymes, preserving their alternate succession. In such metre and stanza, is Montgomery's "Wanderer of Switzerland, a Poem, in Six Parts," and with an aggregate of eight hundred and forty-four lines. Example:—

1.

"*Wanderer*, | whither | wouldst thou | roam?  
To what | region | far a | -way,

Bend thy | steps to | find a | home,  
In the | twilight | of thy | day?’

2.

‘In the | twilight | of my | day,  
I am | hastening | to the | west;  
There my | weary limbs | to lay,  
Where the | sun re | -tires to | rest.

3.

Far be | -yond the At | -lantic | floods,  
Stretched be | -neath the | evening | sky,  
Realms of | mountains, | dark with | woods,  
In Co | -lumbia’s | bosom | lie.

4.

There, in | glens and | caverns | rude,  
Silent | since the | world be | -gan,  
Dwells the | virgin | Soli | -tude,  
Unbe | -trayed by | faithless | man:

5.

Where a | tyrant | never | trod,  
Where a | slave was | never | known,  
But where | nature | worships |  
God In the | wilder | -ness a | -lone.

6.

Thither, | thither | would I | roam;  
There my | children | may be | free;  
I for | them will | find a | home;  
They shall | find a | grave for | me.”

*First six stanzas of Part VI, pp. 71 and 72.*

## MEASURE II.—TROCHAIC OF SEVEN FEET, OR HEPTAMETER.

*EXAMPLE.—PSALM LXX,\* VERSIFIED.*

Hasten, | Lord, to | rescue | me, and | set me | safe from | trouble;  
Shame thou | those who | seek my | soul, re | -ward their | mischief | double.  
Turn the | taunting | scorners | back, who | cry, ‘A | -ha!’ so | loudly;  
Backward | in con | -fusion | hurl the | foe that | mocks me | proudly.  
Then in | thee let | those re | -joice, who | seek thee, | self-de | -nying;  
All who | thy sal | -vation | love, thy | name be | glory | -fying.  
So let | God be | magni | -fied. But | I am | poor and | needy:  
Hasten, | Lord, who | art my | Helper; | let thine | aid be | speedy.

This verse, like all other that is written in very long lines, requires a cæsural pause of proportionate length; and it would scarcely differ at all to the ear, if it were cut in two at

\* The Seventieth Psalm is the same as the last five verses of the Fortieth, except a few unimportant differences of words or points.

the place of this pause—provided the place were never varied. Such metre does not appear to have been at any time much used, though there seems to be no positive reason why it might not have a share of popularity. To commend our versification for its “boundless variety,” and at the same time exclude from it forms either unobjectionable or well authorized, as some have done, is plainly inconsistent. Full trochaics have some inconvenience, because all their rhymes must be double; and, as this inconvenience becomes twice as much when any long line of this sort is reduced to two short ones, there may be a reason why a stanza precisely corresponding to the foregoing couplets is seldom seen. If such lines be divided and rhymed at the middle of the fourth foot, where the cæsural pause is apt to fall, the first part of each will be a trochaic line of four feet, single-rhymed and catalectic, while the rest of it will become an iambic line of three feet, with double rhyme and hypermeter. Such are the prosodial characteristics of the following lines; which, if two were written as one, would make exactly our full trochaic of seven feet, the metre exhibited above:—

“Whisp’ring, | heard by | wakeful | maids,  
To whom | the night | stars *guide* | *us*,  
Stolen | walk, through | moonlight | shades,  
With those | we love | *beside* | *us*”—*Moore’s Melodies*, p. 276.

But trochaic of seven feet may also terminate with single rhyme, as in the following couplet, which is given anonymously, and, after a false custom, erroneously, in N. Butler’s recent Grammar, as “trochaic of *six feet, with an additional long syllable*:—

“Night and | morning | were at | meeting | over | Water | -loo;  
Cocks had | sung their | *earliest* | greeting; | faint and | low they | crew.”\*

In Frazee’s Grammar, a separate line or two, similar in metre to these, and rightly reckoned to have *seven feet*, and many lines, (including those above from Tennyson, which W. C. Fowler erroneously gives for *Heptameter*,) being a foot longer, are presented as trochaics of *eight* feet; but Everett, the surest of our prosodists, remaining, like most others, a total stranger to our octometers, and too little acquainted with trochaic heptameters to believe the species genuine, on finding a couple of stanzas in which two such lines are set with shorter ones of different sorts, and with some which are defective in metre, sagely concludes that all lines of more than “*six trochees*” must necessarily be condemned as prosodial anomalies. It may be worth while to repeat the said stanzas here, adding such corrections and marks as may suggest their proper form and scansion. But since they commence with the shorter metre of six trochees only, and are already placed under that head, I too may take them in the like connexion, by now introducing my third species of trochaics, which is Everett’s tenth.

### MEASURE III.—TROCHAIC OF SIX FEET, OR HEXAMETER.

#### *EXAMPLE.—HEALTH.*

“Up the | dewy | mountain, | Health is | bounding | lightly;  
On her | brows a | garland, | twin’d with | richest | posies:  
Gay is | she, e | -late with | hope, and | smiling | sprightly;

\* It is obvious, that these two lines may easily be reduced to an agreeable stanza, by simply dividing each after the fourth foot—G. B.

Redder | is her | cheek, and | sweeter | than the | rose is.”

G. BROWN: *The Institutes of English Grammar*, p. 258.

This metre appears to be no less rare than the preceding; though, as in that case, I know no good reason why it may not be brought into vogue. Professor John S. Hart says of it: “This is the *longest* Trochaic verse that seems *to have been cultivated*.”—*Hart’s Eng. Gram.*, p. 187. The seeming of its cultivation he doubtless found only in sundry modern grammars. Johnson, Bicknell, Burn, Coar, Ward, Adam,—old grammarians, who vainly profess to have illustrated “every species of English verse,”—make no mention of it; and, with all the grammarians who notice it, *one anonymous couplet*, passing from hand to hand, has everywhere served to exemplify it.

Of this, “the line of six Trochees,” Everett says: “This measure *is languishing*, and rarely used. The following example is often cited:—

‘On a | mountain, | stretched be | -neath a | hoary | willow,  
Lay a | shepherd | swain, and | view’d the | rolling | billow.’”\*

Again: “We have the following from BISHOP HEBER:—

Hōlŷ, | hōlŷ | hōlŷ! | āl thē | sāints ā | -dōre thēe,  
Cāstīng | dōwn thēir | gōldēn | crōwns ā | -rōund thē | glāssŷ | sēa;  
Chērŷ | -bīm ānd | sērā | -phīm [*āre*,] | fālīng | dōwn bē | -fōre thēe,  
*Which* wērt, | ānd ārt, | ānd ēv | -ērmōre | shālt bē!

Holy, | holy, | holy! | though the | darkness | hide thee,  
Though the | eye of | sinful | man thy | glory | may not | see,  
Only | thou, [*O* | *God*,] art | holy; | there is | none be | -side thee,  
Pērfēct | īn pōw’r, | īn lōve, | ānd pū | -rītŷ.’

Only the first *and the third* lines of these stanzas are to our purpose,” remarks the prosodist. That is, only these he conceived to be “lines of six Trochees.” But it is plain, that the third line of the first stanza, having seven long syllables, must have seven feet, and cannot be a trochaic hexameter; and, since the third below should be like it in metre, one can hardly forbear to think the words which I have inserted in brackets, were accidentally omitted.

Further: “It is worthy of remark,” says he, “that the second line of each of these stanzas is composed of *six Trochees* and an *additional long syllable*. As its corresponding line is an Iambic, and as the piece has some licenses in its construction, it is *far safer* to conclude that this line is an *anomaly* than that it forms a distinct species of verse. We

\* In Sanborn’s Analytical Grammar, on page 279th, this couplet is ascribed to “Pope,” but I have sought in vain for this quotation, or any example of similar verse, in the works of that poet. The lines, one or both of them, appear, *without reference*, in *L. Murray’s Grammar, Second Edition*, 1796, p. 176, and in subsequent editions; in *W. Allen’s*, p. 225; *Bullions’s*, 178; *N. Butler’s*, 192; *Chandler’s New*, 196; *Clark’s*, 201; *Churchill’s*, 187; *Cooper’s Practical*, 185; *Davis’s*, 137; *Farnum’s*, 106; *Felton’s*, 142; *Frazee’s*, 184; *Frost’s*, 164; *S. S. Greene’s*, 250; *Hallock’s*, 244; *Hart’s*, 187; *Hiley’s*, 127; *Humphrey’s Prosody*, 17; *Parker and Fox’s Gram.*, Part iii, p. 60; *Weld’s*, 211; *Ditto Abridged*, 138; *Wells’s*, 200; *Fowler’s*, 658; and doubtless in many other such books.

must therefore conclude that the tenth [the metre of six trochees] is the longest species of Trochaic line known to English verse.”—*Everett's Versification*, pp. 95 and 96.

This, in view of the examples above, of our longer trochaics, may serve as a comment on the author's boast, that, “having deduced his rules from the usage of the great poets, he has the best reason for being confident of their correctness.”—*Ibid.*, Pref., p. 5.

Trochaic hexameter, too, may easily be written with *single rhyme*; perhaps more easily than a specimen suited to the purpose can be cited from any thing already written. Let me try:—

*EXAMPLE I.—THE SORCERER.*

Lonely | in the | forest, | subtle | from his | birth,  
 Lived a | necro | -mancer, | wondrous | son of | earth.  
 More of | him in | -quire not, | than I | choose to | say;  
 Nymph or | dryad | bore him—| else 'twas | witch or | fay;  
 Ask you | who his | father?—| haply | he might | be  
 Wood-god, | satyr, | sylvan; |—such his | pedi | -gree.  
 Reared mid | fauns and | fairies, | knew he | no com | -peers;  
 Neither | cared he | for them, | saving | ghostly | seers.  
 Mistress | of the | black-art, | “wizard | gaunt and | grim,”  
 Nightly | on the | hill-top, | “read the | stars to | him.”  
 These were | welcome | teachers; | drank he | in their | lore;  
 Witchcraft | so en | -ticed him, | still to | thirst for | more.  
 Spectres | he would | play with, | phantoms | raise or | quell;  
 Gnomes from | earth's deep | centre | knew his | potent | spell.  
 Augur | or a | -ruspex | had not | half his | art;  
 Master | deep of | magic, | spirits | played his | part;  
 Demons, | imps in | -fernal, | conjured | from be | -low,  
 Shaped his | grand en | -chantments | with im | -posing | show.

*EXAMPLE II.—AN EXAMPLE OF HART'S, CORRECTED*

“Where the | wood is | waving, | *shady*, | green, and | high,  
 Fauns and | dryads, | *nightly*, | watch the | starry | sky.”  
 See *Hart's E. Gram.*, p. 187; or *the citation thence below*.

A couplet of this sort might easily be reduced to a pleasant little stanza, by severing each line after the third foot, thus:—

Hearken! | hearken! | hear ye;  
 Voices | meet my | ear.  
 Listen, | never | fear ye;  
 Friends—or | foes—are | near.  
 Friends! “So | -ho!” they're | shouting.—  
 “Ho! so | -ho, a | -hoy!”—  
 'Tis no | Indian, | scouting.  
 Cry, *so* | *-ho!* with | joy.

But a similar succession of eleven syllables, six long and five short, divided after the seventh, leaving two iambs to form the second or shorter line,—(since such a division

produces different orders and metres both,—) will, I think, retain but little resemblance in rhythm to the foregoing, though the actual sequence of quantities long and short is the same. If this be so, the particular measure or correspondent length of lines is more essential to the character of a poetic strain than some have supposed. The first four lines of the following extract are an example relevant to this point:—

*ARIEL'S SONG.*

“Cōme ũn | -tō´ thēse | yēllōw | sānds,  
And thēn | tāke hānds:  
Court’sied | when you | have and | kiss’d,  
(The wild | waves whist,)  
Foot it | featly | here and | there;  
And, sweet | sprites, the | burden | bear.”

SINGER’S SHAKSPEARE: *Tempest*, Act i, Sc. 2.

MEASURE IV.—TROCHAIC OF FIVE FEET, OR PENTAMETER

*EXAMPLE I.—DOUBLE RHYMES AND SINGLE, ALTERNATED.*

“Mountain | winds! oh! | whither | do ye | call me?  
Vainly, | vainly, | would my | steps pur | -sue:  
Chains of | care to | lower | earth en | -thrall me,  
Wherefore | thus my | weary | spirit | woo?

Oh! the | strife of | this di | -vided | being!  
Is there | peace where | ye are | borne, on | high?  
Could we | soar to | your proud | eyries | fleeing,  
In our | hearts, would | haunting | *mēmōries* | die?”

FELICIA HEMANS: “*To the Mountain Winds:*” *Everet’s Versif.*, p. 95.

*EXAMPLE II.—RHYMES OTHERWISE ARRANGED.*

“Then, me | -thought, I | heard a | hollow | sound,  
*Gāthērīng* | up from | all the lower | ground:  
*Nārrowīng* | in to | where they | sat as | -sembled,  
Low vo | -*lūptūōūs* | music, | winding, | trembled.”

ALFRED TENNYSON: *Frazee’s Improved Gram.*, p. 184; *Fowler’s*, 657.

This measure, whether with the final short syllable or without it, is said, by Murray, Everett, and others, to be “*very uncommon*.” Dr. Johnson, and the other old prosodists named with him above, knew nothing of it. Two couplets, exemplifying it, now to be found in sundry grammars, and erroneously reckoned to *differ as to the number of their feet*, were either selected or composed by Murray, for his Grammar, at its origin—or, if not then, at its first reprint, in 1796. They are these:—

- (1.) “All that | walk on | foot or | ride in | *chariots*,  
All that | dwell in | pala | -ces or | garrets.”

*L. Murray’s Gram.*, 12mo, 175; 8vo, 257; *Chandler’s*, 196; *Churchill’s*, 187; *Hiley’s*, 126; *et al.*

- (2.) “Idle | after | dinner, | in his | chair,

Sat a | farmer, | ruddy, | fat, and | fair.”

*Murray, same places; N. Butler's Gr.*, p. 193; *Hallock's*, 244; *Hart's*, 187; *Weld's*, 211; *et al.*

Richard Hiley most absurdly scans this last couplet, and all verse like it, into “*the Heroic measure*,” or a form of our *iambic pentameter*, saying, “Sometimes a syllable is cut off from the *first* foot; as,

ī | -dlē āf | -tēr dīnn | -nēr īn | hīs chāir [,] Sāt | ā fār | -mēr [,] rūd | -dý, fāt, | ānd fāir.” *Hiley's English Grammar*, Third Edition, p. 125.

J. S. Hart, who, like many others, has mistaken the metre of this last example for “*Trochaic Tetrameter*,” with a surplus “syllable,” after repeating the current though rather questionable assertion, that, “this measure is very uncommon,” proceeds with our “*Trochaic Pentameter*,” thus: “This species is likewise uncommon. It is composed of five trochees; as,

īn thē | dārk ānd | grēen ānd | glōomý | vāllēy,  
Sātýrs | by thē | brōoklēt | lōve tō | dāllý.”

And again: [☞] “*The SAME with an ADDITIONAL accented syllable*; as,

Whēre thē | wōod īs | wāvīng | grēen ānd | *hīgh*,  
Fāuns ānd | Dryāds | wāтч thē | stārrý | *sky*.”

*Hart's English Grammar*, First Edition, p. 187.

These examples appear to have been made for the occasion; and the latter, together with its introduction, made unskillfully. The lines are of five feet, and so are those about the ruddy farmer; but there is nothing “*additional*” in either case; for, as pentameter, they are all *catalectic*, the final short syllable being dispensed with, and a cæsure preferred, for the sake of single rhyme, otherwise not attainable. “Five trochees” and a rhyming “syllable” will make trochaic *hexameter*, a measure perhaps more pleasant than this. See examples above.

## MEASURE V.—TROCHAIC OF FOUR FEET, OR TETRAMETER.

### EXAMPLE I.—A MOURNFUL SONG.

1.

“Raving | winds a | -round her | blowing,  
Yellow | leaves the | woodlands | strewing,  
By a | river | hoarsely | roaring,  
Isa | -bella | strayed de | -ploring.  
‘Farewell | hours that | late did | measure  
Sunshine | days of | joy and | pleasure;  
Hail, thou | gloomy | night of | sorrow,  
Cheerless | night that | knows no | morrow.

2.

O’er the | past too | fondly | *wandering*,  
On the | hopeless | future | *pondering*,

Chilly | grief my | life-blood | freezes,  
 Fell de | -spair my | fancy | seizes.  
 Life, thou | soul of | *every* | blessing,  
 Load to | *misery* | most dis | -tressing,  
 O how | gladly | I'd re | -sign thee,  
 And to | dark ob | *-livion* | join thee.”

ROBERT BURNS: *Select Works*, Vol. ii, p. 131

*EXAMPLE II.—A SONG PETITIONARY.*

“*Powers* ce | -lestial, | whose pro | -tection  
 Ever | guards the | *virtuous* | fair,  
 While in | distant | climes I | wander, Let my |  
 Mary | be your | care:  
 Let her | form so | fair and | faultless,  
 Fair and | faultless | as your | own;  
 Let my | Mary's | kindred | spirit  
 Draw your | choicest | *influence* | down.  
 Make the | gales you | waft a | -round her  
 Soft and | peaceful | as her | breast;  
 Breathing | in the | breeze that | fans her,  
 Soothe her | bosom | into | rest:  
*Guardian* | angels, | O pro | -tect her,  
 When in | distant | lands I | roam;  
*To realms* | *unknown* | *while fate* | *exiles me*,  
 Make her | bosom | still my | home.”

BURNS'S SONGS, Same Volume, p. 165.

*EXAMPLE III.—SONG OF JUNO AND CERES.*

*Ju.* “Honour, | riches, marriage | -blessing,  
 Long con | *-tinuance*, | and in | -creasing,  
 Hourly | joys be | still up | -on you!  
 Juno | sings her | blessings | on you.”  
*Cer.* “Earth's in | -crease, and | foison | plenty;  
 Barns and | garners | never | empty;  
 Vines with | clust'ring | bunches | growing;  
 Plants with | goodly | burden | bowing;  
 Spring come | to you, | at the | farthest,  
 In the | very | end of | harvest!  
 Scarci | -ty and | want shall | shun you;  
 Ceres' | blessing | so is | on you.”

SHAKESPEARE: *Tempest*, Act iv, Sc. 1.

*EXAMPLE IV.—ON THE VOWELS.*

“We are | little | airy | creatures,  
 All of | diff'rent | voice and | features;  
 One of | us in | glass is | set,  
 One of | us you'll | find in | jet;

T'other | you may | see in | tin,  
And the | fourth a | box with | -in;  
If the | fifth you | should pur | -sue,  
It can | never | fly from | you."

SWIFT: *Johnson's British Poets*, Vol. v, p. 343.

*EXAMPLE V.—USE TIME FOR GOOD.*

"Life is | short, and | time is | swift;  
Roses | fade, and | shadows | shift;  
But the ocean | and the | river  
Rise and | fall and | flow for | ever;  
Bard! not | vainly | heaves the | ocean;  
Bard! not | vainly | flows the | river;  
Be thy | song, then, | like their | motion,  
Blessing | now, and | blessing | ever."

EBENEZER ELLIOT: *From a Newspaper*.

*EXAMPLE VI.—"THE TURKISH LADY"—FIRST FOUR STANZAS.*

1.

"'Twas the | hour when | rites un | -holy  
Called each | Paynim | voice to | pray'r,  
And the | star that | faded | slowly,  
Left to | dew's the | freshened | air.

2.

Day her | sultry | fires had | wasted,  
Calm and | sweet the | moonlight | rose;  
E'en a | captive's | spirit | tasted  
Half ob | -livion | of his | woes.

3.

Then 'twas | from an | Emir's | palace  
Came an | eastern | lady | bright;  
She, in | spite of | tyrants | jealous,  
Saw and | loved an | English | knight.

4.

Tell me, | captive, | why in | anguish  
Foes have | dragged thee | here to | dwell  
Where poor | Christians, | as they | languish.  
Hear no | sound of | sabbath | bell?"

THOMAS CAMPBELL: *Poetical Works*, p. 115.

*EXAMPLE VII.—THE PALMER'S MORNING HYMN.*

"Lauded | be thy | name for | ever,  
Thou, of | life the | guard and | giver!  
Thou canst | guard thy | creatures | sleeping,

Heal the | heart long | broke with | weeping,  
 Rule the | ōuphes ānd | ēlves āt | wīll  
*Thāt vēx | thē āir | ōr hāunt | thē hīll,*  
*And āll | thē fū | -rȳ sūb | -jēct kēep*  
*Ōf bōil | -īng clōud | ānd chāf | -ēd dēep!*

I hāve | sēen, ānd | wēll I | *knōw* ĭt!  
 Thou hast | done, and | Thou wilt | do it!  
 God of | stillness | and of | motion!  
 Of the | rainbow | and the | ocean!  
 Of the | mountain, | rock, and | river!  
 Blessed | be Thy | name for | ever!  
 I have | seen thy | wondrous | might  
 Through the | shadows | of this | night!

Thou, who | slumber'st | not, nor | sleepest!  
 Blest are | they thou | kindly | keepest!  
 Spirits, | from the | ocean | under,  
 Liquid | flame, and | levell'd | thunder,  
 Need not | waken | nor a | -larm them—  
 All com | -bined, they | cannot | harm them.

God of | evening's | yellow | ray,  
 God of | yonder | dawning | day,  
 Thine the | flaming | sphere of | light!  
 Thine the | darkness | of the | night!  
 Thine are | all the | gems of | even,  
 God of | angels! | God of | heaven!"

JAMES HOGG: *Mador of the Moor, Poems*, p. 206.

*EXAMPLE VIII—A SHORT SONG, OF TWO STANZAS.*

"Stay, my | charmer, | can you | leave me?  
 Cruel, | cruel, | to de | -ceive me!  
 Well you | know how | much you | grieve me:  
 Cruel | charmer, | can you | go?  
 Cruel | charmer, | can you | go?

By my | love, so | ill re | -quited;  
 By the | faith you | fondly plighted;  
 By the | pangs of | lovers slighted;  
 Do not, | do not | leave me | so!  
 Do not, | do not | leave me | so!"

ROBERT BURNS: *Select Works*, Vol. ii, p. 129.

*EXAMPLE IX.—LINGERING COURTSHIP.*

1.

"Never | wedding, | ever | wooing,  
 Still | lovelorn | heart pur | -suing,  
 Read you | not the | wrong you're | doing,  
 In my | cheek's pale | hue?

All my | life with | sorrow | strewing,  
 Wed, or | cease to | woo.

2.

Rivals | banish'd, | bosoms | plighted,  
 Still our | days are | disu | -nited;  
 Now the | lamp of | hope is | lighted,  
 Now half | quench'd ap | -pears,  
 Damp'd, and | *wavering*, and be | -nighted,  
 Midst my | sighs and | tears.

3.

Charms you | call your | dearest | blessing,  
 Lips that | thrill at | your ca | -ressing,  
 Eyes a | *mutual* soul con | -fessing,  
 Soon you'll | make them | grow  
 Dim, and | worthless | your pos | -sessing,  
 Not with | age, but | woe!"

CAMPBELL: *Everett's System of Versification*, p. 91.

*EXAMPLE X.*—"BOADICEA"—*FOUR STANZAS FROM ELEVEN.*

1.

"When the | British | warrior | queen,  
 Bleeding | from the | Roman | rods,  
 Sought, with | an in | -dignant | mien,  
 Counsel | of her | country's | gods,

2.

Sage be | -neath the | spreading | oak,  
 Sat the | Druid, | hoary | chief;  
*Every* burning | word he | spoke  
 Full of | rage, and | full of | grief.

3.

Princess! | if our | aged | eyes  
 Weep up | -on thy | matchless | wrongs,  
 'Tis be | -cause re | -sentment | ties  
 All the | terrors | of our | tongues.

4.

Rome shall | perish—| write that | word  
 In the | blood that | she hath | spilt;  
 Perish, | hopeless | and ab | -horr'd,  
 Deep in | ruin | as in | guilt."

WILLIAM COWPER: *Poems*, Vol. ii, p. 244.

*EXAMPLE XI—"THE THUNDER STORM"—TWO STANZAS FROM TEN.*

"Now in | deep and | dreadful | gloom,  
 Clouds on | clouds por | -tentous | spread,  
 Black as | if the | day of | doom  
 Hung o'er | Nature's | shrinking | head:  
 Lo! the | lightning | breaks from | high,  
 God is | coming! |—God is | nigh!  
 Hear ye | not his | *chariot* | wheels,  
 As the | mighty | thunder | rolls?  
 Nature, | startled | Nature | reels,  
 From the | centre | to the | poles:  
 Tremble! |—Ocean, | Earth, and | Sky!  
 Tremble! |—God is | passing | by!"

J. MONTGOMERY: *Wanderer of Switzerland, and other Poems*, p. 130.

*EXAMPLE XII.—"THE TRIUMPHS OF OWEN," KING OF NORTH WALES.\**

"Owen's | praise de | -mands my song,  
 Owen | swift and | Owen | strong;  
 Fairest | flow'r of | *Roderick's* | stem,

 He nor | heaps his | brooded | stores,

 Lord of | *every* | regal | art,  
*Liberal* | hand and | open | heart.  
 Big with | hosts of | mighty | name,  
 Squadrons | three a | -gainst him came;  
 This the | force of | Eirin | hiding,  
 Side by | side as | proudly | riding,  
 On her | shadow | long and | gay,  
 Lochlin | ploughs the | *watery* | way:  
 There the Norman | sails a | -far  
 Catch the | winds, and | join the | war;  
 Black and | huge, a | -long they | sweep,  
 Burthens | of the | angry | deep.  
 Dauntless | on his | native | sands,  
*The Drag* | *-on-son* | *of Mo* | *-na stands*;†  
*In glit* | *-tering arms* | *and glo* | *-ry drest*,

*Echoing* | to the | battle's | roar;  
 Where his | glowing | eyeballs | turn,  
 Thousand | banners | round him | burn.

\* "Owen succeeded his father Griffin in the principality of North Wales, A.D. 1120. This battle was fought near forty years afterwards. North Wales is called, in the fourth line, '*Gwyneth*;' and 'Lochlin,' in the fourteenth, is Denmark."—*Gray*. Some say "Lochlin," in the Annals of Ulster, means Norway.—G. B.

† "The red dragon is the device of Cadwallader, which all his descendants bore on their banners."—*Gray*.

 Marking | with in | -dignant | eye  
 Fear to | stop, and | shame to | fly.  
 There Con | -fusion, | Terror's | child,  
 Conflict | fierce, and | Ruin | wild,  
 Ago | -ny, that | pants for | breath,

EXAMPLE XIII.—"*GRONGAR HILL*."—FIRST TWENTY-SIX LINES.

"Silent | Nymph, with | *curious* | eye,  
 Who, the | purple | eve, dost | lie  
 On the | mountain's | lonely | van,  
*Beyond* | *the noise* | *of bus* | *-y man*;  
 Painting | fair the | form of | things,  
 While the | yellow | linnet | sings;  
 Or the | tuneful | nightin | -gale

 Come, and | aid thy | sister | Muse.

 Sweetly | -musing | Quiet | dwells;  
 Grongar, | in whose | silent | shade,  
 For the | modest | Muses | made,  
*So oft* | *I have*, | *the eve* | *-ning still*,  
 At the | fountain | of a | rill,

### OBSERVATIONS.

OBS. 1.—This is the most common of our trochaic measures; and it seems to be equally popular, whether written with single rhyme, or with double; in stanzas, or in couplets; alone, or with some intentional intermixture. By a careful choice of words and style, it may be adapted to all sorts of subjects, grave, or gay; quaint, or pathetic; as may the corresponding iambic metre, with which it is often more or less mingled, as we see in some of the examples above. *Milton's L'Allegro*, or *Gay Mood*, has one hundred and fifty-two lines; ninety-eight of which are iambics; fifty-four trochaic tetrameters; a very few of each order having double rhymes. These orders the poet has *not*—"very ingeniously

*alternated*” as Everett avers; but has simply interspersed, or commingled, with little or no regard to alternation. His *Il Penseroso*, or *Grave Mood*, has twenty-seven trochaic tetrameters, mixed irregularly with one hundred and forty-nine iambics.

OBS. 2.—Everett, who divides our trochaic tetrameters into two species of metre, imagines that the catalectic form, or that which is single-rhymed, “has a *solemn effect*,”—“imparts to all pieces *more dignity* than any of the other short measures,”—“that no trivial or humorous subject should be treated in this measure,”—and that, “besides dignity, it imparts an air of *sadness* to the subject.”—*English Verses.*, p. 87. Our “line of four trochees” he supposes to be “*difficult* of construction,”—“not of very *frequent* occurrence,”—“the most *agreeable* of all the trochaic measures,”—“remarkably well adapted to lively subjects,”—and “peculiarly expressive of the eagerness and fickleness of the passion of love.”—*Ib.*, p. 90. These pretended metrical characteristics seem scarcely more worthy of reliance, than astrological predictions, or the oracular guessings of our modern craniologists.

OBS. 3.—Dr. Campbell repeats a suggestion of the older critics, that gayety belongs naturally to all trochaics, as such, and gravity or grandeur, as naturally, to iambics; and he attempts to find a reason for the fact; while, perhaps, even here—more plausible though the supposition is—the fact may be at least half imaginary. “The iambus,” says he, “is expressive of dignity and grandeur; the trochee, on the contrary, according to Aristotle, (Rhet. Lib. III,) is frolicsome and gay. It were difficult to assign a reason of this difference that would be satisfactory; but of the thing itself, I imagine, most people will be sensible on comparing the two kinds together. I know not whether it will be admitted as a sufficient reason, that the distinction into metrical feet hath a much greater influence in poetry on the rise and fall of the voice, than the distinction into words; and if so, when the cadences happen mostly after the long syllables, the verse will naturally have an air of greater gravity than when they happen mostly after the short.”—*Campbell’s Philosophy of Rhetoric*, p. 354.

#### MEASURE VI.—TROCHAIC OF THREE FEET, OR TRIMETER.

##### EXAMPLE I.—*YOUTH AND AGE CONTRASTED.*

“Crabbed | age and | youth  
 Cannot | live to | -gether;  
 Youth is | full of | pleasance,  
 Age is | full of | care:  
 Youth, like | summer | morn,  
 Age, like | winter | weather;  
 Youth, like | summer, | brave;  
 Age, like | winter, | bare.  
 Youth is | full of | sport,  
 Age’s | breath is | short,  
 Youth is | nimble, | age is | lame;  
 Youth is | hot and | bold,  
 Age is | weak and | cold;  
 Youth is | wild, and | age is | tame.”

*The Passionate Pilgrim*; SINGER’S SHAKSPEARE, Vol. ii p. 594.

*EXAMPLE II—COMMON SENSE AND GENIUS.*

3.

“While I | touch the | string,  
 Wreathe my | brows with | laurel;  
 For the | tale I | sing,  
 Has, for | once, a | moral!

4.

Common | Sense went | on,  
 Many | wise things | saying;  
 While the | light that | shone,  
 Soon set | Genius | straying.

5.

One his eye ne’er | rais’d  
 From the | path be | -fore him;  
 T’ other | idly | gaz’d  
 On each | night-cloud | o’er him.

6.

While I | touch the | string,  
 Wreathe my | brows with | laurel;  
 For the | tale I | sing,  
 Has, for | once, a | moral!

7.

So they | came, at | last,  
 To a | shady | river;  
 Common | Sense soon | pass’d  
 Safe,—as | he doth | ever.

8.

While the | boy whose | look  
 Was in | heav’n that | minute,  
 Never | saw the | brook,—  
*But tum | -bled head | -long in it.”*

*Six Stanzas from Twelve.*—MOORE’S MELODIES, p. 271.

This short measure is much oftener used in stanzas, than in couplets. It is, in many instances, combined with some different order or metre of verse, as in the following:—

*EXAMPLE III.—PART OF A SONG.*

“Go where | glory | waits thee,  
 But while | fame e | -lates thee,  
*Oh! still | remem | -ber me.*  
 When the | praise thou | meetest,  
 To thine | ear is | sweetest,  
*Oh! then | remem | -ber me.*  
 Other | arms may | press thee,

Dearer | friends ca | -ress thee,  
 All the | joys that | bless thee,  
 Sweeter | far may | be:  
 But when | friends are | nearest,  
 And when | joys are | dearest,  
*Oh! then | remem | -ber me.*  
 When, at | eve, thou | rovest,  
 By the | star thou | lovest,  
*Oh! then | remem | -ber me.*  
 Think when | home re | -turning,  
 Bright we've | seen it | burning;  
*Oh! thus | remem | -ber me.*  
 Oft as | summer | closes,  
 When thine | eye re | -poses  
 On its | ling'ring | roses,  
 Once so | loved by | thee,  
 Think of | her who | wove them,  
 Her who | made thee | love them;  
*Oh! then | remem | -ber me."*

MOORE'S *Melodies, Songs, and Airs*, p. 107.

*EXAMPLE IV.—FROM AN ODE TO THE THAMES.*

"On thy | shady | margin,  
 Care its | load dis | -charging,  
*Is lull'd | to gen | -tle rest:*  
 Britain | thus dis | -arming,  
 Nothing | her a | -larming,  
*Shall sleep on Cæ | -sar's breast."*

See ROWE'S POEMS: *Johnson's British Poets*, Vol. iv, p. 58.

*EXAMPLE V.—"THE TRUE POET"—FIRST TWO OF NINE STANZAS.*

1.

"Poet | of the | heart,  
 Delving | in its | mine,  
 From man | -kind a | -part,  
 Yet where | jewels | shine;  
 Heaving | upward | to the | light,  
 Precious | wealth that | charms the | sight;

2.

Toil thou | still, deep | down,  
 For earth's | hidden | gems;  
 They shall | deck a | crown,  
 Blaze in | dia | -dems;  
*And when | thy hand | shall fall | to rest,*  
 Brightly | jewel | beauty's | breast."

JANE B. LOCKE: *N. Y. Evening Post; The Examiner*, No. 98.

*EXAMPLE VI.—“SUMMER LONGINGS”—FIRST TWO OF FIVE STANZAS.*

“Ah! my | heart is | ever | waiting,  
     Waiting | for the | May,—  
 Waiting | for the | pleasant | rambles  
 Where the | fragrant | hawthorn | brambles,  
     With the | woodbine | alter | -nating,  
         Scent the | dewy | way.  
 Ah! my | heart is | weary | waiting,  
     Waiting | for the | May.  
  
 Ah! my | heart is | sick with | longing,  
     Longing | for the | May,—  
 Longing | to e | -scape from | study,  
 To the | young face | fair and | ruddy,  
     And the | thousand | charms be | -longing  
         To the | Summer’s | day.  
 Ah! my | heart is | sick with | longing,  
     Longing | for the | May.”

## MEASURE VII.—TROCHAIC OF TWO FEET, OR DIMETER.

*EXAMPLE I.—THREE SHORT EXCERPTS.*

1.

“My flocks | feed not,  
 My ewes | breed not,  
 My rams | speed not,  
     All is | *amiss*:  
 Love’s de | -nying,  
 Faith’s de | -fying,  
 Heart’s re | -nying,  
     Causer | *of this*.”

2.

“In black | mourn I,  
 All fears | scorn I,  
 Love hath | lorn me,  
     Living | *in thrall*:  
 Heart is | bleeding,  
 All help | needing.  
 (Cruel | speeding,)  
     Fraughted | *with gall*.”

3.

“Clear wells | spring not.  
 Sweet birds | sing not,  
 Loud bells | ring not  
     *Cheerfully*;  
 Herds stand | weeping,

Flocks all | sleeping,  
 Nymphs back | creeping  
*Fearfully.*"

EXAMPLE II.—SPECIMEN WITH SINGLE RHYME.

"TO QUINBUS FLESTRIN, THE MAN-MOUNTAIN"

A LILLIPUTIAN ODE

I.

"In a | -maze,  
 Lost, I | gaze.  
 Can our | eyes  
 Reach thy | size?  
 May my | lays  
 Swell with | praise,  
 Worthy | thee,  
 Worthy | me!  
 Muse, in | -spire  
 All thy | fire!  
 Bards of | old  
 Of him | told,  
 When they | said  
 Atlas' | head  
 Propp'd the | skies:  
 See! and | *believe* | *your eyes*!

II.

"See him | stride  
 Valleys | wide:  
 Over | woods,  
 Over | floods,  
 When he | treads,  
 Mountains' | heads  
 Groan and | shake:  
 Armies | quake,  
 Lest his | spurn  
 Over | -turn  
 Man and | steed:  
 Troops, take | heed!  
 Left and | right  
 Speed your | flight!  
 Lest an | host  
*Beneath* | *his foot* | *be lost*.

III.

"Turn'd a | -side  
 From his | hide,  
 Safe from | wound,

Darts re | -bound.  
 From his | nose,  
 Clouds he | blows;  
 When he | speaks,  
 Thunder | breaks!  
 When he | eats,  
 Famine | threats!  
 When he | drinks,  
 Neptune | shrinks!  
 Nigh thy | ear,  
 In mid | air,  
 On thy | hand,  
 Let me | stand.  
 So shall | I  
 (Lofty | poet!) touch the sky.”

JOHN GAY: *Johnson's British Poets*, Vol. vii, p. 376.

*EXAMPLE III.—TWO FEET WITH FOUR.*

“Oh, the | pleasing, | pleasing | anguish,  
 When we | love, and | when we | languish!  
     Wishes | rising!  
     Thoughts sur | -prising!  
     Pleasure | courting!  
     Charms trans | -porting!  
     Fancy | viewing  
     Joys en | -suing!  
 Oh, the | pleasing, | pleasing | anguish!”

ADDISON'S *Rosamond*, Act i, Scene 6.

*EXAMPLE IV.—LINES OF THREE SYLLABLES WITH LONGER METRES.*

1. WITH TROCHAICS.

“Or we | sometimes | pass an | hour  
     Under | a green | willow,  
 That de | -fends us | from the | shower,  
     Making | earth our | pillow;  
     Where we | may  
     Think and | pray,  
     Bē'fore | death  
     Stops our | breath:  
     Other | joys,  
     Are but | toys,  
 And to | be la | -mented.”\*

---

\* This passage, or some part of it, is given as a trochaic example, in many different systems of prosody. Everett ascribes it entire to “*John Chalkhill*,” and Nutting, more than twenty years before, had attached the name of “*Chalkhill*” to a part of it. But the six lines “of three syllables,” Dr. Johnson, in his Grammar, credits to “*Walton's Angler*,” and Bicknell, too, ascribes the same to “*Walton*.” The readings also have become various. Johnson, Bicknell, Burn, Churchill, and Nutting, have “*Here*” for “*Where*” in the fifth line above; and

## 2. WITH IAMBICS.

“What sounds | were heard,  
 What scenes | appear’d,  
 O’er all | the drear | -y coasts!  
     Dreadful | gleams,  
     Dismal | screams,  
     Fires that | glow,  
     Shrieks of | wo,  
     Sullen | moans,  
     Hollow | groans,

And cries | of tor | -tur’d ghosts!” POPE: *Johnson’s Brit. Poets*, Vol. vi, p. 315.

*EXAMPLE V.—“THE SHOWER.”—IN FOUR REGULAR STANZAS.*

## 1.

“In a | valley | that I | know—  
     Happy | scene!  
 There are | meadows | sloping | low,  
 There the | fairest | flowers | blow,  
 And the | brightest | waters | flow.  
     All se | -rene;  
 But the | sweetest | thing to | see,  
 If you | ask the | dripping | tree,  
 Or the | harvest | -hoping | swain,  
     Is the | Rain.

## 2.

Ah, the | dwellers | of the | town,  
     How they | sigh,—  
 How un | -grateful | -ly they | frown,  
 When the | cloud-king | shakes his | crown,  
 And the | pearls come | pouring | down  
     From the | sky!  
 They de | -sery no | charm at | all  
 Where the | sparkling | jewels | fall,  
 And each | moment | of the | shower,  
     Seems an | hour!

## 3.

Yet there’s | something | very | sweet  
     In the | sight,  
 When the | crystal | currents | meet  
 In the | dry and | dusty | street,  
 And they | wrestle | with the | heat,  
     In their | might!

---

Bicknell and Burn have “*Stop*” in the eighth line, where the rest read “*Stops*.” Nutting has, for the ninth line, “*Others’* joys,” and not, “*Other* joys,” as have the rest.—G. B.

While they | seem to | hold a | talk  
 With the | stones a | -long the | walk,  
 And re | -mind them | of the | rule,  
 To 'keep | cool!'

4.

Ay, but | in that | quiet | dell,  
 Ever | fair,  
 Still the | Lord doth | all things | well,  
 When his | clouds with | blessings | swell,  
 And they | break a | brimming | shell  
 On the | air;  
 There the | shower | hath its | charms,  
 Sweet and | welcome | to the | farms  
 As they | listen | to its | voice,  
 And re | -joice!"

*EXAMPLE VI.—“A GOOD NAME?”—TWO BEAUTIFUL LITTLE STANZAS.*

1.

“Children, | choose it,  
 Don't re | -fuse it,  
 'Tis a | precious | dia | -dem;  
 Highly | prize it,  
 Don't de | -spise it,  
 You will | need it | when you're | men.

2.

Love and | cherish,  
 Keep and | nourish,  
 'Tis more | precious | far than | gold;  
 Watch and | guard it,  
 Don't dis | -card it,  
 You will | need it | when you're | old.”

### OBSERVATIONS.

OBS. 1.—Trochaics of two feet, like those of three, are, more frequently than otherwise, found in connexion with longer lines, as in some of the examples above cited. The trochaic line of three syllables, which our prosodists in general describe as consisting, not of two feet; but “of one Trochee and a long syllable,” may, when it stands alone, be supposed to consist of one *amphimac*; but, since this species of foot is not admitted by all, and is reckoned a secondary one by those who do admit it, the better practice is, to divide even the three syllables into two feet, as above.

OBS. 2.—Murray, Hart, Weld, and many others, erroneously affirm, that, “The *shortest* Trochaic verse in our language, consists of one Trochee and a long syllable.”—*Murray's Gram.*, p. 256; *Hart's, First Edition*, p. 186; *Weld's, Second Edition*, p. 210. The error of

this will be shown by examples below—examples of *true “Trochaic Monometer,”* and not of Dimeter mistaken for it, like Weld’s, Hart’s, or Murray’s.

OBS. 3.—These authors also aver, that, “This measure is *defective in dignity*, and can seldom be used on serious occasions.”—*Same places*. “Trochaic of *two feet*—is likewise so *brief*, that,” in their opinion, “it is rarely used for any very serious purpose.”—*Same places*. Whether the expression of love, or of its disappointment, is “any very serious purpose” or not, I leave to the decision of the reader. What lack of dignity or seriousness there is, in several of the foregoing examples, especially the last two, I think it not easy to discover.

 From stream to purl | -ing stream | convey’d,  
 Through all | the ma | -zes of | the grove,  
 Through all | the ming | -ling tracks | I rove,  
     Turning,  
     Burning,  
     Changing,  
     Ranging,  
 Füll öf | griēf ānd | füll öf | löve.”

ADDISON’S *Rosamond*, Act I, Sc. 4: *Everett’s Versification*, p. 81.

##### 2. WITH ANAPESTICS, &C.

“Tō löve ānd tō lānguīsh,  
     Tō sigh | ānd cōmplāin,  
 Hōw crūēl’s thē ānguīsh!  
     Hōw tōrmēnt | -ing thē pāin!  
     Suing,  
     Pursuing,  
     Flying,  
     Denying,  
 O the curse | of disdain!  
 How torment | -ing’s the pain!”

GEO. GRANVILLE: *Br. Poets*, Vol. v, p. 31.

#### OBSERVATIONS.

OBS. 1.—The metres acknowledged in our ordinary schemes of prosody, scarcely amount, with all their “boundless variety,” to more than one half, or three quarters, of what may be found in *actual use* somewhere. Among the foregoing examples, are some which are longer, and some which are shorter, than what are commonly known to our grammarians; and some, also, which seem easily practicable, though perhaps not so easily quotable. This last trochaic metre, so far as I know, has not been used alone,—that is, without longer lines,—except where grammarians so set examples of it in their prosodies.

OBS. 2.—“Trochaic of One foot,” as well as “Iambic of One foot,” was, I believe, first recognized, prosodically, in Brown’s Institutes of English Grammar, a work first published in 1823. Since that time, both have obtained acknowledgement in sundry schemes of versification, contained in the new grammars; as in Farnum’s, and Hallock’s, of 1842; in Pardon Davis’s, of 1845; in S. W. Clark’s, and S. S. Greene’s, of 1848; in Professor Fowler’s, of 1850. Wells, in his School Grammar, of 1846, and D. C. Allen, in an other, of 1847, give to the *length of lines* a laxity positively absurd: “*Rhymed* verses,” say they, “may consist of *any number* of syllables.”—Wells, 1st Ed., p. 187; late Ed., 204; Allen, p. 88. Everett has recognized “*The line of a single Trochee*,” though he repudiates some long measures that are much more extensively authorized.

### ORDER III.—ANAPESTIC VERSE.

In full Anapestic verse, the stress is laid on every third syllable, the first two syllables of each foot being short. The first foot of an anapestic line, may be an iambus. This is the most frequent diversification of the order. But, as a diversification, it is, of course, not *regular* or *uniform*. The stated or uniform adoption of the iambus for a part of each line, and of the anapest for the residue of it, produces verse of the *Composite Order*. As the anapest ends with a long syllable, its rhymes are naturally single; and a short syllable after this, producing double rhyme, is, of course, supernumerary: so are the two, when the rhyme is triple. Some prosodists suppose, a surplus at the end of a line may compensate for a deficiency at the beginning of the next line; but this I judge to be an error, or at least the indulgence of a questionable license. The following passage has two examples of what may have been *meant* for such compensation, the author having used a dash where I have inserted what seems to be a necessary word:—

“Apol | -lo smil’d shrewd | -ly, and bade | him sit down,  
With ‘Well, | Mr. Scott, | you have man | -aged the town;  
Now pray, | copy less—| have a lit | -tle temer | -*ity*—  
[And] Try | if you can’t | also man | -age poster | -*ity*.  
[For] All | you add now | only les | -sens your cred | -*it*;  
And how | could you think, | too, of tak | -ing to ed | -*ite*?”

LEIGH HUNT’S *Feast of the Poets*, page 20.

The anapestic measures are few; because their feet are long, and no poet has chosen to set a great many in a line. Possibly lines of five anapests, or of four and an initial iambus, might be written; for these would scarcely equal in length some of the iambs and trochaics already exhibited. But I do not find any examples of such metre. The longest anapestics that have gained my notice, are of fourteen syllables, being tetrameters with triple rhyme, or lines of four anapests and two short surplus syllables. This order consists therefore of measures reducible to the following heads:—

### MEASURE I.—ANAPESTIC OF FOUR FEET, OR TETRAMETER.

*EXAMPLE I.—A “POSTSCRIPT.”—AN EXAMPLE WITH HYPERMETER.*

“Lean Tom, | when I saw | him, last week, | on his *horse* | *awry*,  
Threaten’d loud | -ly to turn | me to stone | with his *sor* | -*cery*.  
But, I think, | little Dan, | that, in spite | of what *our* | *foe says*,  
He will find | I read Ov | -id and his | *Meta**mor* | -*phoses*.  
For, omit | -ting the first, | (where I make | a *com**par* | -*ison*,  
With a sort | of allu | -sion to Put | -land or *Har* | -*rison*,)

Yet, by | my descrip | -tion, you'll find | he in *short* | *is*  
 A pack | and a gar | -ran, a top | and a *tor* | -*toise*.  
 So I hope | from hencefor | -ward you ne'er | will ask, *can* | *I maul*  
 This teas | -ing, conceit | -ed, rude, in | -solent *an* | -*imal*?  
 And, if | this rebuke | might be turn'd | to his *ben* | -*efit*,  
 (For I pit | -y the man,) | I should | be glad *then* | *of it*"

SWIFT'S POEMS: *Johnson's British Poets*, Vol. v, p. 324.

*EXAMPLE II.—"THE FEAST OF THE POETS."—FIRST TWELVE LINES.*

"T' other day, | as Apol | -lo sat pitch | -ing his darts  
 Through the clouds | of Novem | -ber, by fits | and by starts,  
 He began | to consid | -er how long | it had been  
 Since the bards | of Old Eng | -land had all | been rung in.  
 'I think,' | said the god, | recollect | -ing, (and then  
 He fell twid | -dling a sun | -beam as I | may my pen,)  
 'I think— | let me see— | yes, it is, | I declare,  
 As long | ago now | as that Buck | -ingham there;  
 And yet | I can't see | why I've been | so remiss,  
 Unless | it may be— | and it cer | -tainly is,  
 That since Dry | -den's fine ver | -ses and Mil | -ton's sublime,  
 I have fair | -ly been sick | of their sing | -song and rhyme."

LEIGH HUNT: *Poems*, New-York Edition, of 1814.

*EXAMPLE III.—THE CROWNING OF FOUR FAVOURITES.*

"Then, 'Come,' | cried the god | in his el | -egant mirth,  
 'Let us make | us a heav'n | of our own | upon earth,  
 And wake, | with the lips | that we dip | in our bowls,  
 That divin | -est of mu | -sic—conge | -nial souls.'  
 So say | -ing, he led | through the din | -ing-room door,  
 And, seat | -ing the po | -ets, cried, 'Lau | -rels for four!'  
 No soon | -er demand | -ed, than, lo! | they were there,  
 And each | of the bards | had a wreath | in his hair.  
 Tom Camp | -bell's with wil | -low and pop | -lar was twin'd,  
 And South | -ey's, with moun | -tain-ash, pluck'd | in the wind;  
 And Scott's, | with a heath | from his old | garden stores,  
 And, with vine | -leaves and jump | -up-and-kiss | -me, Tom Moore's."

LEIGH HUNT: from line 330 to line 342.

*EXAMPLE IV.—"GLENARA."—FIRST TWO OF EIGHT STANZAS.*

"O heard | ye yon pi | -broch sound sad | in the gale,  
 Where a band | cometh slow | -ly with weep | -ing and wail!  
 'Tis the chief | of Glena | -ra laments | for his dear;  
 And her sire, | and the peo | -ple, are called | to her bier.

Glena | -ra came first | with the mourn | -ers and shroud;  
 Her kins | -men, they fol | -lowed, but mourned | not aloud;  
 Their plaids | all their bo | -soms were fold | -ed around;  
 They marched | all in si | -lence—they looked | on the ground."

T. CAMPBELL'S *Poetical Works*, p. 105.

*EXAMPLE V.—“LOCHIEL’S WARNING.”—TEN LINES FROM EIGHTY-SIX.*

“Tis the sun | -set of life | gives me mys | -tical lore,  
 And com | -ing events | cast their shad | -ows before.  
 I tell | thee, Cullo | -den’s dread ech | -oes shall ring  
 With the blood | -hounds that bark | for thy fu | -gitive king.  
 Lo! anoint | -ed by Heav’n | with the vi | -als of wrath,  
 Behold, | where he flies | on his des | -olate path!  
 Now, in dark | -ness and bil | -lows he sweeps | from my sight;  
 Rise! rise! | ye wild tem | -pests, and cov | -er his flight!  
 ’Tis fin | -ished. Their thun | -ders are hushed | on the moors;  
 Cullo | -den is lost, | and my coun | -try deplores.”—*Ib.*, p. 89.

*EXAMPLE VI.—“THE EXILE OF ERIN.”—THE FIRST OF FIVE STANZAS.*

“There came | to the beach | a poor Ex | -ile of E | -*rĭn*,  
 The dew | on his thin | robe was heav | -y and chill;  
 For his coun | -try he sighed, | when at twi | -light repair | -*ing*  
 To wan | -der alone | by the wind | -beaten hill.  
 But the day | -star attract | -ed his eye’s | sad devo | -*tion*,  
 For it rose | o’er his own | native isle | of the o | -*cĕan*,  
 Where once, | in the fire | of his youth | -ful emo | *tion*,  
 He sang | the bold an | -them of E | -rin go bragh.”—*Ib.*, p. 116.

*EXAMPLE VII.—“THE POPLAR FIELD.”*

“*The pop* | -lars are fell’d, | *farewell* | to the shade,  
 And the whis | -pering sound | of the cool | colonnade;  
*The winds* | play no lon | -ger and sing | in the leaves,  
*Nor Ouse* | on his bo | -som their im | -age receives.  
*Twelve years* | have elaps’d, | since I last | took a view  
 Of my fa | -vourite field, | and the bank | where they grew;  
*And now* | in the grass | *behold* | they are laid,  
 And the tree | is my seat | that once lent | me a shade.  
*The black* | -bird has fled | to anoth | -er retreat,  
 Where the ha | -zels afford | him a screen | from the heat,  
 And the scene, | where his mel | -ody charm’d | me before,  
*Resounds* | with his sweet | -flowing dit | -ty no more.  
*My fu* | -gitive years | are all hast | -ing away,  
*And I* | must ere long | lie as low | -ly as they,  
 With a turf | on my breast, | and a stone | at my head,  
 Ere anoth | -er such grove | shall arise | in its stead.  
 ’Tis a sight | to engage | me, if an | -y thing can,  
*To muse* | on the per | -ishing pleas | -ures of man;  
 Though his life | be a dream, | his enjoy | -ments, I see,  
 Have a be | -ing less dur | -able e | -ven than he.”  
 COWPER’S *Poems*, Vol. i, p. 257.

**OBSERVATIONS.**

OBS. 1.—Everett avers, that, “The purely Anapestic measure is more easily constructed than the Trochee, [Trochaic,] and of much more frequent occurrence.”—*English Versification*, p. 97. Both parts of this assertion are at least very questionable; and so are this author’s other suggestions, that, “The Anapest is [necessarily] the vehicle of *gayety and joy*,” that, “Whenever this measure is employed in the treating of *sad* subjects, *the effect is destroyed*,” that, “Whoever should attempt to write an elegy in this measure, would be *sure to fail*,” that, “The words might express grief, but the measure *would express joy*,” that, “The Anapest should never be employed throughout a *long piece*,” because “buoyancy of spirits can never be supposed to last,”—“sadness *never leaves us*, BUT joy remains but for a moment,” and, again, because, “the measure is *exceedingly monotonous*.”—*Ibid.*, pp. 97 and 98.

OBS. 2.—Most anapestic poetry, so far as I know, is in pieces of no great length; but Leigh Hunt’s “Feast of the Poets,” which is thrice cited above, though not a long *poem*, may certainly be regarded as “*a long piece*,” since it extends through fifteen pages, and contains four hundred and thirty-one lines, all, or nearly all, of anapestic tetrameter. And, surely, no poet had ever more need of a metre well suited to his purpose, than he, who, intending a critical as well as a descriptive poem, has found so much fault with the versification of others. Pope, as a versifier, was regarded by this author, “not only as no master of his art, but as a very indifferent practiser.”—*Notes on the Feast of the Poets*, p. 35. His “*monotonous and cloying*” use of numbers, with that of Darwin, *Goldsmith*, Johnson, Haley, and others of the same “school,” is alleged to have wrought a general corruption of taste in respect to versification—a fashion that has prevailed, not temporarily,

*“But ever since Pope spoil’d the ears of the town  
With his cuckoo-song verses, half up and half down”—Ib.*

OBS. 3.—Excessive monotony is thus charged by one critic upon all verse of “the purely Anapestic measure;” and, by an other, the same fault is alleged in general terms against all the poetry “of the school of Pope,” well-nigh the whole of which is iambic. The defect is probably in either case, at least half imaginary; and, as for the inherent joyousness of anapestics, that is perhaps not less ideal. Father Humphrey says, “Anapæstic and amphibrachic verse, being similar in measure and movement, are pleasing to the ear, and well adapted to cheerful and humorous compositions; and *sometimes to elegiac compositions*, and subjects important and solemn.”—*Humphrey’s English Prosody*, p. 17.

OBS. 4.—The anapest, the dactyl, and the amphibrach, have this in common,—that each, with one long syllable, takes two short ones. Hence there is a degree of similarity in their rhythms, or in their several effects upon the ear; and consequently lines of each order, (or of any two, if the amphibrachic be accounted a separate order,) are sometimes commingled. But the propriety of acknowledging an order of “*Amphibrachic verse*,” as does Humphrey, is more than doubtful; because, by so doing, we not only recognize the amphibrach as one of the principal feet, but make a vast number of lines ambiguous in their scansion. For our Amphibrachic order will be *made up* of lines that are commonly scanned as anapestics—such anapestics as are diversified by an iambus at the beginning,

and sometimes also by a surplus short syllable at the end; as in the following verses, better divided as in the sixth example above:—

“Thěre cāme tō | thě bēach ā | pōor Exīle | ōf Erīn  
 The dew on | his thin robe | was heavy | and chill:  
 Fōr hīs coūn | -trȳ hē sīghed, | whēn āt twī | -līght rēpāir | -ing  
 To wander | alone by | the wind-beat | -en hill.”

## MEASURE II.—ANAPESTIC OF THREE FEET, OR TRIMETER.

*EXAMPLE I.*—“*ALEXANDER SELKIRK.*”—*FIRST TWO STANZAS.*

### I.

“I am mon | -arch of all | I survey,  
 My right | there is none | to dispute;  
 From the cen | -tre all round | to the sea,  
 I am lord | of the fowl | and the brute.  
 O Sol | -itude! where | are the charms  
 That sa | -ges have seen | in thy face?  
 Better dwell | in the midst | of alarms,  
 Than reign | in this hor | -rible place.

### II.

I am out | of human | -ity's reach,  
 I must fin | -ish my jour | -ney alone,  
 Never hear | the sweet mu | -sic of speech,  
 I start | at the sound | of my own.  
 The beasts | that roam o | -ver the plain,  
 My form | with indif | -ference see;  
 They are so | unacquaint | -ed with man,  
 Their tame | -ness is shock | -ing to me.”

COWPER'S *Poems*, Vol. i, p. 199.

*EXAMPLE II.*—“*CATHARINA.*”—*TWO STANZAS FROM SEVEN.*

### IV.

“Though the pleas | -ures of Lon | -don exceed  
 In num | -ber the days | of the year,  
 Cathari | -na, did noth | -ing impede,  
 Would feel | herself hap | -pier here;  
 For the close | -woven arch | -es of limes  
 On the banks | of our riv | -er, I know,  
 Are sweet | -er to her | many times  
 Than aught | that the cit | -y can show.

### V.

So it is, | when the mind | is endued  
 With a well | -judging taste | from above;  
 Then, wheth | -er embel | -lish'd or rude,

'Tis na | -ture alone | that we love.  
 The achieve | -ments of art | may amuse,  
 May e | -ven our won | -der excite,  
 But groves, | hills, and val | -leys, diffuse  
 A last | -ing, a sa | -cred delight."

COWPER'S *Poems*, Vol. ii, p. 232.

EXAMPLE III.—“*A PASTORAL BALLAD.*”—*TWO STANZAS FROM TWENTY-SEVEN.*

(8.)

“Not a pine | in my grove | is there seen,  
 But with ten | -drils of wood | -bine is bound;  
 Not a beech | 's more beau | -tiful green,  
 But a sweet | -briar twines | it around,  
 Not my fields | in the prime | of the year  
 More charms | than my cat | -tle unfold;  
 Not a brook | that is lim | -pid and clear,  
 But it glit | -ters with fish | -es of gold.

(9)

One would think | she might like | to retire  
 To the bow'r | I have la | -bour'd to rear;  
 Not a shrub | that I heard | her admire,  
 But I hast | -ed and plant | -ed it there.  
 O how sud | -den the jes | -samine strove  
 With the li | -lac to ren | -der it gay!  
 Alread | -y it calls | for my love,  
 To prune | the wild branch | -es away."

SHENSTONE: *British Poets*, Vol. vii, p. 139.

Anapestic lines of four feet and of three are sometimes alternated in a stanza, as in the following instance:—

EXAMPLE IV.—“*THE ROSE.*”

“The rose | had been wash'd, | just wash'd | in a show'r,  
 Which Ma | -ry to An | -na convey'd;  
 The plen | -tiful moist | -ure encum | -ber'd the flow'r,  
 And weigh'd | down its beau | -tiful head.  
 The cup | was all fill'd, | and the leaves | were all wet,  
 And it seem'd | to a fan | -ciful view,  
 To weep | for the buds | it had left, | with regret,  
 On the flour | -ishing bush | where it grew.  
 I hast | -ily seized | it, unfit | as it was  
 For a nose | -gay, so drip | -ping and drown'd,  
 And, swing | -ing it rude | -ly, too rude | -ly, alas!  
 I snapp'd | it,—it fell | to the ground.  
 And such, | I exclaim'd, | is the pit | -iless part  
 Some act | by the del | -icate mind,

Regard | -less of wring | -ing and break | -ing a heart  
 Alread | -y to sor | -row resign'd.

This el | -egant rose, | had I shak | -en it less,  
 Might have bloom'd | with its own | -er a while;  
 And the tear | that is wip'd | with a lit | -tle address,  
 May be fol | -low'd perhaps | by a smile."

COWPER: *Poems*, Vol. i, p. 216; *English Reader*, p. 212.

### MEASURE III.—ANAPESTIC OF TWO FEET, OR DIMETER.

#### EXAMPLE I.—*LINES WITH HYPERMETER AND DOUBLE RHYME.*

"CORONACH," OR FUNERAL SONG.

1.

"He is gone | on the mount | -aĩn  
 He is lost | to the for | -ěst  
 Like a sum | -mer-dried foun | -taĩn  
 When our need | was the sor | -ěst.  
 The font, | reappear | -ĩng,  
 From the rain | -drops shall bor | -rõw,  
 But to us | comes no cheer | -ĩng,  
 Do Dun | -can no mor | -rõw!

2.

The hand | of the reap | -ěr  
 Takes the ears | that are hoar | -ỹ,  
 But the voice | of the weep | -ěr  
 Wails man | -hood in glo | -rỹ;  
 The au | -tumn winds rush | -ĩng,  
 Waft the leaves | that are sear | -ěst,  
 But our flow'r | was in flush | -ĩng,  
 When blight | -ing was near | -ěst."

WALTER SCOTT: *Lady of the Lake*, Canto iii, St. 16.

#### EXAMPLE II.—*EXACT LINES OF TWO ANAPESTS.*

"Prithee, Cu | -pid, no more  
 Hurl thy darts | at threescore;  
 To thy girls | and thy boys,  
 Give thy pains | and thy joys; Let  
 Sir Trust | -y and me  
 From thy fro | -lics be free."

ADDISON: *Rosamond*, Act ii, Scene 2; *Ev. Versif.*, p. 100.

#### EXAMPLE III.—*AN ODE, FROM THE FRENCH OF MALHERBE.*

"This An | -na so fair,  
 So talk'd | of by fame,  
 Why dont | she appear?  
 Indeed, | she's to blame!

Lewis sighs | for the sake  
 Of her charms, | as they say;  
 What excuse | can she make  
 For not com | -ing away?  
 If he does | not possess,  
 He dies | with despair;  
 Let's give | him redress,  
 And go find | out the fair”

“Cette Anne si belle,  
 Qu'on vante si fort,  
 Pourquoi ne vient elle?  
 Vraiment, elle a tort!  
 Son Louis soupire,  
 Après ses appas;  
 Que veut elle dire,  
 Qu'elle ne vient pas?  
 S'il ne la possède,  
 Il s'en va mourir;  
 Donnons y remède,  
 Allons la quérir.”

WILLIAM KING, LL. D.: *Johnson's British Poets*, Vol. iii, p. 590.

*EXAMPLE IV.—‘TIS THE LAST ROSE OF SUMMER.*

1.

“Tis the last | rose of sum | -*mĕr*,  
 Left bloom | -ing alone;  
 All her love | -ly compan | -*iōns*  
 Are fad | -ed and gone;  
 No flow'r | of her kin | -*drĕd*,  
 No rose | -bud is nigh,  
 To give | back her blush | -*ĕs*,  
 Or give | sigh for sigh.

2.

I'll not leave | thee, thou lone | *ōne*!  
 To pine | on the stem!  
 Since the love | -ly are sleep | -*īng*,  
 Go, sleep | thou with them;  
 Thus kind | -ly I scat | -*tĕr*  
 Thy leaves | o'er thy bed,  
 Where thy mates | of the gar | -*dĕn*  
 Lie scent | -less and dead.

3.

So, soon | may I fol | -*lōw*,  
 When friend | -ships decay,  
 And, from love's | shining cir | -*clĕ*,  
 The gems | drop away;  
 When true | hearts lie with | -*ĕr'd*,

And fond | ones are flown,  
 Oh! who | would inhab | -*it*  
 This bleak | world alone ?”

T. MOORE: *Melodies, Songs, and Airs*, p. 171.

*EXAMPLE V.—NEMESIS CALLING UP THE DEAD ASTARTE.*

“Shadow! | or spir | -*it*  
 Whatev | -er thou art,  
 Which still | doth inher | -*it*  
 The whole | or a part  
 Of the form | of thy birth,  
 Of the mould | of thy clay,  
 Which return’d | to the earth,  
 Re-appear | to the day!  
 Bear what | thou bor | -*est*,  
 The heart | and the form,  
 And the as | -pect thou wor | -*est*  
 Redeem | from the worm!  
 Appear!—Appear!—Appear!”

LORD BYRON: *Manfred*, Act ii, Sc. 4.

*EXAMPLE VI.—ANAPESTIC DIMETER WITH TRIMETER.*

FIRST VOICE.

“Make room | for the com | -bat, make room;  
 Sound the trum | -pet and drum;  
 A fair | -er than Ve | -nus prepares  
 To encoun | -ter a great | -er than Mars.  
 Make room | for the com | -bat, make room;  
 Sound the trum | -pet and drum.”

SECOND VOICE.

“Give the word | to begin,  
 Let the com | -batants in,  
 The chal | -lenger en | -ters all *glo* | *riōūs*;  
 But Love | has decreed,  
 Though Beau | -ty may bleed,  
 Yet Beau | -ty shall still | be victo | -*riōūs*.”

GEORGE GRANVILLE: *Johnson’s British Poets*, Vol. v, p. 58.

*EXAMPLE VII.—ANAPESTIC DIMETER WITH TETRAMETER.*

AIR.

“Let the pipe’s | merry notes | aid the skill | of the voice;  
 For our wish | -es are crown’d, | and our hearts | shall rejoice.  
 Rejoice, | and be glad;  
 For, sure, | he is mad,  
 Who, where mirth, | and good hum | -mour, and har | -mony’s found,

Never catch | -es the smile, | nor lets pleas | -ure go round.  
 Let the stu | -pid be grave,  
 'Tis the vice | of the slave;  
 But can nev | -er agree  
 With a maid | -en like me,  
 Who is born | in a coun | -try that's hap | -py and free."

LLOYD: *Johnson's British Poets*, Vol. viii, p, 178.

#### MEASURE IV.—ANAPESTIC OF ONE FOOT, OR MONOMETER.

This measure is rarely if ever used except in connexion with longer lines. The following example has six anapestics of two feet, and two of one; but the latter, being verses of double rhyme, have each a surplus short syllable; and four of the former commence with the iambus:—

##### EXAMPLE I.—A SONG IN A DRAMA.

"Now, mor | -tal, prepare,  
 For thy fate | is at hand;  
 Now, mor | -tal, prepare,  
 And sŭrrēn | -dēr.  
 For Love | shall arise,  
 Whom no pow'r | can withstand,  
 Who rules | from the skies  
 Tō thē cēn | -trē."

GRANVILLE, VISCOUNT LANSDOWNE: *Joh. Brit. Poets*, Vol. v, p. 49.

The following extract, (which is most properly to be scanned as anapestic, though considerably diversified,) has two lines, each of which is pretty evidently composed of a single anapest:—

##### EXAMPLE II.—A CHORUS IN THE SAME.

"Let trum | -pets and tym | -bāls,  
 Let atā | —bals and cym | -bāls,  
 Let drums | and let haut | -boys give o | -vēr;  
 Bŭt lēt flūtes,  
 And lēt lūtes  
 Our pas | -sions excite  
 To gent | -ler delight,  
 And ev | -ery Mars | be a lov | -ēr." *Ib.*, p. 56.

#### OBSERVATIONS.

OBS. 1.—That a single anapest, a single foot of any kind, or even a single long syllable, may be, and sometimes is, in certain rather uncommon instances, set as a line, is not to be denied. "Dr. Caustic," or T. G. Fessenden, in his satirical "Directions for *Doing* Poetry," uses in this manner the monosyllables, "*Whew*," "*Say*," and "*Dress*" and also the iambs, "*The gay*" and, "*All such*," rhyming them with something less isolated.

OBS. 2.—Many of our grammarians give anonymous examples of what they conceive to be “*Anapestic Monometer*,” or “*the line of one anapest*,” while others—(as Allen, Bullions, Churchill, and Hiley—) will have the length of two anapests to be the *shortest* measure of this order. Prof. Hart says, “The shortest anapæstic verse is a *single* anapæst; as,

|            |                |                 |
|------------|----------------|-----------------|
| ĭn ā swēet | Äll thēir fēet | Äll thē nīght   |
| Rēsōnānce, | Ĭn thē dānce   | Tīnklēd līght.’ |

This measure,” it is added, “is, however, *ambiguous*; for by laying an accent on the first, as well as the third syllable, we may generally make it a trochaic.”—*Hart’s English Gram.*, p. 188. The same six versicles are used as an example by Prof. Fowler, who, without admitting any ambiguity in the measure, introduces them, rather solecistically, thus: “*Each* of the following lines *consist* of a single Anapest.”—*Fowler’s E. Gram.*, 8vo, 1850, §694.

OBS. 3.—Verses of three syllables, with the second short, the last long, and the first *common, or variable*, are, it would seem, *doubly doubtful* in scansion; for, while the first syllable, if made short, gives us an anapest, to make it long, gives either an amphimac or what is virtually two trochees. For reasons of choice in the latter case, see Observation 1st on Trochaic Dimeter. For the *fixing of variable quantities*, since the case admits no other rule, regard should be had to the *analogy of the verse*, and also to the common principles of accentuation. It is doubtless possible to read the six short lines above, into the measure of so many *anapests*; but, since the two monosyllables “*In*” and “*All*” are as easily made long as short, whoever considers the common pronunciation of the longer words, “*Resonance*” and “*Tinkled*,” may well doubt whether the learned professors have, in this instance, hit upon the right mode of scansion. The example may quite as well be regarded either as Trochaic Dimeter, catalectic, or as Amphimacric Monometer, acatalectic. But the word *resonance*, being accented usually on the first syllable only, is naturally a *dactyl*; and, since the other five little verses end severally with a monosyllable, which *can* be varied in quantity, it is possible to read them all as being *dactylics*; and so the whole may be regarded as *trebly doubtful* with respect to the measure.

OBS. 4.—L. Murray says, “*The shortest anapæstic verse must be a single anapæst*; as,  
Būt ĭn vāin  
They complain.”

And then he adds, “This measure is, however, ambiguous; for, by laying the stress of the voice on the first and third syllables, we *might make* a trochaic. *And therefore* the first and simplest form of our genuine Anapæstic verse, is made up of *two anapæsts*.”—*Murray’s Gram.*, 8vo, p. 257; 12mo, p. 207. This conclusion is utterly absurd, as well as completely contradictory to his first assertion. The genuineness of this small metre depends not at all on what may be made of the same words by other pronunciation; nor can it be a very natural reading of this passage, that gives to “*But*” and “*They*” such emphasis as will make them long.

OBS. 5.—Yet Chandler, in his improved grammar of 1847, has not failed to repeat the substance of all this absurdity and self-contradiction, carefully dressing it up in other language, thus: “Verses composed of single Anapæsts *are frequently found* in stanzas of songs; and the same is true of several of the other kinds of feet; *but we may consider the first* [i.e., shortest] *form* of anapæstic verse as consisting of *two* Anapæsts.”—*Chandler’s Common School Gram.*, p. 196.

OBS. 6.—Everett, speaking of anapestic lines, says, “The first and shortest of these is composed of a *single Anapest following an Iambus*.”—*English Versification*, p. 99. This not only denies the existence of *Anapestic Monometer*, but improperly takes for the Anapestic verse what is, by the statement itself, half Iambic, and therefore of the Composite Order. But the false assertion is plainly refuted even by the author himself and on the same page. For, at the bottom of the page, he has this contradictory note: “It has been remarked (§15) that though the Iambus with an additional short syllable *is the shortest line that is known to Iambic verse*, *there are isolated instances of a single Iambus*, and even of a *single long syllable*. There are examples of *lines made up of a single Anapest*, as the following example will show:—

|                        |                         |                      |
|------------------------|-------------------------|----------------------|
| ‘Jove in his chair,    | Cock of the school,     | His bald pate        |
| Of the sky lord mayor, | He bears despotic rule; | Jove would cuff,     |
| With his nods          | His word,               | He’s so bluff,       |
| Men and gods           | Though absurd,          | For a straw.         |
| Keeps in awe;          | Must be law.            | Cowed deities,       |
| When he winks,         | Even Fate,              | Like mice in cheese, |
| Heaven shrinks;        | Though so great,        | To stir must cease   |
| * * * *                | Must not prate;         | Or gnaw.’            |

O’HARA:—*Midas*, Act i, Sc. 1.”—*Everett’s Versification*, p. 99

#### ORDER IV.—DACTYLIC VERSE.

In pure Dactylic verse, the stress is laid on the first syllable of each successive three; that is, on the first, the fourth, the seventh, and the tenth syllable of each line of four feet. Full dactylic generally forms triple rhyme. When one of the final short syllables is omitted, the rhyme is double; when both, single. These omissions are here essential to the formation of such rhymes. Dactylic with double rhyme, ends virtually with a *trochee*; dactylic with single rhyme, commonly ends with a *cæsure*; that is, with a long syllable taken for a foot. Dactylic with single rhyme is the same as anapestic would be without its initial short syllables. Dactylic verse is rather uncommon; and, when employed, is seldom perfectly pure and regular.

#### MEASURE I.—DACTYLIC OF EIGHT FEET, OR OCTOMETER.

##### EXAMPLE.—*NIMROD*.

Nimrod the | hunter was | mighty in | hunting, and | famed as the | ruler of | cities of | yore;  
Babel, and | Erech, and | Accad, and | Calneh, from | Shinar’s fair | region his | name afar | bore.

#### MEASURE II.—DACTYLIC OF SEVEN FEET, OR HEPTAMETER.

##### EXAMPLE.—*CHRIST’S KINGDOM*.

Out of the | kingdom of | Christ shall be | gathered, by | angels o’er | Satan vic | -torious,  
All that of | -fendeth, that | lieth, that | faileth to | honour his | name ever | glorious.

#### MEASURE III.—DACTYLIC OF SIX FEET, OR HEXAMETER.

##### EXAMPLE I.—*TIME IN MOTION*.

Time, thou art | ever in | motion, on | wheels of the | days, years, and | ages;  
Restless as | waves of the | ocean, when | Eurys or | Boreas | rages.

##### EXAMPLE II.—*WHERE, IS GRAND-PRÉ?*

“This is the | forest pri | -meval; but | where are the | hearts that be | -neath it

Leap'd like the | roe, when he | hears in the | woodland the | voice of the | huntsman?  
Where is the | thatch-roof'd | village, the | home of A | -cadian | farmers?"

H. W. LONGFELLOW: *Evangeline*, Part i, l. 7—9.

#### MEASURE IV.—DACTYLIC OF FIVE FEET, OR PENTAMETER.

##### EXAMPLE.—*SALUTATION TO AMERICA*.

"Land of the | beautiful, | beautiful, | land of the | free,  
Land of the | negro-slave, | negro-slave, | land of the | chivalry,  
Often my | heart had turned, | heart had turned, | longing to | thee;  
Often had | mountain-side, | mountain-side, | broad lake, and | stream,  
Gleamed on my | waking thought, | waking thought, | crowded my | dream.  
Now thou dost | welcome me, | welcome me, | from the dark | sea,  
Land of the | beautiful, | beautiful, | land of the | free,  
Land of the | negro-slave, | negro-slave, | land of the | chivalry."

#### MEASURE V.—DACTYLIC OF FOUR FEET, OR TETRAMETER.

##### EXAMPLE 1—*THE SOLDIER'S WIFE*.

"Weary way | -wanderer, | languid and | sick at heart,  
Travelling | painfully | over the | rugged road,  
Wild-visaged | Wanderer! | God help thee, | wretched one!  
Sorely thy | little one | drags by thee | barefooted;  
Cold is the | baby that | hangs at thy | bending back,  
Meagre, and | livid, and | screaming for | misery.  
Woe-begone | mother, half | anger, half | agony,  
Over thy | shoulder thou | lookest to | hush the babe,  
Bleakly the | blinding snow | beats in thy | haggard face.  
Ne'er will thy | husband re | -turn from the | war again,  
Cold is thy | heart, and as | frozen as | Charity!  
Cold are thy | children.—Now | God be thy | comforter!"

ROBERT SOUTHEY: *Poems*, Philad., 1843, p. 250.

##### EXAMPLE II.—*BOYS*.—*A DACTYLIC STANZA*.

"Boys will an | -ticipate, | lavish, and | dissipate  
All that your | busy pate | hoarded with | care;  
And, in their | foolishness, | passion, and | mulishness,  
Charge you with | churlishness, | spurning your pray'r."

##### EXAMPLE III—"LABOUR."—*THE FIRST OF FIVE STANZAS*.

"Pause not to | dream of the | future be | -fore us;  
Pause not to | weep the wild | cares that come | o'er us:  
Hark, how Cre | -ation's deep, | musical | chorus,  
Uninter | -mitting, goes | up into | Heaven!  
Never the | ocean-wave | falters in | flowing;  
Never the | little seed | stops in its | growing;  
More and more | richly the | rose-heart keeps | glowing,  
Till from its | nourishing | stem it is | riven."

FRANCES S. OSGOOD: *Clapp's Pioneer*, p. 94.*EXAMPLE IV.—“BOAT SONG.”—FIRST STANZA OF FOUR.*

“Hail to the | chief who in | triumph ad | -vances! Honour’d and | bless’d be the |  
 ever-green | pine! Long may the | tree in his | banner that | glances, Flourish, the |  
 shelter and | grace of our | line! Heaven send it happy dew, Earth lend it sap anew, Gayly  
 to | bourgeon, and | broadly to | grow, While ev’ry | Highland glen Sends our shout |  
 back agen, ‘Roderigh Vich Alpine Dhu, ho! ieroe!’”

WALTER SCOTT: *Lady of the Lake*, C. ii, St. 19.

## MEASURE VI.—DACTYLIC OF THREE FEET, OR TRIMETER.

*EXAMPLE.—TO THE KATYDID.*

“Ka-ty-did, | Ka-ty-did, | sweetly sing,—  
 Sing to thy | loving mates | near to thee;  
 Summer is | come, and the | trees are green,—  
 Summer’s glad | season so | dear to thee.

Cheerily, | cheerily, | insect, sing;  
 Blithe be thy | notes in the | hickory;  
 Every | bough shall an | answer ring,  
 Sweeter than | trumpet of | victory.”

*EXAMPLE II.—THE PIBROCH.—SIXTEEN LINES FROM FORTY.*

“Pibroch of | Donuil Dhu,  
 Pibroch of | Donuil,  
 Wake thy wild | voice anew.  
 Summon Clan | -Conuil.  
 Come away, | come away!  
 Hark to the | summons!  
 Come in your | war-array,  
 Gentles and | commons!

“Come as the | winds come, when  
 Forests are | rended;  
 Come as the | waves come, when  
 Navies are | stranded;  
 Faster come, | faster come,  
 Faster and | faster!  
 Chief, vassal, | page, and groom,  
 Tenant and | master.”—W. SCOTT.

#### MEASURE VIII.—DACTYLIC OF ONE FOOT, OR MONOMETER.

"FEARFULLY,  
 TEARFULLY."

#### OBSERVATIONS.

OBS. 1.—A single dactyl, set as a line, can scarcely be used otherwise than as part of a stanza, and in connexion with longer verses. The initial accent and triple rhyme make it necessary to have something else with it. Hence this short measure is much less common than the others, which are accented differently. Besides, the line of three syllables, as was noticed in the observations on Anapestic Monometer, is often peculiarly uncertain in regard to the measure which it should make. A little difference in the laying of emphasis or accent may, in many instances, change it from one species of verse to an other. Even what seems to be dactylic of two feet, if the last syllable be sufficiently lengthened to admit of single rhyme with the full metre, becomes somewhat doubtful in its scansion; because, in such case, the last foot maybe reckoned an *amphimac*, or *amphimacer*. Of this, the following stanzas from Barton's lines "to the Gallic Eagle," (or to Bonaparte on St. Helena,) though different from all the rest of the piece, may serve as a specimen:—

“Far from the | *battle’s shock*,  
 Fate hath fast | bound thee;  
 Chain’d to the | *rugged rock*,  
 Waves warring | round thee.

[Now, for] the | *trumpet’s sound*,  
 Sea-birds are | shrieking;  
 Hoarse on thy | *rampart’s bound*,  
 Billows are | breaking.”

OBS. 2.—This may be regarded as verse of the Composite Order; and, perhaps, more properly so, than as Dactylic with mere incidental variations. Lines like those in which the questionable foot is here Italicized, may be united with longer dactyls, and thus produce a stanza of great beauty and harmony. The following is a specimen. It is a song, written by I know not whom, but set to music by Dempster. The twelfth line is varied to a different measure.

“ADDRESS TO THE SKYLARK.”

“Bird of the | wilderness,  
 Blithesome and | cumberless,  
 Light be thy | matin o’er | moorland and | lea;  
 Emblem of | happiness,  
 Blest is thy | dwelling-place;  
 O! to a | -bide in the | desert with | thee!

“Wild is thy | lay, and loud,  
 Far on the | downy cloud;  
 Love gives it | energy, | love gave it | birth:  
 Where, on thy | dewy wing,  
 Where art thou | journeying?  
 Thy lay | is in heav | -en, thy love | is on earth.

“O’er moor and | mountain green,  
 O’er fell and | fountain sheen,  
 O’er the red | streamer that | heralds the | day;  
 Over the | cloudlet dim,  
 Over the | rainbow’s rim,  
 Musical | cherub, hie, | hie thee a | -way.

“Then, when the | gloamin comes,  
 Low in the | heather blooms.  
 Sweet will thy | welcome and | bed of love | be.  
 Emblem of | happiness,  
 Blest is thy | dwelling-place;  
 O! to a | -bide in the | desert with | thee!”

OBS. 3.—It is observed by Churchill, (*New Gram.*, p. 387,) that, “Shakspeare has used the dactyl, as appropriate to mournful occasions.” The chief example which he cites, is the following:—

“Midnight, as | -sist our moan,  
 Help us to | sigh and groan

Heavily, | heavily.  
 Graves, yawn and | yield your dead,  
 Till death be | uttered  
 Heavily, | heavily.”—*Much Ado*, V, 3

OBS. 4.—These six lines of Dactylic (or Composite) Dimeter are subjoined by the poet to four of Trochaic Tetrameter. There does not appear to me to be any particular adaptation of either measure to mournful subjects, more than to others; but later instances of this metre may be cited, in which such is the character of the topic treated. The following long example consists of lines of two feet, most of them dactylic only; but, of the seventy-six, there are twelve which *may* be otherwise divided, and as many more which *must* be, because they commence with a short syllable.

“THE BRIDGE OF SIGHS.”—BY THOMAS HOOD.

“One more un | -fortunate,  
           Weary of | breath,  
 Rashly im | -portunate,  
           Gone to her | death!  
 Take her up | tenderly,  
           Lift her with | care;  
 Fashioned so | slenderly,  
           Young, and so | fair!

Look at her | garments  
 Clinging like | cerements,  
 Whilst the wave | constantly  
           Drips from her | clothing;  
 Take her up | instantly,  
           Loving, not | loathing.

Touch her not | scornfully;  
 Think of her | mournfully,  
           Gently, and | humanly;  
 Not of the | stains of her:  
 All that re | -mains of her  
           Now, is pure | womanly.

Make no deep | scrutiny  
 Into her | mutiny,  
           Rash and un | -dutifull;  
 Past all dis | -honour,  
 Death has left | on her  
           Only the | beautiful.

Still, for all | slips of hers,—  
           One of Eve’s | family,—  
 Wipe those poor | lips of hers,  
           Oozing so | clammily.  
 Loop up her | tresses,  
           Escaped from the comb,—  
 Her fair auburn tresses;

Whilst wonderment guesses,  
Where was her | home?

Who was her | father?  
Who was her | mother?

Had she a | sister?  
Had she a | brother?

Was there a | dearer one  
Yet, than all | other?

Alas, for the rarity  
Of Christian charity  
Under the | sun!  
O, it was | pitiful!  
Near a whole | city full,  
Home she had | none.

Sisterly, | brotherly,  
Fatherly, | motherly,  
Feelings had | changed;  
Love, by harsh | evidence,  
Thrown from its | eminence  
Even God's | providence  
Seeming e | -stranged.

Where the lamps | quiver  
So far in the river,  
With many a light,  
From window and casement,  
From garret to basement,  
She stood, with amazement,  
Houseless, by | night.

The bleak wind of March  
Made her tremble and shiver;  
But not the dark arch,  
Or the black-flowing river:  
Mad from life's | history,  
Glad to death's | mystery,  
Swift to be | hurled,—  
Anywhere, | anywhere,  
Out of the | world!

In she plung'd | boldly,—  
No matter how coldly  
The rough | river ran,—  
Over the | brink of it:  
Picture it, | think of it,  
Dissolute | man!" *Clapp's Pioneer*, p. 54.

OBS. 5.—As each of our principal feet,—the Iambus, the Trochee, the Anapest, and the Dactyl,—has always one, and only one long syllable; it should follow, that, in each of our principal orders of verse,—the Iambic, the Trochaic, the Anapestic, and the Dactylic,—any

line, not diversified by a secondary foot, must be reckoned to contain just as many feet as long syllables. So, too, of the Amphibrach, and any line reckoned Amphibrachic. But it happens, that the common error by which single-rhymed Trochaics have so often been counted a foot *shorter* than they are, is also extended by some writers to single-rhymed Dactyls—the rhyming syllable, if long, being esteemed *supernumerary*! For example, three dactylic stanzas, in each of which a pentameter couplet is followed by a hexameter line, and this again by a heptameter, are introduced by Prof. Hart thus: “The *Dactylic Tetrameter*, *Pentameter*, and *Hexameter*, with the *additional* or *hypermeter syllable*, are all found combined in the following extraordinary specimen of versification. \* \* \* This is the only specimen of Dactylic *hexameter* or even *pentameter* verse that the author recollects to have seen.”

## LAMENT OF ADAM.

“Glad was our | meeting: thy | glittering | bosom I | *heard*,  
 Beating on | mine, like the | heart of a | timorous | *bird*;  
 Bright were thine | eyes as the | stars, and their | glances were | radiant as | *gleams*  
 Falling from | eyes of the | angels, when | singing by | Eden’s pur | -pureal | *streams*.

“Happy as | seraphs were | we, for we | wander’d a | -*lone*,  
 Trembling with | passionate | thrills, when the | twilight had | *flown*:  
 Even the | echo was | silent: our | kisses and | whispers of | *love*  
 Languish’d un | -heard and un | -known, like the | breath of the | blossoming | buds of the | *grove*.

“Life hath its | pleasures, but | fading are | they as the | *flowers*;  
 Sin hath its | sorrows, and | sadly we | turn’d from those | *bowers*;  
 Bright were the | angels be | -hind with their | falchions of | heavenly | *flame*!  
 Dark was the | desolate | desert be | -fore us, and | darker the | depth of our | *shame*!”

HENRY B. HIRST: *Hart’s English Grammar*, p. 190.

OBS. 6.—Of Dactylic verse, our prosodists and grammarians in general have taken but very little notice; a majority of them appearing by their silence, to have been utterly ignorant of the whole species. By many, the dactyl is expressly set down as an inferior foot, which they imagine is used only for the occasional diversification of an iambic, trochaic, or anapestic line. Thus Everett: “It is *never used* except as a *secondary foot*, and then in the *first place* of the line.”—*English Versification*, p. 122. On this order of verse, Lindley Murray bestowed only the following words: “The DACTYLIC measure being very uncommon, we shall give only one example of one species of it:—

Frōm thē lōw plēasūres ōf thīs fällēn nātūre,  
 Rise we to higher, &c.”—*Gram.*, 12mo, p. 207; 8vo, p. 257.

Read this example with “*we rise*” for “*Rise we*,” and all the poetry of it is gone! Humphrey says, “*Dactyle* verse is seldom used, as remarked heretofore; but *is used occasionally*, and has three metres; viz. of 2, 3, and 4 feet. Specimens follow. 2 feet. Free from anxiety. 3 feet. Singing most sweetly and merrily. 4 feet. Dactylic measures are wanting in energy.”—*English Prosody*, p. 18. Here the prosodist has made his own examples; and the last one, which unjustly impeaches all dactyls, he has made very badly—very prosaically; for the word “*Dactylic*,” though it has three syllables, is properly no dactyl, but rather an amphibrach.

OBS. 7.—By the Rev. David Blair, this order of poetic numbers is utterly misconceived and misrepresented. He says of it, “DACTYLIC verse consists of a *short syllable*, with one, two, or three feet, *and a long syllable*; as,

‘Dīstrāctēd wīth wōe,  
T’l rŭsh ōn thē fōe.’ ADDISON.”—*Blair’s Pract. Gram.*, p. 119.

“Yē shēphērds sō chēerfŭl ānd gāy,  
‘Whōse flōcks nēvēr cārelēsslŷ rōam;  
‘Shōuld Cōrydōn’s hāppēn tō strāy, ‘  
Oh! cāl thē pōor wāndērērs hōme.’ SHENSTONE.”—*Ib.*, p. 120.

It is manifest, that these lines are not dactylic at all. There is not a dactyl in them. They are composed of iambs and anapests. The order of the versification is Anapestic; but it is here varied by the very common diversification of dropping the first short syllable. The longer example is from a ballad of 216 lines, of which 99 are thus varied, and 117 are full anapestics.

OBS. 8.—The makers of school-books are quite as apt to copy blunders, as to originate them; and, when an error is once started in a grammar, as it passes with the user for good learning, no one can guess where it will stop. It seems worth while, therefore, in a work of this nature, to be liberal in the citation of such faults as have linked themselves, from time to time, with the several topics of our great subject. It is not probable, that the false scansion just criticised originated with Blair; for the Comprehensive Grammar, a British work, republished in its third edition, by Dobson, of Philadelphia, in 1789, teaches the same doctrine, thus: “Dactylic measure may consist of one, two, or three Dactyls, introduced by a feeble syllable, and terminated by a strong one; as,

Mŷ | dēar Irīsh | fōlks,  
Cōme | lēave ōff yōur | jōkes,  
And | būy ūp mŷ | hālpēnce sō | fīne;  
Sō | fāir ānd sō | brīght,  
Thēy’ll | gīve yōu dē | -līght:  
Ob | -sērvē hōw thēy | glīstēr ānd | shīne. SWIFT.  
A | cōblēr thēre | wās ānd hē | līv’d īn ā | stāl,  
Whīch | sērv’d hīm fōr | kīтчēn, fōr | pārlōur ānd | hall;  
Nō | cōīn īn hīs | pōckēt, nō | cāre īn hīs | pāte;  
Nō ām | -bītīon hē | hād, ānd nō | dūns āt hīs | gāte.”

—*Comp. Gram.*, p. 150.

To this, the author adds, “Dactylic measure becomes Anapestic by setting off an Iambic foot in the beginning of the line.”—*Ib.* These verses, all but the last one, unquestionably have an iambic foot at the beginning; and, for that reason, they are not, and by no measurement can be, dactyls. The last one is purely anapestic. All the divisional bars, in either example, are placed wrong.

#### ORDER V.—COMPOSITE VERSE.

Composite verse is that which consists of various metres, or different feet, combined,—not accidentally, or promiscuously, but by design, and with some regularity. In Composite verse, of any form, the stress must be laid rhythmically, as in the simple orders, else the

composition will be nothing better than unnatural prose. The possible variety of combinations in this sort of numbers is unlimited; but, the pure and simple kinds being generally preferred, any stated mixture of feet is comparatively uncommon. Certain forms which may be scanned by other methods, are susceptible also of division as Composites. Hence there cannot be an exact enumeration of the measures of this order, but instances, as they occur, may be cited to exemplify it.

*EXAMPLE I.—FROM SWIFT'S IRISH FEAST.*

“O'Rourk's | noble fare | will ne'er | be forgot,  
 By those | who were there, | or those | who were not.  
 His rev | -els to keep, | we sup | and we dine  
 On sev | -en score sheep, | fat bul | -locks, and swine.  
 Usquebaugh | to our feast | in pails | was brought up,  
 An hun | -dred at least, | and a mad | -der our cup.  
 O there | is the sport! | we rise | with the light,  
 In disor | -derly sort, | from snor | -ing all night.  
 O how | was I trick'd! | my pipe | it was broke,  
 My pock | -et was pick'd, | I lost | my new cloak.  
 I'm ri | -fled, quoth Nell, | of man | -tle and kerch | -er.  
 Why then | fare them well, | the de'il | take the search | -er.”

*Johnson's Works of the Poets*, Vol. v, p. 310.

Here the measure is tetrameter; and it seems to have been the design of the poet, that each hemistich should consist of one iamb and one anapest. Such, with a few exceptions, is the arrangement throughout the piece; but the hemistichs which have double rhyme, *may* each be divided into two amphibrachs. In Everett's *Versification*, at p. 100, the first six lines of this example are broken into twelve, and set in three stanzas, being given to exemplify “*The Line of a single Anapest preceded by an Iambus*,” or what he improperly calls “The first and shortest species of Anapestic lines.” His other instance of the same metre is also *Composite* verse, rather than Anapestic, even by his own showing. “In the following example,” says he, “we have this measure alternating with Amphibrachic lines:”

*EXAMPLE II.—FROM BYRON'S MANFRED.*

“The Captive Usurper,  
 Hurl'd down | from the throne.  
 Lay buried in torpor,  
 Forgotten and lone;  
 I broke through his slumbers,  
 I shiv | -er'd his chain,  
 I leagued him with numbers—  
 He's Ty | -rant again!  
 With the blood | of a mill | -ion he'll an | -swer my care,  
 With a na | -tion's destruc | -tion—his flight | and despair.”—*Act ii*, Sc. 3.

Here the last two lines, which are not cited by Everett, are pure anapestic tetrameters; and it may be observed, that, if each two of the short lines were printed as one, the eight which are here scanned otherwise, would become four of the same sort, except that these would each begin with an iambus. Hence the specimen *sounds* essentially as anapestic verse.

*EXAMPLE III.—WOMAN ON THE FIELD OF BATTLE.*

“Gentle and | lovely form,  
What didst | thou here,  
When the fierce | battle storm  
Bore down | the spear?  
Banner and | shiver’d crest,  
Beside | thee strown,  
Tell that a | -midst the best  
Thy work was done!  
Low lies the | stately head,  
Earth-bound | the free:  
How gave those | haughty dead  
A place | to thee?  
Slumb’rer! thine | early bier  
Friends should | have crown’d,  
Many a | flow’r and tear  
Shedding | around.  
Soft voices, | dear and young,  
Mingling | their swell,  
Should o’er thy | dust have sung  
Earth’s last | farewell.  
Sisters a | -bove the grave  
Of thy | repose  
Should have bid | vi’lets wave  
With the | white rose.  
Now must the | trumpet’s note.  
Savage | and shrill,  
For requi’m | o’er thee float,  
Thou fair | and still!  
And the swift | charger sweep,  
In full | career,  
Trampling thy | place of sleep—  
Why cam’st | thou here?  
Why?—Ask the | true heart why  
Woman | hath been  
Ever, where | brave men die,  
Unshrink | -ing seen.  
Unto this | harvest ground,  
Proud reap | -ers came,  
Some for that | stirring sound,  
A warr | -ior’s name:  
Some for the | stormy play,  
And joy | of strife,  
And some to | fling away  
A wea | -ry life.

But thou, pale | sleeper, thou,  
 With the | slight frame,  
 And the rich | locks, whose glow  
 Death can | -not tame;

Only one | thought, one pow'r,  
*Thee* could | have led,  
 So through the | tempest's hour  
 To lift | thy head!

Only the | true, the strong,  
 The love | whose trust  
 Woman's deep | soul too long  
 Pours on | the dust."

HEMANS: *Poetical Works*, Vol. ii, p. 157.

Here are fourteen stanzas of composite dimeter, each having two sorts of lines; the first sort consisting, with a few exceptions, of a dactyl and an amphimac; the second, mostly, of two iambs; but, in some instances, of a trochee and an iamb;—the latter being, in such a connexion, much the more harmonious and agreeable combination of quantities.

*EXAMPLE IV.—AIRS FROM A "SERENATA."*

AIR 1.

"Love sounds | the alarm,  
 And fear | is a-flyſg;  
 When beau | -ty's the prize,  
 What mor | -tal fears dy | -ſg?  
 In defence | of my treas | -ſre,  
 I'd bleed | at each vein;  
 Without | her no pleas | -ure;  
 For life | is a pain."

AIR 2.

"Consid | -er, fond shep | -hſrd,  
 How fleet | -ſg's the pleas | -ſre,  
 That flat | -ters our hopes  
 In pursuit | of the fair:  
 The joys | that attend | ſt,  
 By mo | -ments we meas | -ſre;  
 But life | is too lit | -tle  
 To meas | -ure our care."

GAY'S POEMS: *Johnson's Works of the Poets*, Vol vii, p. 378.

These verses are essentially either anapestic or amphibrachic. The anapest divides two of them in the middle; the amphibrach will so divide eight. But either division will give many iambs. By the present scansion, the *first foot* is an iamb in all of them but the two anapestics.

*EXAMPLE V.—"THE LAST LEAF."*

1.

"I saw | him once | before  
As he pass | -'d by | the door,  
And again  
The pave | -ment stones | resound  
As he tot | -ters o'er | the ground  
With his cane.

## 2.

They say | that in | his prime,  
Ere the prun | -ing knife of Time  
Cut him down,  
Not a bet | -ter man | was found  
By the cri | -er on | his round  
Through the town.

## 3.

But now | he walks | the streets,  
And he looks | at all | he meets  
So forlorn;  
And he shakes | his fee | -ble head,  
That it seems | as if | he said,  
They are gone.

## 4.

The mos | -sy mar | -bles rest  
On the lips | that he | has press'd  
In their bloom;  
And the names | he lov'd | to hear  
Have been carv'd | for man | -y a year  
On the tomb.

## 5.

My grand | -mamma | has said,—  
Poor old La | -dy! she | is dead  
Long ago,—  
That he had | a Ro | -man nose,  
And his cheek | was like | a rose  
In the snow.

## 6.

But now | his nose | is thin,  
And it rests | upon | his chin  
Like a staff;  
And a crook | is in | his back  
And a mel | -anchol | -y crack  
In his laugh.

## 7.

I know | it is | a sin  
For me [thus] | to sit | and grin

At him here;  
 But the old | three-cor | -ner'd hat,  
 And the breech | -es, and | all that,  
 Are so queer!

8.

And if I | should live | to be  
 The last leaf | upon | the tree  
 In the spring,—  
 Let them smile, | as I | do now,  
 At the old | forsak | -en bough  
 Where I cling.”

OLIVER W. HOLMES: *The Pioneer*, 1843, p. 108.

### OBSERVATIONS.

OBS. 1.—Composite verse, especially if the lines be short, is peculiarly liable to uncertainty, and diversity of scansion; and that which does not always abide by one chosen order of quantities, can scarcely be found agreeable; it must be more apt to puzzle than to please the reader. The eight stanzas of this last example, have eight lines of *iambic trimeter*; and, since seven times in eight, this metre holds the first place in the stanza, it is a double fault, that one such line seems strayed from its proper position. It would be better to prefix the word *Now* to the fourth line, and to mend the forty-third thus:—

“AND SHOULD | I LIVE | TO BE”—

The trissyllabic feet of this piece, as I scan it, are numerous; being the sixteen short lines of monometer, and the twenty-four initial feet of the lines of seven syllables. Every one of the forty—(except the thirty-sixth, “*The* last leaf”—) begins with a monosyllable which may be varied in quantity; so that, with stress laid on this monosyllable, the foot becomes an *amphimac*; without such stress, an *anapest*.

OBS. 2.—I incline to read this piece as composed of iambs and anapests; but E. A. Poe, who has commended “the effective harmony of these lines,” and called the example “an excellently well conceived and well managed specimen of versification,” counts many syllables long, which such a reading makes short, and he also divides all but the iambs in a way quite different from mine, thus: “Let us scan the first stanza.

I s̄aw | h̄im ōnce | b̄ēfōre  
 As h̄ē | p̄āssēd | b̄y th̄ē | d̄oor,  
 And ā- | ḡain  
 Th̄ē p̄āve- | m̄ēnt stōnes | r̄ēsōund  
 As h̄ē | t̄ōttērs | ō'er th̄ē | grōund  
 With h̄is c̄āne.’

This,” says he, “is the general scansion of the poem. We have first three iambuses. The second line shifts the *rhythm* into the *trochaic*, giving us three trochees, with a cæsura equivalent, in this case, to a trochee. The third line is a trochee and equivalent cæsura.”—POE'S NOTES UPON ENGLISH VERSE: *Pioneer*, p. 109. These quantities are the same as those by which the whole piece is made to consist of iambs and amphimacs.

OBS. 3.—In its *rhythmical effect* upon the ear, a supernumerary short syllable at the end of a line, may sometimes, perhaps, compensate for the want of such a syllable at the beginning of the next line, as may be seen in the fourth example above; but still it is unusual, and seems improper, to suppose such syllables to belong to the scansion of the subsequent line; for the division of lines, with their harmonic pauses, is greater than the division of feet, and implies that no foot can ever actually be split by it. Poe has suggested that the division into lines may be disregarded in scanning, and sometimes must be. He cites for an example the beginning of Byron's "Bride of Abydos,"—a passage which has been admired for its easy flow, and which, he says, has greatly puzzled those who have attempted to scan it. Regarding it as essentially anapestic tetrameter, yet as having some initial iambs, and the first and fifth lines dactylic, I shall here divide it accordingly, thus:—

“Knōw yē thē | lānd whēre thē | cyprēss ānd | myrtlē  
 Arē ēm | -blēms ōf dēeds | thāt āre dōne | īn thēir clīme—  
 Where the rage | of the vul | -ture, the love | of the tur | -tle,  
 Now melt | into soft | -ness, now mad | -den to crime?  
 Know ye the | land of the | cedar and | vine.  
 Where the flow'rs | ever blos | -som, the beams | ever shine,  
 And the light | wings of Zeph | -yr, oppress'd | with perfume,  
 Wax faint | o'er the gar | -dens of Gul | in her bloom?  
 Where the cit | -ron and ol | -ive are fair | -est of fruit,  
 And the voice | of the night | -ingale nev | -er is mute?  
 Where the vir | -gins are soft as the ros | -es they twine,  
 And all, | save the spir | -it of man, | is divine?  
 'Tis the land | of the East- | 't is the clime | of the Sun—  
 Can he smile | on such deeds | as his chil | -dren have done?  
 Oh, wild | as the ac | -cents of lov | -ers' farewell,  
 Are the hearts | that they bear, | and the tales | that they tell.”

OBS. 4.—These lines this ingenious prosodist divides not thus, but, throwing them together like prose unpunctuated, finds in them “a regular succession of *dactylic rhythms*, varied only at three points by equivalent *spondees*, and separated into two distinct divisions by equivalent terminating *cæsuras*.” He imagines that, “By all who have ears—not over long—this will be acknowledged as the true and the sole true scansion.”—*E. A. Poe: Pioneer*, p. 107. So it may, for aught I know; but, having dared to show there is an other way quite as simple and plain, and less objectionable, I submit both to the judgement of the reader:—

“Knōw yē thē | lānd whēre thē | cyprēss ānd | myrtlē āre | ēmblēms ōf | dēeds thāt  
 āre | dōne īn thēir | clīme whēre thē | rāge ōf thē | vūltūre thē | lōve ōf thē | tūrtlē nōw  
 | mēlt īntō | sōftnēss nōw | maddēn tō | *crime*. Knōw yē thē | lānd ōf thē | cēdār ānd |  
 vīne whēre thē | flōw'rs ēvēr | blōssōm thē | bēams ēvēr | shīne whēre thē | līght wīngs  
 ōf | zēphyr ōp | -prēss'd wīth pēr | *fūme wāx* | fāint ō'er thē | gārdēns ōf | Gūl īn hēr |  
 blōom whēre thē | cītrōn ānd | ōlīve āre | fāirēst ōf | frūit ānd thē | vōice ōf thē |  
 nīghtīngāle | nēvēr īs | mūte whēre thē | vīrgīns āre | sōft ās thē | rōsēs thēy | *twīne ānd*  
 | āll sāve thē | spīrīt ōf | mān īs dī- | vīne 'tīs thē | lānd ōf thē | Eāst 'tīs thē | clīmē ōf  
 thē | Sūn cān hē | smīle ōn sūch | dēeds ās hīs | childrēn hāve | *dōne ōh* wīld ās thē |

āccēnts ōf | lōvērs' fāre- | wēll āre thē | hēarts thāt thēy | beār and thē | tāles thāt thēy  
| *tēll.*”—*Ib.*

OBS. 5.—In the sum and proportion of their quantities, the anapest, the dactyl, and the amphibrach, are equal, each having two syllables short to one long; and, with two short quantities between two long ones, lines may be tolerably accordant in rhythm, though the order, at the commencement, be varied, and their number of syllables be not equal. Of the following sixteen lines, nine are pure anapestic tetrameters; one *may* be reckoned dactylic, but it may quite as well be said to have a trochee, an iambus, and two anapests or two amphimacs; one is a spondee and three anapests; and the rest *may* be scanned as amphibrachics ending with an iambus, but are more properly anapestics commencing with an iambus. Like the preceding example from Byron, they lack the uniformity of proper composites, and are rather to be regarded as anapestics irregularly diversified.

#### THE ALBATROSS.

“TIS SAID THE ALBATROSS NEVER RESTS.”—*BUFFON.*

“Whēre thē fāth | -ōmlēss wāves | in magnif | -icence toss,  
Hōmelēss | ānd high | soars the wild | Albatross;  
Unwea | -ried, undaunt | -ed, unshrink | -ing, alone,  
The o | -cean his em | -pire, the tem | -pest his throne.  
When the ter | -rible whirl | -wind raves wild | o’er the surge,  
And the hur | -ricane howls | out the mar | -iner’s dirge,  
In thy glo | -ry thou spurn | -est the dark | -heaving sea,  
Prōud bīrd | of the o | -cean-world, home | -less and free.  
When the winds | are at rest, | and the sun | in his glow,  
And the glit | -tering tide | sleeps in beau | -ty below,  
In the pride | of thy pow | -er trium | -phant above,  
With thy mate | thou art hold | -ing thy rev | -els of love.  
Untir | -ed, unfet | -tered, unwatched, | unconfined,  
Be my spir | -it like thee, | in the world | of the mind;  
No lean | -ing for earth, | e’er to wea | -ry its flight,  
And fresh | as thy pin | -ions in re | -gions of light.”

SAMUEL DALY LANGTREE: *North American Reader*, p. 443.

OBS. 6.—It appears that the most noted measures of the Greek and Latin poets were not of any simple order, but either composites, or mixtures too various to be called composites. It is not to be denied, that we have much difficulty in reading them rhythmically, according to their stated feet and scansion; and so we should have, in reading our own language rhythmically, in any similar succession of feet. Noticing this in respect to the Latin Hexameter, or Heroic verse, Poe says, “Now the discrepancy in question is not observable in English metres; where the scansion coincides with the reading, *so far as the rhythm is concerned*—that is to say, if we pay no attention to the *sense* of the passage. But these facts indicate *a radical difference* in the genius of the two languages, as regards their capacity for modulation. In truth, \* \* \* the Latin is a far more *stately* tongue than our own. It is essentially spondaic; the English is as essentially dactylic.”—*Pioneer*, p. 110. (See the marginal note in §3d. at Obs. 22d, above.) Notwithstanding this difference, discrepance, or difficulty, whatever it may be, some of our poets have, in a few instances, attempted imitations of certain Latin metres; which

imitations it may be proper briefly to notice under the present head. The Greek or Latin Hexameter line has, of course, six feet, or pulsations. According to the Prosodies, the first four of these may be either dactyls or spondees; the fifth is always, or nearly always, a dactyl; and the sixth, or last, is always a spondee: as,

“Lūdērē | quæ vël | -lēm cālā | -mō pēr | -mīsīt ā | -grētī.”—*Virg.*  
 “Infān- | dūm, Rē | -gīnā, jū | -bēs rēnō | -vārē dō | -lōrēm.”—*Id.*

Of this sort of verse, in English, somebody has framed the following very fair example:—

“Mān īs ā | cōmplex, | cōmpōund | cōmpōst, | yēt īs hē | Gōd-bōrn.”

OBS. 7.—Of this species of versification, which may be called Mixed or Composite Hexameter, the most considerable specimen that I have seen in English, is Longfellow’s *Evangeline*, a poem of one thousand three hundred and eighty-two of these long lines, or verses. This work has found admirers, and not a few; for, of these, nothing written by so distinguished a scholar could fail: but, surely, not many of the verses in question exhibit truly the feet of the ancient Hexameters; or, if they do, the ancients contented themselves with very imperfect rhythms, even in their noblest heroics. In short, I incline to the opinion of Poe, that, “Nothing less than the deservedly high reputation of Professor Longfellow, could have sufficed to give currency to his lines as to Greek Hexameters. In general, they are neither one thing nor another. Some few of them are dactylic verses—English dactyls. But do away with the division into lines, and the most astute critic would never have suspected them of any thing more than prose.”—*Pioneer*, p. 111. The following are the last ten lines of the volume, with such a division into feet as the poet is presumed to have contemplated:—

“Still stands the | forest pri | -meval; but | under the | shade of its | branches  
 Dwells an | -other | race, with | other | customs and | language.  
 Only a | -long the | shore of the | mournful and | misty At | -lantic  
 Linger a | few A | -cadian | peasants, whose | fathers from | exile  
 Wandered | back to their | native | land to | die in its | bosom.  
 In the | fisherman’s | cot the | wheel and the | loom are still | busy;  
 Maidens still | wear their | Norman | caps and their | kirtles of | homespun,  
 And by the | evening | fire re | -peat E | -vangeline’s story,  
 While from its | rocky | caverns the | deep-voiced, | neighbouring | ocean  
 Speaks, and in | accents dis | -consolate | answers the | wail of the | forest.”

HENRY W. LONGFELLOW: *Evangeline*, p. 162.

OBS. 8.—An other form of verse, common to the Greeks and Romans, which has sometimes been imitated—or, rather, which some writers have *attempted to imitate*—in English, is the line or stanza called Sapphic, from the inventress, Sappho, a Greek poetess. The Sapphic verse, according to Fabricius, Smetius, and all good authorities, has eleven syllables, making “five feet—the first a trochee, the second a spondee, the third a dactyl, and the fourth and fifth trochees.” The Sapphic stanza, or what is sometimes so called, consists of three Sapphic lines and an Adonian, or Adonic,—this last being a short line composed of “a dactyl and a spondee.” Example from Horace:—

“intē | -gēr vī | -tæ, scēlē | -rīsquē | pūrūs  
 Non e | -get Mau | -ri jacu | -lis ne | -qu’ arcu,  
 Nec ven | -ena | -tis gravi | -dâ sa | -gittis,  
 Fusce, pha | -retra.”

OBS. 9.—To arrange eleven syllables in a line, and have half or more of them to form trochees, is no difficult matter; but, to find *rhythm* in the succession of “a trochee, a spondee, and a dactyl,” as we read words, seems hardly practicable. Hence few are the English Sapphics, if there be any, which abide by the foregoing formulæ of quantities and feet. Those which I have seen, are generally, if not in every instance, susceptible of a more natural scansion as being composed of trochees, with a dactyl, or some other foot of three syllables, at the *beginning* of each line. The cæsural pause falls sometimes after the fourth syllable, but more generally, and much more agreeably, after the fifth. Let the reader inspect the following example, and see if he do not agree with me in laying the accent on only the first syllable of each foot, as the feet are here divided. The accent, too, must be carefully laid. Without considerable care in the reading, the hearer will not suppose the composition to be any thing but prose:—

“THE WIDOW.”—(IN “SAPPHICS.”)

“Cold was the | night-wind, | drifting | fast the | snow fell,  
 Wide were the | downs, and | shelter | -less and | naked,  
 When a poor | Wanderer | struggled | on her | journey,  
 Weary and | way-sore.

Drear were the | downs, more | dreary | her re | -flections;  
 Cold was the | night-wind, | colder | was her | bosom;  
 She had no | home, the | world was | all be | -fore her;  
 She had no | shelter.

Fast o’er the | heath a | chariot | rattlee | by her;  
 ‘Pity me!’ | feebly | cried the | lonely | wanderer;  
 ‘Pity me, | strangers! | lest, with | cold and | hunger,  
 Here I should | perish.

‘Once I had | friends,—though | now by | all for | -saken!  
 ‘Once I had | parents, |—they are | now in | heaven!  
 ‘I had a | home once, |—I had | once a | husband—  
 Pity me, | strangers!

‘I had a | home once, |—I had | once a | husband—  
 ‘I am a | widow, | poor and | broken | -hearted!’  
 Loud blew the | wind; un | -heard was | her com | -plaining;  
 On drove the | chariot.

Then on the | snow she | laid her | down to | rest her;  
 She heard a | horseman; | ‘Pity | me!’ she | groan’d out;  
 Loud was the | wind; un | -heard was | her com | -plaining;  
 On went the | horseman.

Worn out with | anguish, | toil, and | cold, and | hunger,  
 Down sunk the | Wanderer; | sleep had | seized her | senses;

There did the | traveller | find her | in the | morning;  
 God had re | -leased her.”

ROBERT SOUTHEY: *Poems*, Philad., 1843, p. 251.

Among the lyric poems of Dr. Watts, is one, entitled, “THE DAY OF JUDGEMENT; *an Ode attempted in English Sapphic*.” It is perhaps as good an example as we have of the species. It consists of nine stanzas, of which I shall here cite the first three, dividing them into feet as above:—

“When the fierce | North Wind, | with his | airy | forces,  
 Rears up the | Baltic | to a | foaming | fury;  
 And the red | lightning | with a | storm of | hail comes  
 Rushing a | -main down;

How the poor | sailors | stand a | -maz’d and | tremble!  
 While the hoarse | thunder, | like a bloody | trumpet,  
 Roars a loud | onset | to the | gaping | waters,  
 Quick to de | -vour them.

Such shall the | noise be, | and the | wild dis | -order,  
 (If things e | -ternal | may be | like these | earthly,)  
 Such the dire | terror, | when the | great Arch | -angel  
 Shakes the cre | -ation.”

—*Horæ Lyricæ*, p. 67.

“These lines,” says Humphrey, who had cited the first four, “are good English Sapphics, and contain the essential traits of the original as nearly as the two languages, Greek and English, correspond to each other. This stanza, together with the poem, from which this was taken, may stand for a model, in our English compositions.”—*Humphrey’s E. Prosody*, p. 19. This author erroneously supposed, that the trissyllabic foot, in any line of the Sapphic stanza, must occupy the second place: and, judging of the ancient feet and quantities by what he found, or supposed he found, in the English imitations, and not by what the ancient prosodists say of them, yet knowing that the ancient and the modern Sapphics are in several respects unlike, he presented forms of scansion for both, which are not only peculiar to himself, but not well adapted to either. “We have,” says he, “no established rule for this kind of verse, in our English compositions, which has been uniformly adhered to. The rule for which, in Greek and Latin verse, *as far as I can ascertain*, was this:  $\bar{\text{v}}$  |  $\bar{\text{v}}\bar{\text{v}}\bar{\text{v}}$  |  $\text{v}\text{v}$  |  $\bar{\text{v}}$  |  $\bar{\text{v}}$  a trochee, a *moloss*, a *pyrrhic*, a trochee, and [a] *spondee*; and *sometimes, occasionally*, a trochee, instead of a spondee, at the end. But as our language is not favourable to the use of the spondee and moloss, the moloss is seldom or never used in our English Sapphics; but, instead of which, some other *trissyllable* foot is used. Also, instead of the spondee, a trochee is commonly used; and sometimes a trochee instead of the pyrrhic, in the third place. As some prescribed rule, or model for imitation, may be necessary, in this case, I will cite a stanza from one of our best English poets, which may serve for a model.

‘Whēn thē | fiērcē nōrth-wīnd, | wīth hīs | āirŷ | fōrcēs [,]  
 Rēars ūp | thē Bāltic | tō ā | fōamīng | fūrŷ;  
 And thē | rēd līghtnīng | wīth ā | stōrm ōf | hāil cōmes

Rūshīng | āmāin dōwn.’—*Watts*.—*Ib.*, p. 19.

[FORMULE.—Not proper, because the word “*lion*,” here put for Cowper’s word “*beast*” destroys the metre, and changes the line to prose. But, according to the definition given on p. 827, “Verse, in opposition to prose, is language arranged into metrical lines of some determinate length and rhythm—language so ordered as to produce harmony by a due

succession of poetic feet." This line was composed of one iamb and two anapests; and, to such form, it should be restored, thus: "The *beast* is laid down in his lair."—*Cowper's Poems*, Vol. i, p. 201.]

"Where is thy true treasure? Gold says, not in me."—*Hallock's Gram.*, 1842, p. 66.

"Canst thou grow sad, thou sayest, as earth grows bright?"—*Frazer's Gram.*, 1845, p. 140.

"It must be so, Plato, thou reasonest well."—*Wells's Gram.*, 1846, p. 122.

"Slow rises merit, when by poverty depressed."—*Ib.*, p. 195; *Hiley*, 132; *Hart*, 179.

"Rapt in future times, the bard begun."—*Wells's Gram.*, 1846, p. 153.

"Is there not rain enough in the sweet heavens

To wash it white as snow? Whereunto serves mercy,

But to confront the visage of offence!"—*Hallock's Gram.*, 1842, p. 118.

"Look! in this place ran Cassius's dagger through."—*Kames, El. of Cr.*, Vol. i, p. 74.

"—When they list their lean and flashy songs,

Harsh grate on their scrannel pipes of wretched straw."—*Jamieson's Rhet.*, p. 135.

"Did not great Julius bleed for justice's sake?"—*Dodd's Beauties of Shak.*, p. 253.

"Did not great Julius bleed for justice sake?"—*Singer's Shakspeare*, Vol. ii, p. 266.

"May I, unblam'd, express thee? Since God is light."—*O. B. Peirce's Gram.*, p. 290.

"Or hearest thou, rather, pure ethereal stream!"—2d *Perversion, ib.*

"Republics; kingdoms; empires, may decay;

Princes, heroes, sages, sink to nought."—*O. B. Peirce's Gram.*, p. 287.

"Thou bringest, gay creature as thou art,

A solemn image to my heart."—E. J. *Hallock's Gram.*, p. 197.

"Know thyself presume not God to scan;

The proper study of mankind is Man."—*O. B. Peirce's Gram.*, p. 285.

"Raised on a hundred pilasters of gold."—*Charlemagne*, C. i, St. 40.

"Love in Adalgise's breast has fixed his sting."—*Ib.*, C. i, St. 30.

April, June, and November,

February twenty-eight alone,

All the rest thirty and one." *Colet's Grammar, or Paul's Accidence*. Lond., 1793, p. 75.

## LESSON II.—RESTORE THE RHYTHM.

"'Twas not the fame of what he once had been,

Or tales in old records and annals seen."—*Rowe's Lucan*, B. i, l. 274.

"And Asia now and Afric are explor'd,

For high-priced dainties, and citron board."—*Eng. Poets: ib.*, B. i, l. 311.

"Who knows not, how the trembling judge beheld

The peaceful court with arm'd legions fill'd?"—*Eng. Poets; ib.*, B. i, l. 578.

"With thee the Scythian wilds we'll wander o'er,

With thee burning Libyan sands explore."—*Eng. Poets: ib.*, B. i, l. 661.

"Hasty and headlong different paths they tread,

As blind impulse and wild distraction lead."—*Eng. Poets: ib.*, B. i, l. 858.

"But Fate reserv'd to perform its doom,

And be the minister of wrath to Rome."—*Eng. Poets: ib.*, B. ii, l. 136.

"Thus spoke the youth. When Cato thus exprest

The sacred counsels of his most inmost breast."—*Eng. Poets: ib.*, B. ii, l. 435.

"These were the strict manners of the man,

And this the stubborn course in which they ran;  
 The golden mean unchanging to pursue,  
 Constant to keep the proposed end in view.”—*Eng. Poets: ib.*, B. ii, l. 580.  
 “What greater grief can a Roman seize,  
 Than to be forc’d to live on terms like these!”—*Eng. Poets: ib.*, B. ii, l. 782.  
 “He views the naked town with joyful eyes,  
 While from his rage an arm’d people flies.”—*Eng. Poets: ib.*, B. ii, l. 880.  
 “For planks and beams he ravages the wood,  
 And the tough bottom extends across the flood.”—*Eng. Poets: ib.*, B. ii, l. 1040.  
 “A narrow pass the horned mole divides,  
 Narrow as that where Euripus’ strong tides  
 Beat on Euboean Chalcis’ rocky sides.”—*Eng. Poets: ib.*, B. ii, l. 1095.  
 “No force, no fears their hands unarm’d bear,  
 But looks of peace and gentleness they wear.”—*Eng. Poets: ib.*, B. iii, l. 112.  
 “The ready warriors all aboard them ride,  
 And wait the return of the retiring tide.”—*Eng. Poets: ib.*, B. iv, l. 716.  
 “He saw those troops that long had faithful stood,  
 Friends to his cause, and enemies to good,  
 Grown weary of their chief, and satiated with blood.”—*Eng. Poets: ib.*, B. v, l. 337.

## CHAPTER V.—QUESTIONS.

### ORDER OF REHEARSAL, AND METHOD OF EXAMINATION.

#### PART FOURTH, PROSODY.

☞ [The following questions call the attention of the student to the main doctrines in the foregoing code of Prosody, and embrace or demand those facts which it is most important for him to fix in his memory; they may, therefore, serve not only to aid the teacher in the process of examining his classes, but also to direct the learner in his manner of preparation for recital.]

#### LESSON I.—OF PUNCTUATION.

1. Of what does Prosody treat? 2. What is *Punctuation*? 3. What are the principal points, or marks? 4. What pauses are denoted by the first four points? 5. What pauses are required by the other four? 6. What is the general use of the Comma? 7. How many rules for the Comma are there, and what are their heads? 8. What says Rule 1st of *Simple Sentences*? 9. What says Rule 2d of *Simple Members*? 10. What says Rule 3d of *More than Two Words*? 11. What says Rule 4th of *Only Two Words*? 12. What says Rule 5th of *Words in Pairs*? 13. What says Rule 6th of *Words put Absolute*? 14. What says Rule 7th of *Words in Apposition*? 15. What says Rule 8th of *Adjectives*? 16. What says Rule 9th of *Finite Verbs*? 17. What says Rule 10th of *Infinitives*? 18. What says Rule 11th of *Participles*? 19. What says Rule 12th of *Adverbs*? 20. What says Rule 13th of *Conjunctions*? 21. What says Rule 14th of *Prepositions*? 22. What says Rule 15th of *Interjections*? 23. What says Rule 16th of *Words Repeated*? 24. What says Rule 17th of *Dependent Quotations*?

#### LESSON II.—OF THE COMMA.

1. How many exceptions, or forms of exception, are there to Rule 1st for the comma? 2.—to Rule 2d? 3.—to Rule 3d? 4.—to Rule 4th? 5.—to Rule 5th? 6.—to Rule 6th? 7.—to Rule 7th? 8.—to Rule 8th? 9.—to Rule 9th? 10.—to Rule 10th? 11.—to Rule 11th? 12.—to Rule 12th? 13.—to Rule 13th? 14.—to Rule 14th? 15.—to Rule 15th? 16.—to Rule 16th?

17.—to Rule 17th? 18. What says the Exception to Rule 1st of a *Long Simple Sentence*? 19. What says Exception 1st to Rule 2d of *Restrictive Relatives*? 20. What says Exception 2d to Rule 2d of *Short Terms closely Connected*? 21. What says Exception 3d to Rule 2d of *Elliptical Members United*? 22. What says Exception 1st to Rule 4th of *Two Words with Adjuncts*? 23. What says Exception 2d to Rule 4th of *Two Terms Contrasted*? 24. What says Exception 3d to Rule 4th of a mere *Alternative of Words*? 25. What says Exception 4th to Rule 4th of *Conjunctions Understood*?

### LESSON III.—OF THE COMMA.

1. What rule speaks of the separation of *Words in Apposition*? 2. What says Exception 1st to Rule 7th of *Complex Names*? 3. What says Exception 2d to Rule 7th of *Close Apposition*? 4. What says Exception 3d to Rule 7th of *a Pronoun without a Pause*? 5. What says Exception 4th to Rule 7th of *Names Acquired*? 6. What says the Exception to Rule 8th of *Adjectives Restrictive*? 7. What is the rule which speaks of a finite *Verb Understood*? 8. What says the Exception to Rule 9th of a *Very Slight Pause*? 9. What is the Rule for the pointing of *Participles*? 10. What says the Exception to Rule 11th of *Participles Restrictive*?

[Now, if you please, you may correct orally, according to the formules given, some or all of the various examples of *False Punctuation*, which are arranged under the rules for the Comma in Section First.]

### LESSON IV.—OF THE SEMICOLON.

1. What is the general use of the Semicolon? 2. How many rules are there for the Semicolon? 3. What are their heads? 4. What says Rule 1st of *Complex Members*? 5. What says Rule 2d of *Simple Members*? 6. What says Rule 3d of *Apposition, &c.*?

[Now, if you please, you may correct orally, according to the formules given, some or all of the various examples of *False Punctuation*, which are arranged under the rules for the Semicolon in Section Second.]

### LESSON V.—OF THE COLON.

1. What is the general use of the Colon? 2. How many rules are there for the Colon? 3. What are their heads? 4. What says Rule 1st of *Additional Remarks*? 5. What says Rule 2d of *Greater Pauses*? 6. What says Rule 3d of *Independent Quotations*?

[Now, if you please, you may correct orally, according to the formules given, some or all of the various examples of *False Punctuation*, which are arranged under the rules for the Colon in Section Third.]

### LESSON VI.—OF THE PERIOD.

1. What is the general use of the Period? 2. How many rules are there for the Period? 3. What are their heads? 4. What says Rule 1st of *Distinct Sentences*? 5. What says Rule 2d of *Allied Sentences*? 6. What says Rule 3d of *Abbreviations*?

[Now, if you please, you may correct orally, according to the formules given, some or all of the various examples of *False Punctuation*, which are arranged under the rules for the Period in Section Fourth.]

## LESSON VII.—OF THE DASH.

1. What is the general use of the Dash? 2. How many rules are there for the Dash? 3. What are their heads? 4. What says Rule 1st of *Abrupt Pauses*? 5. What says Rule 2d of *Emphatic Pauses*? 6. What says Rule 3d of *Faulty Dashes*?

[Now, if you please, you may correct orally, according to the formules given, some or all of the various examples of *False Punctuation*, which are arranged under the rules for the Dash in Section Fifth.]

## LESSON VIII.—OF THE EROTEME.

1. What is the use of the Eroteme, or Note of Interrogation? 2. How many rules are there for this mark? 3. What are their heads? 4. What says Rule 1st of *Questions Direct*? 5. What says Rule 2d of *Questions United*? 6. What says Rule 3d of *Questions Indirect*?

[Now, if you please, you may correct orally, according to the formules given, some or all of the various examples of *False Punctuation*, which are arranged under the rules for the Eroteme in Section Sixth.]

## LESSON IX.—OF THE ECPHONEME.

1. What is the use of the Ecphoneme, or Note of Exclamation? 2. How many rules are there for this mark? 3. What are their heads? 4. What says Rule 1st of *Interjections*? 5. What says Rule 2d of *Invocations*? 6. What says Rule 3d of *Exclamatory Questions*?

[Now, if you please, you may correct orally, according to the formules given, some or all of the various examples of *False Punctuation*, which are arranged under the rules for the Ecphoneme in Section Seventh.]

## LESSON X.—OF THE CURVES.

1. What is the use of the Curves, or Marks of Parenthesis? 2. How many rules are there for the Curves? 3. What are their titles, or heads? 4. What says Rule 1st of *the Parenthesis*? 5. What says Rule 2d of *Included Points*?

[Now, if you please, you may correct orally, according to the formules given, some or all of the various examples of *False Punctuation*, which are arranged under the rules for the Curves in Section Eighth.]

## LESSON XI.—OF THE OTHER MARKS.

1. What is the use of the Apostrophe? 2. What is the use of the Hyphen? 3. What is the use of the Diæresis, or Dialysis? 4. What is the use of the Acute Accent? 5. What is the use of the Grave Accent? 6. What is the use of the Circumflex? 7. What is the use of the Breve, or Stenotone? 8. What is the use of the Macron, or Macrotone? 9. What is the use of the Ellipsis, or Suppression? 10. What is the use of the Caret? 11. What is the use of the Brace? 12. What is the use of the Section? 13. What is the use of the Paragraph? 14. What is the use of the Guillemets, or Quotation Points? 15. How do we mark a quotation within a quotation? 16. What is the use of the Crotchets, or Brackets? 17. What is the use of the Index, or Hand? 18. What are the six Marks of Reference in their usual order? 19. How can references be otherwise made? 20. What is the use of the Asterism, or the Three Stars? 21. What is the use of the Cedilla?

[Having correctly answered the foregoing questions, the pupil should be taught to apply the principles of punctuation; and, for this purpose, he may be required to read a portion of some accurately pointed book, or may be directed to turn to the *Fourteenth Praxis*, beginning on p. 821,—and to assign a reason for every mark he finds.]

#### LESSON XII.—OF UTTERANCE.

1. What is *Utterance*? 2. What does it include? 3. What is articulation? 4. How does articulation differ from pronunciation? 5. How does Comstock define it? 6. What, in his view, is a good articulation? 7. How does Bolles define articulation? 8. Is a good articulation important? 9. What are the faults opposite to it? 10. What says Sheridan, of a good articulation? 11. Upon what does distinctness depend? 13. Why is just articulation better than mere loudness? 13. Do we learn to articulate in learning to speak or read?

#### LESSON XIII.—OF PRONUNCIATION.

1. What is pronunciation? 2. What is it that is called *Orthoëpy*? 3. What knowledge does pronunciation require? 4. What are the just powers of the letters? 5. How are these learned? 6. Are the just powers of the letters in any degree variable? 7. What is quantity? 8. Are all long syllables equally long, and all short ones equally short? 9. What has stress of voice to do with quantity? 10. What is accent? 11. Is every word accented? 12. Do we ever lay two equal accents on one word? 13. Have we more than one sort of accent? 14. Can any word have the secondary accent, and not the primary? 15. Can monosyllables have either? 16. What regulates accent? 17. What four things distinguish the elegant speaker?

#### LESSON XIV.—OF ELOCUTION.

1. What is elocution? 2. What does elocution require? 3. What is emphasis? 4. What comparative view is taken of accent and emphasis? 5. How does L. Murray connect emphasis with quantity? 6. Does emphasis ever affect accent? 7. What is the guide to a right emphasis? 8. Can one read with too many emphases? 9. What are pauses? 10. How many and what kinds of pauses are there? 11. What is said of the duration of pauses, and the taking of breath? 12. After what manner should pauses be made? 13. What pauses are particularly ungraceful? 14. What is said of rhetorical pauses? 15. How are the harmonic pauses divided? 16. Are such pauses essential to verse?

#### LESSON XV.—OF ELOCUTION.

17. What are inflections? 18. What is called the rising or upward inflection? 19. What is called the falling or downward inflection? 20. How are these inflections exemplified? 21. How are they used in asking questions? 22. What is said of the notation of them? 23. What constitutes a circumflex? 24. What constitutes the rising, and what the falling, circumflex? 25. Can you give examples? 26. What constitutes a monotone, in elocution? 27. Which kind of inflection is said to be most common? 28. Which is the best adapted to strong emphasis? 29. What says Comstock of rules for inflections? 30. Is the voice to be varied for variety's sake? 31. What should regulate the inflections? 32. What is cadence? 33. What says Ripplingham about it? 34. What says Murray? 35. What are tones? 36. Why do they deserve particular attention? 37. What says Blair about tones? 38. What says Hiley?

## LESSON XVI.—OF FIGURES.

1. What is a *Figure* in grammar? 2. How many kinds of figures are there? 3. What is a figure of orthography? 4. What are the principal figures of orthography? 5. What is Mimesis? 6. What is an Archaism? 7. What is a figure of etymology? 8. How many and what are the figures of etymology? 9. What is Aphæresis? 10. What is Prosthesis? 11. What is Syncope? 12. What is Apocope? 13. What is Paragoge? 14. What is Diæresis? 15. What is Synæresis? 16. What is Tmesis? 17. What is a figure of syntax? 18. How many and what are the figures of syntax? 19. What is Ellipsis, in grammar? 20. Are sentences often elliptical? 21. What parts of speech can be omitted, by ellipsis? 22. What is Pleonasm? 23. When is this figure allowable? 24. What is Syllepsis? 25. What is Enallage? 26. What is Hyperbaton? 27. What is said of this figure?

## LESSON XVII.—OF FIGURES.

28. What is a figure of rhetoric? 29. What peculiar name have some of these? 30. Do figures of rhetoric often occur? 31. On what are they founded? 32. How many and what are the principal figures of rhetoric? 33. What is a Simile? 34. What is a Metaphor? 35. What is an Allegory? 36. What is a Metonymy? 37. What is Synecdoche? 38. What is Hyperbole? 39. What is Vision? 40. What is Apostrophe? 41. What is Personification? 42. What is Erotesis? 43. What is Ecphonesis? 44. What is Antithesis? 45. What is Climax? 46. What is Irony? 47. What is Apophasis, or Paralipsis? 48. What is Onomatopoeia?

[Now, if you please, you may examine the quotations adopted for the *Fourteenth Praxis*, and may name and define the various figures of grammar which are contained therein.]

## LESSON XVIII.—OF VERSIFICATION.

1. What is *Versification*? 2. What is verse, as distinguished from prose? 3. What is the rhythm of verse? 4. What is the quantity of a syllable? 5. How are poetic quantities denominated? 6. How are they proportioned? 7. What quantity coincides with accent or emphasis? 8. On what but the vowel sound does quantity depend? 9. Does syllabic quantity always follow the quality of the vowels? 10. Where is quantity variable, and where fixed, in English? 11. What is rhyme? 12. What is blank verse? 13. What is remarked concerning the rhyming syllables? 14. What is a stanza? 15. What uniformity have stanzas? 16. What variety have they?

## LESSON XIX.—OF VERSIFICATION.

17. Of what does a verse consist? 18. Of what does a poetic foot consist? 19. How many feet do prosodists recognize? 20. What are the principal feet in English? 21. What is an Iambus? 22. What is a Trochee? 23. What is an Anapest? 24. What is a Dactyl? 25. Why are these feet principal? 26. What orders of verse arise from these? 27. Are these kinds to be kept separate? 28. What is said of the secondary feet? 29. How many and what secondary feet are explained in this code? 30. What is a Spondee? 31. What is a Pyrrhic? 32. What is a Moloss? 33. What is a Tribrach? 34. What is an Amphibrach? 35. What is an Amphimac? 36. What is a Bacchy? 37. What is an Antibachy? 38. What is a Cæsure?

## LESSON XX.—OF VERSIFICATION.

39. What are the principal kinds, or orders, of verse? 40. What other orders are there? 41. Does the composite order demand any uniformity? 42. Do the simple orders admit any diversity? 43. What is meant by *scanning* or *scansion*? 44. What mean the technical

words, *catalectic*, *acatalectic*, and *hypermeter*? 45. In scansion, why are the principal feet to be preferred to the secondary? 46. Can a single foot be a line? 47. What are the several combinations that form dimeter, trimeter, tetrameter, pentameter, hexameter, heptameter, and octometer? 48. What syllables have stress in a pure iambic line? 49. What are the several measures of iambic verse? 50. What syllables have stress in a pure trochaic line? 51. Can it be right, to regard as hypermeter the long rhyming syllables of a line? 52. Is the number of feet in a line to be generally counted by that of the long syllables? 53. What are the several measures of trochaic verse?

#### LESSON XXI.—OF VERSIFICATION.

54. What syllables have stress in a pure anapestic line? 55. What variation may occur in the first foot? 56. Is this frequent? 57. Is it ever uniform? 58. What is the result of a uniform mixture? 59. Is the anapest adapted to single rhyme? 60. May a surplus ever make up for a deficiency? 61. Why are the anapestic measures few? 62. How many syllables are found in the longest? 63. What are the several measures of anapestic verse? 64. What syllables have stress in a pure dactylic line? 65. With what does single-rhymed dactylic end? 66. Is dactylic verse very common? 67. What are the several measures of dactylic verse? 68. What is composite verse? 69. Must composites have rhythm? 70. Are the kinds of composite verse numerous? 71. Why have we no exact enumeration of the measures of this order? 72. Does this work contain specimens of different kinds of composite verse?

[It may now be required of the pupil to determine, by reading and scansion, the metrical elements of any good English poetry which may be selected for the purpose—the feet being marked by pauses, and the long syllables by stress of voice. He may also correct orally the few *Errors of Metre* which are given in the Fifth Section of Chapter IV.]

### CHAPTER VI.—FOR WRITING.

#### EXERCISES IN PROSODY.

☞ [When the pupil can readily answer all the questions on Prosody, and apply the rules of punctuation to any composition in which the points are rightly inserted, he should *write out* the following exercises, supplying what is required, and correcting what is amiss. Or, if any teacher choose to exercise his classes *orally*, by means of these examples, he can very well do it; because, to read words, is always easier than to write them, and even points or poetic feet may be quite as readily named as written.]

#### EXERCISE I.—PUNCTUATION.

*Copy the following sentences, and insert the COMMA where it is requisite.*

#### EXAMPLES UNDER RULE I.—OF SIMPLE SENTENCES.

“The dogmatist’s assurance is paramount to argument.” “The whole course of his argumentation comes to nothing.” “The fieldmouse builds her garner under ground.”

Exc.—“The first principles of almost all sciences are few.” “What he gave me to publish was but a small part.” “To remain insensible to such provocation is apathy.” “Minds ashamed of poverty would be proud of affluence.” “To be totally indifferent to praise or censure is a real defect in character.”—*Wilson’s Punctuation*, p. 38.

## UNDER RULE II.—OF SIMPLE MEMBERS.

“I was eyes to the blind and feet was I to the lame.” “They are gone but the remembrance of them is sweet.” “He has passed it is likely through varieties of fortune.” “The mind though free has a governor within itself.” “They I doubt not oppose the bill on public principles.” “Be silent be grateful and adore.” “He is an adept in language who always speaks the truth.” “The race is not to the swift nor the battle to the strong.”

Exc. I.—“He that has far to go should not hurry.” “Hobbes believed the eternal truths which he opposed.” “Feeble are all pleasures in which the heart has no share.” “The love which survives the tomb is one of the noblest attributes of the soul.”—*Wilson's Punctuation*, p. 38.

Exc. II.—“A good name is better than precious ointment.” “Thinkst thou that duty shall have dread to speak?” “The spleen is seldom felt where Flora reigns.”

## UNDER RULE III.—OF MORE THAN TWO WORDS.

“The city army court espouse my cause.” “Wars pestilences and diseases are terrible instructors.” “Walk daily in a pleasant airy and umbrageous garden.” “Wit spirits faculties but make it worse.” “Men wives and children stare cry out and run.” “Industry, honesty, and temperance are essential to happiness.”—*Wilson's Punctuation*, p. 29. “Honor, affluence, and pleasure seduce the heart.”—*Ib.*, p. 31.

## UNDER RULE IV.—OF TWO TERMS CONNECTED.

“Hope and fear are essentials in religion.” “Praise and adoration are perfective of our souls.” “We know bodies and their properties most perfectly.” “Satisfy yourselves with what is rational and attainable.” “Slowly and sadly we laid him down.”

Exc. I.—“God will rather look to the inward motions of the mind than to the outward form of the body.” “Gentleness is unassuming in opinion and temperate in zeal.”

Exc. II.—“He has experienced prosperity and adversity.” “All sin essentially is and must be mortal.” “Reprove vice but pity the offender.”

Exc. III.—“One person is chosen chairman or moderator.” “Duration or time is measured by motion.” “The governor or viceroy is chosen annually.”

Exc. IV.—“Reflection reason still the ties improve.” “His neat plain parlour wants our modern style.” “We are fearfully wonderfully made.”

## UNDER RULE V.—OF WORDS IN PAIRS.

“I inquired and rejected consulted and deliberated.” “Seed-time and harvest cold and heat summer and winter day and night shall not cease.”

## EXERCISE II.—PUNCTUATION.

*Copy the following sentences, and insert the COMMA where it is requisite.*

## EXAMPLES UNDER RULE VI.—OF WORDS PUT ABSOLUTE.

To virtue delicacy truth or sense  
Try the criterion tis a faithful guide  
Nor has nor can have Scripture on its side. *Cowper*

#### EXERCISE VIII.—SCANNING.

*Divide the following VERSES into the feet which compose them, and distinguish by marks the long and the short syllables.*

##### *EXAMPLE I.—“OUR DAILY PATHS”—BY F. HEMANS.*

“There’s Beauty all around our paths, if but our watchful eyes  
Can trace it ‘midst familiar things, and through their lowly guise;  
We may find it where a hedgerow showers its blossoms o’er our way,  
Or a cottage-window sparkles forth in the last red light of day.”

##### *EXAMPLE II.—“FETCHING WATER”—ANONYMOUS.*

“Early on a sunny morning, while the lark was singing sweet,  
Came, beyond the ancient farmhouse, sounds of lightly-tripping feet.  
‘Twas a lowly cottage maiden, going,—why, let young hearts tell,—  
With her homely pitcher laden, fetching water from the well.”

*EXAMPLE III.—DEITY.*

Alone thou sitst above the everlasting hills  
And all immensity of space thy presence fills:  
For thou alone art God;—as God thy saints adore thee;  
Jehovah is thy name;—they have no gods before thee.—*G. Brown.*

*EXAMPLE IV.—IMPENITENCE.*

The impenitent sinner whom mercy empowers,  
Dishonours that goodness which seeks to restore;  
As the sands of the desert are water'd by showers.  
Yet barren and fruitless remain as before.—*G. Brown.*

*EXAMPLE V.—PIETY.*

Holy and pure are the pleasures of piety,  
Drawn from the fountain of mercy and love;  
Endless, exhaustless, exempt from satiety,  
Rising unearthly, and soaring above.—*G. Brown.*

*EXAMPLE VI.—A SIMILE.*

The bolt that strikes the tow'ring cedar dead,  
Oft passes harmless o'er the hazel's head.—*G. Brown.*

*EXAMPLE VII.—A SIMILE.*

“Yet to their general's voice they soon obey'd  
Innumerable. As when the potent rod  
Of Amram's son, in Egypt's evil day,  
Wav'd round the coast, up call'd a pitchy cloud  
Of locusts, warping on the eastern wind,  
That o'er the realm of impious Pharaoh hung  
Like night, and darken'd all the land of Nile.”—*Milton.*

*EXAMPLE VIII.—ELEGIAC STANZA.*

Thy name is dear—'tis virtue balm'd in love;  
Yet e'en thy name a pensive sadness brings.  
Ah! wo the day, our hearts were doom'd to prove,  
That fondest love but points affliction's stings!—*G. Brown.*

*EXAMPLE IX.—CUPID.*

Zephyrs, moving bland, and breathing fragrant  
With the sweetest odours of the spring,  
O'er the winged boy, a thoughtless vagrant,  
Slumb'ring in the grove, their perfumes fling.—*G. Brown.*

*EXAMPLE X.—DIVINE POWER.*

When the winds o'er Gennesaret roar'd,  
 And the billows tremendously rose,  
 The Saviour but utter'd the word,  
 They were hush'd to the calmest repose.—*G. Brown.*

*EXAMPLE XI.—INVITATION.*

Come from the mount of the leopard, spouse,  
 Come from the den of the lion;  
 Come to the tent of thy shepherd, spouse,  
 Come to the mountain of Zion.—*G. Brown.*

*EXAMPLE XII.—ADMONTION.*

In the days of thy youth,  
 Remember thy God:  
 O! forsake not his truth,  
 Incur not his rod.—*G. Brown.*

*EXAMPLE XIII.—COMMENDATION.*

Constant and duteous,  
 Meek as the dove,  
 How art thou beauteous,  
 Daughter of love!—*G. Brown.*

## EXERCISE IX.—SCANNING.

*Mark the feet and syllables which compose the following lines—or mark a sample of each metre.*

## EDWIN, AN ODE.

## I. STROPHE.

Led by the pow'r of song, and nature's love,  
 Which raise the soul all vulgar themes above,  
     The mountain grove  
     Would Edwin rove,  
 In pensive mood, alone;  
 And seek the woody dell,  
 Where noontide shadows fell,  
     Cheering,  
     Veering,  
     Mov'd by the zephyr's swell.  
 Here nurs'd he thoughts to genius only known,  
     When nought was heard around  
     But sooth'd the rest profound  
 Of rural beauty on her mountain throne.  
     Nor less he lov'd (rude nature's child)  
     The elemental conflict wild;

When, fold on fold, above was pil'd  
The watery swathe, careering on the wind.  
Such scenes he saw  
With solemn awe,  
As in the presence of the Eternal Mind.  
Fix'd he gaz'd,  
Tranc'd and rais'd,  
Sublimely rapt in awful pleasure undefin'd.

## II. ANTISTROPHE

Reckless of dainty joys, he finds delight  
Where feebler souls but tremble with affright.  
Lo! now, within the deep ravine,  
A black impending cloud  
Infolds him in its shroud,  
And dark and darker glooms the scene.  
Through the thicket streaming,  
Lightnings now are gleaming;  
Thunders rolling dread,  
Shake the mountain's head;  
Nature's war  
Echoes far,  
O'er ether borne,  
That flash  
The ash  
Has scath'd and torn!  
Now it rages;  
Oaks of ages,  
Writhing in the furious blast,  
Wide their leafy honours cast;  
Their gnarled arms do force to force oppose  
Deep rooted in the crevic'd rock,  
The sturdy trunk sustains the shock,  
Like dauntless hero firm against assailing foes.

## III. EPODE.

'O Thou who sitst above these vapours dense,  
And rul'st the storm by thine omnipotence!  
Making the collied cloud thy ear,  
Coursing the winds, thou rid'st afar,  
Thy blessings to dispense.  
The early and the latter rain,  
Which fertilize the dusty plain,  
Thy bounteous goodness pours.  
Dumb be the atheist tongue abhorr'd!  
All nature owns thee, sovereign Lord!  
And works thy gracious will;  
At thy command the tempest roars,  
At thy command is still.

Thy mercy o'er this scene sublime presides;  
    'Tis mercy forms the veil that hides  
The ardent solar beam;  
While, from the volley'd breast of heaven,  
    Transient gleams of dazzling light,  
    Flashing on the balls of sight,  
        Make darkness darker seem.  
Thou mov'st the quick and sulphurous leven—  
    The tempest-driven  
        Cloud is riven;  
And the thirsty mountain-side  
    Drinks gladly of the gushing tide.'  
So breath'd young Edwin, when the summer shower,  
    From out that dark o'erchamb'ring cloud,  
    With lightning flash and thunder loud,  
Burst in wild grandeur o'er his solitary bower.—*G. Brown.*

TO THE  
IMPROPRIETIES FOR CORRECTION,  
CONTAINED IN  
THE GRAMMAR OF ENGLISH GRAMMARS,  
AND  
DESIGNED FOR ORAL EXERCISES  
UNDER  
ALL THE RULES AND NOTES OF THE WORK.

☞ [The various examples of error which are exhibited for oral correction, in the Grammar of English Grammars, are all here explained, in their order, by full amended readings, sometimes with authorities specified, and generally with references of some sort. They are intended to be corrected orally by the pupil, according to the formulæ given under corresponding heads in the Grammar. Some portion, at least, under each rule or note, should be used in this way; and the rest, perhaps, may be read and compared more simply.]

Brown.* “And *God* spake unto Moses, and said unto him, I am the LORD: and I appeared unto Abraham, unto Isaac, and unto Jacob, by the name of *God Almighty*; but by my name JEHOVAH was I not known to them.”—SCOTT, ALGER, FRIENDS: *Exod.*, vi, 2. “Thus saith the LORD\* the *King* of Israel,

\* OBSERVATION.—In the Bible, the word LORD, whenever it stands for the Hebrew name JEHOVAH, not only commences with a full capital, but has small or half capitals for the other letters; and I have thought proper to print both words in that manner here. In correcting the last example, I follow Dr. *Scott’s Bible*, except in the word “*God*,” which he writes with a small *g*. Several other copies have “*first*” and “*last*” with small initials, which I think not so correct; and some distinguish the word “*hosts*” with a capital, which

and his *Redeemer* the LORD of hosts; I am the *First*, and I am the *Last*; and besides me there is no *God*.”—See *Isa.*, xliv, 6.

#### UNDER RULE IV.—OF PROPER NAMES.

“Islamism prescribes fasting during the month *Ramadan*.”—*Balbi cor.* “Near *Mecca*, in *Arabia*, is *Jebel Nor*, or the *Mountain of Light*, on the top of which the *Mussulmans* erected a mosque, that they might perform their devotions where, according to their belief, *Mohammed* received from the angel *Gabriel* the first chapter of the Koran.”—*G. Brown*. “In the *Kaaba* at *Mecca* there is a celebrated block of volcanic basalt, which the *Mohammedans* venerate as the gift of *Gabriel* to *Abraham*, but their ancestors once held it to be an image of *Remphan*, or *Saturn*; so ‘the image which fell down from *Jupiter*,’ to share with *Diana* the homage of the *Ephesians*, was probably nothing more than a meteoric stone.”—*Id.* “When the *Lycaonians* at *Lystra* took *Paul* and *Barnabas* to be gods, they called the former *Mercury*, on account of his eloquence, and the latter *Jupiter*, for the greater dignity of his appearance.”—*Id.* “Of the writings of the apostolic fathers of the first century, but few have come down to us; yet we have in those of *Barnabas*, *Clement* of *Rome*, *Hermas*, *Ignatius*, and *Polycarp*, very certain evidence of the authenticity of the New Testament, and the New Testament is a voucher for the Old.”—*Id.* “It is said by *Tatian*, that *Theagenes* of *Rhegium*, in the time of *Cambyzes*, *Stesimbrotus* the *Thracian*, *Antimachus* the *Colophonian*, *Herodotus* of *Halicarnassus*, *Dionysius* the *Olynthian*, *Ephorus* of *Cumæ*, *Philochorus* the *Athenian*, *Metaclides* and *Chamæleon* the *Peripatetics*, and *Zenodotus*, *Aristophanes*, *Callimachus*, *Crates*, *Eratosthenes*, *Aristarchus*, and *Apollodorus*, the grammarians, all wrote concerning the poetry, the birth, and the age of *Homer*.”—See *Coleridge’s Introd.*, p. 57. “Yet, for aught that now appears, the life of *Homer* is as fabulous as that of *Hercules*; and some have even suspected, that, as the son of *Jupiter* and *Alcmena* has fathered the deeds of forty other *Herculeses*, so this unfathered son of *Critheis*, *Themisto*, or whatever dame—this *Melesigenes*, *Mæonides*, *Homer*—the blind schoolmaster, and poet, of *Smyrna*, *Chios*, *Colophon*, *Salamis*, *Rhodes*, *Argos*, *Athens*, or whatever place—has, by the help of *Lycurgus*, *Solon*, *Pisistratus*, and other learned ancients, been made up of many poets or *Homers*, and set so far aloft and aloof on old *Parnassus*, as to become a god in the eyes of all *Greece*, a wonder in those of all *Christendom*.”—*G. \* OBS.—The following words, *as names of towns*, come under Rule 6th, and are commonly found correctly compounded in the books of Scotch geography and statistics; “Strathaven, Stonehaven, Strathdon, Glenluce, Greenlaw, Coldstream, Lochwinnoch, Lochcarron, Loehmaber, Prestonpans, Prestonkirk, Peterhead, Queensferry, Newmills,” and many more like them.

† Section OBS.—This name, in both the Vulgate and the Septuagint, is *Pharao Nechao*, with two capitals and no hyphen. Walker gives the two words separately in his Key, and spells the latter *Necho*, and not *Nechoh*. See the same orthography in *Jer.*, xlvi, 2. In our common Bibles, many such names are needlessly, if not improperly, compounded; sometimes with one capital, and sometimes with two. The proper manner of writing Scripture names, is too little regarded even by good men and biblical critics.

“Fall back, fall back; *I* have not room:—*O!* methinks *I* see a couple whom *I* should know.”—*Lucian*. “Nay, *I* live as *I* did, *I* think as *I* did, *I* love you as *I* did; but all these are to no purpose; the world will not live, think, or love, as *I* do.”—*Swift to Pope*. “Whither, *O!* whither shall *I* fly? *O* wretched prince! *O* cruel reverse of fortune! *O* father Micipsa! is this the consequence of thy generosity?”—*Tr. of Sallust*. “When *I* was a child, *I* spake as a child, *I* understood as a child, *I* thought as a child; but when *I* became a man, *I* put away childish things.”—1 *Cor.*, xiii, 11. “And *I* heard, but *I* understood not; then said *I*, *O* my Lord, what shall be the end of these things?”—*Dan.*, xii, 8. “Here am *I*; *I* think *I* am very good, and *I* am quite sure *I* am very happy, yet *I* never wrote a treatise in my life.”—*Few Days in Athens*, p. 127. “Singular, Vocative, *O master!* Plural, Vocative, *O masters!*”—*Bicknell cor.*

“I, *I* am he; *O* father! rise, behold  
Thy son, with twenty winters now grown old!”—*Pope’s Odyssey*, B. 24, l. 375.

#### UNDER RULE XIII.—OF POETRY.

“Reason’s whole pleasure, all the joys of sense,  
*Lie* in three words—health, peace, and competence;  
*But* health consists with temperance alone,  
*And* peace, O Virtue! peace is all thy own.”—*Pope*.

“Observe the language well in all you write,  
*And* swerve not from it in your loftiest flight.  
The smoothest verse and the exactest sense

**THE KEY.—PART II.—ETYMOLOGY.****CHAPTER I.—PARTS OF SPEECH.**

The first chapter of Etymology, as it exhibits only the distribution of words into the ten Parts of Speech, contains no false grammar for correction. And it may be here observed, that as mistakes concerning the forms, classes, or modifications of words, are chiefly to be found in *sentences*, rather than in any separate exhibition of the terms; the quotations of this kind, with which I have illustrated the principles of etymology, are many of them such as might perhaps with more propriety be denominated *false syntax*. But, having examples enough at hand to show the ignorance and carelessness of authors in every part of grammar, I have thought it most advisable, so to distribute them as to leave no part destitute of this most impressive kind of illustration. The examples exhibited as *false etymology*, are as distinct from those which are called *false syntax*, as the nature of the case will admit.

\* From the force of habit, or to prevent the possibility of a false pronunciation, these ocular contractions are still sometimes carefully made in printing poetry; but they are not very important, and some modern authors, or their printers, disregard them altogether. In correcting short poetical examples, I shall in general take no particular pains to distinguish them from prose. All needful contractions however will be preserved, and sometimes also a capital letter, to show where the author commenced a line.

“New York, Fifthmonth 3d, 1823.

Dear friend,

*I* am sorry to hear of thy loss; but *I* hope it may be retrieved. I should be happy to render thee any assistance in my power. *I* shall call to see thee to-morrow morning. Accept assurances of my regard.  
A. B.”

“New York, May 3d, P. M., 1823.

Dear sir,

*I* have just received the kind note *you* favoured me with this morning; and *I* cannot forbear to express my gratitude to you. On further information, *I* find *I* have not lost so much as *I* at first supposed; and *I* believe *I* shall still be able to meet all my engagements. *I* should, however, be happy to see you. Accept, dear sir, my most cordial thanks. C. D.”

#### UNDER NOTE IX.—APPLICATION OF MOODS.

##### FIRST CLAUSE OF THE NOTE.—THE SUBJUNCTIVE PRESENT.

“He will not be pardoned unless he *repent.*”—*Inst.*, p. 191. “If thou *find* any kernelwort in this marshy meadow, bring it to me.”—*Neef cor.* “If thou *leave* the room, do not forget to shut that drawer.”—*Id.* “If thou *grasp* it stoutly, thou wilt not be hurt:” or, (familiarily,)—“thou *will* not be hurt.”—*Id.* “On condition that he *come*, I will consent to stay.”—*Murray’s Key*, p. 208. “If he *be* but discreet, he will succeed.”—*Inst.*, p. 280. “Take heed that thou *speak* not to Jacob.”—*Gen.*, xxxi, 24. “If thou *cast* me off, I shall be miserable.”—*Inst.*, p. 280. “Send them to me, if thou *please.*”—*Ib.* “Watch the door of thy lips, lest thou *utter* folly.”—*Ib.* “Though a liar *speak* the truth, he will hardly be believed.”—*Bartlett cor.* “I will go, unless I *be* ill.”—*L. Murray cor.* “If the word or words understood *be* supplied, the true construction will be apparent.”—*Id.* “Unless thou *see* the propriety of the measure, we shall not desire thy support.”—*Id.* “Unless thou *make* a timely retreat, the danger will be unavoidable.”—*Id.* “We may live happily, though our possessions *be* small.”—*Id.* “If they *be* carefully studied, they will enable the student to parse all the exercises.”—*Id.* “If the accent *be* fairly preserved on the proper syllable, this drawling sound will never be heard.”—*Id.* “One phrase may, in point of sense, be equivalent to an other, though its grammatical nature *be* essentially different.”—*Id.* “If any man *obey* not our word by this epistle, note that man.”—2 *Thess.*, iii, 14. “Thy skill will be the greater, if thou *hit* it.”—*Putnam, Cobb, or Knowles, cor.* “We shall overtake him, though he *run.*”—*Priestley et al. cor.* “We shall be disgusted, if he *give* us too much.”—*Blair cor.*

“What is’t to thee, if he *neglect* thy urn,  
Or without spices *let* thy body burn?”—*Dryden cor.*

## SECOND CLAUSE OF NOTE IX.—THE SUBJUNCTIVE IMPERFECT.\*

“And so would I, if I *were* he.”—*Inst.*, p. 191. “If I *were* a Greek, I should resist Turkish despotism.”—*Cardell cor.* “If he *were* to go, he would attend to your business.”—*Id.* “If thou *felt* as I do, we should soon decide.”—*Inst.*, p. 280. “Though thou *shed* thy blood in the cause, it would but prove thee sincerely a fool.”—*Ib.* “If thou *loved* him, there would be more evidence of it.”—*Ib.* “If thou *convinced* him, he would not act accordingly.”—*Murray cor.* “If there *were* no liberty, there would be no real crime.”—*Formey cor.* “If the house *were* burnt down, the case would be the same.”—*Foster cor.* “As if the mind *were* not always in action, when it prefers any thing.”—*West cor.* “Suppose I *were* to say, ‘Light is a body.’”—*Harris cor.* “If either oxygen or azote *were* omitted, life would be destroyed.”—*Gurney cor.* “The verb *dare is* sometimes used as if it *were* an auxiliary.”—*Priestley cor.* “A certain lady, whom I could name, if it *were* necessary.”—*Spect. cor.* “If the *e were* dropped, *c* and *g* would assume their hard sounds.”—*Buchanan cor.* “He would no more comprehend it, than if it *were* the speech of a Hottentot.”—*Neef cor.* “If thou *knew* the gift of God,” &c.—*Bible cor.* “I wish I *were* at home.”—*O. B. Peirce cor.* “Fact alone does not constitute right: if it *did*, general warrants were lawful.”—*Junius cor.* “Thou *lookst* upon thy boy, as though thou *guessed* it.”—*Putnam, Cobb, or Knowles, cor.* “He fought as if he *contended* for life.”—*Hiley cor.* “He fought as if he *were contending* for his life.”—*Id.*

“The dewdrop glistens on thy leaf,  
As if thou *shed for me* a tear;  
As if thou *knew* my tale of grief,  
*Felt* all my sufferings severe.”—*Letham cor.*

## LAST CLAUSE OF NOTE IX.—THE INDICATIVE MOOD.

“If he *knows* the way, he does not need a guide.”—*Inst.*, p. 191. “And if there *is* no difference, one of them must be superfluous, and ought to be rejected.”—*Murray cor.* “I cannot say that I admire this construction though it *is* much used.”—*Priestley cor.* “We are disappointed, if the verb *does* not immediately follow it.”—*Id.* “If it *was* they, *that* acted so ungratefully, they are doubly in fault.”—*Murray cor.* “If art *becomes* apparent, it disgusts the reader.”—*Jamieson cor.* “Though perspicuity *is* more properly a rhetorical than a grammatical quality, I thought it better to include it in this book.”—*Campbell cor.* “Although the efficient cause *is* obscure, the final cause of those sensations lies open.”—*Blair cor.* “Although the barrenness of language, or the want of words, *is* doubtless one cause of the invention of tropes.”—*Id.* “Though it *enforces* not its instructions, yet it furnishes a greater variety.”—*Id.* “In other cases, though the idea *is* one, the words remain quite separate.”—*Priestley cor.* “Though the form of our language *is* more simple, and has that peculiar beauty.”—*Buchanan cor.* “Human works are of no significancy till they *are* completed.”—*Kames cor.* “Our disgust lessens gradually till it *vanishes* altogether.”—*Id.* “And our relish improves by use, till it *arrives* at perfection.”—*Id.* “So long as he *keeps* himself in his own proper element.”—*Coke cor.* “Whether this translation *was* ever published or not, I am wholly ignorant.”—*Sale cor.* “It is false to affirm, ‘As it is day, it is light,’ unless it actually *is* day.”—*Harris cor.* “But we may at midnight affirm, ‘If it *is* day, it is light.’”—*Id.* “If the Bible *is* true, it is a volume of unspeakable interest.”—*Dickinson cor.*

\* All the corrections under this head are directly contrary to the teaching of William S. Cardell. Oliver B. Peirce, and perhaps some other such writers on grammar; and some of them are contrary also to Murray's late editions. But I am confident that these authors teach erroneously; that their use of indicative forms for mere suppositions that are contrary to the facts, is positively ungrammatical; and that the potential imperfect is less elegant, in such instances, than the simple subjunctive, which they reject or distort.

“Though he *was* a son, yet learned he obedience by the things which he suffered.”—*Bible cor.* “If David then *calleth* (or *calls*) him Lord, how is he his son?”—*Id.*

“’Tis hard to say, if greater want of skill  
*Appears* in writing, or in judging, ill.”—*Pope cor.*

#### UNDER NOTE X.—FALSE SUBJUNCTIVES.

“If a man *has built* a house, the house is his.”—*Wayland cor.* “If God *has required* them of him, as is the fact, he has time.”—*Id.* “Unless a previous understanding to the contrary *has been had* with the principal.”—*Berrian cor.* “O! if thou *hast hid* them in some flowery cave.”—*Milton cor.* “O! if Jove’s will *has linked* that amorous power to thy soft lay.”—*Id.* “SUBJUNCTIVE MOOD: If thou love, If thou loved.”—Dr. Priestley, Dr. Murray, John Burn, David Blair, Harrison, and others. “Till Religion, the pilot of the soul, *hath* lent thee her unfathomable coil.”—*Tupper cor.* “Whether nature or art *contributes* most to form an orator, is a trifling inquiry.”—*Blair cor.* “Year after year steals something from us, till the decaying fabric *totters* of itself, and *at length crumbles* into dust.”—*Murray cor.* “If spiritual pride *has* not entirely vanquished humility.”—*West cor.* “Whether he *has* gored a son, or *has* gored a daughter.”—*Bible cor.* “It is doubtful whether the object introduced by way of simile, *relates* to what goes before or to what follows.”—*Kames cor.*

“And bridle in thy headlong wave,  
Till thou our summons answer’d *hast.*”

Or:—“And bridle in thy headlong wave,

Murray corrected.* “Not everything favoured by good use, is on that account worthy to be retained.”—*Campbell cor.* “Most men dream, but *not* all.”—*Beattie cor.* “By hasty composition, we shall *certainly* acquire a very bad style.”—*Dr. Blair cor.* “The comparisons are short, touching on *only* one point of resemblance.”—*Id.* “Having *once* had some considerable object set before us.”—*Id.* “The positive seems to be *improperly* called a degree.” \*—*Adam and Gould cor.* “In some phrases, the genitive *only* is used.”—*Id.* “This blunder is said to have *actually* occurred.”—*Smith cor.* “But *not* every man is called James, nor every woman, Mary.”—*Buchanan cor.* “Crotchets are employed for *nearly* the same purpose as the parenthesis.”—*Churchill cor.* “There is a *still* greater impropriety in a double comparative.”—*Priestley cor.* “We often have occasion to speak of time.”—*Lowth cor.* “The following sentence cannot *possibly* be understood.”—*Id.* “The words must *generally* be separated from the context.”—*Comly cor.* “Words ending in *ator*, *generally* have the accent on the penultimate.”—*L. Mur. cor.* “The learned languages, with respect to voices, moods, and tenses, are, in general, constructed *differently* from the English tongue.”—*Id.* “Adverbs seem to have been *originally* contrived to express compendiously, in one word, what must otherwise have required two or more.”—*Id.* “But it is so, *only* when the expression can be converted into the regular form of the possessive case.”—*Id.* “‘Enter *boldly*,’ says he, ‘for here too there are gods.’”—*Harris cor.* “For none *ever* work for so little a pittance that some cannot be found to work for less.”—*Sedgwick cor.* “For sinners also lend to sinners, to receive *again* as much.”—*Bible cor.* Or, as Campbell has it in his version:—“*that they may* receive as much *in return*.”—*Luke*, vi, 34. “They must be viewed in *exactly* the same light.”—*L. Murray cor.* “If he *speaks but* to display his abilities, he is unworthy of attention.”—*Id.*

#### UNDER NOTE II.—ADVERBS FOR ADJECTIVES.

“*Upward* motion is commonly more agreeable than motion *downward*.”—*Dr. Blair cor.* “There are but two *possible* ways of justification before God.”—*Cox cor.* “This construction sounds rather *harsh*.”—*Mur. and Ing. cor.* “A clear conception, in the mind of the learner, of *regular* and well-formed letters.”—*C. S. Jour. cor.* “He was a great hearer of \* \* \* Attalus, Sotion, Papirius, Fabianus, of whom he makes *frequent* mention.”—*L’Estrange cor.* “It is only the *frequent* doing of a thing, that makes it a custom.”—*Leslie cor.* “Because W. R. takes *frequent* occasion to insinuate his jealousies of persons and things.”—*Barclay cor.* “Yet *frequent* touching will wear gold.”—*Shak. cor.* “Uneducated persons frequently use an *adverb* when they ought to use an *adjective*: as, ‘The country looks *beautifully*,’ in stead of *beautiful*.” †—*Bucke cor.* “The adjective is put *absolute*, or without its substantive.”—*Ash cor.* “A noun or *a* pronoun in the second person, may be put *absolute* in the nominative

\* From this opinion, I dissent. See Obs. 1st on the Degrees of Comparison, and Obs. 4th on Regular Comparison, in the Etymology of this work, at pp. 279 and 285.—G. BROWN.

† “The country *looks beautiful*,” that is, *appears* beautiful—*is* beautiful. This is right, and therefore the use which Bucke makes of it, may be fairly reversed. But the example was ill chosen; and I incline to think, it may also be right to say, “The country *looks beautifully*,” for the *quality* expressed by *beautiful*, is nothing else than the *manner* in which the thing *shows* to the eye. See Obs. 11th on Rule 9th.—G. BROWN.

case.”—*Harrison cor.* “A noun or *a* pronoun, when put *absolute* with a participle,” &c.—*Id. and Jaudon cor.* “A verb in the infinitive mood absolute, stands *independent* of the remaining part of the sentence.”—*Wilbur and Liv. cor.* “At my *late* return into England, I met a book *entitled*, ‘The Iron Age.’”—*Cowley cor.* “But he can discover no better foundation for any of them, than the *mere* practice of Homer and Virgil.”—*Kames cor.*

C. Smith cor.* “They are used to mark a distinction *among* several objects.”—*Lévizac cor.*

#### UNDER NOTE III.—OMISSION OF PREPOSITIONS.

“This would have been less worthy *of* notice.”—*Churchill cor.* “But I passed it, as a thing unworthy *of* my notice.”—*Werter cor.* “Which, in compliment to me, perhaps you may one day think worthy *of* your attention.”—*Bucke cor.* “To think this small present worthy *of* an introduction to the young ladies of your very elegant establishment.”—*Id.* “There are but a few miles *of* portage.”—*Jefferson cor.* “It is worthy *of* notice, that our mountains are not solitary.”—*Id.* “It is *about* one hundred feet *in* diameter.” \*—*Id.* “Entering a hill a quarter or half *of* a mile.”—*Id.* “And herself seems passing to *an* awful dissolution, whose issue *it* is not given *to* human foresight to scan.”—*Id.* “It was of a spheroidical form, *about* forty feet *in* diameter at the base, and had been *about* twelve feet *in* altitude.”—*Id.* “Before this, it was covered with trees of twelve inches *in* diameter; and, round the base, *there* was an excavation of five feet *in* depth and *five in* width.”—*Id.* “Then thou *mayst* eat grapes *to* thy fill, at thine own pleasure.”—*Bible cor.* “Then he brought me back *by* the way of the gate of the outward sanctuary.”—*Id.* “They will bless God, that he has peopled one half *of* the world with a race of freemen.”—*Webster cor.* “Of what use can these words be, till their meaning is known?”—*Town cor.* “The tents of the Arabs now are black, or *of* a very dark colour.”—*The Friend cor.* “They may not be unworthy *of* the attention of young men.”—*Kirkham cor.* “The pronoun *THAT* is frequently applied to persons as well as *to* things.”—*Merchant cor.* “And ‘who’ is in the same case that ‘man’ is *in*.”—*Sanborn cor.* “He saw a flaming stone, apparently about four feet *in* diameter.”—*The Friend cor.* “Pliny informs us, that this stone was *of* the size of a cart.”—*Id.* “Seneca was about twenty years of age in the fifth year of Tiberius, when the Jews were expelled *from* Rome.”—*L'Estrange cor.* “I was prevented *from* reading a letter which would have undeceived me.”—*Hawkesworth cor.* “If the problem can be solved, we may be pardoned *for* the inaccuracy of its demonstration.”—*Booth cor.* “The army must of necessity be the school, not of honour, but *of* effeminacy.”—*Dr. Brown cor.* “Afraid of the virtue of a nation in its opposing *of* bad measures:” or,—“in its *opposition to* bad measures.”—*Id.* “The uniting *of* them in various ways, so as to form words, would be easy.”—*Gardiner cor.* “I might be excused *from* taking any more notice of it.”—*Watson cor.* “Watch therefore; for ye know not *at* what hour your Lord *will* come.”—*Bible cor.* “Here, not even infants were spared *from* the sword.”—*M'Ilvaine cor.* “To prevent men *from* turning aside to *false* modes of worship.”—*John Allen cor.* “God expelled them *from* the garden of Eden.”—*Burder cor.* “Nor could he refrain *from* expressing to the senate the agonies of his mind.”—*Hume cor.* “Who now so strenuously opposes the granting *to* him *of* any new powers.”—*Duncan cor.* “That the laws of the censors have banished him *from* the forum.”—*Id.* “We read not that he was degraded *from* his office *in* any other way.”—*Barclay cor.* “To all *to* whom these presents shall come, greeting.”—*Hutchinson cor.* “On the 1st *of* August, 1834.”—*Brit. Parl. cor.*

\* The preposition *of* which Jefferson uses before *about*, appears to me to be useless. It does not govern the noun *diameter*, and is therefore no substitute for the *in* which I suppose to be wanting; and, as the preposition *about* seems to be sufficient between *is* and *feet*, I omit the *of*. So in other instances below.—G. BROWN.

Murray cor.* “I single him out *from* among

\* This sentence may be written correctly in a dozen different ways, with precisely the same meaning, and very nearly the same words. I have here made the noun *gold* the object of the verb *took*, which in the original appears to govern the noun *treasure*, or *money*, understood. The noun *amount* might as well be made its object, by a suppression of the preposition *to*. And again, for “*pounds’ weight*,” we may say, “*pounds in weight*.” The words will also admit of many other positions.—G. BROWN.

† See a different reading of this example, cited as the first item of false syntax under Rule 16th above, and there corrected differently. The words “*both of*,” which make the difference, were probably added by L. Murray in some of his *revisals*; and yet it does not appear that this popular critic ever got the sentence *right*.—G. BROWN.

Walker cor.* “The chin has an important office to perform; for, *by the degree of* its activity, we disclose *either* a polite or *a* vulgar pronunciation.”—*Gardiner cor.* “For no other reason, *than that he was* found in bad company.”—*Webster cor.* “It is usual to compare them *after* the manner *of polysyllables*.”—*Priestley cor.* “The infinitive mood is *recognized more easily* than any *other*, because the preposition TO precedes it.”—*Bucke cor.* “Prepositions, you recollect, connect words, *and so do* conjunctions: how, then, can you tell *a conjunction* from *a preposition*?” Or:—“how, then, can you *distinguish* the *former* from the *latter*?”—*R. C. Smith cor.*

“No kind of work requires *a nicer* touch,  
And, *this* well finish’d, *none else* shines so much.”—*Sheffield cor.*

#### LESSON XVI.—THREE ERRORS.

“*On* many occasions, it is the final pause alone, *that* marks the difference between prose and verse: *this* will be evident from the following arrangement of a few poetical lines.”—*L. Murray cor.* “I shall do all I can to persuade others to take *for their cure* the same measures *that* I have *taken for mine*.”—*Guardian cor.*; *also Murray.* “It is the nature of extreme self-lovers, *that* they will set *a* house on fire, *as* it were, but to roast their eggs.”—*Bacon cor.* “Did ever man struggle more earnestly in a cause *in which* both his honour and *his* life *were* concerned?”—*Duncan cor.* “So the rests, *or* pauses, *which* *separate* sentences *or* their parts, are marked by points.”—*Lowth cor.* “Yet the case and *mood are* not influenced by them, but *are* determined by the nature of the sentence.”—*Id.*

"*Through inattention* to this rule, many errors have been committed: *several* of which *are here* subjoined, as a further caution and direction to the learner."—*L. Murray cor.* "Though thou *clothe* thyself with crimson, though thou *deck* thee with ornaments of gold, though thou *polish* thy face with painting, in vain shalt thou make thyself fair." \*—*Bible cor.* "But that the doing *of* good to others, will make us happy, is not so evident; *the* feeding *of* the hungry, for example, or *the* clothing *of* the naked." Or: "But that, *to do* good to others, will make us happy, is not so evident; *to feed* the hungry, for example, or *to clothe* the naked."—*Kames cor.* "There is no other God *than he*, no other light *than* his." Or: "There is no God *but he*, no light *but* his."—*Penn cor.* "How little reason *is there* to wonder, that a *powerful* and accomplished orator should be one of the characters that *are* most rarely found."—*Dr. Blair cor.* "Because they express *neither the* doing nor *the* receiving *of* an action."—*Inf. S. Gram. cor.* "To find the answers, will require an effort of mind; and, when *right answers are* given, *they* will be the result of reflection, *and show* that the subject is understood."—*Id.* "The sun rises,' is *an expression* trite and common; but *the same idea* becomes a magnificent image, when expressed *in the language of* Mr. Thomson."—*Dr. Blair cor.* "The declining *of* a word is the giving *of its* different endings." Or: "*To decline* a word, is *to give* it different endings."—*Ware cor.* "And so much are they for *allowing* every *one to follow his* own mind."—*Barclay cor.* "More than one overture for peace *were* made, but Cleon prevented *them from* taking effect."—*Goldsmith cor.* "Neither in English, *nor* in any other language, is this word, *or* that which corresponds to it in *meaning*, any more an article, than TWO, THREE, *or* FOUR."—*Webster cor.* "But the most irksome conversation of all that I have met *with in* the neighbourhood, has been *with* two or three of your travellers."—*Spect. cor.* "Set down the *first two* terms of *the* supposition, *one under the other*, in the first place."—*Smiley cor.* "It is *a* useful *practice* too, to fix *one's* eye on some of the most distant persons in the assembly."—*Dr. Blair cor.* "He will generally please *his hearers* most, when *to please them* is not his sole *or his* chief aim."—*Id.* "At length, the consuls return to the camp, and inform *the soldiers*, *that* they could *obtain for them* no other terms *than those* of surrendering their arms and passing under the yoke."—*Id.* "Nor *are* mankind so much to blame, in *their* choice thus determining *them*."—*Swift cor.* "These forms are what *are* called *the Numbers*." Or: "These forms are called *Numbers*."—*Fosdick cor.* "In *those* languages which admit but two genders, all nouns are either masculine or feminine, even though they designate beings *that* are neither male *nor* female."—*Id.* "It is called *Verb* or *Word* by way of eminence, because it is the most essential word in a sentence, *and one* without which the other parts of speech *cannot* form *any* complete sense."—*Gould cor.* "The sentence will consist of two members, *and these will* commonly *be* separated from *each* other by a comma."—*Jamieson cor.* "Loud and soft in speaking *are* like the *forte* and *piano* in music; *they* only *refer* to the different degrees of force used in the same key: whereas high and low imply a change of key."—*Sheridan cor.* "They are chiefly three: the acquisition of knowledge; the assisting *of* the memory to treasure up this knowledge; *and* the communicating *of* it to others."—*Id.*

## LESSON XVII.—MANY ERRORS.

“A man will be forgiven, even *for* great errors, *committed* in a foreign language; but, in *the use he makes of* his own, even the least slips are justly *pointed out* and ridiculed.”—*Amer. Chesterfield cor.* “LET expresses *not only* permission, but *entreaty, exhortation, and command.*”—*Lowth cor.*; also *Murray, et al.* “That death which is our leaving *of* this world, is nothing else *than the putting-off of* these bodies.”—*Sherlock cor.* “They differ from the saints recorded *in either* the Old *or the* New *Testament.*”—*Newton cor.* “The nature of relation, *therefore*, consists in the referring or comparing *of* two things to *each* other; from which comparison, one or both *come* to be denominated.”—*Locke cor.* “It is not credible, that there *is* any one who will say, that *through* the whole course of *his life he* has kept *himself entirely* undefiled, *without* the least spot or stain of sin.”—*Witsius cor.* “If *to act* conformably to the will of our Creator,—if *to promote* the welfare of mankind around us,—if *to secure* our own happiness, *is an object* of the highest moment; then are we loudly called upon to cultivate and extend the great interests of religion and virtue.” Or: “If, to act conformably to the will of our Creator, to promote the welfare of mankind around us, *and* to secure our own happiness, *are objects* of the highest moment; then,” &c.—*Murray et al. cor.* “The verb being in the plural number, it is supposed, that *the officer and his guard are joint agents.* But *this* is not the case: the only nominative to the verb is ‘*officer.*’ In the expression, ‘*with his guard,*’ the *noun* ‘*guard*’ *is* in the objective case, *being* governed by the preposition *with*; and *consequently it* cannot form the nominative, or any part of it. The prominent subject *for the agreement*, the true nominative *to* the verb, *or the term* to which the verb peculiarly refers, is the *word* ‘*officer.*’”—*L. Murray cor.* “This is *an other* use, that, in my opinion, contributes to make a man learned *rather* than wise; and is *incapable* of pleasing *either* the understanding or *the* imagination.”—*Addison cor.* “The work is a dull performance; and is *incapable* of pleasing *either* the understanding *or* the imagination.”—*L. Murray cor.* “I would recommend the ‘Elements of English Grammar,’ by Mr. Frost. *The plan of this little work is similar to that of Mr. L. Murray’s smallest Grammar;* but, *in order* to meet the understanding of children, *its* definitions and language *are* simplified, *so* far as the nature of the subject will admit. It also embraces more examples *for* Parsing, than *are* usual in elementary treatises.”—*S. R. Hall cor.* “More rain falls in the first two summer months, than in the first two *months* of winter; but *what falls*, makes a much greater show upon the earth, in *winter* than in *summer*, because there is a much slower evaporation.”—*L. Murray cor.* “They often contribute also to *render* some persons prosperous, though wicked; and, *what* is still worse, to *reward* some actions, though vicious; and *punish* other actions, though virtuous.”—*Bp. Butler cor.* “Hence, to such a man, *arise* naturally a secret satisfaction, *a* sense of security, and *an* implicit hope of somewhat further.”—*Id.* “So much for the third and last cause of illusion, that was *noticed above; which arises* from the abuse of very general and abstract terms; *and* which is the principal source of the *abundant* nonsense that *has* been vented by metaphysicians, mystagogues, and theologians.”—*Campbell cor.* “As to those animals *which are* less common, or *which*, on account of the places they inhabit, fall less under our observation, as fishes and birds, or *which* their diminutive size removes still further from our observation, we generally, in English, employ a single noun to designate both genders, *the* masculine and *the* feminine.”—*Fosdick cor.* “Adjectives may always be distinguished by their *relation to other words: they express* the quality, condition, *or number*, of whatever *things are* mentioned.”—*Emmons cor.* “An adverb *is* a word added to a verb, *a* participle, *an* adjective, or *an* other adverb; *and generally expresses time, place, degree, or manner.*”—*Brown’s Inst.*, p. 29. “The *joining-together of* two objects, *so* grand, and the representing *of* them both, as subject at one moment to the command of God, *produce* a

noble effect.”—*Dr. Blair cor.* “Twisted columns, for instance, are undoubtedly ornamental; but, as they have an appearance of weakness, they displease *the eye*, *whenever* they are *used* to support any *massy* part of a building, *or what* seems to require a more substantial prop.”—*Id.* “In a vast number of inscriptions, some upon rocks, some upon stones of a defined shape, is found an Alphabet different from the *Greeks*’, *the Latins*’, and *the Hebrews*’, and also unlike that of any modern nation.”—*W. C. Fowler cor.*

#### LESSON XVIII.—MANY ERRORS.

“The empire of Blefuscu is an island situated on the northeast side of Lilliput, from *which* it is parted by a channel of *only* 800 yards *in width*.”—*Swift and Kames cor.* “The nominative case usually *denotes* the agent or doer; and *any noun or pronoun which is* the subject of a *finite* verb, *is always in this case*.”—*R. C. Smith cor.* “There *are*, *in* his allegorical personages, an originality, *a* richness, and *a* variety, which almost *vie* with the splendours of the ancient mythology.”—*Hazlitt cor.* “As neither the Jewish nor *the* Christian revelation *has* been universal, and as *each has* been afforded to a greater or *a* less part of the world at different times; so likewise, at different times, both revelations have had different degrees of evidence.”—*Bp. Butler cor.* “Thus we see, that, *to kill* a man with a sword, *and to kill one* with a hatchet, are looked upon as no distinct species of action; but, if the point of the sword first enter the body, *the action* passes for a distinct species, called *stabbing*.”—*Locke cor.* “If a soul sin, and commit a trespass against the Lord, and lie unto his neighbour *concerning* that which was delivered him to keep, or *deceive* his neighbour, or *find* that which was lost, and *lie* concerning it, and *swear* falsely; in any of all these that a man doeth, sinning therein, then it shall be,” &c.—*Bible cor.* “As, *to do* and *teach* the commandments of God, is the great proof of virtue; so, *to break* them, and *to teach* others to break them, *are* the great *proofs* of vice.”—*Wayland cor.* “The latter simile, *in* Pope’s terrific maltreatment of *it*, is true *neither* to *the* mind *nor* to *the* eye.”—*Coleridge cor.* “And the two brothers were seen, transported with rage and fury, like Eteocles and Polynices, *each endeavouring* to plunge *his sword* into *the other’s heart*, and to assure *himself* of the throne by the death of *his* rival.”—*Goldsmith cor.* “Is it not plain, therefore, that neither the castle, *nor* the planet, nor the cloud, which you *here* see, *is that* real *one* which you suppose *to* exist at a distance?”—*Berkley cor.* “I have often wondered, how it comes to pass, that every body should love *himself* best, and yet value *his neighbours*’ opinion about *himself* more than *his* own.”—*Collier cor.* “Virtue, (Αρετή, *Virtus*,) as well as most of its species, *when sex is figuratively ascribed to it, is made* feminine, perhaps from *its* beauty and amiable appearance.”—*Harris cor.* “Virtue, with most of its species, is *made* feminine *when personified*; and so is Vice, *perhaps* for being Virtue’s opposite.”—*Brit. Gram. cor.*; also *Buchanan*. “From this deduction, *it* may *easily* be seen, how it comes to pass, that personification makes so great a figure in all compositions *in which* imagination or passion *has* any concern.”—*Dr. Blair cor.* “An Article is a word *placed before a noun*, to point *it* out *as such*, and to show how far *its* signification extends.”—*Folker cor.* “All men have certain natural, essential, and inherent rights;—among which are the *rights of* enjoying and defending life and liberty; *of* acquiring, possessing, and protecting property; and, in a word, of seeking and obtaining happiness.”—*Const. of N. H. cor.* “From *those* grammarians who form their ideas and make their decisions, respecting this part of English grammar, *from* the principles and construction of *other* languages,—of languages which do not in these points *accord with* our own, but *which* differ considerably from it,—we may naturally expect grammatical schemes that *will be neither* perspicuous nor consistent, and *that* will tend *rather* to perplex than *to* inform the learner.”—*Murray and Hall cor.* “*Indeed* there are but very few who know how to be idle and innocent, or *who*

have a relish *for* any pleasures that are not criminal; every diversion *which the majority* take, is at the expense of some one virtue or *other*, and their very first step out of business is into vice or folly.”—*Addison cor.*

“Hail, holy Love! thou *bliss* that *sumst* all bliss!  
*Giv’st* and *receiv’st* all bliss; fullest when most  
 Thou *giv’st*; spring-head of all felicity!”—*Pollok cor.*

#### LESSON XV.—OF MANY ERRORS.

(1.) “Compound *words are*[, by L. Murray and others, improperly] included *among the derivatives*.”—*L. Murray corrected.* (2.) “*The* Apostrophe, *placed above the line*, thus ‘, is used to abbreviate or shorten *words*. *But* its chief use is, to *denote* the *possessive* case of nouns.”—*Id.* (3.) “*The* Hyphen, *made* thus -, *connects the parts of compound* words. It is also used when a word is divided.”—*Id.* (4.) “The Acute Accent, *made* thus ‘, *denotes the syllable on which stress is laid, and sometimes also, that the vowel is short*: as, ‘*Fáncy*.’ The Grave Accent, *made* thus ` , *usually denotes, (when applied to English words,) that the stress is laid where a vowel ends the syllable*: as, ‘*Fàvour*.”—*Id.* (5.) “The stress is laid on long *vowels or* syllables, and on short *ones*, indiscriminately. In order to distinguish the *long or open vowels* from the *close or short ones*, some writers of dictionaries have placed the grave *accent* on the former, and the acute on the latter.”—*Id.* (6.) “*The* Diæresis, thus *made* “, *is* placed over one of two *contiguous* vowels, *to show that they are not* a diphthong.”—*Id.* (7.) “*The* Section, *made* thus §, *is sometimes used to mark the subdivisions* of a discourse or chapter.”—*Id.* (8.) “*The* Paragraph, *made* thus ¶, *sometimes* denotes the beginning of a new subject, or *of* a *passage* not connected with the *text preceding*. This character is *now seldom* used [*for such a purpose*], *except* in the Old and New Testaments.” Or better:—“except in the *Bible*.”—*Id.* (9.) “*The* Quotation *Points*, *written thus* “ “, *mark* the beginning *and the end* of *what* is quoted or transcribed from *some* speaker or author, in his own words. In type, they are inverted commas at the beginning, *apostrophes* at the conclusion.”—*Id.* (10.) “*The* Brace *was formerly* used in poetry at the end of a triplet, or *where* three lines *rhymed together in heroic verse*; *it* also *serves* to connect *several terms* with one, *when the one is common to all*, and *thus* to prevent a repetition *of the* common term.”—*Id.* (11.) “Several asterisks *put together*, generally denote the omission of some *letters belonging to* a word, or of some bold or indelicate expression; *but sometimes they imply a* defect in the manuscript *from which the text is copied*.”—*Id.* (12.) “*The* Ellipsis, *made* thus —, or thus \*\*\*\*, *is* used *where* some letters *of* a word, or some words *of* a verse, are omitted.”—*Id.* (13.) “*The* Obelisk, which is *made* thus †; and *the* Parallels, *which are made* thus ||; *and sometimes* the letters of the alphabet; and *also the Arabic* figures; are used as references to *notes in* the margin, or *at the* bottom, of the page.”—*Id.* (14.) “The note of interrogation should not be employed, where it is only said *that* a question has been asked, and where the words are not used as a question; *as*, ‘The Cyprians asked me why I wept.’”—*Id. et al. cor.* (15.) “*The* note of interrogation is improper after *mere* expressions of admiration, or of *any* other emotion, *though they may bear the form of* questions.”—*Id.* (16.) “The parenthesis incloses *something which is thrown* into the body of a sentence, *in an under tone*; *and* which affects neither the sense, nor the construction, *of the main text*.”—*Lowth cor.* (17.) “Simple members connected by *a relative*

not used restrictively, or by a conjunction that implies comparison, are for the most part divided by *the* comma.”—*Id.* (18.) “Simple members, or sentences, connected as terms of comparison, are for the most part separated by *the* comma.”—*L. Murray et al. cor.* (19.) “Simple sentences connected by a comparative particle, are for the most part divided by the comma.”—*Russell cor.* (20.) “Simple sentences or clauses connected to form a comparison, should generally be parted by *the* comma.”—*Merchant cor.* (21.) “The simple members of sentences that express contrast or comparison, should generally be divided by *the* comma.”—*Jaudon cor.* (22.) “The simple members of a comparative sentence, when they are long, are separated by a comma.”—*Cooper cor.* (23.) “Simple sentences connected to form a comparison, or phrases placed in opposition, or contrast, are usually separated by *the* comma.”—*Hiley and Bullions cor.* (24.) “On whichever word we lay the emphasis,—whether on the first, *the* second, *the* third, or *the* fourth,—every change of it strikes out a different sense.”—*L. Murray cor.* (25.) “To say to those who do not understand sea phrases, ‘We tacked to the larboard, and stood off to sea,’ would give them little or no information.”—*Murray and Hiley cor.* (26.) “Of those dissyllables which are sometimes nouns and sometimes verbs, it may be observed, that the verb is commonly accented on the latter syllable, and the noun on the former.”—*L. Murray cor.* (27.) “And this gives to our language an advantage over most others, in the poetical or rhetorical style.”—*Id. et al. cor.* (28.) “And this gives to the English language an advantage over most others, in the poetical and the rhetorical style.”—*Lowth cor.* (29.) “The second and *the* third scholar may read the same sentence; or as many may repeat the text, as are necessary to teach it perfectly to the whole class.”—*Osborn cor.*

- (30.) “Bliss is the same, in subject, or in king,  
In who obtain defence, or who defend.”—*Pope’s Essay on Man*, IV, 58.

#### LESSON XVI.—OF MANY ERRORS.

“The Japanese, the Tonquinese, and the Coreans, speak languages differing from one another, and from that of the inhabitants of China; while all use the same written characters, and, by means of them, correspond intelligibly with one another in writing, though ignorant of the language spoken by their correspondents: a plain proof, that the Chinese characters are like hieroglyphics, and essentially independent of language.”—*Jamieson cor.*; also *Dr. Blair*. “The curved line, in stead of remaining round, is changed to a square one, for the reason before mentioned.”—*Knight cor.* “Every reader should content himself with the use of those tones only, that he is habituated to in speech; and should give to the words no other emphasis, than what he would give to the same words, in discourse. [Or, perhaps the author meant:—and should give to the emphatic words no other intonation, than what he would give, &c.] Thus, whatever he utters, will be delivered with ease, and will appear natural.”—*Sheridan cor.* “A stop, or pause, is a total cessation of sound, during a perceptible, and, in musical or poetical compositions, a measurable space of time.”—*Id.* “Pauses, or rests, in speaking or reading, are total cessations of the voice, during perceptible, and, in many cases, measurable spaces of time.”—*L. Murray et al. cor.* “Those derivative nouns which denote small things of the kind named by their primitives, are called Diminutive Nouns: as, lambkin, hillock, satchel, gosling; from lamb, hill, sack, goose.”—*Bullions cor.* “Why is it, that nonsense so often escapes detection, its character not being perceived either by the writer or by the reader?”—*Campbell cor.* “An Interjection is a word used to express sudden emotion. Interjections are so called, because they are generally thrown in between the parts of discourse, and have no reference to the structure of those parts.”—*M’Culloch cor.* “The verb OUGHT has no other inflection than

OUGHTEST, *and this is nearly obsolete.*”—*Macintosh cor.* “But the *arrangement*, government, *and* agreement *of words*, and *also their* dependence upon *others*, are referred to our reason.”—*Osborn cor.* “ME is a personal pronoun, *of the* first person, singular *number*, and *objective* case.”—*Guy cor.* “The *noun* SELF is *usually* added to a pronoun; as, herself, himself, &c. *The compounds* thus *formed are* called reciprocal *pronouns.*”—*Id.* “One cannot *but think*, that our author *would have* done better, *had he* begun the first of these three sentences, with saying, ‘*It* is novelty, *that* bestows charms on a monster.’”—*Dr. Blair cor.* “The idea which they present to us, of *nature* resembling art, of *art* considered as an original, and nature as a copy, seems not very distinct, *or* well *conceived*, nor indeed very material to our author’s purpose.”—*Id.* “This faulty construction of the sentence, *evidently arose from haste and carelessness.*”—*Id.* “Adverbs serve to modify *terms* of action or quality, or to denote time, place, order, degree, *or* some *other circumstance* which we have occasion to specify.”—*Id.* “We may naturally expect, *that* the more any nation is improved by science, and the more perfect *its* language becomes, *the* more will *that language* abound with connective particles.”—*Id.* “Mr. Greenleaf’s book is *far better* adapted *to the capacity of* learners, *than* any *other* that has yet appeared, on the subject.”—Feltus and Onderdonk’s false praise Englished. “Punctuation is the art of marking, in writing *or in print*, the several pauses, or rests, *which separate* sentences, *or* the parts of sentences; *so as to denote* their proper quantity or proportion, as *it is exhibited* in a just and accurate *delivery.*”—*Louth cor.* “A compound sentence must *generally* be resolved into simple ones, and *these be* separated by *the comma.*” Or better: “A compound sentence *is generally divided*, by *the comma*, into *its* simple *members.*”—*Greenleaf and Fisk cor.* “Simple sentences should *in general* be separated from *one an* other by *the comma*, unless *a greater point is required*; as, ‘Youth is passing away, age is approaching, and death is near.’”—*S. R. Hall cor.* “V has *always* one uniform sound, *which is that of f flattened*, as in *thieve* from *thief*: *thus v* bears to *f* the same relation *that b* does to *p*, *d* to *t*, hard *g* to *k*, *or z* to *s.*”—*L. Murray and Fisk cor.*; also *Walker*; also *Greenleaf*. “The author is explaining the *difference* between sense and imagination, *as powers of* the human mind.”—*L. Murray cor.* Or, if this was the critic’s meaning: “The author is endeavouring to explain a very abstract point, the distinction between the powers of sense and *those of* imagination, *as two different faculties of* the human mind.”—*Id.*; also *Dr. Blair cor.* “HE—(from the Anglo-Saxon HE—) is a personal pronoun, of the third person, singular number, masculine gender, *and* nominative case. Decline HE.”—*Fowler cor.*

#### UNDER CRITICAL NOTE III.—OF DEFINITIONS.

(1.) “A definition is a *short and lucid* description of *a thing, or species, according to its nature and properties.*”—G. BROWN: *Rev. David Blair cor.* (2.) “Language, in general, signifies the expression of our ideas by certain articulate sounds, *or written words*, which are used as the signs of those ideas.”—*Dr. Hugh Blair cor.* (3.) “A word is *one or more syllables* used by common consent as the sign of an idea.”—*Bullions cor.* (4.) “A word is *one or more syllables* used as the *sign of an idea, or of some manner* of thought.”—*Hazen cor.* (5.) “Words are articulate sounds, *or their written signs*, used to convey ideas.”—*Hiley cor.* (6.) “A word is *one or more syllables* used *orally or in writing*, to represent some idea.”—*Hart cor.* (7.) “A word is *one or more syllables* used as the sign of an idea.”—*S. W. Clark cor.* (8.) “A word is a letter or a combination of letters, *a sound or a combination of*

*sounds*, used as the sign of an idea.”—*Wells cor.* (9.) “Words are articulate sounds, *or their written signs*, by which ideas are communicated.”—*Wright cor.* (10.) “Words are certain articulate sounds, *or their written representatives*, used by common consent as signs of our ideas.”—*Bullions, Lowth, Murray, et al. cor.* (11.) “Words are sounds *or written symbols* used as signs of our ideas.”—*W. Allen cor.* (12.) “Orthography *literally* means *correct writing*”—*Kirkham and Smith cor.* [The word *orthography* stands for different things: as, 1. The art or practice of writing words with their proper letters; 2. That part of grammar which treats of letters, syllables, separate words, and spelling.] (13.) “A vowel is a letter which *forms a perfect* sound *when uttered alone*.”—*Inst.*, p. 16; *Hazen, Lennie, and Brace, cor.* (14-18.) “Spelling is the art of expressing words by their proper letters.”—*G. Brown: Lowth and Churchill cor.*; also *Murray, Ing. et al.*; also *Comly*; also *Bullions*; also *Kirkham and Sanborn.* (19.) “A syllable is *one or more letters*, pronounced by a single impulse of the voice, and constituting a word, or part of a word.”—*Lowth, Mur., et al., cor.* (20.) “A syllable is a *letter or a combination of letters*, uttered in one complete sound.”—*Brit. Gram. and Buch. cor.* (21.) “A syllable is *one or more letters representing* a distinct sound, *or what is* uttered by a single impulse of the voice.”—*Kirkham cor.* (22.) “A syllable is so much of a word as *is* sounded at once, *whether it* be the whole *or a part*.”—*Bullions cor.* (23.) “A syllable is *so many letters* as *are* sounded at once; *and is either* a word, or a part of a word.”—*Picket cor.* (24.) “A diphthong is *a* union of two vowels *in one syllable*, as in *bear* and *beat*.”—*Bucke cor.* Or: “A diphthong is *the meeting* of two vowels in one syllable.”—*Brit. Gram.*, p. 15; *Buchanan’s*, 3. (25.) “A diphthong consists of two vowels *put together in* one syllable; as *ea* in *beat*, *oi* in *voice*.”—*Guy cor.* (26.) “A triphthong consists of three vowels *put together in* one syllable; as, *eau* in *beauty*.”—*Id.* (27.) “But *a* triphthong is the union of three vowels *in one syllable*.”—*Bucke cor.* Or: “A triphthong is the meeting of three vowels in one syllable.”—*British Gram.*, p. 21; *Buchanan’s*, 3. (28.) “What is a noun? A noun is the *name of something*; as, a man, a boy.”—*Brit. Gram. and Buchanan cor.* (29.) “An adjective is a word added to *a noun or pronoun*, to describe *the object named or referred to*.”—*Maunder cor.* (30.) “An adjective is a word *added* to a noun *or pronoun*, to describe or define *the object mentioned*.”—*R. C. Smith cor.* (31.) “An adjective is a word *which, without assertion or time, serves* to describe or define *something*; as, a *good* man, *every* boy.”—*Wilcox cor.* (32.) “An adjective is *a word* added to *a noun or pronoun, and generally expresses a quality*.”—*Mur. and Lowth cor.* (33.) “An adjective expresses the quality, *not* of the noun *or pronoun* to which it is applied, *but of the person or thing spoken of*; and *it* may generally be known by *the* sense *which it thus makes* in connexion with *its noun*; as, ‘A *good* man,’ ‘A *genteel* woman.’”—*Wright cor.* (34.) “An adverb is a word used to modify the sense of *a verb, a participle, an adjective, or an other adverb*.”—*Wilcox cor.* (35.) “An adverb is a word *added* to a verb, *a participle*, an adjective, or an other adverb, to modify *the sense*, or denote some circumstance.”—*Bullions cor.* (36.) “A substantive, or noun, is a name given to *some* object which the senses can perceive, the understanding comprehend, or the imagination entertain.”—*Wright cor.* (37-54.) “Genders are modifications that distinguish *objects* in regard to sex.”—*Brown’s Inst.*, p. 35: *Bullions cor.*; also *Frost*; also *Perley*; also *Cooper*; also *L. Murray et al.*; also *Alden et al.*; also *Brit. Gram., with Buchanan*; also *Fowle*; also *Burn*; also *Webster*; also *Coar*; also *Hall*; also *Wright*; also *Fisher*; also *W. Allen*; also *Parker and Fox*; also *Weld*; also *Weld again.* (55 and 56.) “A case, *in grammar*, is the state or condition of a noun *or pronoun*, with respect to *some* other *word* in *the* sentence.”—*Bullions cor.*; also *Kirkham.* (57.) “Cases are modifications that distinguish the relations of nouns and pronouns to other words.”—*Brown’s Inst.*, p. 36. (58.) “Government is the power which one *word* has over an other, *to cause* it to *assume* some particular *modification*.”—*Sanborn et al. cor.* See *Inst.*, p. 104. (59.) “A simple sentence is a sentence which contains only one *assertion, command, or question*.”—

*Sanborn et al. cor.* (60.) "Declension means *the* putting *of* a noun *or* pronoun through the different cases *and* numbers."—*Kirkham cor.* Or better: "The declension of a *word* is a regular arrangement of its numbers and cases."—See *Inst.*, p. 37. (61.) "Zeugma is a *figure in which* two or more *words refer* in common *to an other* which *literally agrees with* only one of them."—*B. F. Fish cor.* (62.) "An irregular verb is *a verb that does not form the preterit* and the perfect participle *by assuming d* or *ed*; as, smite, smote, smitten."—*Inst.*, p. 75. (63.) "A personal *pronoun is a pronoun that shows, by its form, of what person it is.*"—*Inst.*, p. 46.

#### UNDER CRITICAL NOTE IV.—OF COMPARISONS.

"*Our language abounds* more in vowel and diphthong sounds, than most *other tongues.*" Or: "We abound more in vowel and *diphthongal* sounds, than most *nations.*"—*Dr. Blair cor.* "A line thus accented has a more spirited air, than *one which takes* the accent on any other syllable."—*Kames cor.* "Homer *introduces* his deities with no greater ceremony, that [what] he uses towards mortals; and Virgil has still less moderation *than he.*"—*Id.* "Which the more refined taste of later writers, *whose* genius *was* far inferior to *theirs*, would have taught them to avoid."—*Dr. Blair cor.* "*As a poetical composition*, however, the Book of Job is not only equal to any other of the sacred writings, but is superior to them all, except those of Isaiah alone."—*Id.* "On the whole, *Paradise Lost* is a poem *which* abounds with beauties of every kind, and *which* justly entitles its author to *be equalled in fame with* any poet."—*Id.* "Most of the French writers compose in short sentences; though their style, in general, is not concise; commonly less so than *that of most* English writers, whose sentences are much longer."—*Id.* "The principles of the Reformation were *too deeply fixed* in the prince's mind, to be easily eradicated."—*Hume cor.* "Whether they do not create jealousy and animosity, more than *sufficient to counterbalance* the benefit derived from them."—*Leo Wolf cor.* "The Scotch have preserved the ancient character of their music more entire, than *have the inhabitants of* any other country."—*Gardiner cor.* "When the time or quantity of one syllable exceeds *that of* the rest, that syllable readily receives the accent."—*Rush cor.* "What then can be more obviously true, than that it should be made as just as we can *make it.*"—*Dymond cor.* "It was not likely that they would criminate themselves more than, they could *not* avoid."—*Clarkson cor.* "*In* their understandings *they* were the most acute people *that* have ever lived."—*Knapp cor.* "The patentees have printed it with neat types, and upon better paper than was *used* formerly."—*John Ward cor.* "In reality, its relative use is not exactly like *that of* any other word."—*Felch cor.* "Thus, *in stead* of *having to purchase* two books,—the Grammar and the Exercises,—the learner finds both in one, for a price at *most* not greater than *that of* the others."—*Alb. Argus cor.* "They are not improperly regarded as pronouns, though they are less *strictly* such than the others."—*Bullions cor.* "We have had, as will readily be believed, *a much better* opportunity of becoming conversant with the case, than the generality of our readers can be supposed to have had."—*Brit. Friend cor.*

#### UNDER CRITICAL NOTE V.—OF FALSITIES.

"The long sound of *i* is *like a very quick union* of the sound of *a*, as heard in *bar*, and that of *e*, as heard in *be.*"—*Churchill cor.* "The omission of a word necessary to grammatical propriety, is *of course an impropriety, and not a true* ellipsis."—*Priestley cor.* "*Not* every substantive, *or* noun, is *necessarily* of the third person."—*A. Murray cor.* "A noun is in the third person, when the subject is *merely* spoken *of*; and in the second person, when the subject is spoken *to*; *and* in the first person, *when it names the speaker as such.*"—*Nutting cor.* "With us, no nouns are *literally of the* masculine *or* the feminine

gender, except the names of male and female creatures.”—*Dr. Blair cor.* “*The* apostrophe is a little mark, either *denoting the possessive case of nouns*, or signifying that something is shortened: as, ‘*William’s* hat;’—‘the *learn’d*,’ for ‘the *learned*.”—*Inf. S. Gram. cor.* “When a word beginning with a vowel coupled with one beginning with a consonant, the indefinite article must *not* be repeated, *if the two words be adjectives belonging to one and the same noun*; thus, ‘Sir Matthew Hale was *a* noble and impartial judge;’—‘Pope was *an* elegant and nervous writer.”—*Maunder cor.*\* “*W* and *y* are consonants, when they *precede a vowel heard in the same* syllable: in every other situation, they are vowels.”—*L. Mur. et al. cor.* See *Inst.*, p. 16. “*The* is *not varied* before adjectives and substantives, let them begin as they will.”—*Bucke cor.* “*A few English* prepositions, *and many which we have borrowed from other languages*, are *often* prefixed to words, in such a manner as to coalesce with them, and to become *parts of the compounds or derivatives thus formed*.”—*Lowth cor.* “*H*, at the beginning of syllables not accented, is *weaker*, but *not* entirely silent; as in *historian*, *widowhood*.”—*Rev. D. Blair cor.* “*Not every* word that will make sense with *to* before it, is a verb; for *to* may govern nouns, pronouns, or participles.”—*Kirkham cor.* “*Most* verbs do, in reality, express actions; but they are *not* intrinsically the mere names of actions: *these must of course be nouns*.”—*Id.* “The nominative *denotes* the actor or subject; and the verb, the action *which is* performed *or received* by *this actor or subject*.”—*Id.* “But if only one creature or thing acts, *more than* one action *may*, at the same instant, be done; as, ‘The girl not only *holds* her pen badly, but *scowls* and *distorts* her features, while she *writes*.”—*Id.* “*Nor is each of these verbs of the singular number because it* denotes but one action which the girl performs, *but because the subject or nominative* is of the singular number, *and the words must agree*.”—*Id.* “And when I say, ‘*Two men walk*,’ is it not equally apparent, that *walk* is plural because it *agrees with men*?”—*Id.* “The subjunctive mood is formed by *using the simple verb in a suppositive sense, and without personal inflection*.”—*Beck cor.* “The possessive case *of nouns, except in instances of apposition or close connexion*, should always be distinguished by the apostrophe.”—*Frost cor.* “‘At these proceedings *of* the Commons:’ Here *of* is *a* sign of the *objective* case; and ‘*Commons*’ is of that case, *being* governed *by this preposition*.”—*A. Murray cor.* “Here let it be observed again, that, strictly speaking, *all finite* verbs have numbers *and* persons; *and so* have *nearly all* nouns *and* pronouns, *even* when they refer to irrational creatures and inanimate things.”—*Barrett cor.* “The noun denoting the person or *persons* addressed or spoken to, is in the nominative case independent: *except it be put in apposition with a pronoun of the second person*; as, ‘Woe to *you lawyers*;’—‘*You* political *men* are constantly manoeuvring.”—*Frost cor.* “Every noun, when *used in a direct address and set off by a comma*, becomes of the second person, and is in the nominative case absolute; as, ‘*Paul*, thou art beside thyself.”—*Jaudon cor.* “Does the conjunction *ever* join words together? *Yes*; the conjunction *sometimes* joins *words* together, *and sometimes* sentences, *or certain parts of sentences*.”—*Brit. Gram. cor.*; also *Buchanan*. “Every *noun of the possessive form* has a *governing* noun, expressed or understood: as, *St. James’s*. Here *Palace* is understood. *But* one *possessive may* govern another; as, ‘*William’s father’s* house.”—*Buchanan cor.* “Every adjective (*with the exceptions noted under Rule 9th*) belongs to a *noun or pronoun* expressed or understood.”—*L. Murray et al. cor.* “*Not* every adjective qualifies a substantive, expressed or understood.”—*Bullions cor.* “*Not* every adjective belongs to *a* noun expressed or understood.”—*Ingersoll cor.* “Adjectives belong to nouns *or pronouns, and serve to* describe *things*.”—*R. C. Smith cor.* “*English* adjectives, *in general*,

\* The article *may* be repeated in examples like these, without producing *impropriety*; but then it will alter the construction of the adjectives, and render the expression more formal and emphatic, by suggesting a repetition of the noun.—G. BROWN.

*have no modifications in which they can* agree with the nouns *to* which they *relate*.”—*Allen Fisk cor.* “The adjective, *if it denote unity or plurality*, must agree with its substantive in number.”—*Buchanan cor.* “*Not* every adjective and participle, *by a vast many*, belongs to some noun or pronoun, expressed or understood.”—*Frost cor.* “*Not* every verb of the infinitive mood, supposes a verb before it, expressed or understood.”—*Buchanan cor.* “*Nor* has every adverb its verb, expressed or understood; *for some adverbs relate to participles, to adjectives, or to other adverbs*.”—*Id.* “*A conjunction that connects one* sentence to *an other, is not* always placed betwixt the two propositions or sentences which *it unites*.”—*Id.* “The words *for all that*, are by no means ‘low;’ but the putting of this phrase for *yet* or *still*, is neither necessary nor elegant.”—*L. Murray cor.*; also *Dr. Priestley*. “The reader or hearer then understands from *AND*, that *the author adds one proposition, number, or thing, to an other*. Thus *AND often, very often*, connects one thing with an other thing, *or* one word with an other word.”—*James Brown cor.* “‘Six *AND* six *are* twelve.’ Here it is affirmed, that *the two sixes added together are* twelve.”—*Id.* “‘John *AND* his wife *have* six children.’ This is an instance *in which AND connects two nominatives in a simple sentence*. It is *not* here affirmed that John has six children, and that his wife has six *other* children.”—*Id.* “That ‘Nothing can be great which is not right,’ is itself a *great falsity*: there are great blunders, great evils, great sins.”—*L. Murray cor.* “The highest degree of reverence should be paid to *the most exalted virtue or goodness*.”—*Id.* “There is in *all* minds *some* knowledge, *or* understanding.”—*L. Murray et al. cor.* “Formerly, the nominative and objective cases of our pronouns, were *more generally distinguished in practice*, than they now are.”—*Kirkham cor.* “As it respects a choice of words and expressions, *the just* rules of grammar *may* materially aid the learner.”—*S. S. Greene cor.* “*The name of* whatever exists, or is conceived to exist, is a noun.”—*Fowler cor.* “As *not all* men are brave, *brave* is itself *distinctive*.”—*Id.*

#### UNDER CRITICAL NOTE VI.—OF ABSURDITIES.

(1.) “And sometimes two unaccented syllables *come together*.”—*Dr. Blair cor.* (2.) “What nouns frequently *stand together*?” Or: “What nouns *are* frequently *used one after an other*?”—*Sanborn cor.* (3.) “Words are derived from *other words* in various ways.”—*Idem et al. cor.* (4.) “*The name* PREPOSITION *is* derived from the two Latin words *præ* and *pono*, which signify *before* and *place*.”—*Mack cor.* (5.) “He was *much* laughed at for such conduct.”—*Bullions cor.* (6.) “Every *pronominal adjective* belongs to some noun, expressed or understood.”—*Ingersoll cor.* (7.) “If he [Addison] fails in any thing, it is in strength and precision; *the want of* which renders his manner not altogether a proper model.”—*Dr. Blair cor.* (8.) “Indeed, if Horace *is* deficient in any thing *his fault* is this, of not being sufficiently attentive to juncture, *or the* connexion of parts.”—*Id.* (9.) “The pupil is now supposed to be acquainted with the *ten parts* of speech, and their most usual modifications.”—*Taylor cor.* (10.) “I could see, *feel*, taste, and smell the rose.”—*Sanborn cor.* (11.) “The *vowels iou are* sometimes pronounced distinctly in two syllables; as in *various, abstemious*; but not in *bilious*.”—*Murray and Walker cor.* (12.) “The diphthong *aa* generally sounds like *a* short; as in *Balaam, Canaan, Isaac*; in *Baäl* and *Gaäl*, we make no diphthong.”—*L. Mur. cor.* (13.) “Participles *cannot be said to be* ‘governed by the article;’ for *any* participle, with *an* article before it, becomes a substantive, or an adjective used substantively: as, *the learning, the learned*.”—*Id.* (14.) “*From* words ending with *y* preceded by a consonant, *we* form the plurals of nouns, the persons of verbs, *agent* nouns, *perfect* participles, comparatives, and superlatives, by changing the *y* into *i*, and adding *es, ed, er, eth, or est*.”—*Walker, Murray, et al. cor.* (15.) “But *y* preceded by a vowel, *remains unchanged*, in the derivatives above named; as, *boy, boys*.”—*L. Murray et al. cor.* (16.) “But when *the final y* is preceded by a vowel, it *remains unchanged before an* additional syllable; as, *coy, coyly*.”—*Id.* (17.) “But *y*

preceded by a vowel, *remains unchanged*, in *almost all* instances; as, coy, *coily*.”—*Kirkham cor.* (18.) “Sentences are of *two kinds*, simple and compound.”—*Wright cor.* (19.) “The neuter pronoun *it* may be employed to *introduce a nominative* of any person, number, or gender: as, ‘*It is he*.’—‘*It is she*.’—‘*It is they*.’—‘*It is the land*.’”—*Bucke cor.* (20 and 21.) “*It is* and *it was*, are *always singular*; but they *may introduce words of* a plural construction: as, ‘*It was the heretics that* first began to rail.’ SMOLLETT.”—*Merchant cor.*; also *Priestley et al.* (22.) “*W* and *y*, as consonants, have *each of them* one sound.”—*Town cor.* (23.) “The *word as* is frequently a relative *pronoun*.”—*Bucke cor.* (24.) “*From a series of* clauses, the conjunction may *sometimes* be omitted with propriety.”—*Merchant cor.* (25.) “If, however, the *two* members are very closely connected, the comma is unnecessary; as, ‘Revelation tells us how we may attain happiness.’”—*L. Murray et al. cor.* (26-27.) “The mind has difficulty in *taking effectually*, in quick succession, so many different views of the same object.”—*Dr. Blair cor.*; also *L. Mur.* (28.) “*Pronominal adjectives* are a kind of *definitives*, which *may either accompany their* nouns, *or represent them understood*.”—*Kirkham cor.* (29.) “*When the nominative or antecedent is a collective noun* conveying *the idea of plurality*, the verb or pronoun *must agree* with it in the plural *number*.”—*Id. et al. cor.* (30-34.) “A noun or *a* pronoun in the possessive case, is governed by the *name of the thing possessed*.”—*Brown’s Inst.*, p. 176; *Greenleaf cor.*; also *Wilbur and Livingston*; also *Goldsbury*; also *P. E. Day*; also *Kirkham, Frazee, and Miller*. (35.) “Here the boy is represented as acting: *the word boy* is therefore in the nominative case.”—*Kirkham cor.* (36.) “*Do, be, have, and will*, are *sometimes* auxiliaries, *and sometimes* principal verbs.”—*Cooper cor.* (37.) “*Names of males* are masculine. *Names of females* are feminine.”—*Adam’s Gram.*, p. 10; *Beck cor.* (38.) “‘To-day’s lesson is longer than yesterday’s.’ Here *to-day’s* and *yesterday’s* are substantives.”—*L. Murray et al. cor.* (39.) “In this example, *to-day’s* and *yesterday’s* are nouns in the possessive case.”—*Kirkham cor.* (40.) “An Indian in Britain would be much surprised to *find by chance* an elephant feeding at large in the open fields.”—*Kames cor.* (41.) “If we were to contrive a new language, we might make any articulate sound the sign of any idea: *apart from previous usage*, there would be no impropriety in calling oxen *men*, or rational beings *oxen*.”—*L. Murray cor.* (42.) “All the parts of a sentence should *form a consistent whole*.”—*Id et al. cor.*

(43.) “Full through his neck the weighty falchion sped,  
Along the pavement rolled the *culprit’s* head.”—*Pope cor.*

#### UNDER CRITICAL NOTE VII.—OF SELF-CONTRADICTION.

(1.) “Though ‘The king, *with* the lords and commons,’ *must have a singular rather than* a plural verb, the sentence would certainly stand better thus: ‘The king, the lords, *and* the commons, *form* an excellent constitution.’”—*Mur. and Ing. cor.* (2-3.) “*L* has a soft liquid sound; as in *love, billow, quarrel. This letter* is sometimes silent; as in *half, talk, psalm*.”—*Mur. and Fisk cor.*; also *Kirkham*. (4.) “The words *means* and *amends*, though regularly derived from the singulars *mean* and *amend*, are *not* now, *even* by polite writers, restricted to the plural number. Our most distinguished modern authors *often* say, ‘by *this means*,’ as well as, ‘by *these means*.’”—*Wright cor.* (5.) “A friend exaggerates a man’s virtues; an enemy, his crimes.”—*Mur. cor.* (6.) “The auxiliary *have, or any form of* the perfect tense, *belongs not properly to* the subjunctive mood. *We suppose past facts by the indicative*: as, If I *have loved*, If thou *hast loved*, &c.”—*Merchant cor.* (7.) “There is also an impropriety in *using* both the indicative and the subjunctive *mood* with the same conjunction; as, ‘If a man *have* a hundred sheep, and one of them *is* gone astray,’ &c. [This is Merchant’s perversion of the text. It should be, ‘and one of them *go* astray:’ or, ‘*be gone* astray,’ as in

*Matt.*, xviii. 12.]”—*Id.* (8.) “The rising series of contrasts *conveys transcendent* dignity and energy to the conclusion.”—*Jamieson cor.* (9.) “A groan or a shriek is instantly understood, as a language extorted by distress, a *natural* language which conveys a meaning that *words* are *not adequate* to express. A groan or *a* shriek speaks to the ear with *a* far more thrilling effect than words: yet *even this natural* language of distress may be counterfeited by art.”—*Dr. Porter cor.* (10.) “If these words [*book* and *pen*] cannot be put together in such a way as will constitute plurality, then they cannot be ‘these words;’ and then, also, *one and one* cannot be *two*.”—*James Brown cor.* (11.) “Nor can the real pen and the real book be *added or counted together* in words, in such a manner as will *not* constitute plurality in grammar.”—*Id.* (12.) “*Our* is *a personal* pronoun, of the possessive *case*. *Murray does not* decline it.”—*Mur. cor.* (13.) “*This* and *that*, and their plurals *these* and *those*, are *often* opposed to each other in a sentence. When *this* or *that* is used alone, i.e., *without contrast*, *this* is *applied* to *what is* present or near; *that*, to *what is* absent or distant.”—*Buchanan cor.* (14.) “Active and neuter verbs may be conjugated by adding their *imperfect* participle to the auxiliary verb *be*, through all its variations.”—“*Be* is an auxiliary whenever it is placed before either the perfect *or the imperfect* participle of an other verb; but, in every other situation, it is a principal verb.”—*Kirkham cor.* (15.) “A verb in the imperative mood is *almost* always of the second person.”—“The verbs, according to a *foreign* idiom, or the poet’s license, are used in the imperative, agreeing with a nominative of the first or third person.”—*Id.* (16.) “A personal *pronoun, is a pronoun that shows, by its form, of what person it is*.”—“Pronouns of the first person do not *disagree* in person with the nouns they represent.”—*Id.* (17.) “Nouns have three cases; *the* nominative, *the* possessive, and *the* objective.”—“Personal pronouns have, like nouns, *three* cases; *the* nominative, *the* possessive, and *the* objective.”—*Beck cor.* (18.) “In *many* instances the preposition suffers *a* change *and* becomes an adverb by its *mere* application.”—*L. Murray cor.* (19.) “Some nouns are used only in the plural; as, *ashes, literati, minutiae*. Some nouns *have* the same *form* in both numbers; as, *sheep, deer, series, species*. Among the inferior parts of speech, there are some *pairs* or *couples*.”—*Rev. D. Blair cor.* (20.) “Concerning the pronominal adjectives, that may, *or* may not, represent *their nouns*.”—*O. B. Peirce cor.* (21.) “The *word a* is in a few instances employed in the sense of a preposition; as, ‘Simon Peter *saith unto them*, I go *a* fishing;’ i. e., I go *to* fishing.”—*Weld cor.* (22.) “So, *too*, verbs *that are commonly* transitive, are used intransitively, when they have no object.”—*Bullions cor.*

(23.) “When first young Maro, in his boundless mind,  
A work t’ outlast *imperial* Rome design’d.”—*Pope cor.*

#### UNDER CRITICAL NOTE VIII.—OF SENSELESS JUMBLING.

“*There are two numbers*, called the singular and *the* plural, *which* distinguish nouns as *signifying either* one *thing*, or many of the same kind.”—*Dr. H. Blair cor.* “Here James Monroe is addressed, he is spoken to; *the name* is *therefore* a noun of the second person.”—*Mack cor.* “The number and *person* of *an English* verb can *seldom* be ascertained until its nominative is known.”—*Emmons cor.* “A noun of multitude, or *a singular noun* signifying many, may have *a* verb *or a* pronoun agreeing with it in *either* number; yet not without regard to the import of the *noun*, as conveying *the idea of* unity or plurality.”—*Lowth et al. cor.* “To *form* the present *tense* and *the* past imperfect of our *active* or neuter *verbs*, the auxiliary *do*, and *its preterit did*, *are sometimes* used: *as*, I *do* now love; I *did* then love.”—*Lowth cor.* “If these *be* perfectly committed *to memory*, *the learner* will be able to take twenty lines for *his second* lesson, and *the task* may be increased each day.”—*Osborn cor.* “*Ch* is generally sounded in the same manner *as if it were tch*: as in *Charles*,

*church*, *cheerfulness*, and *cheese*. But, in *Latin or Greek* words, *ch* is pronounced like *k*: as in *Chaos*, *character*, *chorus*, and *chimera*. And, in *words* derived from the French, *ch* is sounded like *sh*: as in *Chagrin*, *chicanery*, and *chaise*.”—*Bucke cor.* “Some *nouns* literally neuter, are *made* masculine or feminine by a figure of speech.”—*L. Murray et al. cor.* “In the English language, words may be classified under ten general heads: the *sorts, or chief classes, of words*, are usually termed the ten parts of speech.”—*Nutting cor.* “‘Mercy is the true badge of nobility.’ *Nobility* is a *common* noun, *of the* third person, singular number, *neuter* gender, and objective case; and is governed by *of*.”—*Kirkham cor.* “*Gh* is either silent, *as in plough*, or *has* the sound of *f*, as in *laugh*.”—*Town cor.* “Many *nations* were destroyed, and as many languages or dialects were lost and blotted out from the general catalogue.”—*Chazotte cor.* “Some languages contain a greater number of moods than others, and *each* exhibits *its own as* forms *peculiar to itself*.”—*L. Murray cor.* “A SIMILE is a simple and express comparison; and is generally introduced by *like*, *as*, or *so*.”—*Id.* See *Inst.*, p. 233. “The word *what* is sometimes improperly used for the conjunction *that*.”—*Priestley, Murray, et al., cor.* “Brown makes *no* ado *in condemning* the *absurd* principles of preceding works, in relation to the gender of pronouns.”—*O. B. Peirce cor.* “The nominative *usually* precedes the verb, and *denotes the agent of* the action.”—*Wm. “Plato reproving a young man for playing at some childish game, ‘You chide me,’ says the youth, ‘for a trifling fault.’ ‘Custom,’ replied the philosopher, ‘is no trifle.’ ‘And,’ adds *Montaigne*, ‘he was in the right; for our vices begin in infancy.’”—*Home cor.*

“A merchant at sea asked the skipper what death his father died. ‘My father,’ says the skipper, ‘my grandfather, and my great-grandfather, were all drowned.’ ‘Well,’ replies the merchant, ‘and are not you afraid of being drowned too?’”—*Id.*

“The use of inverted commas derives from France, where one Guillemet was the author of them; [and,] as an acknowledgement for the improvement, his countrymen call them after his name, GUILLEMETS.”—*Hist. cor.*

“This, however, is seldom if ever done, unless the word following the possessive begins with *s*; thus, we do not say, ‘the *prince*’ feather;’ but, ‘the *prince’s* feather.’”—*Bullions cor.* “And this phrase must mean, ‘*the feather of the prince*;’ but ‘*prince’s-feather*,’ written as one word, [and with both apostrophe and hyphen,] is the name of a plant, a species of amaranth.”—*G. Brown.* “Boëthius soon had the satisfaction of obtaining the highest honours his country could bestow.”—*Ingersoll cor.*; also *L. Murray.*

“When an example, a quotation, or a speech, is introduced, it is separated from the rest of the sentence either by a *comma* or *by* a colon; as, ‘The Scriptures give us an amiable representation of the Deity, in these words: *God is love.*’—*Hiley cor.* “Either the colon or *the comma* may be used, [according to the nature of the case,] when an example, a quotation, or a speech, is introduced; as, ‘Always remember this ancient maxim: *Know thyself.*’—‘The Scriptures give us an amiable representation of the Deity, in these words: *God is love.*’—*Bullions cor.*

“The first word of a quotation introduced after a colon, or *of any sentence quoted* in a direct form, must begin with a capital: as, ‘*Always* remember this ancient maxim: *Know thyself.*’—‘Our great lawgiver says, *Take* up thy cross daily, and follow me.’—*Bullions and Lennie cor.*; also *L. Murray*; also *Weld*. See *Luke*, ix, 23.

“Tell me, in whose house do you live?”—*N. “Letters form syllables; syllables, words; words, sentences; and sentences, combined and connected, form discourse.”—*Cooper cor.* “A letter which forms a perfect sound when uttered by itself, is called a vowel; as, *a, e, i.*”—*Id.* “A proper noun is the name of an individual, [or of a particular people or place]; as, John, Boston, Hudson, America.”—*Id.*

“Many men have been capable of doing a wise thing; more, a cunning thing; but very few, a generous thing.”—*Davis cor.* “In the place of an ellipsis of the verb, a comma must be inserted.”—*Id.* “A common noun unlimited by an article, is sometimes understood in its broadest acceptation: thus, ‘*Fishes* swim,’ is understood to mean *all* fishes; ‘*Man* is mortal,’ *all* men.”—*Id.*

“Thus, those sounds formed principally by the throat, are called *gutturals*; those formed principally by the palate, *palatals*; those formed by the teeth, *dentals*; those by the lips, *labials*; *and* those by the nose, *nasals.*”—*Davis cor.*

“Some adjectives are compared irregularly: as, *Good, letter, best; Bad, worse, worst; Little, less, least.*”—*Felton cor.*

“Under the fourth head of grammar, therefore, four topics will be considered; viz., PUNCTUATION, ORTHOEPEY, FIGURES, and VERSIFICATION.”—*Hart cor.*

## GOOD ENGLISH RIGHTLY POINTED.

### LESSON I.—UNDER VARIOUS RULES.

“Discoveries of such a character are sometimes made in grammar also; and such, too, *are* often their origin and their end.”—*Bullions cor.*

“TRAVERSE, [literally to *cross*,] To deny what the opposite party has alleged. To traverse an indictment, *or the like*, is to deny it.”—*Id.*

“The *Ordinal* numerals denote the *order*, or *succession*, in which any number of persons or things *are* mentioned; as, *first*, *second*, *third*, fourth, &c.”—*Hiley cor.*

“Nouns have three persons; *the* First, *the* Second, and *the* Third. The First person is *that which denotes* the speaker: the Second is *that which denotes the person or thing* spoken to; the Third is *that which denotes* the *person or thing merely* spoken of.”—*Hart cor.*

“Nouns have three cases; *the* Nominative, *the* Possessive, and *the* Objective. The *relations* indicated by the *cases* of a noun, *include* three *distinct* ideas; viz., those of subject, object, and ownership.”—*Id.*

“In speaking of animals that are of inferior size, or whose sex is not known or not regarded, *we* often *treat them* as without sex: thus, we say of a cat, ‘*It* is treacherous;’ of an infant, ‘*It* is beautiful;’ of a deer, ‘*It* was killed.’”—*Id.*

“When THIS *and* THAT, or THESE *and* THOSE, refer to a preceding sentence; THIS or THESE *represents* the latter member or term, *and* THAT or THOSE, the former.”—*Churchill cor.*; and *Louth.*

“The rearing of them became his first care; their fruit, his first food; and *the* marking of their kinds, his first knowledge.”—*N. Butler cor.*

“After the period used with abbreviations, we should employ other points, if the construction demands *them*; thus, after ‘Esq.,’ in the last example, there should be, besides *the* period, a comma.”—*Id.*

“In the plural, the verb *has* the same *form* in all the persons; *but still* the principle in *Rem.* 5, under Rule iii, that the first or second person takes precedence, is applicable to verbs, *in parsing*.”—*Id.*

“Rex and Tyrannus are of very different characters. The one rules his people by laws to which they consent; the other, by his absolute will and power: that *government* is called freedom; this, tyranny.”—*L. Murray cor.*

“A noun is the name of any person, place, or thing, *that* can be known or mentioned: as, George, London, America, goodness, charity.”—See *Brown’s Institutes*, p. 31.

“Etymology treats of the classification of words, their various modifications, and *their derivation*”—*P. E. Day cor.*

“To punctuate correctly, implies a thorough acquaintance with the meaning of words and phrases, as well as *with* all their corresponding connexions.”—*W. Day cor.*

“All objects *that* belong to neither the male nor *the* female kind, are said to be of the neuter gender, *except certain things personified*.”—*Weld cor* twice.

“The Analysis of the Sounds in the English language, presented in the preceding statements, *is* sufficiently exact for the purpose in hand. Those who wish to pursue *the subject* further, can consult Dr. Rush’s admirable work, ‘The Philosophy of the Human Voice.’—*Fowler cor.* “Nobody confounds the name of *w* or *y* with *the* sound *of the letter*, or *with its* phonetic import.”—*Id.* [☞ This assertion is hardly true. Strange as such a blunder is, it has actually occurred. See, in Orthography, Obs. 5, on the Classes of the Letters, at p. 156.—G. B.]

“Order is Heav’n’s first law; and, this *confess’d*,  
Some are, and must be, greater than the rest.”—*Pope.*

## LESSON II—UNDER VARIOUS RULES.

“*From* adjectives of one syllable, *and some of two*, the comparative is formed by adding *r* or *er* to the positive; and the superlative, by adding *st* or *est*: as, *sweet*, *sweeter*, *sweetest*; *able*, *abler*, *ablest*.”—*Bullions cor.*

“*From* monosyllables, *or from dissyllables ending with a vowel or the accent*, the comparative is formed by adding *er* or *r* to the positive; and the superlative, by adding *est* or *st*: as, *tall*, *taller*, *tallest*; *wise*, *wiser*, *wisest*; *holy*, *holier*, *holiest*; *complete*, *completer*, *completest*.”—*Id.*

“By this method, the confusion and unnecessary labour occasioned by studying grammars, in these languages, constructed on different principles, *are* avoided; the study of one is rendered a profitable introduction to the study of an other; and an opportunity is furnished to the *inquiring* student, of comparing the languages in their grammatical structure, and *of* seeing at once wherein they agree, and wherein they differ.”—*Id.* “No larger portion should be assigned for each recitation, than the class can easily master; and, till *the previous lessons are well learned*, a new portion should not be given out.”—*Id.* “The acquisitions made in every new lesson, should be *riveted* and secured by repeated revisals.”—*Id.*

“The personal pronouns may be parsed briefly, thus: ‘*I* is a personal pronoun, *of* the first *person*, singular *number*, masculine *gender*, (feminine, if the speaker is a female,) *and* nominative *case*.’ ‘*His* is a personal pronoun, *of* the third *person*, singular *number*, masculine *gender*, *and* possessive *case*.’”—*Id.*

“When the male and *the* female are expressed by distinct terms, as, *shepherd*, *shepherdess*, the masculine term has also a general meaning, expressing both male and female; and is always to be used when the office, occupation, *or* profession, and not the sex, of the individual, is chiefly to be expressed; the feminine term being used only when the discrimination of sex is indispensably necessary. Thus, when it is said, ‘The poets of this country are distinguished *for* correctness of taste,’ the term ‘poets’ clearly includes both male and female writers of poetry.”—*Id.*

“Nouns and pronouns connected by conjunctions, must be in the same *case*”—*Ingersoll cor.*

“Verbs connected by *and*, *or*, or *nor*, must *generally* be in the *same mood* and *tense*; and, when *the tense has different forms*, they must be in the same form.”—*Id.*

“This will habituate him to reflection; exercise his *judgement* on the meaning of the author; and, without any great effort on his part, impress indelibly on his memory the rules which he is required to give. After the exercises under *any* rule have been gone through, *agreeably to the direction* in the note *at the bottom of* page 88<sup>th</sup>, they may be read over again in a corrected state, the pupil making an emphasis on the correction made; or they may be presented in writing, at the next recitation.”—*Bullions cor.*

“Man, but for that, no action could attend;  
And, but for this, *were active* to no end.”—*Pope.*

### LESSON III.—UNDER VARIOUS RULES.

“‘Johnson, the bookseller and stationer’ indicates that *bookseller* and *stationer* are *terms* belonging to the same person; ‘the bookseller and the stationer,’ would indicate that they belong to different persons.”—*Bullions cor.*

“*Past* is [commonly] an adjective; *passed*, the past tense or perfect participle of the verb: and they ought not (as *they* frequently *are*) to be confounded with each other.”—*Id.*

“Not only the nature of the thoughts and sentiments, but the very selection *or* arrangement of the words, gives English poetry a character which separates it widely from common prose.”—*Id.*

“Men of sound, discriminating, and philosophical minds—men prepared for the work by long study, patient investigation, and extensive acquirements—have laboured for ages to improve and perfect it; and nothing is hazarded in asserting, that, should it be unwisely abandoned, it will be long before an other, equal in beauty, stability, and usefulness, *will* be produced in its stead.”—*Id.*, on the common “system of English Grammar.”

“The article *the*, on the other hand, is used to restrict; and is therefore termed *Definite*. Its proper office is, to call the attention to a particular individual or class, or to any number of such; and *accordingly it* is used with nouns *of* either number, singular or plural.”—*Id.*

“Hence, also, the infinitive mood, a participle *with its adjuncts*, a member of a sentence, or a *whole* proposition, forming the subject of discourse, or the object of a verb or preposition, and being the name of an act or circumstance, *is*, in construction, regarded as a *noun*; and *is* usually called, ‘a substantive phrase:’ as, ‘*To play*, is pleasant.’—‘*That he is an expert dancer*, is no recommendation.’—‘Let your motto be, *Honesty is the best policy*.’”—*Id.*

“In accordance with his definition, Murray has divided verbs into three classes: *Active*, *Passive*, and *Neuter*;—and *included* in the first class transitive verbs only; and, in the last, all verbs used intransitively”—*Id.*

“Moreover, as the name of the speaker or *that of* the person spoken to is seldom expressed, (the *pronoun* I being used *for the former*, and THOU *or* YOU *for the latter*,) a noun is very *rarely* in the first person; not often in the second; and *hardly ever* in either, unless it *is* a proper noun, or a common noun *denoting an object* personified.”—*Id.*

“In using the *parsing* exercises, it will save much time, (and this saving is *all-important*,) if the pupil be taught to say *all things* belonging to the noun, in the fewest words possible; and to say them always in the same order, *after the example* above.”—*Id.*

“In any phrase or sentence, the adjectives qualifying a noun may generally be found by prefixing the phrase, ‘What kind of,’ to the noun, in the form of a question; as, ‘What kind of horse?’ ‘What kind of stone?’ ‘What kind of way?’ The word containing the answer to the question, is an adjective.”—*Id.*

“In the following exercise, let the pupil first point out the nouns, and then the adjectives; and tell how he knows them to be *such*.”—*Id.*

“In the following sentences, point out the improper *ellipses*; *show* why *they are* improper; and correct *them*.”—*Id.*

“SINGULAR.

1. I am smitten,
2. Thou art smitten,
3. He is smitten;

PLURAL.

1. We are smitten,
2. You are smitten,
3. They are smitten.”—*Wright cor.*

## APPENDIX I.

### TO PART FIRST, OR ORTHOGRAPHY. OF THE SOUNDS OF THE LETTERS.

In the first chapter of Part I, the powers of the letters, or the elementary sounds of the English language, were duly enumerated and explained; for these, as well as the letters themselves, are few, and may be fully stated in few words: but, since we often express the same sound in many different ways, and also, in some instances, give to the same letter several different sounds,—or, it may be, no sound at all,—any adequate account of the powers of the letters considered severally according to usage,—that is, of the sound or sounds of each letter, with its mute positions, as these occur in practice,—must, it was thought, descend to a minuteness of detail not desirable in the first chapter of Orthography. For this reason, the following particulars have been reserved to be given here as an Appendix, pertaining to the First Part of this English Grammar.

#### OBSERVATIONS.

OBS. 1.—A proper discrimination of the different vowel sounds by the epithets most commonly used for this purpose,—such as *long* and *short*, *broad* and *slender*, *open* and *close*, or *open* and *shut*,—is made difficult, if not impossible, by reason of the different, and sometimes directly contradictory senses in which certain orthoepists have employed such terms. Wells says, “Vowel sounds are called *open* or *close*, according to the *relative size of the opening* through which the voice passes in forming them. Thus, *a* in *father*, and *o* in *nor*, are called *open* sounds, because they are formed by a *wide opening* of the organs of speech; while *e* in *me*, and *u* in *rule*, are called *close* sounds, because the organs are *nearly closed* in uttering them.”—*School Grammar*, 1850, p. 32. Good use should fix the import of words. How does the passage here cited comport with this hint of Pope?

“These equal syllables alone require,  
*Though oft the ear the open vowels tire.*”—*Essay on Criticism*, l. 344.

OBS. 2.—Walker, too, in his *Principles*, 64 and 65, on page 19th of his *Critical Pronouncing Dictionary*, mentions a similar distinction of vowels, “which arises from *the different apertures* of the mouth in forming them;” and says, “We accordingly find vowels denominated by the French, *ouvert* and *fermé*; by the Italians, *aperto* and *chiuso*; and by the English [,] *open* and *shut*. But whatever propriety there may be in the use of these terms in other languages, it is certain they must be used with caution in English for fear of confounding them with *long* and *short*. Dr. Johnson and other grammarians call the *a* in *father* the *open a*: which may, indeed, distinguish it from the *slender a* in *paper*; but not from the *broad a* in *water*, which is still more *open*. Each of these letters [the seven vowels] has a *short* sound, which may be called a *shut* sound; but the *long* sounds cannot be so properly denominated *open* as more or less *broad*; that is, the *a* in *paper*, the slender sound; the *a* in *father*, the broadish or middle sound; and the *a* in *water*, the broad sound. The same may be observed of the *o*. This letter has three long sounds, heard in *move*, *note*, *nor*; which graduate from slender to broadish, and broad [,] like [those three sounds of] the *a*. The *i* also in *mine* may be called the broad *i*, and that in *machine*, the slender *i*; though each of them is equally *long*; and though these vowels that are *long* [,] may be said to be more or less *open* according to the different apertures of the mouth in forming them, yet the *short* vowels cannot be said to be more or less *shut*; for as *short*

always implies *shut* (except in verse,) though *long* does not always imply *open*, we must be careful not to confound *long* and *open*, and *close* and *shut*, when we speak of the quantity and quality of the vowels. The truth of it is,” continues he, “all vowels either terminate a syllable, or are united with a consonant. In the first case, if the accent be on the syllable, the vowel is *long*, though it may not be *open*: in the second case, where a syllable is terminated by a consonant, except that consonant be *r*, whether the accent be on the syllable or not, the vowel has its *short* sound, which, compared with its long one, may be called *shut*: but [,] as no vowel can be said to be *shut* that is not joined to a consonant, *all vowels that end syllables* may be said to be *open*, whether the accent be on them or not.”—Crit. Pron. Dict., New York, 1827, p. 19.

OBS. 3.—These suggestions of Walker’s, though each in itself may seem clear and plausible, are undoubtedly, in several respects, confused and self-contradictory. *Open* and *shut* are here inconsistently referred first to one principle of distinction, and then to another;—first, (as are “*open* and *close*” by Wells,) to “the *relative size* of the opening,” or to “the *different apertures* of the mouth;” and then, in the conclusion, to the *relative position* of the vowels with respect to other letters. These principles improperly give to each of the contrasted epithets two very different senses: as, with respect to aperture, *wide* and *narrow*; with respect to position, *closed* and *unclosed*. Now, that *open* may mean *unclosed*, or *close* be put *for closed*, is not to be questioned; but that *open* is a good word for *wide*, or that *shut* (not to say *close*) can well mean *narrow*, is an assumption hardly scholarlike. According to Walker, “*we must be careful* not to confound” *open* with *long*, or *shut* with *short*, or *close* with *shut*; and yet, if he himself does not, in the very paragraph above quoted, confound them all,—does not identify in sense, or fail to distinguish, the two words in each of these pairs,—I know not who can need his “caution.” If there are vowel sounds which graduate through several degrees of openness or broadness, it would seem most natural to express these by regularly comparing the epithet preferred; as, *open*, *opener*, *openest*; or *broad*, *broadier*, *broadest*. And again, if “all vowels that end syllables may be said to be open,” then it is not true, that “the long sounds” of *a* in *paper*, *father*, *water*, cannot be so “denominated;” or that to “call the *a* in *father* the *open a*, may, indeed, distinguish it from the slender *a* in *paper*.” Nor, on this principle, can it be said that “the broad *a* in *water* is still *more open*,” for this *a* no more “ends a syllable” than the others. If any vowel sound is to be called the *open* sound because the letter ends a syllable, or is not shut by a consonant, it is, undoubtedly, the *primal* and *most usual* sound, as found in the letter when accented, and not some other of rare occurrence.

OBS. 4.—Dr. Perley says, “It is greatly to be regretted that the different sounds of a vowel should be called by the names *long*, *short*, *slender*, and *broad*, which convey no idea of the nature of the sound, for *mat* and *not* are as long in poetry as *mate* and *note*. The first sound of a vowel[,] as [that of *a* in] *fate*[,] may be called *open*, because it is the sound which the vowel generally has when it ends a syllable; the second sound as [that of *a* in] *fat*, may be called *close*, because it is the sound which the vowel generally has when it is joined with a consonant following in the same syllable, as *fat-ten*; when there are more than two sounds of any vowel[,] they may be numbered onward; as 3 *far*, 4 *fall*.”—*Perley’s Gram.*, p. 73.

OBS. 5.—Walker thought a long or short vowel sound essential to a long or short quantity in any syllable. By this, if he was wrong in it, (as, in the chapter on Versification, I have argued that he was,) he probably disturbed more the proper distinction of quantities, than that of vowel sounds. As regards *long* and *short*, therefore, Perley’s regret

seems to have cause; but, in making the same objection to “slender and *broad*,” he reasons illogically. So far as his view is right, however, it coincides with the following earlier suggestion: “The terms *long* and *short*, which are often used to denote certain vowel sounds; being also used, with a different import, to distinguish the quantity of syllables, are frequently misunderstood; for which reason, we have substituted for them the terms *open* and *close*;—the former, to denote the sound usually given to a vowel when it *forms* or *ends* an accented syllable; as, *ba, be, bi, bo, bu, by*;—the latter, to denote the sound which the vowel commonly takes when closed by a consonant; as, *ab, eb, ib, ob, ub*”—*Brown’s Institutes*, p. 285.

### I. OF THE LETTER A.

The vowel A has *four* sounds properly its own; they are named by various epithets: as,

1. The English, open, full, long, or slender *a*; as in *aid, fame, favour, efficacious*.
2. The French, close, curt, short, or stopped *a*; as in *bat, banner, balance, carrying*.
3. The Italian, broadish, grave, or middle *a*; as in *far, father, aha, comma, scoria, sofa*.
4. The Dutch, German, Old-Saxon, or broad *a*; as in *wall, haul, walk, warm, water*.

### OBSERVATIONS.

OBS. 1.—Concerning the number of sounds pertaining to the vowel *a*, or to certain other particular letters, and consequently in regard to the whole number of the sounds which constitute the oral elements of the English language, our educational literati,—the grammarians, orthoepists, orthographers, elocutionists, phonographers, and lexicographers,—are found to have entertained and inculcated a great variety of opinions. In their different countings, the number of our phonical elements varies from twenty-six to more than forty. Wells says there are “about forty elementary sounds.”—*School Gram.*, §64. His first edition was more positive, and stated them at “*forty-one*.” See the last and very erroneous passage which I have cited at the foot of page 162. In Worcester’s Universal and Critical Dictionary, there appear to be noted several *more* than *forty-one*, but I know not whether this author, or Walker either, has anywhere told us how many of his marked sounds he considered to be severally different from all others. Sheridan and Jones admitted *twenty-eight*. Churchill acknowledges, as undisputed and indisputable, only *twenty-six*; though he enumerates, “Of simple vowel sounds, *twelve*, or *perhaps thirteen*” (*New Grammar*, p. 5,) and says, “The consonant sounds in the English language, are *nineteen*, or *rather twenty*.”—P. 13.

OBS. 2.—Thus, while Pitman, Comstock, and others, are amusing themselves with the folly of inventing new “Phonetic Alphabets,” or of overturning all orthography to furnish “a character for each of the 38 elementary sounds,” more or fewer, one of the acutest observers among our grammarians can fix on no number more definite or more considerable than *thirty-one*, *thirty-two*, or *thirty-three*; and the finding of these he announces with a “perhaps,” and the admission that other writers object to as many as *five* of the questionable number. Churchill’s vowel sounds, he says, “may be found in the following words: 1. Bate, 2. Bat, 3. Ball; 4. Bet, 5. Be; 6. Bit; 7. Bot, 8. Bone, 9. Boon; 10. But, 11. Bull; 12. Lovely; 13. *Wool*.”—*New Grammar*, p. 5. To this he adds: “Many of the writers on orthoepy, however, consider the first and fourth of the sounds above distinguished as actually the same, the former differing from the latter only by being lengthened in the pronunciation. They also reckon the seventh sound, to be the third shortened; the twelfth, the fifth shortened; and the eleventh, the ninth shortened. Some

consider the fifth and sixth as differing only in length; and most esteem the eleventh and thirteenth as identical.”—*Ib.*

OBS. 3.—Now, it is plain, that these six identifications, or so many of them as are admitted, must diminish by six, or by the less number allowed, the thirteen vowel sounds enumerated by this author. By the best authorities, *W* initial, as in “Wool.” is reckoned a *consonant*; and, of course, its sound is supposed to differ in some degree from that of *oo* in “Boon,” or that of *u* in “Bull,”—the ninth sound or the eleventh in the foregoing series. By Walker, Murray, and other popular writers, the sound of *y* in “Lovely” is accounted to be essentially the same as that of *e* in “Be.” The twelfth and the thirteenth, then, of this list, being removed, and three others added,—namely, the *a* heard in *far*, the *i* in *fine*, and the *u* in *fuse*,—we shall have the *fourteen vowel sounds* which are enumerated by L. Murray and others, and adopted by the author of the present work.

OBS. 4.—Wells says, “A has *six* sounds:—1. Long; as in *late*. 2. Grave; as in *father*. 3. Broad; as in *fall*. 4. Short; as in *man*. 5. The sound heard in *care*, *hare*. 6. Intermediate between *a* in *man* and *a* in *father*; as in *grass*, *pass*, *branch*.”—*School Grammar*, 1850, p. 33. Besides these six, Worcester recognizes a seventh sound,—the “A obscure; as in *liar*, *rival*”—Univ. and Crit. Dict., p. ix. Such a multiplication of the oral elements of our first vowel.—or, indeed, any extension of them beyond four,—appears to me to be unadvisable; because it not only makes our alphabet the more defective, but is unnecessary, and not sustained by our best and most popular orthoepical authorities. The sound of *a* in *liar*, (and in *rival* too, if made “*obscure*”) is a borrowed one, pertaining more properly to the letter *u*. In *grass*, *pass*, and *branch*, properly uttered, the *a* is essentially the same as in *man*. In *care* and *hare*, we have the first sound of *a*, made as slender as the *r* will admit.

OBS. 5.—Concerning his fifth sound of *a*, Wells cites authorities thus: “Walker, Webster, Sheridan, Fulton and Knight, Kenrick, Jones, and Nares, give *a* in *care* the *long* sound of *a*, as in *late*. Page and Day give it the *short* sound of *a*, as in *mat*. See Page’s Normal Chart, and Day’s Art of Elocution. Worcester and Perry make the sound of *a* in *care* a separate element; and this distinction is also recognized by Russell, Mandeville, and Wright. See Russell’s Lessons in Enunciation, Mandeville’s Elements of Reading and Oratory, and Wright’s Orthography.”—*Wells’s School Grammar*, p. 34. Now the opinion that *a* in *care* has its long, primal sound, and is not properly “a separate element,” is maintained also by Murray, Hiley, Bullions, Scott, and Cobb; and is, undoubtedly, much more prevalent than any other. It accords, too, with the scheme of Johnson. To count this *a* by itself, seems too much like a distinction without a difference.

OBS. 6.—On his sixth sound of *a*, Wells remarks as follows: “Many persons pronounce this *a* incorrectly, giving it either the grave or the short sound. Perry, Jones, Nares, Webster, and Day, give to *a* in *grass* the grave sound, as in *father*; while Walker, Jamieson, and Russell, give it the short sound, as in *man*. But good speakers generally pronounce *a* in *grass*, *plant*, etc., as a distinct element, intermediate between the grave and the short sound.”—*School Gram.*, p. 34. He also cites Worcester and Smart to the same effect; and thinks, with the latter, “*There can be no harm* in avoiding the censure of both parties by *shunning the extreme* that offends the taste of each.”—*Ib.*, p. 35. But I say, that a needless multiplication of questionable vowel powers difficult to be discriminated, *is* “harm,” or a fault in teaching; and, where intelligent orthoepists dispute whether words have “the *grave* or the *short* sound” of *a*, how can others, who condemn both parties, acceptably split the difference, and form “a distinct element” in the interval? Words are

often mispronounced, and the French or close *a* may be mistaken for the Italian or broadish *a*, and *vice versa*; but, between the two, there does not appear to be room for an other distinguishable from both. Dr. Johnson says, (inaccurately indeed,) “A has *three* sounds, the slender, [the] open, and [the] broad. A slender is found in *most words*, as *face*, *mane*. A open is the *a* of the Italian, or nearly resembles it; as *father*, *rather*, *congratulate*, *fancy*, *glass*. A broad resembles the *a* of the German; as *all*, *wall*, *call*. ☞ The *short a* approaches to the *a* open, as *grass*.”—*Johnson’s Grammar, in his Quarto Dictionary*, p. 1. Thus the same word, *grass*, that serves Johnson for an example of “the *short a*” is used by Wells and Worcester to exemplify the “*a intermediate*,” while of the Doctor’s five instances of what he calls the “a open,” three, if not four, are evidently such as nearly all readers nowadays would call close or short!

OBS. 7.—There are several grammarians who agree in ascribing to our first vowel *five* sounds, but who nevertheless oppose one another in making up the five. Thus, according to Hart, “A has five sounds of its own, as in fate, fare, far, fall, fat,”—*Hart’s E. Gram.*, p. 26. According to W. Allen, “A has five sounds;—the long or slender, as in *cane*; the short or open, as in *can*; the middle, as in *arm*; the broad, as in *all*; and the *broad contracted*, as in *want*.”—*Allen’s E. Gram.*, p. 6. P. Davis has the same sounds in a different order, thus: “a [as in] mane, mar, fall, mat, what.”—Davis’s *E. Gram.*, p. xvi. Mennye says, “A has five sounds; as, 1 fame, 2 fat, 3 false, 4 farm, 5 beggar.”—Mennye’s *E. Gram.*, p. 55. Here the fifth sound is the seventh of Worcester,—the “A obscure.”

#### DIPHTHONGS BEGINNING WITH A.

The only proper diphthong in which *a* is put first, is the word *ay*, meaning *yes*: in which *a* has its *middle* sound, as in *ah*, and *y* is like *open e*, or *ee*, uttered feebly—ah-ee. *Aa*, when pronounced as an improper diphthong, and not as pertaining to two syllables, usually takes the sound of *close a*; as in *Balaam*, *Canaan*, *Isaac*. In many words, as in *Baäl*, *Gaäl*, *Gaäsh*, the diæresis occurs. In *baa*, the cry of a sheep, we hear the Italian sound of *a*; and, since we hear it but once, one *a* or the other must be silent.

*Æ*, a Latin improper diphthong, common also in the Anglo-Saxon, generally has, according to modern orthoëpists, the sound of *open e* or *ee*; as in *Cæsar*, *ænigma*, *pæan*;—sometimes that of *close* or *short e*; as in *aphæresis*, *diæresis*, *et cætera*. Some authors, judging the *a* of this diphthong to be needless, reject it, and write *Cesar*, *enigma*, &c.

*Ai*, an improper diphthong, generally has the sound of *open* or *long a*; as in *sail*, *avail*, *vainly*. In a final unaccented syllable, it sometimes preserves the first sound of *a*; as in *chilblain*, *mortmain*: but oftener takes the sound of *close* or *short i*; as in *certain*, *curtain*, *mountain*, *villain*. In *said*, *saith*, *again*, and *against*, it takes the sound of *close* or *short e*; and in the name *Britain*, that of *close* or *short u*.

*Ao*, an improper diphthong, occurs in the word *gaol*, now frequently written as it is pronounced, *jail*; also in *gaoler*, which may be written *jailer*; and in the compounds of *gaol*: and, again, it is found in the adjective *extraordinary*, and its derivatives, in which, according to nearly all orthoëpists, the *a* is silent. The name *Pharaoh*, is pronounced *Fā’rō*.

*Au*, an improper diphthong, is generally sounded like *broad a*; as in *cause*, *caught*, *applause*. Before *n* and an other consonant, it usually has the sound of *grave* or *middle a*;

as in *aunt*, *flaunt*, *gaunt*, *launch*, *laundry*. So in *laugh*, *laughter*, and their derivatives. *Gauge* and *gauger* are pronounced *gage* and *gager*, and sometimes written so.

*Aw*, an improper diphthong, is always sounded like *broad a*; as in *draw*, *drawn*, *drawl*.

*Ay*, an improper diphthong, like *ai*, has usually the sound of *open* or *long a*; as in *day*, *pay*, *delay*; in *sayst* and *says*, it has the sound of *close* or *short e*.

## TRIPHTHONGS BEGINNING WITH A.

*Awe* is sounded *au*, like *broad a*. *Aye*, an adverb signifying *always*, has the sound of *open* or *long a* only; being different, both in sound and in spelling, from the adverb *ay*, yes, with which it is often carelessly confounded. The distinction is maintained by Johnson, Walker, Todd, Chalmers, Jones, Cobb, Maunder, Bolles, and others; but Webster and Worcester give it up, and write "*ay*, or *aye*," each sounded *ah-ee*, for the affirmation, and "*aye*," sounded *ā*, for the adverb of time: Ainsworth on the contrary has *ay* only, for either sense, and does not note the pronunciation.

## II. OF THE LETTER B.

The consonant *B* has but one sound; as in *boy*, *robber*, *cub*. *B* is silent before *t* or after *m* in the same syllable; as in *debt*, *debtor*, *doubt*, *dumb*, *lamb*, *climb*, *tomb*. It is heard in *subtile*, fine; but not in *subtle*, cunning.

## III. OF THE LETTER C.

The consonant *C* has two sounds, neither of them peculiar to this letter; the one *hard*, like that of *k*, and the other *soft*, or rather *hissing*, like that of *s*. *C* before *a*, *o*, *u*, *l*, *r*, *t*, or when it ends a syllable, is generally hard, like *k*; as in *can*, *come*, *curb*, *clay*, *crab*, *act*, *action*, *accent*, *flaccid*. *C* before *e*, *i*, or *y*, is always soft, like *s*; as in *cent*, *civil*, *decency*, *acid*.

In a few words, *c* takes the *flat* sound of *s*, like that of *z*; as in *discern*, *suffice*, *sacrifice*, *sice*. *C* before *ea*, *ia*, *ie*, *io*, or *eou*, when the accent precedes, sounds like *sh*; as in *ocean*, *special*, *species*, *gracious*, *cetaceous*. *C* is silent in *czar*, *czarina*, *victuals*, *indict*, *muscle*, *corpuscle*, and the second syllable of *Connecticut*.

*Ch* is generally sounded like *tch*, or *tsh*, which is the same to the ear; as in *church*, *chance*, *child*. But in words derived from the learned languages, it has the sound of *k*; as in *character*, *scheme*, *catechise*, *chorus*, *choir*, *chyle*, *patriarch*, *drachma*, *magna charta*: except in *chart*, *charter*, *charity*. *Ch*, in words derived from the French, takes the sound of *sh*; as in *chaise*, *machine*. In Hebrew words or names, in general, *ch* sounds like *k*; as in *Chebar*, *Sirach*, *Enoch*: but in *Rachel*, *cherub*, and *cherubim*, we have Anglicized the sound by uttering it as *tch*. *Loch*, a Scottish word, sometimes also a medical term, is heard as *lok*.

"*Arch*, before a vowel, is pronounced *ark*; as in *archives*, *archangel*, *archipelago*: except in *arched*, *archer*, *archery*, *archenemy*. Before a consonant it is pronounced *artch*; as in *archbishop*, *archduke*, *archfiend*."—See *W. Allen's Gram.*, p. 10. *Ch* is silent in *schism*, *yacht*, and *drachm*. In *schedule*, some utter it as *k*; others, as *sh*; and many make it mute: I like the first practice.

## IV. OF THE LETTER D.

The general sound of the consonant *D*, is that which is heard in *dog*, *eddy*, *did*. *D*, in the termination *ed*, preceded by a sharp consonant, takes the sound of *t*, when the *e* is suppressed or unheard: as in *faced*, *stuffed*, *cracked*, *tripped*, *passed*; pronounced *faste*, *stuft*, *cract*, *tript*, *past*. *D* before *ia*, *ie*, *io*, or *eou*, when the accent precedes, generally sounds like *j*; as in *Indian*, *soldier*, *tedious*, *hideous*. So in *verdure*, *arduous*, *education*.

## V. OF THE LETTER E.

The vowel *E* has *two* sounds properly its own,—and I incline to think, *three*:—

1. The open, long, full, or primal *e*; as in *me*, *mere*, *menial*, *melodious*.
2. The close, curt, short, or stopped *e*; as in *men*, *merry*, *ebony*, *strength*.
3. The obscure or faint *e*; as in *open*, *garden*, *shovel*, *able*. This third sound is scarcely perceptible, and barely sufficient to articulate the consonant and form a syllable.

*E final* is mute and belongs to the syllable formed by the preceding vowel or diphthong; as in *age*, *eve*, *ice*, *ore*. Except—1. In the words, *be*, *he*, *me*, *we*, *she*, in which it has the open sound; and the article *the*, wherein it is open before a vowel, and obscure before a consonant. 2. In Greek and Latin words, in which it has its open sound, and forms a distinct syllable, or the basis of one; as in *Penelope*, *Pasiphaë*, *Cyaneë*, *Gargaphië*, *Arsinoë*, *apostrophe*, *catastrophe*, *simile*, *extempore*, *epitome*. 3. In the terminations *ere*, *gre*, *tre*, in which it has the sound of *close* or *curt u*, heard before the *r*; as in *acre*, *meagre*, *centre*.

Mute *e*, after a single consonant, or after *st* or *th*, generally preserves the open or long sound of the preceding vowel; as in *cane*, *here*, *pine*, *cone*, *tune*, *thyme*, *baste*, *waste*, *lathe*, *clothe*: except in syllables unaccented; as in the last of *genuine*;—and in a few monosyllables; as *bade*, *are*, *were*, *gone*, *shone*, *one*, *done*, *give*, *live*, *shove*, *love*.

## DIPHTHONGS BEGINNING WITH E.

*E* before an other vowel, in general, either forms with it an *improper* diphthong, or else belongs to a separate syllable. We do not hear both vowels in one syllable, except perhaps in *eu* or *ew*.

*Ea*, an improper diphthong, mostly sounds like *open* or *long e*; as in *ear*, *fear*, *tea*; frequently like *close* or *curt e*; as in *head*, *health*, *leather*: sometimes, like *open* or *long a*; as in *steak*, *bear*, *forswear*: rarely, like *middle a*; as in *heart*, *hearth*, *hearken*. *Ea* in an unaccented syllable, sounds like *close* or *curt u*; as in *vengeance*, *pageant*.

*Ee*, an improper diphthong, mostly sounds like one *open* or *long e*; as in *eel*, *sheep*, *tree*, *trustee*, *referee*. The contractions *e'er* and *ne'er*, are pronounced *air* and *nair*, and not like *ear* and *near*. *E'en*, however, preserves the sound of *open e*. *Been* is most commonly heard with the curt sound of *i*, *bin*.

*Ei*, an improper diphthong, mostly sounds like the *primal* or *long a*; as in *reign*, *veil*: frequently, like *open* or *long e*; as in *deceit*, *either*, *neither*, *seize*: sometimes, like *open* or *long i*; as in *height*, *sleight*, *heigh-ho*: often, in unaccented syllables, like *close* or *curt i*; as in *foreign*, *forfeit*, *surfeit*, *sovereign*: rarely, like *close e*; as in *heifer*, *nonpareil*.

*Eo*, an improper diphthong, in *people*, sounds like *open* or *long e*; in *leopard* and *jeopard*, like *close* or *curt e*; in *yeoman*, according to the best usage, like *open* or *long o*; in *George*, *Georgia*, *georgic*, like *close o*; in *dungeon*, *puncheon*, *sturgeon*, &c., like *close u*. In *feoff*, and its derivatives, the *close* or *short* sound of *e* is most fashionable; but some prefer the long sound of *e*; and some write the word “*fief*.” Feod, feudal, feodary, feodatory, are now commonly written as they are pronounced, *feud*, *feudal*, *feudary*, *feudatory*.

*Eu* and *ew* are sounded alike, and almost always with the diphthongal sound of *open* or *long u*; as in *feud*, *deuce*, *jewel*, *dew*, *few*, *new*. These diphthongs, when initial, sound like *yu*. Nouns beginning with this sound, require the article *a*, and not *an*, before them; as, *A European*, *a ewer*. After *r* or *rh*, *eu* and *ew* are commonly sounded like *oo*; as in *drew*, *grew*, *screw*, *rheumatism*. In *sew* and *Shrewsbury*, *ew* sounds like *open o*: Worcester, however, prefers the sound of *oo* in the latter word. *Shew* and *strew*, having the same meaning as *show* and *strow*, are sometimes, by sameness of pronunciation, made to be the same words; and sometimes distinguished as different words, by taking the sounds *shu* and *stroo*.

*Ey*, accented, has the sound of *open* or *long a*; as in *bey*, *prey*, *survey*: unaccented, it has the sound of *open e*; as in *alley*, *valley*, *money*. *Key* and *ley* are pronounced *kee*, *lee*.

#### TRIPHTHONGS BEGINNING WITH E.

*Eau*, a French triphthong, sounds like *open o*; as in *beau*, *flambeau*, *portmanteau*, *bureau*: except in *beauty*, and its compounds, in which it is pronounced like *open u*, as if the word were written *buty*.

*Eou* is a combination of vowels sometimes heard in one syllable, especially after *c* or *g*; as in *crus-ta-ceous*, *gor-geous*. Walker, in his *Rhyming Dictionary*, gives one hundred and twenty words ending in *eous*, in all of which he separates these vowels; as in *ex-tra-ne-ous*. And why, in his *Pronouncing Dictionary*, he gave us several such anomalies as *fa-ba-ce-ous* in four syllables and *her-ba-ceous* in three, it is not easy to tell. The best rule is this: after *c* or *g*, unite these vowels; after the other consonants, separate them.

*Ewe* is a triphthong having the sound of *yu*, and forming a word. The vulgar pronunciation *yoe* should be carefully avoided.

*Eye* is an improper triphthong which also forms a word, and is pronounced like *open i*, or the pronoun *I*.

#### VI. OF THE LETTER F.

The consonant *F* has one unvaried sound, which is heard in *fan*, *effort*, *staff*: except *of*, which, when simple, is pronounced *ov*.

#### VII. OF THE LETTER G.

The consonant *G* has two sounds;—the one *hard*, guttural, and peculiar to this letter; the other *soft*, like that of *j*. *G* before *a*, *o*, *u*, *l*, *r*, or at the end of a word, is hard; as in *game*, *gone*, *gull*, *glory*, *grace*, *log*, *bog*; except in *gaol*. *G* before *e*, *i*, or *y*, is soft; as in *gem*, *ginger*, *elegy*. Except—1. In *get*, *give*, *gewgaw*, *finger*, and a few other words. 2. When a syllable is added to a word ending in *g*: as, *long*, *longer*; *fog*, *foggy*.

*G* is silent before *m* or *n* in the same syllable; as in *phlegm*, *apothegm*, *gnaw*, *design*. *G*, when silent, usually lengthens the preceding vowel; as in *resign*, *impregn*, *impugn*.

*Gh* at the beginning of a word has the sound of *g hard*; as in *ghastly*, *gherkin*, *Ghibelline*, *ghost*, *ghoul*, *ghyll*: in other situations, it is generally silent; as in *high*, *mighty*, *plough*, *bough*, *though*, *through*, *fight*, *night*, *bought*. *Gh final* sometimes sounds like *f*; as in *laugh*, *rough*, *tough*; and sometimes, like *g hard*; as in *burgh*. In *hough*, *lough*, *shough*, it sounds like *k*, or *ck*; thus, *hock*, *lock*, *shock*.

## VIII. OF THE LETTER H.

The sound of the consonant *H*, (though articulate and audible when properly uttered,) is little more than an aspirate breathing. It is heard in *hat*, *hit*, *hot*, *hut*, *adhere*.

*H* at the beginning of a word, is always sounded; except in *heir*, *herb*, *honest*, *honour*, *hospital*, *hostler*, *hour*, *humble*, *humour*, with their compounds and derivatives. *H* after *r*, is always silent; as in *rhapsody*, *rhetoric*, *rheum*, *rhubarb*. *H final*, immediately following a vowel, is always silent; as in *ah*, *Sarah*, *Nineveh*, *Shiloh*.

## IX. OF THE LETTER I.

The vowel *I* has three sounds, each very common to it, and perhaps properly its own:—

1. The open, long, full, or primal *i*; as in *life*, *fine*, *final*, *time*, *bind*, *child*, *sigh*, *pint*, *resign*. This is a diphthongal sound, equivalent to the sounds of *middle a* and *open e* quickly united.

2. The close, curt, short, or stopped *i*; as in *ink*, *limit*, *disfigure*, *mimicking*.

3. The feeble, faint, or slender *i*, accentless; as in *divest*, *doctrinal*, *diversity*.

This third sound is equivalent to that of *open e*, or *ee* uttered feebly. *I* generally has this sound when it occurs at the end of an unaccented syllable: except at the end of Latin words, or of ancient names, where it is *open* or *long*; as in *literati*, *Nervii*, *Eli*, *Levi*.

In some words, (principally from other modern languages,) *i* has the full sound of *open e*, under the accent; as in *Porto Rico*, *machine*, *magazine*, *antique*, *shire*.

Accented *i* followed by a vowel, has its open or primal sound; and the vowels belong to separate syllables; as in *pliant*, *diet*, *satiety*, *violet*, *pious*. Unaccented *i* followed by a vowel, has its feeble sound; as in *expatiate*, *obedient*, *various*, *abstemious*.

## DIPHTHONGS BEGINNING WITH I.

*I*, in the situation last described, readily coalesces with the vowel which follows, and is often sunk into the same syllable, forming a proper diphthong: as in *fustian*, *quotient*, *question*. The terminations *cion*, *sion*, and *tion*, are generally pronounced *shun*; and *cious* and *tious* are pronounced *shus*.

*Ie* is commonly an improper diphthong. *Ie* in *die*, *hie*, *lie*, *pie*, *tie*, *vie*, and their derivatives, has the sound of *open i*. *Ie* in words from the French, (as *cap-a-pie*, *ecurie*, *grenadier*, *siege*, *bier*,) has the sound of *open e*. So, generally, in the middle of English roots; as in *chief*, *grief*, *thief*; but, in *sieve*, it has the sound of *close* or *short i*. In *friend*, and its derivatives or compounds, it takes the sound of *close e*.

## TRIPHTHONGS BEGINNING WITH I.

The triphthongs *ieu* and *iew* both sound like open or long *u*; as in *lieu*, *adieu*, *view*.

The three vowels *iou*, in the termination *iou*s, often fall into one syllable, and form a triphthong. There are two hundred and forty-five words of this ending; and more than two hundred derivatives from them. Walker has several puzzling inconsistencies in their pronunciation; such as *fas-tid-i-ous* and *per-fid-i-ous*, *con-ta-gi-ous* and *sac-ri-le-gious*. After *c*, *g*, *t*, or *x*, these vowels should coalesce: as in *gra-cious*, *re-li-gious*, *vex-a-tious*, *ob-nox-i-ous*, and about two hundred other words. After the other consonants, let them form two syllables; (except when there is a syn-eresis in poetry;) as in *dw-bi-ou-s*, *o-di-ous*, *va-ri-ous*, *en-vi-ous*.

## X. OF THE LETTER J.

The consonant *J*, the tenth letter of the English alphabet, has invariably the sound of *soft g*, like the *g* in *giant*, which some say is equivalent to the complex sound *dz**h*; as, *jade*, *jet*, *jilt*, *joy*, *justice*, *jewel*, *prejudice*.

## XI. OF THE LETTER K.

The consonant *K*, not silent, has uniformly the sound of *c* hard; and occurs where *c* would have its soft sound: as in *keep*, *looking*, *kind*, *smoky*.

*K* before *n* is silent; as in *knave*, *know*, *knuckle*. In stead of doubling *c* *final*, we write *ck*; as in *lack*, *lock*, *luck*, *attack*. In English words, *k* is never doubled, though two Kays may come together in certain compounds; as in *brickkiln*, *jackknife*. Two Kays, belonging to different syllables, also stand together in a few Scripture names; as in *Akkub*, *Bakbakkar*, *Bukki*, *Bukkiah*, *Habakkuk*. *Hakkoz*, *Ikkesh*, *Sukkims*. *C* before *k*, though it does not always double the sound which *c* or *k* in such a situation must represent, always shuts or shortens the preceding vowel; as in *rack*, *speck*, *freckle*, *cockle*, *wicked*.

## XII. OF THE LETTER L.

The consonant *L*, the plainest of the semivowels, has a soft, liquid sound; as in *line*, *lily*, *roll*, *follow*. *L* is sometimes silent; as in *Holmes*, *alms*, *almond*, *calm*, *chalk*, *walk*, *calf*, *half*, *could*, *would*, *should*. *L*, too, is frequently doubled where it is heard but once; as in *hill*, *full*, *travelled*. So any letter that is written twice, and not twice sounded, must there be once mute; as the last in *baa*, *ebb*, *add*, *see*, *staff*, *egg*, *all*, *inn*, *coo*, *err*, *less*, *buzz*.

## XIII. OF THE LETTER M.

The consonant *M* is a semivowel and a liquid, capable of an audible, humming sound through the nose, when the mouth is closed. It is heard in *map*, *murmur*, *mammon*. In the old words, *compt*, *accompt*, *comptroller*, (for *count*, *account*, *controller*,) the *m* is sounded as *n*. *M* before *n*, at the beginning of a word, is silent; as in *Mnason*, *Mnemosyne*, *mnemonics*.

## XIV. OF THE LETTER N.

The consonant *N*, which is also a semivowel and a liquid, has two sounds;—the first, the pure and natural sound of *n*; as in *nun*, *banner*, *cannon*;—the second, the ringing sound of *ng*, heard before certain gutturals; as in *think*, *mangle*, *conquer*, *Congress*, *singing*, *twinkling*, *Cen'chreä*. The latter sound should be carefully preserved in all words ending in *ing*, and in such others as require it. The sounding of the syllable *ing* as if it

were *in*, is a vulgarism in utterance; and the writing of it so, is, as it would seem by the usage of Burns, a Scotticism.

*N final* preceded by *m*, is silent; as in *hymn*, *solemn*, *column*, *damn*, *condemn*, *autumn*. But this *n* becomes audible in an additional syllable; as in *autumnal*, *condemnable*, *damning*.

## XV. OF THE LETTER O.

The vowel *O* has *three* different sounds, which are properly its own:—

1. The open, full, primal, or long *o*; as in *no*, *note*, *opiate*, *opacity*, *Roman*.
2. The close, curt, short, or stopped *o*; as in *not*, *nor*, *torrid*, *dollar*, *fondle*.
3. The slender or narrow *o*, like *oo*; as in *prove*, *move*, *who*, *to*, *do*, *tomb*.

*O*, in many words, sounds like *close* or *curt u*; as in *love*, *shove*, *son*, *come*, *nothing*, *dost*, *attorney*, *gallon*, *dragon*, *comfit*, *comfort*, *coloration*. *One* is pronounced *wun*; and *once*, *wunce*. In the termination *on* immediately after the accent, *o* is often sunk into a sound scarcely perceptible, like that of *obscure e*; as in *mason*, *person*, *lesson*.

## DIPHTHONGS BEGINNING WITH O.

*Oa*, an improper diphthong, has the sound of *open* or *long o*; as in *boat*, *coal*, *roach*, *coast*, *coastwise*: except in *broad* and *groat*, which have the sound of *broad a*.

*Oe*, an improper diphthong, when *final*, has the sound of *open* or *long o*: as in *doe*, *foe*, *throe*: except in *canoe*, *shoe*, pronounced *canoo*, *shoo*. *OE*, a Latin diphthong, generally sounds like *open e*; as in *Antoeci*, *foetus*: sometimes, like *close* or *curt e*; as in *foetid*, *foeticide*. But the English word *fétid* is often, and perhaps generally, written without the *o*.

*Oi* is generally a proper diphthong, uniting the sound of *close o* or *broad a*, and that of *open e*; as in *boil*, *coil*, *soil*, *rejoice*. But the vowels, when they appear together, sometimes belong to separate syllables; as in *Stoic*, *Stoicism*. *Oi* unaccented, sometimes has the sound of *close* or *curt i*; as in *avoirdupois*, *connoisseur*, *tortoise*.

*Oo*, an improper diphthong, generally has the slender sound of *o*; as in *coo*, *too*, *woo*, *fool*, *room*. It has, in some words, a shorter or closer sound, (like that of *u* in *bull*,) as in *foot*, *good*, *wood*, *stood*, *wool*;—that of *close u* in *blood* and *flood*;—and that of *open o* in *door* and *floor*. Derivatives from any of these, sound as their primitives.

*Ou* is generally a proper diphthong, uniting the sound of *close* or *curt o*, and that of *u* as heard in *bull*,—or *u* sounded as *oo*; as in *bound*, *found*, *sound*, *ounce*, *thou*. *Ou* is also, in certain instances, an improper diphthong; and, as such, it has *six* different sounds:—(1.) That of *close* or *curt u*; as in *rough*, *tough*, *young*, *flourish*. (2.) That of *broad a*; as in *ought*, *bought*, *thought*. (3.) That of *open* or *long o*; as in *court*, *dough*, *four*, *though*. (4.) That of *close* or *curt o*; as in *cough*, *trough*, *lough*, *shough*: which are, I believe, the only examples. (5.) That of *slender o*, or *oo*; as in *soup*, *you*, *through*. (6.) That of *u* in *bull*, or of *oo* shortened; only in *would*, *could*, *should*.

*Ow* generally sounds like the proper diphthong *ou*,—or like a union of *short o* with *oo*; as in *brown*, *dowry*, *now*, *shower*: but it is often an improper diphthong, having only the sound of *open* or *long o*; as in *know*, *show*, *stow*.

*Oy* is a proper diphthong, equivalent in sound to *oi*; as in *joy*, *toy*, *oyster*.

#### TRIPHTHONGS BEGINNING WITH O.

*Œu* is a French triphthong, pronounced in English as *oo*, and occurring in the word *manoeuvre*, with its several derivatives. *Owe* is an improper triphthong, and an English word, in which the *o* only is heard, and heard always with its long or open sound.

#### XVI. OF THE LETTER P.

The consonant *P*, when not written before *h*, has commonly one peculiar sound; which is heard in *pen*, *pine*, *sup*, *supper*. The word *cupboard* is usually pronounced *kubburd*. *P*, written with an audible consonant, is sometimes itself silent; as in *psalm*, *psalter*, *pseudography*, *psychology*, *ptarmigan*, *ptyalism*, *receipt*, *corps*.

*Ph* generally sounds like *f*; as in *philosophy*. In *Stephen* and *nephew*, *ph* has the sound of *v*. The *h* after *p*, is silent in *diphthong*, *triphthong*, *naphtha*, *ophthalmic*; and both the *p* and the *h* are silent in *apophthegm*, *phthisis*, *phthisical*. From the last three words, *ph* is sometimes dropped.

#### XVII. OF THE LETTER Q.

The consonant *Q*, being never silent, never final, never doubled, and not having a sound peculiar to itself, is invariably heard, in English, with the power of *k*; and is always followed by the vowel *u*, which, in words *purely English*, is sounded like the narrow *o*, or *oo*,—or, perhaps, is squeezed into the consonantal sound of *w*;—as in *queen*, *quaver*, *quiver*, *quarter*, *request*. In some words of *French* origin, the *u* after *q* is silent; as in *coquet*, *liquor*, *burlesque*, *etiquette*.

#### XVIII. OF THE LETTER R.

The consonant *R*, called also a semivowel and a liquid, has usually, at the beginning of a word, or before a vowel, a rough or pretty strong sound; as in *roll*, *rose*, *roam*, *proudly*, *prorogue*. “In other positions,” it is said by many to be “smooth” or “soft;” “as in *hard*, *ford*, *word*.”—*W. Allen*.

#### OBSERVATIONS.

OBS. 1.—The letter *R* turns the tip of the tongue up against or towards the roof of the mouth, where the sound may be lengthened, roughened, trilled, or quavered. Consequently, this element may, at the will of the speaker, have more or less—little or nothing, or even very much—of that peculiar roughness, jar, or whur, which is commonly said to constitute the sound. The extremes should here be avoided. Some readers very improperly omit the sound of *r* from many words to which it pertains; pronouncing *or* as *awe*, *nor* as *knew*, *for* as *faugh*, and *war* as the first syllable of *water*. On the other hand, “The excessive *trilling* of the *r*, as practised by some speakers, is a great fault.”—D. P. Page.

OBS. 2.—Dr. Johnson, in his “Grammar of the English Tongue,” says, “*R* has the same *rough snarling sound* as in other tongues.”—P. 3. Again, in his Quarto Dictionary, under this letter, he says, “*R* is called the *canine letter*, because it is uttered *with some resemblance to the growl or snarl of a cur*: it has *one constant sound* in English, such as it

has in other languages; as, *red, rose, more, muriatick*.” Walker, however, who has a greater reputation as an orthoepist, teaches that, “There is a distinction in the sound of this letter, which is,” says he, “in my opinion, *of no small importance*; and that is, the [distinction of] the rough and [the] smooth *r*. Ben Jonson,” continues he, “in his Grammar, says, ‘It is sounded firm in the beginning of words, and more liquid in the middle and ends, as in *rarer, riper*; and so in the Latin.’ The rough *r* is formed by jarring the tip of the tongue against the roof of the mouth near the fore teeth: the smooth *r* is a vibration of the lower part of the tongue, near the root, against the inward region of the palate, near the entrance of the throat.”—*Walker’s Principles*, No. 419; *Octavo Dict.*, p. 48.

OBS. 3.—Wells, with his characteristic indecision, forbears all recognition of this difference, and all intimation of the quality of the sound, whether smooth or rough; saying, in his own text, only this: “*R* has the sound heard in *rare*.”—*School Grammar*, p. 40. Then, referring the student to sundry authorities, he adds in a footnote certain “quotations,” that are said to “present a general view of the different opinions which exist among orthoepists respecting this letter.” And so admirably are these authorities or opinions balanced and offset, one class against an other, that it is hard to tell which has the odds. First, though it is not at all probable that Wells’s utterance of “*rare*” exhibits twice over the *rough snarl* of Johnson’s *r*, the “general view” seems intended to confirm the indefinite teaching above, thus: ““*R* has one constant sound in English.”—*Johnson*. The same view is adopted by Webster, Perry, Kendrick, Sheridan, Jones, Jameson, Knowles, and others.”—*School Grammar*, p. 40. In counterpoise of these, Wells next cites about as many more—namely, Frazee, Page, Russell, Walker, Rush, Barber, Comstock, and Smart,—as maintaining or admitting that *r* has sometimes a rough sound, and sometimes a smoother one.

## XIX. OF THE LETTER S.

The consonant *S* has a sharp, hissing, or hard sound; as in *sad, sister, thus*; and a flat, buzzing, or soft sound, like that of *z*; as in *rose, dismal, bosom, husband*. *S*, at the beginning of words, or after any of the sharp consonants, is always sharp; as in *see, steps, cliffs, sits, stocks, smiths*. *S*, after any of the flat mutes, or at the end of words when not preceded by a sharp consonant, is generally flat; as in *eyes, trees, beds, bags, calves*. But in the English termination *ous*, or in the Latin *us*, it is sharp; as *joyous, vigorous, hiatus*.

*Ss* is generally sharp; as in *pass, kiss, harass, assuage, basset, cassock, remissness*. But the first two Esses in *possess*, or any of its regular derivatives, as well as the two in *dissolve*, or its proximate kin, sound like two Zees; and the soft or flat sound is commonly given to each *s* in *hyssop, hussy, and hussar*. In *scissel, scissible, and scissile*, all the Esses hiss;—in *scissors*, the last three of the four are flat, like *z*;—but in the middle of *scissure* and *scission* we hear the sound of *zh*.

*S*, in the termination *sion*, takes the sound of *sh*, after a consonant; as in *aspersion, session, passion, mission, compulsion*: and that of *zh*, after a vowel; as in *evasion, elision, confusion*.

In the verb *assure*, and each of its derivatives, also in the nouns *pressure* and *fissure*, with their derivatives, we hear, according to Walker, the sound of *sh* for each *s*, or twice in each word; but, according to the orthoëpy of Worcester, that sound is heard only in the accented syllable of each word, and the vowel in each unaccented syllable is *obscure*.

*S* is silent or mute in the words, *isle*, *island*, *aisle*, *demesne*, *corps*, and *viscount*.

## XX. OF THE LETTER T.

The general sound of the consonant *T*, is heard in *time*, *letter*, *set*. *T*, immediately after the accent, takes the sound of *tch*, before *u*, and generally also before *eou*; as in *nature*, *feature*, *virtue*, *righteous*, *courteous*: when *s* or *x* precedes, it takes this sound before *ia* or *io*; as in *fustian*, *bastion*, *mixture*. But the general or most usual sound of *t* after the accent, when followed by *i* and an other vowel, is that of *sh*; as in *creation*, *patient*, *cautious*.

In English, *t* is seldom, if ever, silent or powerless. In *depot*, however, a word borrowed from the French, we do not sound it; and in *chestnut*, which is a compound of our own, it is much oftener written than heard. In *often* and *soften*, some think it silent; but it seems rather to take here the sound of *f*. In *chasten*, *hasten*, *fasten*, *castle*, *nestle*, *whistle*, *apostle*, *epistle*, *bustle*, and similar words, with their sundry derivatives, the *t* is said by some to be mute; but here it seems to take the sound of *s*; for, according to the best authorities, this sound is beard twice in such words. *Th*, written in Greek by the character called *Theta*, (Θ or θ capital, ϑ or θ small,) represents an elementary sound; or, rather, two distinct elementary sounds, for which the Anglo-Saxons had different characters, supposed by Dr. Bosworth to have been applied with accurate discrimination of “the *hard* or *sharp* sound of *th*,” from “the *soft* or *flat* sound.”—(See *Bosworth’s Compendious Anglo-Saxon Dictionary*, p. 268.) The English *th* is either sharp, as in *thing*, *ethical*, *thinketh*; or flat, as in *this*, *whither*, *thither*.

“*Th* initial is sharp; as in *thought*: except in *than*, *that*, *the*, *thee*, *their*, *them*, *then*, *thence*, *there*, *these*, *they*, *thine*, *this*, *thither*, *those*, *thou*, *thus*, *thy*, and their compounds.”—*W. Allen’s Grammar*, p. 22.

*Th* final is also sharp; as in *south*: except in *beneath*, *booth*, *with*, and several verbs formerly with *th* last, but now frequently (and more properly) written with final *e*; as *loathe*, *mouthe*, *seethe*, *soothe*, *smoothe*, *clothe*, *wreathe*, *bequeathe*, *unclothe*.

*Th* medial is sharp, too, when preceded or followed by a consonant; as in *Arthur*, *ethnic*, *swarthy*, *athwart*: except in *brethren*, *burthen*, *farther*, *farthing*, *murther*, *northern*, *worthy*. But “*th* between two vowels, is generally flat in words purely English; as in *gather*, *neither*, *whither*: and sharp in words from the learned languages; as in *atheist*, *ether*, *method*”—See *W. Allen’s Gram.*, p. 22.

“*Th*, in *Thames*, *Thomas*, *thyme*, *asthma*, *phthisis*, and their compounds, is pronounced like *t*.”—*Ib.*

## XXI. OF THE LETTER U.

The vowel *U* has three sounds which may be considered to be properly its own:—

1. The open, long, full, primal, or diphthongal *u*; as in *tube*, *cubic*, *juvenile*.
2. The close, curt, short, or stopped *u*; as in *tub*, *butter*, *justice*, *unhung*.
3. The middle *u*, resembling a short or quick *oo*; as in *pull*, *pulpit*, *artful*.

*U* forming a syllable by itself or *U* as naming itself is nearly equivalent in sound to *you*, and requires the article *a*, and not *an*, before it; as, *a U*, *a union*.

*U* sometimes borrows the sound of some other vowel; for *bury* is pronounced *berry*, and *busy* is pronounced *bizzy*. So in the derivatives, *burial*, *buried*, *busied*, *busily*, and the like.

The long or diphthongal *u*, commonly sounded as *yu*, or as *ew* in *ewer*,—or any equivalent diphthong or digraph, as *ue*, *ui*, *eu*, or *ew*.—when it follows *r* or *rh*, assumes the sound of slender *o* or *oo*; as in *rude*, *rhubarb*, *rue*, *rueful*, *rheum*, *fruit*, *truth*, *brewer*.

#### DIPHTHONGS BEGINNING WITH U.

*U*, in the proper diphthongs, *ua*, *ue*, *ui*, *uo*, *uy*, has the sound of *w* or of *oo feeble*; as in *persuade*, *query*, *quell*, *quiet*, *languid*, *quote*, *obloquy*.

*Ua*, an improper diphthong, has the sound—1. Of *middle a*; as in *guard*, *guardian*. 2. Of *close a*; as in *guarantee*, *piquant*. 3. Of *obscure e*; as in *victuals* and its compounds or kindred. 4. Of *open u*; as in *mantuamaker*.

*Ue*, an improper diphthong, has the sound—1. Of *open u*; as in *blue*, *ensue*, *ague*. 2. Of *close e*; as in *guest*, *guesser*. 3. Of *close u*; as in *leaguer*. *Ue final* is sometimes silent; as in *league*, *antique*. *Ui*, an improper diphthong, has the sound—1. Of *open i*; as in *guide*, *guile*. 2. Of *close i*; as in *conduit*, *circuit*. 3. Of *open u*; as in *juice*, *sluice*, *suit*.

*Uo* can scarcely be called an improper diphthong, except, perhaps, after *q* in *liquor*, *liquorice*, *liquorish*, where *uor* is heard as *ur*.

*Uy*, an improper diphthong, has the sound—1. Of *open y*; as in *buy*, *buyer*. 2. Of *feeble y*, or of *ee feeble*; as in *plaguy*, *roguy*.

#### TRIPHTHONGS BEGINNING WITH U.

*Uai* is pronounced nearly, if not exactly, like *way*; as in *guai-a-cum*, *quail*, *quaint*. *Uaw* is sounded like *wa* in *water*; as in *squaw*, a female Indian. *Uay* has the sound of *way*; as in *Par-a-quay*: except in *quay*, which nearly all our orthoepists pronounce *kee*. *Uea* and *uee* are each sounded *wee*; as in *queasy*, *queer*, *squeal*, *squeeze*. *Uoi* and *woy* are each sounded *woi*; as in *quoit*, *buoy*. Some say, that, as *u*, in these combinations, sounds like *w*, it is a consonant; others allege, that *w* itself has only the sound of *oo*, and is therefore in all cases a vowel. *U* has, certainly, in these connexions, as much of the sound of *oo*, as has *w*; and perhaps a little more.

#### XXII. OF THE LETTER V.

The consonant *V* always has a sound like that of *f flattened*; as in *love*, *vulture*, *vivacious*. In pure English, it is never silent, never final, never doubled: but it is often doubled in the dialect of Craven; and there, too, it is sometimes final.

#### XXIII. OF THE LETTER W.

*W*, when reckoned a *consonant*, (as it usually is when uttered with a vowel that follows it,) has the sound heard at the beginning of *wine*, *win*, *woman*, *woody*; being a sound less vocal than that of *oo*, and depending more upon the lips.

*W* before *h*, is usually pronounced as if it followed the *h*; as in *what*, *when*, *where*, *while*: but, in *who*, *whose*, *whom*, *whole*, *whoop*, and words formed from these, it is silent. Before *r*, in the same syllable, it is also silent; as in *wrath*, *wrench*, *wrong*. So in a few other cases; as in *sword*, *answer*, *two*.

*W* is never used alone as a *vowel*; except in some Welsh or foreign names, in which it is equivalent to *oo*; as in “*Cwm Cothy*,” the name of a mountain in Wales; “*Wkra*” the name of a small river in Poland.—See *Lockhart’s Napoleon*, Vol. ii, p. 15. In a diphthong, when heard, it has the power of *u* in *bull*, or nearly that of *oo*; as in *new*, *now*, *brow*, *frown*. *Aw* and *ow* are frequently improper diphthongs, the *w* being silent, the *a* broad, and the *o* long; as in *law*, *flaw*,—*tow*, *snow*. *W*, when sounded before vowels, being reckoned a *consonant*, we have no diphthongs or triphthongs beginning with this letter.

#### XXIV. OF THE LETTER X.

The consonant “*X* has a *sharp* sound, like *ks*; as in *ox*: and a *flat* one, like *gz*; as in *example*. *X* is sharp, when it ends an accented syllable; as in *exercise*, *exit*, *excellence*: or when it precedes an accented syllable beginning with a consonant; as in *expand*, *extreme*, *expunge*. *X* unaccented is generally flat, when the next syllable begins with a vowel; as in *exist*, *exemption*, *exotic*. *X* initial, in Greek proper names, has the sound of *z*; as in *Xanthus*, *Xantippe*, *Xenophon*, *Xerxes*”—See *W. Allen’s Gram.*, p. 25.

#### XXV. OF THE LETTER Y.

*Y*, as a *consonant*, has the sound heard at the beginning of *yarn*, *young*, *youth*; being rather less vocal than the feeble sound of *i*, or of the vowel *y*, and serving merely to modify that of a succeeding vowel, with which it is quickly united. *Y*, as a vowel, has the same sounds as *i*:—

1. The open, long, full, or primal *y*; as in *cry*, *crying*, *thyme*, *cycle*.
2. The close, curt, short, or stopped *y*; as in *system*, *symptom*, *cynic*.
3. The feeble or faint *y*, accentless; (like *open e* feeble;) as in *cymar*, *cycloidal*, *mercy*.

The vowels *i* and *y* have, in general, exactly the same sound under similar circumstances, and, in forming derivatives, we often change one for the other: as in *city*, *cities*; *tie*, *tying*; *easy*, *easily*.

*Y*, before a vowel heard in the same syllable, is reckoned a *consonant*; we have, therefore, no diphthongs or triphthongs *commencing* with this letter.

#### XXVI. OF THE LETTER Z.

The consonant *Z*, the last letter of our alphabet, has usually a soft or buzzing sound, the same as that of *s* flat; as in *Zeno*, *zenith*, *breeze*, *dizzy*. Before *u* primal or *i* feeble, *z*, as well as *s* flat, sometimes takes the sound of *zh*, which, in the enumeration of consonantal sounds, is reckoned a distinct element; as in *azure*, *seizure*, *glazier*; *osier*, *measure*, *pleasure*.

**APPENDIX II.****TO PART SECOND, OR ETYMOLOGY.  
OF THE DERIVATION OF WORDS.**

Derivation, as a topic to be treated by the grammarian, is a species of Etymology, which explains the various methods by which those derivative words which are not formed by mere grammatical inflections, are deduced from their primitives. Most of those words which are regarded as primitives in English, may be traced to ulterior sources, and many of them are found to be compounds or derivatives in the other languages from which they have come to us. To show the composition, origin, and literal sense of these, is also a part, and a highly useful part, of this general inquiry, or theme of instruction.

This species of information, though insignificant in those whose studies reach to nothing better,—to nothing valuable and available in life,—is nevertheless essential to education and to science; because it is essential to a right understanding of the import and just application of such words. All reliable etymology, all authentic derivation of words, has ever been highly valued by the wise. The learned James Harris has a remark as follows: “How useful to ETHIC SCIENCE, and indeed to KNOWLEDGE in general, a GRAMMATICAL DISQUISITION into the *Etymology* and *Meaning* of WORDS was esteemed by the chief and ablest Philosophers, may be seen by consulting *Plato* in his *Cratylus*; *Xenophon’s Memorabilia*, IV, 5, 6; *Arrian. Epict.* I, 17; II, 10; *Marc. Anton.* III, 11;” &c.—See *Harris’s Hermes*, p. 407.

A knowledge of the *Saxon*, *Latin*, *Greek*, and *French* languages, will throw much light on this subject, the derivation of our modern English; nor is it a weak argument in favour of studying these, that our acquaintance with them, whether deep or slight, tends to a better understanding of what is borrowed, and what is vernacular, in our own tongue. But etymological analysis may extensively teach the origin of English words, their composition, and the import of their parts, without demanding of the student the power of reading foreign or ancient languages, or of discoursing at all on General Grammar. And, since many of the users of this work may be but readers of our current English, to whom an unknown letter or a foreign word is a particularly uncouth and repulsive thing, we shall here forbear the use of Saxon characters, and, in our explanations, not go beyond the precincts of our own language, except to show the origin and primitive import of some of our definitive and connecting particles, and to explain the prefixes and terminations which are frequently employed to form English derivatives.

The rude and cursory languages of barbarous nations, to whom literature is unknown, are among those transitory things which, by the hand of time, are irrecoverably buried in oblivion. The fabric of the English language is undoubtedly of *Saxon* origin; but what was the particular form of the language spoken by the *Saxons*, when about the year 450 they entered Britain, cannot now be accurately known. It was probably a dialect of the *Gothic* or *Teutonic*. This *Anglo-Saxon* dialect, being the nucleus, received large accessions from other tongues of the north, from the *Norman French*, and from the more polished languages of *Rome* and *Greece*, to form the modern *English*. The speech of our rude and warlike ancestors thus gradually improved, as Christianity, civilization, and knowledge, advanced the arts of life in Britain; and, as early as the tenth century, it became a language capable of expressing all the sentiments of a civilized people. From the time of

*Alfred*, its progress may be traced by means of writings which remain; but it can scarcely be called *English*, as I have shown in the Introduction to this work, till about the thirteenth century. And for two or three centuries later, it was so different from the modern English, as to be scarcely intelligible at all to the mere English reader; but, gradually improving by means upon which we need not here dilate, it at length became what we now find it,—a language copious, strong, refined, impressive, and capable, if properly used, of a great degree of beauty and harmony.

## SECTION I.—DERIVATION OF THE ARTICLES.

1. For the derivation of our article THE, which he calls “*an adjective*,” Dr. Webster was satisfied with giving this hint: “Sax. *the*; Dutch, *de*.”—*Amer. Dict.* According to Horne Tooke, this definite article of ours, is the Saxon *verb* “THE,” imperative, from THEAN, to *take*; and is nearly equivalent in meaning to *that* or *those*, because our *that* is “the past participle of THEAN,” and “means *taken*.”—*Diversions of Purley*, Vol. ii, p. 49. But this is not very satisfactory. Examining ancient works, we find the word, or something resembling it, or akin to it, written in various forms, as *se, see, ye, te, de, the, thá*, and others that cannot be shown by our modern letters; and, tracing it as one article, or one and the same word, through what we suppose to be the oldest of these forms, in stead of accounting the forms as signs of different roots, we should sooner regard it as originating in the imperative of SEON, *to see*.

2. AN, our indefinite article, is the Saxon *oen, ane, an*, ONE; and, by dropping *n* before a consonant, becomes *a*. Gawin Douglas, an ancient English writer, wrote *ane*, even before a consonant; as, “*Ane* book,”—“*Ane* lang spere,”—“*Ane* volume.”

## OBSERVATIONS.

OBS. 1.—The words of Tooke, concerning the derivation of *That* and *The*, as nearly as they can be given in our letters, are these: “THAT (in the Anglo-Saxon Thæt, i.e. Thead, Theat) means *taken, assumed*; being merely the past participle of the Anglo-Saxon verb Thean, Thegan, Thion, Thihan, Thicgan, Thigian; sumere, assumere, accipere; to THE, to *get*, to *take*, to *assume*.

‘Ill mote he THE That caused me  
To make myselfe a frere.’—*Sir T. More’s Workes*, pag. 4.

THE (our *article*, as it is called) is the imperative of the same verb Thean: which may very well supply the place of the correspondent Anglo-Saxon article Se, which is the imperative of Seon, videre: for it answers the same purpose in discourse, to say.... *see* man, or *take* man.”—*Diversions of Purley*, Vol. ii, p. 49.

OBS. 2.—Now, between *Thæt* and *Theat*, there is a considerable difference of form, for *æ* and *ea* are not the same diphthong; and, in the identifying of so many infinitives, as forming but one verb, there is room for error. Nor is it half so probable that these are truly one root, as that our article *The* is the same, in its origin, as the old Anglo-Saxon *Se*. Dr. Bosworth, in his Anglo-Saxon Dictionary, gives no such word as *Thean* or *Thegan*, no such participle as *Thead* or *Theat*, which derivative is perhaps imaginary; but he has inserted together “Thicgan, thicgean, thigan, *to receive, or take*,” and separately, “Theon, *to thrive, or flourish*,”—“Thihan, *to thrive*,”—and “Thion, *to flourish*,” as well as the preterit “Theat, *howled*,” from “Theotan, *to howl*.” And is it not plain, that the old verb “THE,” as

used by More, is from Theon, *to thrive*, rather than from Thicgan, *to take*? “Ill mote he THE”—“Ill might he *thrive*,” not, “Ill might he *take*.”

OBS. 3.—Professor Hart says, “The word *the* was originally *thæt*, or *that*. In course of time [,] it became abbreviated, and the short form acquired, in usage, a shade of meaning different from the original long one. *That* is demonstrative with emphasis; *the* is demonstrative without emphasis.”—*Hart’s E. Grammar*, p. 32. This derivation of *The* is quite improbable; because the shortening of a monosyllable of five letters by striking out the third and the fifth, is no usual mode of abbreviation. Bosworth’s Dictionary explains THE as “An indeclinable article, often used for all the cases of Se, seo, thæt, especially in adverbial expressions and in corrupt Anglo-Saxon, as in the *Chronicle* after the year 1138.”

OBS. 4—Dr. Latham, in a section which is evidently neither accurate nor self-consistent, teaches us—“that there exist in the present English two powers of the word spelled *t-h-e*, or of the so-called definite article;” then, out of sixteen Anglo-Saxon equivalents, he selects two for the roots of this double-powered *the*; saying, “Hence the *the* that has originated out of the Anglo-Saxon *thy* is one word; whilst the *the* that has originated out of the Anglo-Saxon *the*, [is] another. The latter is the common article: the former the *the* in expressions like *all the more*, *all the better*—*more by all that*, *better by all that*, and the Latin phrases *eo majus*, *eo melius*.”—Latham’s Hand-Book, p. 158. This double derivation is liable to many objections. The Hand-Book afterwards says, “That the, in expressions like *all the more*, *all the better*, &c., is *no article*, has already been shown.”—P. 196. But in fact, though *the* before comparatives or superlatives be no article, Dr. Latham’s etymologies prove no such thing; neither does he anywhere tell us what it is. His examples, too, with their interpretations, are all of them fictitious, ambiguous, and otherwise bad. It is uncertain whether he meant his phrases for counterparts to each other or not. If *the* means “*by that*,” or *thereby*, it is an *adverb*; and so is its equivalent “eo” denominated by the Latin grammarians. See OBS. 10, under Rule I.

## SECTION II.—DERIVATION OF NOUNS.

In *English*, Nouns are derived from nouns, from adjectives, from verbs, or from participles.

I. Nouns are derived from *Nouns* in several different ways:—

1. By the adding of *ship*, *dom*, *ric*, *wick*, *or*, *ate*, *hood*, or *head*: as, *fellow*, *fellowship*; *king*, *kingdom*; *bishop*, *bishopric*; *bailiff*, or *baily*, *bailiwick*; *senate*, *senator*; *tetrarch*, *tetrarchate*; *child*, *childhood*; *God*, *Godhead*. These generally denote dominion, office, or character.

2. By the adding of *ian*: as, *music*, *musician*; *physic*, *physician*; *theology*, *theologian*; *grammar*, *grammarian*; *college*, *collegian*. These generally denote profession.

3. By the adding of *r*, *ry*, or *ery*: as, *grocer*, *grocery*; *cutler*, *cutlery*; *slave*, *slavery*; *scene*, *scenery*; *fool*, *foolery*. These sometimes denote state or habit; sometimes, an artificer’s wares or shop.

4. By the adding of *age* or *ade*: as, *patron*, *patronage*; *porter*, *portorage*; *band*, *bandage*; *lemon*, *lemonade*; *baluster*, *balustrade*; *wharf*, *wharfage*; *vassal*, *vassalage*.

5. By the adding of *kin*, *let*, *ling*, *ock*, *el*, *erel*, or *et*: as, *lamb*, *lambkin*; *ring*, *ringlet*; *cross*, *crosslet*; *duck*, *duckling*; *hill*, *hillock*; *run*, *runnel*; *cock*, *cockerel*; *pistol*, *pistolet*; *eagle*, *eaglet*; *circle*, *circlet*. All these denote little things, and are called diminutives.

6. By the addition of *ist*: as, *psalm*, *psalmist*; *botany*, *botanist*; *dial*, *dialist*; *journal*, *journalist*. These denote persons devoted to, or skilled in, the subject expressed by the primitive.

7. By the prefixing of an adjective, or an other noun, so as to form a compound word: as, *foreman*, *broadsword*, *statesman*, *tradesman*; *bedside*, *hillside*, *seaside*; *bear-berry*, *bear-fly*, *bear-garden*; *bear's-ear*, *bear's-foot*, *goat's-beard*.

8. By the adoption of a negative prefix to reverse the meaning: as, *order*, *disorder*; *pleasure*, *displeasure*; *consistency*, *inconsistency*; *capacity*, *incapacity*; *observance*, *nonobservance*; *resistance*, *nonresistance*; *truth*, *untruth*; *constraint*, *unconstraint*.

9. By the use of the prefix *counter*, signifying *against* or *opposite*: as, *attraction*, *counter-attraction*; *bond*, *counter-bond*; *current*, *counter-current*; *movement*, *counter-movement*.

10. By the addition of *ess*, *ix*, or *ine*, or the changing of masculines to feminines so terminating: as, *heir*, *heiress*; *prophet*, *prophetess*; *abbot*, *abbess*; *governor*, *governess*; *testator*, *testatrix*; *hero*, *heroine*.

## II. Nouns are derived from *Adjectives* in several different ways:—

1. By the adding of *ness*, *ity*, *ship*, *dom*, or *hood*: as, *good*, *goodness*; *real*, *reality*; *hard*, *hardship*; *wise*, *wisdom*; *free*, *freedom*; *false*, *falsehood*.

2. By the changing of *t* into *ce* or *cy*: as, *radiant*, *radiance*; *consequent*, *consequence*; *flagrant*, *flagrancy*; *current*, *currency*; *discrepant*, *discrepance*, or *discrepancy*.

3. By the changing of some of the letters, and the adding of *t* or *th*: as, *long*, *length*; *broad*, *breadth*; *wide*, *width*; *high*, *height*. The nouns included under these three heads, generally denote abstract qualities, and are called abstract nouns.

4. By the adding of *ard*: as, *drunk*, *drunkard*; *dull*, *dullard*. These denote ill character.

5. By the adding of *ist*: as, *sensual*, *sensualist*; *separate*, *separatist*; *royal*, *royalist*; *fatal*, *fatalist*. These denote persons devoted, addicted, or attached, to something.

6. By the adding of *a*, the Latin ending of neuter plurals, to certain proper adjectives in *an*: as, *Miltonian*, *Miltoniana*; *Johnsonian*, *Johnsoniana*. These literally mean, *Miltonian things*, *sayings*, or *anecdotes*, &c.; and are words somewhat fashionable with the journalists, and are sometimes used for titles of books that refer to table-talk.

## III. Nouns are derived from *Verbs* in several different ways:—

1. By the adding of *ment*, *ance*, *ence*, *ure*, or *age*: as, *punish*, *punishment*; *abate*, *abatement*; *repent*, *repentance*; *condole*, *condolence*; *forfeit*, *forfeiture*; *stow*, *stowage*; *equip*, *equipage*; *truck*, *truckage*.

2. By a change of the termination of the verb, into *se*, *ce*, *sion*, *tion*, *ation*, or *ition*: as, *expand*, *expanse*, *expansion*; *pretend*, *pretence*, *pretension*; *invent*, *invention*; *create*, *creation*; *omit*, *omission*; *provide*, *provision*; *reform*, *reformation*; *oppose*, *opposition*. These denote either the act of doing, or the thing done.

3. By the adding of *er* or *or*: as, *hunt*, *hunter*; *write*, *writer*; *collect*, *collector*; *assert*, *assertor*; *instruct*, *instructor*, or *instructor*. These generally denote the doer. To denote the person to whom something is done, we sometimes form a derivative ending in *ee*: as, *promisee*, *mortgagee*, *appellee*, *consignee*.

4. Nouns and Verbs are sometimes alike in orthography, but different in pronunciation: as, a *house*, to *house*; a *use*, to *use*; a *reb'el*, to *rebel*; a *rec'ord*, to *record*; a *cem'ent*, to *cement*. Of such pairs, it may often be difficult to say which word is the primitive.

5. In many instances, nouns and verbs are wholly alike as to form and sound, and are distinguished by their sense and construction only: as, *love*, to *love*; *fear*, to *fear*; *sleep*, to *sleep*;—to *revise*, a *revise*; to *rebuke*, a *rebuke*. In these, we have but the same word used differently.

IV. Nouns are often derived from *Participles* in *ing*; as, a *meeting*, the *understanding*, *murmurings*, *disputings*, *sayings*, and *doings*: and, occasionally, one is formed from such a word and an adverb or a perfect participle joined with it; as, “The *turning-away*,”—“His *goings-forth*,”—“Your *having-boasted* of it.”

### SECTION III.—DERIVATION OF ADJECTIVES.

In *English*, Adjectives are derived from nouns, from adjectives, from verbs, or from participles.

I. Adjectives are derived from *Nouns* in several different ways:—

1. By the adding of *ous*, *ious*, *eous*, *y*, *ey*, *ic*, *al*, *ical* or *ine*: (sometimes with an omission or change of some of the final letters:) as, *danger*, *dangerous*; *glory*, *glorious*; *right*, *righteous*; *rock*, *rocky*; *clay*, *clayey*; *poet*, *poetic*, or *poetical*; *nation*, *national*; *method*, *methodical*; *vertex*, *vertical*; *clergy*, *clerical*; *adamant*, *adamantine*. Adjectives thus formed, generally apply the properties of their primitives, to the nouns to which they relate.

2. By the adding of *ful*: as, *fear*, *fearful*; *cheer*, *cheerful*; *grace*, *graceful*; *shame*, *shameful*; *power*, *powerful*. These come almost entirely from personal qualities or feelings, and denote abundance.

3. By the adding of *some*: as, *burden*, *burdensome*; *game*, *gamesome*; *toil*, *toilsome*. These denote plenty, but do not exaggerate.

4. By the adding of *en*: as, *oak*, *oaken*; *silk*, *silken*; *wheat*, *wheaten*; *oat*, *oaten*; *hemp*, *hempen*. Here the derivative denotes the matter of which something is made.

5. By the adding of *ly* or *ish*: as, *friend*, *friendly*; *gentleman*, *gentlemanly*; *child*, *childish*; *prude*, *prudish*. These denote resemblance. The termination *ly* signifies *like*.

6. By the adding of *able* or *ible*: as, *fashion*, *fashionable*; *access*, *accessible*. But these terminations are generally, and more properly, added to verbs. See Obs. 17th, 18th, &c., on the Rules for Spelling.

7. By the adding of *less*: as, *house*, *houseless*; *death*, *deathless*; *sleep*, *sleepless*; *bottom*, *bottomless*. These denote privation or exemption—the absence of what is named by the primitive.

8. By the adding of *ed*: as, *saint*, *sainted*; *bigot*, *bigoted*; *mast*, *masted*; *wit*, *witted*. These have a resemblance to participles, and some of them are rarely used, except when joined with some other word to form a compound adjective: as, *three-sided*, *bare-footed*, *long-eared*, *hundred-handed*, *flat-nosed*, *hard-hearted*, *marble-hearted*, *chicken-hearted*.

9. Adjectives coming from proper names, take various terminations: as, *America*, *American*; *England*, *English*; *Dane*, *Danish*; *Portugal*, *Portuguese*; *Plato*, *Platonic*.

10. Nouns are often converted into adjectives, without change of termination: as, *paper* currency; a *gold* chain; *silver* knee-buckles.

II. Adjectives are derived from *Adjectives* in several different ways:—

1. By the adding of *ish* or *some*: as, *white*, *whitish*; *green*, *greenish*; *lone*, *lonesome*; *glad*, *gladsome*. These denote quality with some diminution.

2. By the prefixing of *dis*, *in*, or *un*: as, *honest*, *dishonest*; *consistent*, *inconsistent*; *wise*, *unwise*. These express a negation of the quality denoted by their primitives.

3. By the adding of *y* or *ly*: as, *swarth*, *swarthy*; *good*, *goodly*. Of these there are but few; for almost all the derivatives of the latter form are adverbs.

III. Adjectives are derived from *Verbs* in several different ways:—

1. By the adding of *able* or *ible*: (sometimes with a change of some of the final letters:) as, *perish*, *perishable*; *vary*, *variable*; *convert*, *convertible*; *divide*, *divisible*, or *dividable*. These, according to their analogy, have usually a passive import, and denote susceptibility of receiving action. 2. By the adding of *ive* or *ory*: (sometimes with a change of some of the final letters:) as, *elect*, *elective*; *interrogate*, *interrogative*, *interrogatory*; *defend*, *defensive*; *defame*, *defamatory*; *explain*, *explanatory*.

3. Words ending in *ate*, are mostly verbs; but some of them may be employed as adjectives, in the same form, especially in poetry; as, *reprobate*, *complicate*.

IV. Adjectives are derived from *Participles*, not by suffixes, but in these ways:—

1. By the prefixing of *un*, meaning *not*; as, *unyielding*, *unregarded*, *unreserved*, *unendowed*, *unendeared*, *unendorsed*, *unencountered*, *unencumbered*, *undisheartened*, *undishonoured*. Of this sort there are very many.

2. By a combining of the participle with some word which does not belong to the verb; as, *way-faring*, *hollow-sounding*, *long-drawn*, *deep-laid*, *dear-purchased*, *down-trodden*. These, too, are numerous.

3. Participles often become adjectives without change of form. Such adjectives are distinguished from participles by their construction alone: as, “A *lasting* ornament;”—“The *starving* chymist;”—“Words of *learned* length;”—“With *counterfeited* glee.”

#### SECTION IV.—DERIVATION OF THE PRONOUNS.

I. The *English* Pronouns are all of *Saxon* origin; but, in them, our language differs very strikingly from that of the Anglo-Saxons. The following table compares the simple personal forms:—

|      |       |         |              |       |            |                  |               |
|------|-------|---------|--------------|-------|------------|------------------|---------------|
| Eng. | I,    | My or   | Mine,        | Me;   | We,        | Our or Ours,     | Us.           |
| Sax. | Ic,   |         | Min, Me or   | Mec;  | We,        | Ure or User,     | Us.           |
| Eng. | Thou, | Thy or  | Thine,       | Thee; | Ye,        | Your or Yours,   | You.          |
| Sax. | Thu,  |         | Thin, The or | Thec; | Ge         | Eower, Eow or    | Eowie.        |
| Eng. | He,   |         | His          | Him;  | They,      | Their or Theirs, | Them.         |
| Sax. | He,   | His or  | Hys, Him or  | Hine; | Hi or Hig, | Hira or Heora,   | Heom or Hi.   |
| Eng. | She,  | Her or  | Hers,        | Her;  | They,      | Their or Theirs, | Them.         |
| Sax. | Heo,  | Hire or | Hyre,        | Hi;   | Hi or Hig, | Hira or Heora,   | Heom or Hi.   |
| Eng. | It,   |         | Its,         | It;   | They,      | Their or Theirs, | Them.         |
| Sax. | Hit,  | His or  | Hys,         | Hit;  | Hi or Hig, | Hira or Heom     | Heora, or Hi. |

Here, as in the personal pronouns of other languages, the plurals and oblique cases do not all appear to be regular derivatives from the nominative singular. Many of these pronouns, perhaps all, as well as a vast number of other words of frequent use in our language, and in that from which it chiefly comes, were very variously written by the Middle English, Old English, Semi-Saxon, and Anglo-Saxon authors. He who traces the history of our language, will meet with them under all the following forms, (or such as these would be with Saxon characters for the Saxon forms,) and perhaps in more:—

1. I, J, Y, y, i, ay, ic, che, ich, Ic;—MY, mi, min, MINE, myne, myn;—ME, mee, me, meh, mec, mech;—WE, wee, ve;—OUR or OURS, oure, ure, wer, urin, uren, urne, user, usse, usser, usses, ussum;—Us, ous, vs, uss, usic, usich, usig, usih, uz, huz.

2. THOU, thoue, thow, thowe, thu, tou, to, tu;—THY or THINE, thi, thyne, thyn, thin;—THEE, the, theh, thec;—YE, yee, yhe, ze, zee, ge, ghe;—YOUR or YOURS, youre, zour, hure, goure, yer, yower, yowyer, yorn, yourn, youre, eower;—You, youe, yow, gou, zou, ou, iu, iuh, eow, iow, geow, eowih, eowic, iowih.

3. HE, hee, hie, se;—HIS, hise, is, hys, ys, hyse, hus;—HIM, hine, hiene, hion, hen, hyne, hym, im;—THEY, thay, thei, the, tha, thai, thii, yai, hi, hie, heo, hig, hyg, hy;—THEIR or THEIRS, ther, theyr, theyrs, thair, thare, theora, hare, here, her, hir, hire, hira, hiora,

hiera, heora, hyra;—THEM, thym, theym, thaym, thaim, thame, tham, em, hem, heom, hiom, eom, hom, him, hi, hig.

4. SHE, shee, sche, scho, sho, shoe, scæ, seo, heo, hio, hiu, hoo, hue;—HER, (possessive,) hur, hir, hire, hyr, hyre, hyra, hera;—HER, (objective,) hire, hyre, hur, hir, hi. The plural forms of this feminine pronoun are like those of the masculine *He*; but the “*Well-Wishers to Knowledge*,” in their small Grammar, (erroneously, as I suppose,) make *hira* masculine only, and *heora* feminine only. See their *Principles of Grammar*, p. 38.

5. It, yt, itt, hit, hyt, hytt. The possessive *Its* is a modern derivative; *His* or *Hys* was formerly used in lieu of it. The plural forms of this neuter pronoun, *It*, are like those of *He* and *She*. According to Horne Tooke, who declares *hoet* to have been one of its ancient forms, “this pronoun was merely the past participle of the verb HAITAN, *hætan*, nominare,” *to name*, and literally signifies “the said;” (*Diversions of Purley*, Vol. ii, p. 46; *W. Allen’s Gram.*, p. 57;) but Dr. Alexander Murray, exhibiting it in an other form, not adapted to this opinion, makes it the neuter of a declinable adjective, or pronoun, inflected from the masculine, thus: “He, heo hita, *this*”—*Hist. of Lang.*, Vol. i, p. 315.

II. The relatives and interrogatives are derived from the same source, the Anglo-Saxon tongue, and have passed through similar changes, or varieties in orthography; but, the common relative pronoun of the Anglo-Saxons being like their article *the*,—or, with the three genders, *se*, *seo*, *thæt*,—and not like our *who*, *which*, and *what*, it is probable that the interrogative use of these words was the primitive one. They have been found in all the following forms:—

1. WHO, ho, hue, wha, hwa, hua, wua, qua, quha;—WHOSE, who’s, whos, whois, whoise, wheas, quhois, quhais, quhase, hwæs;—WHOM, whome, quham, quhum, quhome, hwom, hwam, hwæm, hwæne, hwone.

2. WHICH, whiche, whyche, whilch, wych, quilch, quilk, quhilk, hwilc, hwylc, hwelc, whilk, huilic, hvilc. For the Anglo-Saxon forms, Dr. Bosworth’s Dictionary gives “*hwilc*, *hwylc*, and *hwelc*,” but Professor Fowler’s *E. Grammar* makes them “*huilic* and *hvilc*.”—See p. 240. *Whilk*, or *quhilk*, is a Scottish form.

3. WHAT, hwat, hwet, quhat, hwæt. This pronoun, whether relative or interrogative, is regarded by Bosworth and others as a neuter derivative from the masculine or feminine *hwa*, who. It may have been thence derived, but, in modern English, it is not always of the neuter gender. See the last note on page 312.

4. THAT, Anglo-Saxon Thæt. Tooke’s notion of the derivation of this word is noticed above in the section on Articles. There is no certainty of its truth; and our lexicographers make no allusion to it. W. Allen reaffirms it. See his *Gram.*, p. 54.

### OBSERVATIONS.

OBS. 1.—In the *Well-Wishers’ Grammar*, (p. 39,) as also in L. Murray’s and some others, the pronoun *Which* is very strangely and erroneously represented as being always “of the *neuter* gender.” (See what is said of this word in the Introduction, Chap. ix, ¶ 32.) Whereas it is the relative most generally applied to *brute animals*, and, in our common version of the Bible, its application to *persons* is peculiarly frequent. Fowler says, “In its

origin it is a Compound.”—*E. Gram.*, p. 240. Taking its first Anglo-Saxon form to be “*Huilic*,” he thinks it traceable to “*hwa*, who,” or its ablative “*hwi*,” and “*lie*, like.”—*Ib.* If this is right, the neuter sense is not its primitive import, or any part of it.

OBS. 2.—From its various uses, the word *That* is called sometimes a pronoun, sometimes an adjective, and sometimes a conjunction; but, in respect to derivation, it is, doubtless, one and the same. As a relative pronoun, it is of either number, and has no plural form different from the singular; as, “Blessed is the *man that* heareth me.”—*Prov.*, viii, 34. “Blessed are *they that* mourn.”—*Matt.*, v, 4. As an adjective, it is said by Tooke to have been formerly “applied indifferently to plural nouns and to singular; as, ‘Into *that* holy orders.’—*Dr. Martin*. ‘At *that* dayes.’—*Id.* ‘*That* euyl aungels the denilles.’—*Sir Tho. More*. ‘This pleasure undoubtedly farre excelleth all *that* pleasures that in this life maie be obtained.’—*Id.*”—*Diversions of Purley*, Vol. ii, pp. 47 and 48. The introduction of the plural form *those*, must have rendered this usage bad English.

## SECTION V.—DERIVATION OF VERBS.

In English, Verbs are derived from nouns, from adjectives, or from verbs.

I. Verbs are derived from *Nouns* in the following different ways:—

1. By the adding of *ize*, *ise*, *en*, or *ate*: as, *author*, *authorize*; *critic*, *criticise*; *length*, *lengthen*; *origin*, *originate*. The termination *ize* is of Greek origin, and *ise* is most probably of French: the former is generally preferable in forming English derivatives; but both are sometimes to be used, and they should be applied according to Rule 13th for Spelling.

2. Some few verbs are derived from nouns by the changing of a sharp or hard consonant to a flat or soft one, or by the adding of a mute *e*, to soften a hard sound: as, *advice*, *advise*; *price*, *prize*; *bath*, *bathe*; *cloth*, *clothe*; *breath*, *breathe*; *wreath*, *wreathe*; *sheath*, *sheathe*; *grass*, *graze*.

II. Verbs are derived from *Adjectives* in the following different ways:—

1. By the adding of *ize* or *en*: as *legal*, *legalize*; *immortal*, *immortalize*; *civil*, *civilize*; *human*, *humanize*; *familiar*, *familiarize*; *particular*, *particularize*; *deaf*, *deafen*; *stiff*, *stiffen*; *rough*, *roughen*; *deep*, *deepen*; *weak*, *weaken*.

2. Many adjectives become verbs by being merely used and inflected as verbs: as, *warm*, to *warm*, he *warms*; *dry*, to *dry*, he *dries*; *dull*, to *dull*, he *dulls*; *slack*, to *slack*, he *slacks*; *forward*, to *forward*, he *forwards*.

III. Verbs are derived from *Verbs* in the following modes, or ways:—

1. By the prefixing of *dis* or *un* to reverse the meaning: as, *please*, *displease*; *qualify*, *disqualify*; *organize*, *disorganize*; *fasten*, *unfasten*; *muzzle*, *unmuzzle*; *nerve*, *unnerve*.

2. By the prefixing of *a*, *be*, *for*, *fore*, *mis*, *over*, *out*, *under*, *up*, or *with*: as, *rise*, *arise*; *sprinkle*, *besprinkle*; *bid*, *forbid*; *see*, *foresee*; *take*, *mistake*; *look*, *overlook*; *run*, *outrun*; *go*, *undergo*; *hold*, *uphold*; *draw*, *withdraw*.

## SECTION VI.—DERIVATION OF PARTICIPLES.

All *English* Participles are derived from *English* verbs, in the manner explained in Chapter 7th, under the general head of Etymology; and when foreign participles are introduced into our language, they are not participles with us, but belong to some other class of words, or part of speech.

## SECTION VII.—DERIVATION OF ADVERBS.

1. In *English*, many Adverbs are derived from adjectives by the addition of *ly*: which is an abbreviation for *like*, and which, though the addition of it to a noun forms an adjective, is the most distinctive as well as the most common termination of our adverbs: as, *candid*, *candidly*; *sordid*, *sordidly*; *presumptuous*, *presumptuously*. Most adverbs of manner are thus formed.

2. Many adverbs are compounds formed from two or more English words; as, *herein*, *thereby*, *to-day*, *always*, *already*, *elsewhere*, *sometimes*, *wherewithal*. The formation and the meaning of these are, in general, sufficiently obvious.

3. About seventy adverbs are formed by means of the prefix, or inseparable preposition, *a*; as, *Abreast*, *abroach*, *abroad*, *across*, *afar*, *afield*, *ago*, *agog*, *aland*, *along*, *amiss*, *atilt*.

4. *Needs*, as an adverb, is a contraction of *need is*; *prithce*, or *pr'ythee*, of *I pray thee*; *alone*, of *all one*; *only*, of *one-like*; *anon*, of the Saxon *an on*; i.e., *in one* [instant]; *never*, of *ne ever*; i.e., *not ever*. Prof. Gibbs, in Fowler's Grammar, makes *needs* "the Genitive case of the noun *need*."—P. 311.

5. *Very* is from the French *veray*, or *vrai*, true; and this, probably, from the Latin *verus*. *Rather* appears to be the regular comparative of the ancient *rath*, soon, quickly, willingly; which comes from the *Anglo-Saxon* "*Rathe*, or *Hrathe*, of one's own accord."—*Bosworth*. But the parent language had also "*Hrathre*, to a mind."—*Id*. That is, to *one's* mind, or, perhaps, *more willingly*.

## OBSERVATIONS.

OBS. 1.—Many of our most common adverbs are of Anglo-Saxon derivation, being plainly traceable to certain very old forms, of the same import, which the etymologist regards but as the same words differently spelled: as, *All*, eall, eal, or æll; *Almost*, ealmæst, or ælmæst; *Also*, ealswa, or ælswa; *Else*, elles; *Elsewhere*, elleshwær; *Enough*, genog, or genoh; *Even*, euen, efen, or æfen; *Ever*, euer, æfer, or æfre; *Downward*, duneward; *Forward*, forweard, or foreweard; *Homeward*, hamweard; *Homewards*, hamweardes; *How*, hu; *Little*, lytel; *Less*, læs; *Least*, læst; *No*, na; *Not*, noht, or nocht; *Out*, ut, or ute; *So*, swa; *Still*, stille, or styll; *Then*, thenne; *There*, ther, thar, thær; *Thither*, thider, or thyder; *Thus*, thuss, or thus; *Together*, togædere, or togædre; *Too*, tó; *When*, hwenne, or hwænne; *Where*, hwær; *Whither*, hwider, hwyder, or hwyther; *Yea*, ia, gea, or gee; *Yes*, gese, gise, or gyse.

OBS. 2.—According to Horne Tooke, "*Still* and *Else* are the imperatives *Stell* and *Ales* of their respective verbs *Stellan*, to put, and *Alesan*, to dismiss."—*Diversions*, Vol. i, p. 111. He afterwards repeats the doctrine thus: "*Still* is only the imperative *Stell* or *Steall*, of *Stellan* or *Steallian*, ponere."—*Id*., p. 146. "This word *Else*, formerly written *alles*, *alys*,

*alyse*, *elles*, *ellus*, *ellis*, *ells*, *els*, and now *else*; is, as I have said, no other than *Ales* or *Alys*, the imperative of *Alesan* or *Alysan*, *dimittere*.”—*Ib.*, p. 148. These ulterior and remote etymologies are perhaps too conjectural.

#### SECTION VIII.—DERIVATION OF CONJUNCTIONS.

The *English* Conjunctions are mostly of Anglo-Saxon origin. The best etymological vocabularies of our language give us, for the most part, the same words in Anglo-Saxon characters; but Horne Tooke, in his *Diversions of Purley*, (a learned and curious work which the advanced student may peruse with advantage,) traces, or professes to trace, these and many other English particles, to *Saxon verbs* or *participles*. The following derivations, so far as they partake of such speculations, are offered principally on his authority:—

1. ALTHOUGH, signifying *admit*, *allow*, is from *all* and *though*; the latter being supposed the imperative of Thafian or Thafigan, *to allow*, *to concede*, *to yield*.

2. AN, an obsolete or antiquated conjunction, signifying *if*, or *grant*, is the imperative of the Anglo-Saxon verb Anan or Unan, *to grant*, *to give*.

3. AND, [Saxon, And,] *add*, is said by Tooke to come from “An-ad, the imperative of Ananad, *Dare congeriem*.”—D. of P., Vol. i, p. 111. That is, “To give the heap.” The truth of this, if unapparent, I must leave so.

4. AS, according to Dr. Johnson, is from the Teutonic *als*; but Tooke says that *als* itself is a contraction for *all* and the original particle *es* or *as*, meaning *it*, *that*, or *which*.

5. BECAUSE, from *be* and *cause*, means *by cause*; the *be* being written for *by*.

6. BOTH, *the two*, is from the pronominal adjective *both*; which, according to Dr. Alexander Murray, is a contraction of the Visigothic *Bagoth*, signifying *doubled*. The Anglo-Saxons wrote for it *butu*, *butwu*, *buta*, and *batwa*; i. e., *ba*, both, *twa*, two.

7. BUT,—(in Saxon, *bute*, *butan*, *buton*, or *butun*—) meaning *except*, *yet*, *now*, *only*, *else than*, *that not*, or *on the contrary*,—is referred by Tooke and some others, to two roots,—each of them but a conjectural etymon for it. “BUT, implying *addition*,” say they, “is from Bot, the imperative of Botan, *to boot*, *to add*; BUT, denoting *exception*, is from Be-utan, the imperative of Beon-utan, *to be out*.”—See *D. of P.*, Vol. i, pp. 111 and 155.

8. EITHER, *one of the two*, like the pronominal adjective EITHER, is from the Anglo-Saxon Æther, or Egther, a word of the same uses, and the same import.

9. EKE, *also*, (now nearly obsolete,) is from “Eac, the imperative of Eacan, *to add*.”

10. EVEN, whether a noun, an adjective, an adverb, or a conjunction, appears to come from the same source, the Anglo-Saxon word Efen or Æfen.

11. EXCEPT, which, when used as a conjunction, means *unless*, is the imperative, or (according to Dr. Johnson) an ancient perfect participle, of the verb *to except*.

12. FOR, *because*, is from the Saxon preposition *For*, which, to express this meaning, our ancestors combined with something else, reducing to one word some such phrase as, *For that*, *For this*, *For this that*; as, “Fortha, Fortham, Forthan, Forthamthe, Forthan the.”—See *Bosworth’s Dict.*

13. IF, *give*, *grant*, *allow*, is from “Gif, the imperative of the Anglo-Saxon Gifan, *to give*.”—*Tooke’s Diversions*, Vol. i, p. 111.

14. LEST, *that not*, *dismissed*, is from “Lesed, the perfect participle of Lesan, *to dismiss*.”

15. NEITHER, *not either*, is a union and contraction of *ne either*: our old writers frequently used *ne* for *not*; the Anglo-Saxons likewise repeated it, using *ne—ne*, in lieu of our correlatives *neither—nor*; and our modern lexicographers still note the word, in some of these senses.

16. NOR, *not other*, *not else*, is supposed to be a union and contraction of *ne or*.

17. NOTWITHSTANDING, *not hindering*, is an English compound of obvious formation.

18. OR, an alternative conjunction, seems to be a word of no great antiquity. It is supposed to be a contraction of *other*, which Johnson and his followers give, in Saxon characters, either as its source, or as its equivalent.

19. PROVIDED, the perfect participle of the verb *provide*, becomes occasionally a disjunctive conjunction, by being used alone or with the particle *that*, to introduce a condition, a saving clause, a proviso.

20. SAVE, anciently used with some frequency as a conjunction, in the sense of *but*, or except is from the imperative of the English verb *save*, and is still occasionally turned to such a use by the poets.

21. SEEING, sometimes made a copulative conjunction, is the imperfect participle of the verb *see*. Used at the head of a clause, and without reference to an agent, it assumes a conjunctive nature.

22. SINCE is conjectured by Tooke to be “the participle of Seon, *to see*,” and to mean “*seeing*, *seeing that*, *seen that*, or *seen as*.”—*Diversions of P.*, Vol. i, pp. 111 and 220. But Johnson and others say, it has been formed “by contraction from *sithence*, or *sith thence*, from *sithe*, Sax.”—*Joh. Dict.*

23. THAN, which introduces the latter term of a comparison, is from the Gothic *than*, or the Anglo-Saxon *thane*, which was used for the same purpose. 24. THAT, when called a conjunction, is said by Tooke to be etymologically the same as the adjective or pronoun THAT, the derivation of which is twice spoken of above; but, in Todd’s Johnson’s Dictionary, as abridged by Chalmers, THAT, the *conjunction*, is referred to “*thatei*, Gothic;” THAT, the *pronoun*, to “*that*, *thata*, Gothic; *thæt*, Saxon; *dat*, Dutch.”

25. THEN, used as a conjunction, is doubtless the same word as the Anglo-Saxon *Thenne*, taken as an illative, or word of inference.

26. “THOUGH, *allow*, is [from] the imperative Thaf, or Thafig, of the verb Thafian or Thafigan, *to allow*.”—*Tooke’s Diversions*, Vol. i, pp. 111 and 150.

27. “UNLESS, *except*, *dismiss*, is [from] Onles, the imperative of Onlesan, *to dismiss*.”—*Ib.*

28. WHETHER, a corresponsive conjunction, which introduces the first term of an alternative, is from the Anglo-Saxon *hwæther*, which was used for the same purpose.

29. YET, *nevertheless*, is from “Get, the imperative of Getan, *to get*.”—*Tooke*.

#### SECTION IX.—DERIVATION OF PREPOSITIONS.

The following are the principal *English* Prepositions, explained in the order of the list:—

1. ABOARD, meaning *on board of*, is from the prefix or preposition *a* and the noun *board*, which here means “*the deck* of a ship” or vessel. *Abord*, in French, is *approach*, *arrival*, or a *landing*.

2. ABOUT, [Sax. Abútan, or Abúton,] meaning *around*, *at circuit*, or *doing*, is from the prefix *a*, meaning *at*, and the noun *bout*, meaning a *turn*, a *circuit*, or a *trial*. In French, *bout* means end; and *about*, *end*, or *but-end*.

3. ABOVE, [Sax. Abufan, Abufon, A-be-ufan.] meaning *over*, or, literally, *at-by-over*, or *at-by-top*, is from the Saxon or Old English *a*, *be*, and *ufa*, or *ufan*, said to mean “high, upwards, or *the top*.”

4. ACROSS, *at cross*, *athwart*, *traverse*, is from the prefix *a* and the word *cross*.

5. AFTER, [Sax. Æfter, or Æftan,] meaning *behind*, *subsequent to*, is, in form, the comparative of *aft*, a word common to seamen, and it may have been thence derived.

6. AGAINST, *opposite to*, is probably from the Anglo-Saxon, Ongean, or Ongegen, each of which forms means *again* or *against*. As prefixes, *on* and *a* are often equivalent.

7. ALONG, [i.e., *at-long*,] meaning *lengthwise of*, *near to*, is formed from *a* and *long*.

8. AMID, [i. e., *at mid* or *middle*,] is from *a* and *mid*; and AMIDST [, i.e., *at midst*,] is from *a* and *midst*, contracted from *middest*, the superlative of *mid*.

9. AMONG, *mixed with*, is probably an abbreviation of *amongst*; and AMONGST, according to *Tooke*, is from *a* and *mongst*, or the older “Ge-meneged,” Saxon for “*mixed*, *mingled*.”

10. AROUND, *about*, *encircling*, is from *a* and *round*, a circle, or circuit.

11. AT, *gone to*, is supposed by some to come from the Latin *ad*; but Dr. Murray says, “We have in Teutonic AT for AGT, touching or touched, joined, *at*.”—*Hist. of Lang.*, i, 349.

12. ATHWART, *across*, is from *a* and *thwart*, cross; and this from the Saxon Thweor.
13. BATING, a preposition for *except*, is the imperfect participle of *bate*, to abate.
14. BEFORE, [i.e., *by-fore*,] in front of, is from the prefix *be* and the adjective *fore*.
15. BEHIND, [i.e., *by-hind*,] in rear of, is from the prefix *be* and the adjective *hind*.
16. BELOW, [i.e., *by-low*,] meaning *under*, or *beneath*, is from *be* and the adjective *low*.
17. BENEATH [, Sax. or Old Eng. Beneoth,] is from *be* and *neath*, or Sax. Neothe, *low*.
18. BESIDE [, i.e., *by-side*,] is probably from *be* and the noun or adjective *side*.
19. BESIDES [, i.e., *by-sides*,] is probably from *be* and the plural noun *sides*.
20. BETWEEN, [Sax. Betweenan, or Betwynan,] literally, *by-twain*, seems to have been formed from *be*, by, and *twain*, two—or the Saxon Twegen, which also means *two*, *twain*.
21. BETWIXT, meaning *between*, [Sax. Betweox, Betwux, Betwyx, Betwyxt, &c.,] is from *be*, by, and *twyx*, originally a “Gothic” word signifying “*two*, or *twain*.”—See *Tooke*, Vol. i, p. 329.
22. BEYOND, *past*, [Sax. Begeond,] is from the prefix *be*, by, and *yond*, [Sax. Geond,] *past*, *far*.
23. BY [, Sax. Be, Bi, or Big,] is affirmed by Tooke to be “the imperative Byth, of the Anglo-Saxon verb Beon, *to be*.”—*Diversions of P.*, Vol. i, p. 326. This seems to be rather questionable.
24. CONCERNING, the preposition, is from the first participle of the verb *concern*.
25. DOWN, the preposition, is from the Anglo-Saxon Dune, down.
26. DURING, prep. of time, is from the first participle of an old verb *dure*, to last, formerly in use; as, “While the world may *dure*.”—Chaucer’s Knight’s Tale.
27. ERE, *before*, prep. of time, is from the Anglo-Saxon Ær, a word of like sort.
28. EXCEPT, *bating*, is from the imperative, or (according to Dr. Johnson) the ancient perfect participle of the verb *to except*; and EXCEPTING, when a preposition, is from the first participle of the same verb.
29. FOR, *because of*, is the Anglo-Saxon preposition For, a word of like import, and supposed by Tooke to have come from a Gothic noun signifying *cause*, or *sake*.
30. FROM, in Saxon, *Fram*, is probably derived from the old adjective Frum, *original*.

31. IN, or the Saxon In, is the same as the Latin *in*: the Greek is ἐν; and the French, *en*.
32. INTO, like the Saxon Into, noting entrance, is a compound of *in* and *to*.
33. MID and MIDST, as English prepositions, are poetical forms used for *Amid* and *Amidst*.
34. NOTWITHSTANDING, *not hindering*, is from the adverb *not*, and the participle *withstanding*, which, by itself, means *hindering*, or *preventing*. 35. OF is from the Saxon Of, or Af; which is supposed by Tooke to come from a noun signifying *offspring*.
36. OFF, opposed to *on*, Dr. Johnson derives from the “Dutch *af*.”
37. ON, a word very often used in Anglo-Saxon, is traced by some etymologists to the Gothic *ana*, the German *an*, the Dutch *aan*; but no such derivation fixes its meaning.
38. OUT, [Sax. Ut, Ute, or Utan,] when made a preposition, is probably from the adverb or adjective *Out*, or the earlier *Ut*; and OUT-OF, [Sax. Ut-of,] opposed to *Into*, is but the adverb *Out* and the preposition *Of*—usually written separately, but better joined, in some instances.
39. OVER, *above*, is from the Anglo-Saxon Ofer, *over*; and this, probably, from Ufa, *above*, *high*, or from the comparative, Ufera, *higher*.
40. OVERTHWART, meaning *across*, is a compound of *over* and *thwart*, cross.
41. PAST, *beyond*, *gone by*, is a contraction from the perfect participle *passed*.
42. PENDING, *during* or *hanging*, has a participial form, but is either an adjective or a preposition: we do not use *pend* alone as a verb, though we have it in *depend*.
43. RESPECTING, *concerning*, is from the first participle of the verb *respect*.
44. ROUND, a preposition for *about* or *around*, is from the noun or adjective *round*.
45. SINCE is most probably a contraction of the old word *Sithence*; but is conjectured by Tooke to have been formed from the phrase, “*Seen as*.”
46. THROUGH [, Sax. Thurh, or Thurch,] seems related to *Thorough*, Sax. Thuruh; and this again to Thuru, or Duru, a *Door*.
47. THROUGHOUT, *quite through*, is an obvious compound of *through* and *out*.
48. TILL, [Sax. Til or Tille,] *to*, *until*, is from the Saxon Til or Till, *an end*, *a station*.
49. TO, whether a preposition or an adverb, is from the Anglo-Saxon particle To.
50. TOUCHING, *with regard to*, is from the first participle of the verb *touch*.

51. TOWARD or TOWARDS, written by the Anglo-Saxons *Toweward* or *Towearde*, is a compound of *To* and *Ward* or *Weard*, a guard, a look-out; “Used in composition to express *situation* or *direction*.”—*Bosworth*.

52. UNDER, [Gothic, Undar; Dutch, Onder,] *beneath*, *below*, is a common Anglo-Saxon word, and very frequent prefix, affirmed by Tooke to be “nothing but *on-neder*,” a Dutch compound = *on lower*.—See *Diversions of Purley*, Vol. i, p. 331.

53. UNDERNEATH is a compound of *under* and *neath*, low; whence *nether*, lower.

54. UNTIL is a compound from *on* or *un*, and till, or *til*, the end.

55. UNTO, now somewhat antiquated, is formed, not very analogically, from *un* and *to*.

56. UP is from the Anglo-Saxon adjective, “Up or Upp, *high*, *lofty*.”

57. UPON, which appears literally to mean *high on*, is from two words *up* and *on*.

58. WITH comes to us from the Anglo-Saxon With, a word of like sort and import; which Tooke says is an imperative verb, sometimes from “Withan, *to join*,” and sometimes from “Wyrthan, *to be*.”—See his *Diversions*, Vol. i, p. 262.

59. WITHIN [, i.e., *by-in*,] is from *with* and *in*: Sax. Withinnan, Binnan, or Binnon.

60. WITHOUT [, i.e., *by-out*,] is from *with* and *out*: Sax. Withútan, -úten, -úton; Bútan, Búton, Bútun.

### OBSERVATION.

In regard to some of our minor or simpler prepositions, as of sundry other particles, to go beyond the forms and constructions which present or former usage has at some period given them as particles, and to ascertain their actual origin in something ulterior, if such they had, is no very easy matter; nor can there be either satisfaction or profit in studying what one suspects to be mere guesswork. “How do you account for IN, OUT, ON, OFF, and AT?” says the friend of Tooke, in an etymological dialogue at Purley. The substance of his answer is, “The explanation and etymology of these words require a degree of knowledge in all the *antient* northern languages, and a skill in the application of that knowledge, which I am very far from assuming; and though I am almost persuaded by some of my own conjectures concerning them, I am not willing, by an apparently forced and far-fetched derivation, to justify your imputation of etymological legerdemain.”—*Diversions*, Vol. i, p. 370.

### SECTION X.—DERIVATION OF INTERJECTIONS.

Those significant and constructive words which are occasionally used as Interjections, (such as *Good! Strange! Indeed!*,) do not require an explanation here; and those mere sounds which are in no wise expressive of thought, scarcely admit of definition or derivation. The Interjection HEY is probably a corruption of the adjective *High*;—ALAS is from the French *Hélas*;—ALACK is probably a corruption of *Alas*;—WELAWAY or WELLAWAY, (which is now corrupted into WELLADAY,) is said by some to be from the Anglo-Saxon *Wá-*

*lá-wá*, i.e., *Wo-lo-wo*;—"FIE," says Tooke, "is the imperative of the Gothic and Anglo-Saxon verb *Fian*, to hate;"—Heyday is probably from *high day*;—AVAUNT, perhaps from the French *avant*, before;—LO, from *look*;—BEGONE, from *be* and *gone*;—WELCOME, from *well* and *come*;—FAREWELL, from *fare* and *well*.

## SECTION XI—EXPLANATION OF THE PREFIXES.

In the formation of English words, certain particles are often employed as prefixes; which, as they generally have some peculiar import, may be separately explained. A few of them are of Anglo-Saxon origin, or character; and the greater part of these are still employed as separate words in our language. The rest are Latin, Greek, or French prepositions. The *roots* to which they are prefixed, are not always proper English words. Those which are such, are called SEPARABLE RADICALS; those which are not such, INSEPARABLE RADICALS.

### CLASS I—THE ENGLISH OR ANGLO-SAXON PREFIXES.

1. A, as an English prefix, signifies *on*, *in*, *at*, or *to*: as in *a-board*, *a-shore*, *a-foot*, *a-bed*, *a-soak*, *a-tilt*, *a-slant*, *a-far*, *a-field*; which are equal to the phrases, *on board*, *on shore*, *on foot*, *in bed*, *in soak*, *at tilt*, *at slant*, *to a distance*, *to the fields*. The French *à*, to, is probably the same particle. This prefix is sometimes redundant, adding little or nothing to the meaning; as in *awake*, *arise*, *amend*.

2. BE, as a prefix, signifies *upon*, *over*, *by*, *to*, *at*, or *for*: as in *be-spatter*, *be-cloud*, *be-times*, *be-tide*, *be-howl*, *be-speak*. It is sometimes redundant, or merely intensive; as in *be-gird*, *be-deck*, *be-loved*, *be-dazzle*, *be-moisten*, *be-praise*, *be-quote*.

3. COUNTER, an English prefix, allied to the French *Contre*, and the Latin *Contra*, means *against*, or *opposite*; as in *counter-poise*, *counter-evidence*, *counter-natural*.

4. FOR, as a prefix, unlike the common preposition *For*, seems generally to signify *from*: it is found in the irregular verbs *for-bear*, *for-bid*, *for-get*, *for-give*, *for-sake*, *for-swear*; and in *for-bathe*, *for-do*, *for-pass*, *for-pine*, *for-say*, *for-think*, *for-waste*, which last are now disused, the *for* in several being merely intensive.

5. FORE, prefixed to a verb, signifies *before*; as in *fore-know*, *fore-tell*: prefixed to a noun, it is usually an adjective, and signifies anterior; as in *fore-side*, *fore-part*.

6. HALF, signifying *one of two equal parts*, is much used in composition; and, often, merely to denote imperfection: as, *half-sighted*, seeing imperfectly.

7. MIS signifies *wrong* or *ill*; as in *mis-cite*, *mis-print*, *mis-spell*, *mis-chance*, *mis-hap*.

8. OVER denotes superiority or excess; as in *over-power*, *over-strain*, *over-large*.

9. OUT, prefixed to a verb, generally denotes excess; as in *out-do*, *out-leap*, *out-poise*: prefixed to a noun, it is an adjective, and signifies *exterior*; as in *out-side*, *out-parish*.

10. SELF generally signifies one's own person, or belonging to one's own person; but, in *self-same*, it means *very*. We have many words beginning with *Self*, but most of them

seem to be compounds rather than derivatives; as, *self-love*, *self-abasement*, *self-abuse*, *self-affairs*, *self-willed*, *self-accusing*.

11. UN denotes negation or contrariety; as in *un-kind*, *un-load*, *un-truth*, *un-coif*.

12. UNDER denotes inferiority; as in *under-value*, *under-clerk*, *under-growth*.

13. UP denotes motion upwards; as in *up-lift*: sometimes subversion; as in *up-set*.

14. WITH, as a prefix, unlike the common preposition *With*, signifies *against*, *from*, or *back*; as in *with-stand*, *with-hold*, *with-draw*, *with-stander*, *with-holdment*, *with-drawal*.

## CLASS II.—THE LATIN PREFIXES.

The primitives or radicals to which these are prefixed, are not many of them employed separately in English. The final letter of the prefix *Ad*, *Con*, *Ex*, *In*, *Ob*, or *Sub*, is often changed before certain consonants; not capriciously, but with uniformity, to adapt or assimilate it to the sound which follows.

1. A, AB, or ABS, means From, or Away: as, *a-vert*, to turn from, or away; *ab-duce*, to lead from; *ab-duction*, a carrying-away; *ab-tract*, to draw from, or away.

2. AD,—forming *ac*, *af*, *al*, *an*, *ap*, *as*, *at*,—means To, or At: as, *ad-vert*, to turn to; *ac-cord*, to yield to; *af-flux*, a flowing-to; *al-ly*, to bind to; *an-nex*, to link to; *ap-ply*, to put to; *as-sume*, to take to; *at-test*, to witness to; *ad-mire*, to wonder at.

3. ANTE means Fore, or Before: as, *ante-past*, a fore-taste; *ante-cedent*, foregoing, or going before; *ante-mundane*, before the world; *ante-date*, to date before.

4. CIRCUM means Round, Around, or About: as *circum-volve*, to roll round; *circum-scribe*, to write round; *circum-vent*, to come round; *circum-spect*, looking about one's self.

5. CON,—which forms *com*, *co*, *col*, *cor*,—means Together: as, *con-tract*, to draw together; *compel*, to drive together; *co-erce*, to force together; *col-lect*, to gather together; *cor-rade*, to rub or scrape together; *con-junction*, a joining-together.

6. CONTRA, or CONTRO, means Against, or Counter: as, *contra-dict*, to speak against; *contra-vene*, to come against; *contra-mure*, counter-mure; *contro-vert*, to turn against.

7. DE means OF, From, or Down: as, *de-note*, to be a sign of; *de-tract*, to draw from; *de-pend*, to hang down; *de-press*, to press down; *de-crease*, to grow down, to grow less.

8. DIS, or DI, means Away, or Apart: as, *dis-pel*, to drive away; *dis-sect*, to cut apart; *di-vert*, to turn away.

9. E, or EX,—making also *ec*, *ef*,—means Out: as, *e-ject*, to cast out; *e-lect*, to choose out; *ex-clude*, to shut out; *ex-cite*, to summon out; *ec-stacy*, a raising out; *ef-face*, to blot out.

10. EXTRA means Beyond, or Out of: as, *extra-vagant*, syllabled *ex-trav'a-gant*, roving beyond; *extra-vasate*, *ex-trav'a-sate*, to flow out of the vessels; *extra-territorial*, being out of the territory.

11. IN,—which makes also *il*, *im*, *ir*,—means In, Into, or Upon: as, *in-spire*, to breathe in; *il-lude*, to draw in by deceit; *im-mure*, to wall in; *ir-ruption*, a rushing in; *in-spect*, to look into; *in-scribe*, to write upon; *in-sult*, to jump upon. These syllables, prefixed, to English nouns or adjectives, generally reverse their meaning; as in *in-justice*, *il-legality*, *im-partiality*, *ir-religion*, *ir-rational*, *in-secure*, *in-sane*.

12. INTER means Between, or In between: as, *inter-sperse*, to scatter in between; *inter-jection*, something thrown in between; *inter-jacent*, lying between; *inter-communication*, communication between.

13. INTRO means In, Inwards, or Within: as, *intro-duce*, to lead in; *intro-vert*, to turn inwards; *intro-spect*, to look within; *intro-mission*, a sending-in.

14. OB,—which makes also *oc*, *of*, *op*,—means Against: as, *ob-trude*, to thrust against; *oc-cur*, to run against; *of-fer*, to bring against; *op-pose*, to place against; *ob-ject*, to cast against.

15. PER means Through or By: as, *per-vade*, to go through; *per-chance*, by chance; *per-cent*, by the hundred; *per-plex*, to tangle through, or to entangle thoroughly.

16. POST means After: as, *post-pone*, to place after; *post-date*, to date after.

17. PRÆ, or PRE, means Before: as, *pre-sume*, to take before; *pre-position*, a placing before, or thing placed before; *præ-cognita*, things known before.

18. PRO means For, Forth, or Forwards: as, *pro-vide*, to take care for; *pro-duce*, to bring forth; *pro-trude*, to thrust forwards; *pro-ceed*, to go forward; *pro-noun*, for a noun.

19. PRETER means By, Past, or Beyond: as, *preter-it*, bygone, or gone by; *preter-imperfect*, past imperfect; *preter-natural*, beyond what is natural; *preter-mit*, to put by, to omit.

20. RE means Again or Back: as, *re-view*, to view again; *re-pel*, to drive back.

21. RETRO means Backwards, Backward, or Back: as, *retro-active*, acting backwards; *retro-grade*, going backward; *retro-cede*, to cede back again.

22. SE means Aside or Apart: as, *se-duce*, to lead aside; *se-cede*, to go apart.

23. SEMI means Half: as, *semi-colon*, half a colon; *semi-circle*, half a circle.

24. SUB,—which makes *suf*, *sug*, *sup*, *sur*, and *sus*,—means Under, and sometimes Up: as, *sub-scribe*, to write under; *suf-fossion*, an undermining; *sug-gest*, to convey under; *sup-ply*, to put under; *sur-reption*, a creeping-under; *sus-tain*, to hold up; *sub-ject*, cast under.

25. SUBTER means Beneath: as, *subter-fluous*, flowing beneath.

26. SUPER means Over or Above: as, *super-fluous*, flowing over; *super-natant*, swimming above; *super-lative*, carried over, or carrying over; *super-vise*, to overlook, to oversee.

27. TRANS,—whence TRAN and TRA,—means Beyond, Over, To another state or place: as, *trans-gress*, to pass beyond or over; *trans-cend*, to climb over; *trans-mit* to send to an other place; *trans-form*, to change to an other shape; *tra-montane*, from beyond the mountains; i.e., *Trans-Alpine*, as opposed to *Cis-Alpine*.

### CLASS III.—THE GREEK PREFIXES.

1. A and AN, in Greek derivatives, denote privation: as, *a-nomalous*, wanting rules; *an-ony-mous*, wanting name; *an-archy*, want of government; *a-cephalous*, headless.

2. AMPHI means Two, Both, or Double: as, *amphi-bious*, living in two elements; *amphi-brach*, both [sides] short; *amphi-theatre*, a double theatre.

3. ANTI means Against: as, *anti-slavery*, against slavery; *anti-acid*, against acidity; *anti-febrile*, against fever; *anti-thesis*, a placing-against.

4. APO, APH,—From: as, *apo-strophe*, a turning-from; *aph-aeresis*, a taking from.

5. DIA,—Through: as, *dia-gonal*, through the corners; *dia-meter*, measure through.

6. EPI, EPH,—Upon: as, *epi-demic*, upon the people; *eph-emera*, upon a day.

7. HEMI means Half: as, *hemi-sphere*, half a sphere; *hemi-stich*, half a verse.

8. HYPER means Over: as, *hyper-critical*, over-critical; *hyper-meter*, over measure. 9. HYPO means Under: as, *hypo-stasis*, substance, or that which stands under; *hypo-thesis*, supposition, or a placing-under; *hypo-phylloous*, under the leaf.

10. META means Beyond, Over, To an other state or place: as, *meta-morphose*, to change to an other shape; *meta-physics*, mental science, as beyond or over physics.

11. PARA means Against: as, *para-dox*, something contrary to common opinion.

12. PERI means Around: as, *peri-phery*, the circumference, or measure round.

13. SYN,—whence *Sym*, *Syl*,—means Together: as, *syn-tax*, a putting-together; *sym-pathy*, a suffering-together; *syl-lable*, what we take together; *syn-thesis* a placing-together.

### CLASS IV.—THE FRENCH PREFIXES.

1. A is a preposition of very frequent use in French, and generally means *To*. I have suggested above that it is probably the same as the Anglo-Saxon prefix *a*. It is found in a few English compounds or derivatives that are of French, and not of Saxon origin: as, *a-dieu*, to God; i.e., I commend you to God; *a-larm*, from *alarme*, i.e., *à l'arme*, to arms.

2. DE means Of or From: as in *de-mure*, of manners; *de-liver*, to ease from or of.

3. DEMI means Half: as, *demi-man*, half a man; *demi-god*, half a god; *demi-devil*, half a devil; *demi-deify*, to half deify; *demi-sized*, half sized; *demi-quaver*, half a quaver. 4. EN,—which sometimes becomes em,—means In, Into, or Upon: as, *en-chain*, to hold in chains; *em-brace*, to clasp in the arms; *en-tomb*, to put into a tomb; *em-boss*, to stud upon. Many words are yet wavering between the French and the Latin orthography of this prefix: as, *embody*, or *imbody*; *ensurance*, or *insurance*; *ensnare*, or *insnare*; *enquire*, or *inquire*.

5. SUR, as a French prefix, means Upon, Over, or After: as, *sur-name*, a name upon a name; *sur-vey*, to look over; *sur-mount*, to mount over or upon; *sur-render*, to deliver over to others; *sur-feit*, to overdo in eating; *sur-vive*, to live after, to over-live, to outlive.

## APPENDIX III

### TO PART THIRD, OR SYNTAX. OF THE QUALITIES OF STYLE.

Style, as a topic connected with syntax, is the particular manner in which a person expresses his conceptions by means of language. It is different from mere words, different from mere grammar, in any limited sense, and is not to be regulated altogether by rules of construction. It always has some relation to the author's peculiar manner of thinking; involves, to some extent, and shows his literary, if not his moral, character; is, in general, that sort of expression which his thoughts most readily assume; and, sometimes, partakes not only of what is characteristic of the man, of his profession, sect, clan, or province, but even of national peculiarity, or some marked feature of the age. The words which an author employs, may be proper in themselves, and so constructed as to violate no rule of syntax, and yet his style may have great faults.

In reviews and critical essays, the general characters of style are usually designated by such epithets as these;—concise, diffuse,—neat, negligent,—terse, bungling,—nervous, weak,—forcible, feeble,—vehement, languid,—simple, affected,—easy, stiff,—pure, barbarous,—perspicuous, obscure,—elegant, uncouth,—florid, plain,—flowery, artless,—fluent, dry,—piquant, dull,—stately, flippant,—majestic, mean,—pompous, modest,—ancient, modern. A considerable diversity of style, may be found in compositions all equally excellent in their kind. And, indeed, different subjects, as well as the different endowments by which genius is distinguished, require this diversity. But, in forming his style, the learner should remember, that a negligent, feeble, affected, stiff, uncouth, barbarous, or obscure style is always faulty; and that perspicuity, ease, simplicity, strength, neatness, and purity, are qualities always to be aimed at.

In order to acquire a good style, the frequent practice of composing and writing something, is indispensably necessary. Without exercise and diligent attention, rules or precepts for the attainment of this object, will be of no avail. When the learner has acquired such a knowledge of grammar, as to be in some degree qualified for the undertaking, he should devote a stated portion of his time to composition. This exercise will bring the powers of his mind into requisition, in a way that is well calculated to strengthen them. And if he has opportunity for reading, he may, by a diligent perusal of the best authors, acquire both language and taste as well as sentiment;—and these three are the essential qualifications of a good writer.

In regard to the qualities which constitute a good style, we can here offer nothing more than a few brief hints. With respect to words and phrases, particular attention should be paid to three things—purity, propriety, and *precision*; and, with respect to sentences, to three others,—perspicuity, unity, and *strength*. Under each of these six heads, we shall arrange, in the form of short precepts, a few of the most important directions for the forming of a good style.

#### SECTION I.—OF PURITY.

Purity of style consists in the use of such words and phrases only, as belong to the language which we write or speak. Its opposites are the faults aimed at in the following precepts.

PRECEPT I.—Avoid the unnecessary use of foreign words or idioms: such as the French words *fraicheur*, *hauteur*, *delicatesse*, *politesse*, *noblesse*;—the expression, “He *repented himself*;”—or, “It *serves* to an excellent purpose.”

PRECEPT II.—Avoid obsolete or antiquated words, except there be some special reason for their use: that is, such words as *acception*, *addressful*, *administrate*, *affamish*, *affrontiveness*, *belikely*, *blustorous*, *clerigical*, *cruciate*, *rutilate*, *timidous*.

PRECEPT III.—Avoid strange or unauthorized words: such as, *flutteration*, *inspector*, *judgematical*, *incumberment*, *connexity*, *electerized*, *martyrized*, *reunion*, *marvelize*, *limpitude*, *affectated*, *adoremment*, *absquatulate*. Of this sort is O. B. Peirce’s “assimilarity,” used on page 19th of his *English Grammar*; and still worse is Jocelyn’s “irradicable,” for *uneradicable*, used on page 5th of his *Prize Essay on Education*.

PRECEPT IV.—Avoid bombast, or affectation of fine writing. It is ridiculous, however serious the subject. The following is an example: “Personifications, however rich the depictions, and unconstrained their latitude; analogies, however imposing the objects of parallel, and the media of comparison; can never expose the consequences of sin to the extent of fact, or the range of demonstration.”—*Anonymous*.

## SECTION II.—OF PROPRIETY.

Propriety of language consists in the selection and right construction of such words as the best usage has appropriated to those ideas which we intend to express by them. Impropropriety embraces all those forms of error, which, for the purpose of illustration, exercise, and special criticism, have been so methodically and so copiously posted up under the various heads, rules, and notes, of this extensive Grammar. A few suggestions, however, are here to be set down in the form of precepts.

PRECEPT I.—Avoid low and provincial expressions: such as, “Now, *says I*, boys;”—“*Thinks I to myself*;”—“*To get into a scrape*;”—“Stay here *while* I come back;”—“*By jinkers*;”—“*By the living jingoes*.”

PRECEPT II.—In writing prose, avoid words and phrases that are merely poetical: such as, *morn*, *eve*, *plaint*, *corse*, *weal*, *drear*, *amid*, *oft*, *steepy*;—“*what time* the winds arise.”

PRECEPT III.—Avoid technical terms: except where they are necessary in treating of a particular art or science. In technology, they are proper.

PRECEPT IV.—Avoid the recurrence of a word in different senses, or such a repetition of words as denotes paucity of language: as, “His own *reason* might have suggested better *reasons*.”—“Gregory *favoured* the undertaking, for no other reason than this; that the manager, in countenance, *favoured* his friend.”—“I *want* to go and see what he *wants*.”

PRECEPT V.—Supply words that are wanting: thus, instead of saying, “This action increased his former services,” say, “This action increased *the merit of* his former services.”—“How many [kinds of] substantives are there? Two; proper and common.”—See *E. Devis’s Gram.*, p. 14. “These changes should not be left to be settled by chance or by

caprice, but [should be determined] by the judicious application of the principles of Orthography.”—See *Fowlers E. Gram.*, 1850, p. 170.

PRECEPT VI.—Avoid equivocal or ambiguous expressions: as, “His *memory* shall be lost on the earth.”—“I long since learned to like nothing but what you *do*.”

PRECEPT VII.—Avoid unintelligible, inconsistent, or inappropriate expressions: such as, “I have observed that the superiority among these coffee-house politicians proceeds from *an opinion* of gallantry and fashion.”—“These words do not convey even an *opaque* idea of the author’s meaning.”

PRECEPT VIII.—Observe the natural order of things or events, and do not *put the cart before the horse*: as, “The scribes *taught and studied* the Law of Moses.”—“They can neither *return to nor leave* their houses.”—“He tumbled, *head over heels*, into the water.”—“Pat, how did you carry that quarter of beef?’ ‘Why, I thrust *it through a stick*, and threw *my shoulder over it*.”

### SECTION III.—OF PRECISION.

Precision consists in avoiding all superfluous words, and adapting the expression exactly to the thought, so as to say, with no deficiency or surplus of terms, whatever is intended by the author. Its opposites are noticed in the following precepts.

PRECEPT I.—Avoid a useless tautology, either of expression or of sentiment; as, “When will you return *again*?”—“We returned *back* home *again*.”—“On entering *into* the room, I saw *and discovered* he had fallen *down* on the floor and could not *rise* up.”—“They have a *mutual* dislike to each other.”—“Whenever I go, he *always* meets me there.”—“Where is he *at*? *In* there.”—“His faithfulness *and fidelity* should be rewarded.”

PRECEPT II.—Repeat words as often as an exact exhibition of your meaning requires them; for repetition may be elegant, if it be not useless. The following example does not appear faulty: “Moral *precepts* are *precepts* the reasons of which we see; positive *precepts* are *precepts* the reasons of which we do not see.”—*Butler’s Analogy*, p. 165.

PRECEPT III.—Observe the exact meaning of words accounted synonymous, and employ those which are the most suitable; as, “A diligent scholar may *acquire* knowledge, *gain* celebrity, *obtain* rewards, *win* prizes, and *get* high honour, though he *earn* no money.” These six verbs have nearly the same meaning, and yet no two of them can here be correctly interchanged.

PRECEPT IV.—Observe the proper form of each word, and do not confound such as resemble each other. “Professor J. W. Gibbs, of Yale College,” in treating of the “Peculiarities of the Cockney Dialect,” says, “The Londoner sometimes confounds two different forms; as *contagious* for *contiguous*; *eminent* for *imminent*; *humorous* for *humorsome*; *ingeniously* for *ingenuously*; *luxurious* for *luxuriant*; *scrupulosity* for *scruple*; *successfully* for *successively*.”—See *Fowler’s E. Gram.*, p. 87; and Pref., p. vi.

PRECEPT V.—Think clearly, and avoid absurd or incompatible expressions. Example of error: “To pursue *those* remarks, would, *probably*, be of no further *service* to the learner than *that of burdening his memory* with a catalogue of dry and *uninteresting* peculiarities;

*which may gratify curiosity*, without affording information adequate to the trouble of the perusal.”—*Wright’s Gram.*, p. 122.

PRECEPT VI.—Avoid words that are useless; and, especially, a multiplication of them into sentences, members, or clauses, that may well be spared. Example: “If one could *really* be a spectator of what is passing in the world *around us* without taking part in the events, *or sharing in the passions and actual performance on the stage; if we could set ourselves down, as it were, in a private box of the world’s great theatre, and quietly look on at the piece that is playing, no more moved than is absolutely implied by sympathy with our fellow-creatures, what a curious, what an amusing*, what an interesting spectacle would life present.”—G. P. R. JAMES: “The Forger,” commencement of Chap. xxxi. This sentence contains *eighty-seven* words, “of which *sixty-one* are entirely unnecessary to the expression of the author’s idea, if idea it can be called.”—*Holden’s Review*.

#### OBSERVATION.

Verbosity, as well as tautology, is not so directly opposite to precision, as to conciseness, or brevity. From the manner in which lawyers usually multiply terms in order to express their facts *precisely*, it would seem that, with them, precision consists rather in the use of *many* words than of *few*. But the ordinary style of legal instruments no popular writer can imitate without becoming ridiculous. A terse or concise style is very apt to be elliptical: and, in some particular instances, must be so; but, at the same time, the full expression, perhaps, may have more *precision*, though it be less agreeable. For example: “A word of one syllable, is called a monosyllable; a word of two syllables, *is called* a dissyllable: a word of three syllables, *is called* a trisyllable: a word of four or more syllables, *is called* a polysyllable.”—*O. B. Peirce’s Gram.*, p. 19. Better, perhaps, thus: “A word of one syllable is called a *monosyllable*; a word of two syllables, a *dissyllable*; a word of three syllables, a *trissyllable*; and a word of four or more syllables, a *polysyllable*.”—*Brown’s Institutes*, p. 17.

#### SECTION IV.—OF PERSPICUITY.

Perspicuity consists in freedom from obscurity or ambiguity. It is a quality so essential to every kind of writing, that for the want of it no merit of other name can compensate. “Without this, the richest ornaments of style, only glimmer through the dark, and puzzle in stead of pleasing the reader.”—Dr. Blair. Perspicuity, being the most important property of language, and an exemption from the most embarrassing defects, seems even to rise to a degree of positive beauty. We are naturally pleased with a style that frees us from all suspense in regard to the meaning; that carries us through the subject without embarrassment or confusion; and that always flows like a limpid stream, through which we can “see to the very bottom.” Many of the errors which have heretofore been pointed out to the reader, are offences against perspicuity. Only three or four hints will here be added.

PRECEPT I.—Place adjectives, relative pronouns, participles, adverbs, and explanatory phrases near enough to the words to which they relate, and in a position which will make their reference clear. The following sentences are deficient in perspicuity: “Reverence is the veneration paid to superior sanctity, *intermixed* with a certain degree of awe.”—Unknown. “The Romans understood liberty, *at least*, as well as we.”—See *Murray’s Gram.*, p. 307. “Taste was never *made to cater* for vanity.”—*J. Q. Adams’s Rhet.*, Vol. i, p. 119.

PRECEPT II.—In prose, avoid a poetic collocation of words. For example: “Guard your weak side from being known. If it be attacked, the best way is, to join in the attack.”—KAMES: *Art of Thinking*, p. 75. This maxim of prudence might be expressed more poetically, but with some loss of perspicuity, thus: “Your weak side guard from being known. Attacked in this, the assailants join.”

PRECEPT III.—Avoid faulty ellipses, and repeat all words necessary to preserve the sense. The following sentences require the words which are inserted in crotchets: “Restlessness of mind disqualifies us, both for the enjoyment of peace, and [for] the performance of our duty.”—*Murray’s Key*, 8vo, p. 166. “Double Comparatives and [Double] Superlatives should be avoided.”—*Fowler’s E. Gram.*, 1850, p. 489.

PRECEPT IV.—Avoid the pedantic and sense-dimming style of charlatans and new theorists, which often demands either a translation or a tedious study, to make it at all intelligible to the ordinary reader. For example: “RULE XL Part 3. An intransitive or receptive *asserter* in the unlimited mode, depending on a word in the possessive case, may have, after it, a word in the subjective case, denoting the same thing: And, when it acts the part of an assertive name, depending on a relative, it may have after it a word in the subjective case. EXAMPLES:—John’s being my *friend*, saved me from inconvenience. Seth Hamilton was unhappy in being a *slave* to party prejudice.”—*O. B. Peirce’s Gram.*, 1839, p. 201. The meaning of this *third part of a Rule* of syntax, is, in proper English, as follows: “A participle not transitive, with the possessive case before it, may have after it a nominative denoting the same thing; and also, when a preposition governs the participle, a nominative may follow, in agreement with one which precedes.” In doctrine, the former clause of the sentence is erroneous: it serves only to propagate false syntax by rule. See the former example, and a note of mine, referring to it, on page 531 of this work.

#### SECTION V.—OF UNITY.

Unity consists in avoiding needless pauses, and keeping one object predominant throughout a sentence or paragraph. Every sentence, whether its parts be few or many, requires strict unity. The chief faults, opposite to this quality of style, are suggested in the following precepts.

PRECEPT I.—Avoid brokenness, hitching, or the unnecessary separation of parts that naturally come together. Examples: “I was, soon after my arrival, taken out of my Indian habit.”—*Addison, Tattler*, No. 249. Better: “Soon after my arrival, *I* was taken out of my Indian habit.”—*Churchill’s Gram.*, p. 326. “Who can, either in opposition, or in the ministry, act alone?”—*Ib.* Better: “Who can act alone, either in opposition, or in the ministry?”—*Ib.* “I, like others, have, in my youth, trifled with my health, and old age now prematurely assails me.”—*Ib.*, p. 327. Better: “Like others, I have trifled with my health, and old age now prematurely assails me.”

PRECEPT II.—Treat different topics in separate paragraphs, and distinct sentiments in separate sentences. Error: “The two volumes are, indeed, intimately *connected*, *and constitute* one uniform system of English Grammar.”—*Murray’s Preface*, p. iv. Better thus: “The two volumes are, indeed, intimately connected. *They* constitute one uniform system of English *grammar*.”

PRECEPT III.—In the progress of a sentence, do not desert the principal subjects in favour of adjuncts, or change the scene unnecessarily. Example: “After we came to anchor, they put me on shore, where I was welcomed by all my friends, who received me with the greatest kindness, which was not then expected.” Better: “The vessel having come to anchor, I was put on shore; where I was unexpectedly welcomed by all my friends, and received with the greatest kindness.”—See *Blair’s Rhet.*, p. 107.

PRECEPT IV.—Do not introduce parentheses, except when a lively remark may be thrown in without diverting the mind too long from the principal subject. Example: “But (saith he) since I take upon me to teach the whole world, (it is strange, it should be so natural for this man to write untruths, since I direct my *Theses* only to the Christian world; but if it may render me odious, such *Peccadillo’s* pass with him, it seems, but for *Piæ Fraudes*;) I intended never to write of those things, concerning which we do not differ from others.”—*R. Barclay’s Works*, Vol. iii. p. 279. The parts of this sentence are so put together, that, as a whole, it is scarcely intelligible.

#### SECTION VI.—OF STRENGTH.

Strength consists in giving to the several words and members of a sentence, such an arrangement as shall bring out the sense to the best advantage, and present every idea in its due importance. Perhaps it is essential to this quality of style, that there be animation, spirit, and *vigour of thought*, in all that is uttered. A few hints concerning the Strength of sentences, will here be given in the form of precepts.

PRECEPT I.—Avoid verbosity; a concise style is the most favourable to strength. Examples: “No human happiness is so pure as not to contain *any* alloy.”—*Murray’s Key*, 8vo, p. 270. Better: “No human happiness is *unalloyed*.” “He was so much skilled in the exercise of the oar, that few could equal him.”—*Ib.*, p. 271. Better: “He was so *skillful at* the oar, that few could *match* him.” Or thus: “At the oar, he was *rarely equalled*.” “The reason why they [the pronouns] are considered separately is, because there is something particular in their inflections.”—*Priestley’s Gram.*, p. 81. Better: “The pronouns are considered separately, because there is something peculiar in their inflections.”

PRECEPT II.—Place the most important words in the situation in which they will make the strongest impression. Inversion of terms sometimes increases the strength and vivacity of an expression: as, “All these things will I give thee, if thou wilt fall down and worship me.”—*Matt.*, iv, 9. “Righteous art thou, O Lord, and upright are thy judgements.”—*Psalms*, cxix, 137. “Precious in the sight of the Lord is the death of his saints.”—*Ps.*, cxvi, 15.

PRECEPT III.—Have regard also to the relative position of clauses, or members; for a weaker assertion should not follow a stronger; and, when the sentence consists of two members, the longer should be the concluding one. Example: “We flatter ourselves with the belief that we have forsaken our passions, when they have forsaken us.” Better: “When our passions have forsaken us, we flatter ourselves with the belief that we have forsaken them.”—See *Blair’s Rhet.*, p. 117; *Murray’s Gram.*, p. 323.

PRECEPT IV.—When things are to be compared or contrasted, their resemblance or opposition will be rendered more striking, if a pretty near resemblance in the language and construction of the two members, be preserved. Example: “The wise man is happy,

when he gains his own approbation; the fool, when he recommends himself to the applause of those about him.” Better: “The wise man is happy, when he gains his own approbation; the fool, when he gains the applause of others.”—See *Murray’s Gram.*, p. 324.

PRECEPT V.—Remember that it is, in general, ungraceful to end a sentence with an adverb, a preposition, or any inconsiderable word or phrase, which may either be omitted or be introduced earlier. “For instance, it is a great deal better to say, ‘Avarice is a crime of which wise men are often guilty,’ than to say, ‘Avarice is a crime which wise men are often guilty of.’”—*Blair’s Rhet.*, p. 117; *Murray’s Gram.*, p. 323.

## APPENDIX IV.

### TO PART FOURTH, OR PROSODY. OF POETIC DICTION.

Poetry, as defined by Dr. Blair, “is the language of passion, or of enlivened imagination, formed, most commonly, into regular numbers.”—*Rhet.*, p. 377. The style of poetry differs, in many respects, from that which is commonly adopted in prose. Poetic diction abounds in bold figures of speech, and unusual collocations of words. A great part of the figures, which have been treated of in one of the chapters of Prosody, are purely poetical. The primary aim of a poet, is, to please and to move; and, therefore, it is to the imagination, and the passions, that he speaks. He may also, and he should, have it in his view, to instruct and to reform; but it is indirectly, and by pleasing and moving, that such a writer accomplishes this end. The exterior and most obvious distinction of poetry, is versification: yet there are some forms of verse so loose and familiar, as to be hardly distinguishable from prose; and there is also a species of prose, so measured in its cadences, and so much raised in its tone, as to approach very nearly to poetic numbers.

This double approximation of some poetry to prose, and of some prose to poetry, not only makes it a matter of acknowledged difficulty to distinguish, by satisfactory definitions, the two species of composition, but, in many instances, embarrasses with like difficulty the attempt to show, by statements and examples, what usages or licenses, found in English works, are proper to be regarded as peculiarities of poetic diction. It is purposed here, to enumerate sundry deviations from the common style of prose; and perhaps all of them, or nearly all, may be justly considered as pertaining only to poetry.

#### POETICAL PECULIARITIES.

The following are among the chief peculiarities in which the poets indulge, and are indulged:—

- I. They not unfrequently omit the ARTICLES, for the sake of brevity or metre; as,  
     “What dreadful pleasure! there to stand sublime,  
     Like *shipwreck’d mariner* on *desert* coast!”—*Beattie’s Minstrel*, p. 12.  
     “*Sky lour’d*, and, muttering thunder, some sad drops  
     Wept at *completing* of the mortal sin.”—*Milton, P. L.*, B. ix, l. 1002.

- II. They sometimes abbreviate common NOUNS, after a manner of their own: as, *amaze*, for *amazement*; *acclaim*, for *acclamation*; *consult*, for *consultation*; *corse*, for *corpse*; *eve* or *even*, for *evening*; *fount*, for *fountain*; *helm*, for *helmet*; *lament*, for *lamentation*; *morn*, for *morning*; *plaint*, for *complaint*; *targe*, for *target*; *weal*, for *wealth*.

- III. By *enallage*, they use verbal forms substantively, or put verbs for nouns; perhaps for brevity, as above: thus,

1. “Instant, without *disturb*, they took alarm.”—*P. Lost: Joh. Dict.*, w. *Aware*.
2. “The gracious Judge, without *revile* reply’d.”—*P. Lost*, B. x, l. 118.
3. “If they were known, as the *suspect* is great.”—*Shakspeare*.
4. “Mark, and perform it: seest thou? for the *fail*  
     Of any point in’t shall be death.”—*Shakspeare*.

- IV. They employ several nouns that are not used in prose, or are used but rarely; as, *benison*, *boon*, *emprise*, *fane*, *guerdon*, *guise*, *ire*, *ken*, *lore*, *meed*, *sire*, *steed*, *welkin*, *yore*.

V. They introduce the noun *self* after an other noun of the possessive case; as,

1. "Affliction's semblance bends not o'er thy tomb,  
Affliction's *self* deplores thy youthful doom."—*Byron*.
2. "Thoughtless of beauty, she was beauty's *self*."—*Thomson*.

VI. They place before the verb nouns, or other words, that usually come after it; and, after it, those that usually come before it: as,

1. "No jealousy *their dawn of love* o'ercast,  
Nor *blasted* were *their wedded days* with strife."—*Beattie*.
2. "No *hive* hast *thou* of hoarded sweets."—*W. Allen's Gram.*
3. "Thy chain *a wretched weight* shall prove."—*Langhorne*.
4. "Follows the loosen'd aggravated *roar*."—*Thomson*.
5. "That *purple* grows *the primrose pale*."—*Langhorne*.

VII. They more frequently place ADJECTIVES after their nouns, than do prose writers; as,

1. "Or where the gorgeous East, with richest hand,  
Show'rs on her kings *barbaric*, pearl and gold."—*Milton, P. L.*, B. ii, l. 2.
2. "Come, nymph *demure*, with mantle *blue*."—*W. Allen's Gram.*, p. 189.
3. "This truth *sublime* his simple sire had taught."—*Beattie's Minstrel*, p. 14.

VIII. They ascribe qualities to things to which they do not literally belong; as,

1. "The ploughman homeward plods his *weary way*."—*Gray's Elegy*, l. 3.
2. "Or *drowsy tinklings* lull the distant folds."—*Ibidem*, l. 8.
3. "Imbitter'd more and more from *peevish day* to day."—*Thomson*.
4. "All thin and naked, to the *numb* cold *night*."—*Shakspeare*.

IX. They use concrete terms to express abstract qualities; (i. e., adjectives for nouns;) as,

1. "Earth's meanest son, all trembling, prostrate falls,  
And on the *boundless* of thy goodness calls."—*Young*.
2. "Meanwhile, whate'er of *beautiful* or *new*,  
*Sublime* or *dreadful*, in earth, sea, or sky,  
By chance or search, was offer'd to his view,  
He scann'd with curious and romantic eye."—*Beattie*.
3. "Won from the void and formless *infinite*."—*Milton*.
4. "To thy large heart give utterance due; thy heart  
Contains of *good*, *wise*, *just*, the perfect shape."—*Id.*, P. R., B. iii, l. 10.

X. They often substitute quality for manner; (i. e., adjectives for adverbs;) as,

1. —"The stately-sailing swan  
Gives out his snowy plumage to the gale,  
And, arching *proud* his neck, with oary feet,  
Bears forward *fierce*, and guards his osier isle."—*Thomson*.
2. "Thither *continual* pilgrims crowded still."—*Id.*, Cos. of Ind., i, 8.
3. "Level at beauty, and at wit;  
The fairest mark is *easiest* hit."—*Butler's Hudibras*.

XI. They form new compound epithets, oftener than do prose writers; as,

1. "In *world-rejoicing* state, it moves sublime."—*Thomson*.
2. "The *dewy-skirted* clouds imbibe the sun."—*Idem*.
3. "By brooks and groves in *hollow-whispering* gales."—*Idem*.
4. "The violet of *sky-woven* vest."—Langhorne.
5. "A league from Epidamnum had we sail'd,  
Before the *always-wind-obeying* deep  
Gave any tragic instance of our harm."—*Shakspeare*.
6. "*Blue-eyed, strange-voiced, sharp-beaked, ill-omened* fowl,  
What art thou?' 'What I ought to be, an owl.'"—*Day's Punctuation*, p. 139.

XII. They connect the comparative degree to the positive, before a verb; as,

1. "*Near and more* near the billows rise."—*Merrick*.
2. "*Wide and wider* spreads the vale."—*Dyer's Grongar Hill*.
3. "*Wide and more wide*, the overflowings of the mind  
Take every creature in, of every kind."—*Pope*.
4. "*Thick and more thick* the black blockade extends,  
A hundred head of Aristotle's friends."—*Id.*, *Dunciad*.

XIII. They form many adjectives in *y*, which are not common in prose; as, The *dimply* flood,—dusky veil,—a *gleamy* ray,—heapy harvests,—moony shield,—paly circlet,—sheety lake,—stilly lake,—spiry temples,—steely casque,—steepy hill,—towery height,—vasty deep,—writhy snake.

XIV. They employ adjectives of an abbreviated form: as, *dread*, for *dreadful*; *drear*, for *dreary*; *ebon*, for *ebony*; *hoar*, for *hoary*; *lone*, for *lonely*; *scant*, for *scanty*; *slope*, for *sloping*; *submiss*, for *submissive*; *vermil*, for *vermilion*; *yon*, for *yonder*.

XV. They employ several adjectives that are not used in prose, or are used but seldom; as, *azure*, *blithe*, *boon*, *dank*, *darkling*, *darksome*, *doughty*, *dun*, *fell*, *rife*, *rapt*, *rueful*, *sear*, *sylvan*, *twain*, *wan*.

XVI. They employ the personal PRONOUNS, and introduce their nouns afterwards; as,

1. "It curl'd not Tweed alone, that *breeze*."—*Sir W. Scott*.
2. "What may *it* be, the heavy *sound*  
That moans old Branksome's turrets round?"—*Idem*, Lay, p. 21.
3. "Is it the lightning's quivering glance,  
That on the thicket streams;  
Or do *they* flash on spear and lance,  
The sun's retiring *beams*"—*Idem*, L. of L., vi, 15.

XVII. They use the forms of the second person singular oftener than do others; as,

1. "Yet I had rather, if I were to chuse,  
*Thy* service in some graver subject use,  
Such as may make *thee* search thy coffers round,  
Before *thou clothe* my fancy in fit sound."—*Milton's Works*, p. 133.
2. "But *thou*, of temples old, or altars new,  
*Standest* alone—with nothing like to thee."—*Byron*, Pilg., iv, 154.
3. "Thou seest not all; but piecemeal thou must break,  
To separate contemplation, the great whole."—*Id.*, *ib.*, iv, 157.
4. "Thou rightly deemst, fair youth, began the bard;

The form then sawst was Virtue ever fair.”—*Pollok, C. of T.*, p. 16.

XVIII. They sometimes omit relatives that are nominatives; (see Obs. 22, at p. 555;) as,  
“For is there aught in sleep can charm the wise?”—*Thomson*.

XIX. They omit the antecedent, or introduce it after the relative; as,

1. “*Who* never fasts, no banquet e’er enjoys,  
*Who* never toils or watches, never sleeps.”—*Armstrong*.
2. “*Who* dares think one thing and an other tell,  
My soul detests *him* as the gates of hell.”—*Pope’s Homer*.

XX. They remove relatives, or other connectives, into the body of their clauses; as,

1. “Parts the fine locks, her graceful head *that* deck.”—*Darwin*.
2. “Not half so dreadful rises to the sight  
Orion’s dog, the year *when* autumn weighs.”—*Pope, Iliad*, B. xxii, l. 37.

XXI. They make intransitive VERBS transitive, changing their class; as,

- 1.—“A while he stands,  
*Gazing* the inverted landscape, half afraid  
To *meditate* the blue profound below.”—*Thomson*.
2. “Still in harmonious intercourse, they *liv’d*  
The rural day, and *talk’d* the flowing heart.”—*Idem*.
- 3.—“I saw and heard, for we sometimes  
Who *dwell* this wild, constrain’d by want, come forth.”—*Milton*, P. R., B. i, l. 330.

XXII. They make transitive verbs intransitive, giving them no regimen; as,

1. “The soldiers should have *toss’d* me on their pikes,  
Before I would have *granted* to that act.”—*Shakspeare*.
2. “This minstrel-god, well-pleased, amid the quire  
Stood proud to *hymn*, and tune his youthful lyre.”—*Pope*.

XXIII. They give to the imperative mood the first and the third person; as,

1. “*Turn we* a moment fancy’s rapid flight.”—*Thomson*.
2. “*Be* man’s peculiar *work* his sole delight.”—*Beattie*.
3. “And what is reason? Be *she* thus *defin’d*:  
Reason is upright stature in the soul.”—*Young*.

XXIV. They employ *can*, *could*, and *would*, as principal verbs transitive; as,

1. “*What* for ourselves we *can*, is always ours.”—*Anon*.
2. “Who does the best his circumstance allows,  
Does well, acts nobly; angels *could* no *more*.”—*Young*.
3. “What *would* this man? Now upward will he soar,  
And, little less than angel, would be more.”—*Pope*.

XXV. They place the infinitive before the word on which it depends; as,

1. “When first thy sire *to send* on earth  
Virtue, his darling child, *design’d*”—*Gray*.
2. “As oft as I, *to kiss* the flood, *decline*;  
So oft his lips ascend, to close with mine.”—*Sandys*.

3. "Besides, Minerva, *to secure* her care,  
*Diffus'd* around a veil of thicken'd air."—*Pope*.

XXVI. They place the auxiliary verb after its principal, by hyperbaton; as,

1. "No longer *heed* the sunbeam bright  
That plays on Carron's breast he *can*"—Langhorne.
2. "*Follow* I *must*, I cannot go before."—*Beauties of Shakspeare*, p. 147.
3. "The man who suffers, loudly may complain;  
And *rage* he *may*, but he shall rage in vain."—*Pope*.

XXVII. Before verbs, they sometimes arbitrarily employ or omit prefixes: *as*, *bide*, or *abide*; *dim*, or *bedim*; *gird*, or *begird*; *lure*, or *allure*; *move*, or *emove*; *reave*, or *bereave*; *vails*, or *avails*; *vanish*, or *evanish*; *wail*, or *bewail*; *weep*, or *beweep*; *wilder*, or *bewilder*.—

1. "All knees to thee shall bow, of them that *bide*  
In heav'n, or earth, or under earth in hell."—*Milton*, *P. L.*, B. iii, l. 321.
2. "Of a horse, *ware* the heels; of a bull-dog, the jaws;  
Of a bear, the embrace; of a lion, the paws."—*Churchills Gram.*, p. 215.

XXVIII. Some few verbs they abbreviate: as *list*, for *listen*; *ope*, for *open*; *hark*, for *hearken*; *dark*, for *darken*; *threat*, for *threaten*; *sharp*, for *sharpen*.

XXIX. They employ several verbs that are not used in prose, or are used but rarely; as, *appal*, *astound*, *brook*, *cower*, *doff*, *ken*, *wend*, *ween*, *trou*.

XXX. They sometimes imitate a Greek construction of the infinitive; as,

1. "Who would not sing for Lycidas? he knew  
Himself *to sing*, and *build* the lofty rhyme."—*Milton*.
2. "For not, *to have been dipp'd* in Lethè lake,  
Could save the son of Thetis *from to die*."—Spenser.

XXXI. They employ the PARTICIPLES more frequently than prose writers, and in a construction somewhat peculiar; often intensive by accumulation: as,

1. "He came, and, standing in the midst, explain'd  
The peace *rejected*, but the truce *obtain'd*."—*Pope*.
2. "As a poor miserable captive thrall  
Comes to the place where he before had sat  
Among the prime in splendor, now *depos'd*,  
*Ejected*, *emptied*, *gaz'd*, *unpitied*, *shunn'd*,  
A spectacle of ruin or of scorn."—*Milton*, *P. R.*, B. i, l. 411.
3. "Though from our birth the faculty divine  
Is *chain'd* and *tortured*—*cabin'd*, *cribb'd*, *confined*."—*Byron*, *Pilg.*, C. iv, St. 127.

XXXII. In turning participles to adjectives, they sometimes ascribe actions, or active properties, to things to which they do not literally belong; as,

"The green leaf quivering in the gale,  
The *warbling hill*, the *lowing vale*."—MALLET: *Union Poems*, p. 26.

XXXIII. They employ several ADVERBS that are not used in prose, or are used but seldom; as, *oft*, *haply*, *inly*, *blithely*, *cheerily*, *deftly*, *felly*, *rifely*, *starkly*.

XXXIV. They give to adverbs a peculiar location in respect to other words; as,

1. "Peeping from *forth* their alleys green."—*Collins*.
2. "Erect the standard *there* of ancient Night"—*Milton*.
3. "The silence *often* of pure innocence  
Persuades, when speaking fails."—*Shakspeare*.
4. "Where Universal Love *not* smiles around."—*Thomson*.
5. "Robs me of that which *not* enriches him."—*Shakspeare*.

XXXV. They sometimes omit the introductory adverb *there*: as,

"*Was* nought around but images of rest."—*Thomson*.

XXXVI. They briefly compare actions by a kind of compound adverbs, ending in *like*; as,

"Who bid the stork, *Columbus-like*, explore  
Heavens not his own, and worlds unknown before?"—*Pope*.

XXXVII. They employ the CONJUNCTIONS, *or—or*, and *nor—nor*, as correspondents; as,

1. "*Or* by the lazy Scheldt or wandering Po."—*Goldsmith*.
2. "Wealth heap'd on wealth, nor truth, nor safety buys."—*Johnson*.
3. "Who by repentance is not satisfied,  
Is nor of heaven, nor earth; for these are pleas'd."—*Shakspeare*.
4. "Toss it, or to the fowls, or to the flames."—*Young, N. T.*, p. 157.
5. "*Nor* shall the pow'rs of hell, nor wastes of time,  
Or vanquish, or destroy."—*Gibbon's Elegy on Davies*.

XXXVIII. They oftener place PREPOSITIONS and their adjuncts, before the words on which they depend, than do prose writers; as,

"*Against* your fame *with* fondness hate *combines*;  
The rival batters, and the lover mines."—*Dr. Johnson*.

XXXIX. They sometimes place a long or dissyllabic preposition after its object; as,

1. "When beauty, *Eden's* bowers within,  
First stretched the arm to deeds of sin,  
When passion burn'd and prudence slept,  
The pitying angels bent and wept."—*James Hogg*.
2. "The Muses fair, these peaceful shades among,  
With skillful fingers sweep the trembling strings."—*Lloyd*.
3. "Where Echo walks steep *hills among*,  
List'ning to the shepherd's song."—*J. Warton, U. Poems*, p. 33.

XL. They have occasionally employed certain prepositions for which, perhaps, it would not be easy to cite prosaic authority; as, *adown*, *aloft*, *aloof*, *anear*, *aneath*, *askant*, *aslant*, *aslope*, *atween*, *atwixt*, *besouth*, *traverse*, *thorough*, *sans*. (See Obs. 10th, and others, at p. 441.)

XLI. They oftener employ INTERJECTIONS than do prose writers; as,

“O let me gaze!—Of gazing there’s no end.

O let me think!—Thought too is wilder’d here.”—*Young*.

XLII. They oftener employ ANTIQUATED WORDS and modes of expression; as,

1. “*Withouten* that, would come *an* heavier bale.”—*Thomson*.

2. “He was, *to weet*, a little roguish page,  
*Save* sleep and play, who minded nought at all.”—*Id*.

3. “Not one *eftsoons* in view was to be found.”—*Id*.

4. “To number up the thousands dwelling here,  
*An* useless were, and eke *an* endless task.”—*Id*.

5. “Of clerks good plenty here you *mote espy*.”—*Id*.

6. “But these I *passen* by with nameless numbers moe.”—*Id*.

THE END OF APPENDIX FOURTH

## INDEX TO THE GRAMMAR OF ENGLISH GRAMMARS.

\* *In the following Index, the page of the Grammar is directly referred to: Obs. or N. before a numeral, stands for Observation or Observations, or for Note or Notes of the text: R. after a reference, stands for RULE. The small letter n., with an asterisk or other mark affixed to it, relates to a footnote with such mark in the Grammar. Occasionally, t., m., or b., or u., or l., accompanies a reference, to indicate the top, middle, or bottom, or the upper or the lower half, of the page referred to. Few abbreviations are employed beyond those of the ordinary grammatical terms. The Index is not intended to supersede the use of the Table of Contents, which stands after the Preface. It is occupied wholly with the matter of the Grammar proper; hence there are in it no references to the Introduction Historical and Critical, which precedes the didactic portion of the work. In the Table before-mentioned must be sought the general division of English grammar, and matters pertaining to praxis, to examination, and to the writing of exercises.*
